TheSecret of the Strikes

Most Canadians are asking "What is the cause of the 'Great Unrest' "? Is it the fault of labor—or of capital?—or is it the result of German propaganda? Do you know of the real reason for the labor disturbances in Canada, and elsewhere? Are YOU thoroughly familiar with the ins-and-outs of the plans which threaten a world-wide "tie-up?" This is something that should be understood by every Canadian. And every Canadian should read "The Secret of the Strikes," by Lieut.-Colonel J. B. Maclean in the August issue of MacLean's Magazine. It is brimful of startling and authoritative information regarding this great problem. Read it carefully. It starts on page 33, August MacLean's.

"The Lecturer At Large"

Stephen Leacock is one of the continent's greatest humorists. "The Lecturer at Large" is one of the best humorous sketches that he has written. It is made up of what he terms "a few painful reminiscences of the platform" in the course of his lecturing up and down Canada. Get your family around you and read the sketch aloud—it's a rare treat.

Other Big Features

"A Party in the Making." By J. K. Munro. Illustrated by William Casey. An article on the political situation, giving a great deal of inside information with reference to recent developments at Ottawa.

"Solving the Problem of the Arctic." By Vilhjalmur Stefansson. The fifth instalment of his story of the five years' explorations that he conducted for the Dominion of Canada.

"The Unspoiled Country." By Harold C. Lowrey. A descriptive article of a part of Canada which is little known to Canadians generally, Temagami.

"Petite Simunde." By Arthur Beverley Baxter. Illustrated by E. J. Dinsmore. A charming romance of the war. The author will be remembered favorably for his "Mr. Craighouse of New York, Satirist."

"The Seven Blue Doves." By W. A. Fraser. Illustrated by Charles L. Wrenn. The fifth of the Bulldog Carney series and in some respects the best. It is a mystery story.

"His Majesty's Well-Beloved." By Baroness Orczy. Illustrated by C. F. Peters. The second instalment of this splendid romantic novel of the colorful era of Charles II.

The Month's Vital Question

Winning the Woman's Hardware Trade

An Eastern Retailer Values This Trade Very Highly—Pays to Do Little Favors—One Big Seller is Aluminum—Trade Active During War Period.

WINSOMENESS may not enter into business as a dominating or even a necessary factor, but since the securing of a woman's trade, and the maintenance of it, once it is secured, is of compelling interest to the retailer of the twentieth century, it is worthy of note that The Chinic Hardware, of Quebec City, has made itself strong with the women of this fine old city. It is a trade to be appreciated, for women are without question coming to be large hardware buyers. It is the modern woman who dictates much of the buying,—very frequently the bulk of it.

And so, when a representative of HARDWARE AND METAL called at this store recently, it was right to the point to learn from the manager of the Chinic store, J. A. LaChance, that, among the store's patrons, the feminine customers were many and their trade bulked large in the annual turnover recorded. Generally speaking, the women's trade is a profitable one.

50 Per Cent. Women

In developing his remarks upon the extent of the trade secured from the women of Quebec, Mr. La Chance said;—"We give very careful attention to this class of trade, and our sales are made largely to women. Probably 50 per cent. of our customers are women folk."

Asked as to the character of the goods which women generally bought, Mr. La Chance said that these were of great variety. "They even will ask us for articles that no hardware store would ever carry. They seem to feel that the hardware store carries everything and there is no end to what a woman will ask for."

And this is just the idea that the store has held on to. They do not turn the women away, but cater to their wishes and if the particular goods asked for are not in stock, they are secured. The plan is one of service and by doing this woman a favor, she appreciates it and returns to the store time and time again. It has been a big feature indeed.

50 Per Cent. Increase

Recently a demonstration of aluminum ware was made by a representative sent out by the manufacturer. She represented a well-known maker of this ware, and a very desirable fact was that she spoke both French and English fluently. This was a great idea, and the demonstration was a big success, contributing in large measure to the general development of housefurnishing selling. For, in addition to knowing very perfectly how to demonstrate the ware, there was no customer to whom she was not able to address herself in a perfectly acceptable manner.

In point of sales, aluminum cooking utensils have been disposed of in increasingly large quantities since the war

Featuring one line of goods is sometimes considered of distinct value, and this photograph illustrates a display made by the Chinic Hardware Co. of Quebec City of aluminum ware. Catering to the ladies is considered good business by this progressive firm. Read their views on this subject in the accompanying article.

began. One reason for this, Mr. La Chance said, was owing to the difficulty, from time to time, of procuring a sufficient stock of high-grade enamelled ware. There was also a growing demand for the light and attractive ware that had lightness, cleanliness and practicability in its make-up. This line, it was estimated, has shown an increase in sales of 50%.

Mr. La Chance pointed out that he was particularly careful to have good salesmen. They must speak both languages, and be very well qualified to take care of the customer, and supply every want. An unfailing, courteous service was essential from each of them. "If we put on a new man, very often we have to train him over again," he stated. For he had to be a discriminating salesman.

Other Big Sellers

Mixed paint and specialties have been large sellers, and there is always a chance to interest the women in the special enamels, varnishes, etc., that are required around the house. This means the sale of brushes too, and of a score of special items from the paint stock. In this connection, Mr. La Chance stated that he considered it good policy to carry a big variety. Their experience had demonstrated this, with regard to paints, in particular.

Quebec believes in play. Witness this fact in the sale each year by the Chinic store of from 300 to 350 tennis rackets. These are of high-grade makes and there is an excellent margin of profit on these goods. And the tennis balls that are called for run into hundreds. In fact, it has not been an easy matter to secure all of these that were needed during some of the war years.

Cutlery, in spite of high price, continued to sell well right along.

Strong With Contractors

If there is one line of goods carried here, that shows completeness, it is that of shelf and builders' hardware. The latter line is particularly in evidence as a stock to be proud of. The variety is an unusually large one, and Mr. LaChance stated that this was quite justified.

There has been a big demand for English designs in door sets. These are carried in the expensive unit sets, and there has been no hesitancy in buying these at even the advanced prices attained since materials started on the upward move. "Even though prices are high," said Mr. La Chance," people will buy the best sets."

A large trade is done direct with the contractors, and as Quebec has been erecting many churches, schools, etc., there was little complaint of this department showing a big decline in the matter of sales. In fact the business in builders' hardware has kept up well, and is now expected to be even better, during reconstruction.

Gas logs and fireplace fixtures are big sellers when there is any house building, but this has been somewhat restricted for a while past.

Displays Advertising

The store has a fine pair of display windows. These are usefully employed to indicate what a fine stock is carried. They are frequently dressed. Early in April builders' hardware was being featured, the idea being to make these displays timely or even a little ahead of actual time of need. The various lines carried are tastefully arranged in the windows, and there is a splendid, whole-

Continued on page 42

An imposing display of enamelware m ade by the Chinic Hardware Co., Quebec City, at their branch store. This firm makes a specialty of catering to the women's trade, and house furnishings of all kinds are among their biggest sellers.

Evidences are not lacking of the demand being made upon builders' hardware supplies, and dealers are keen in catering to this trade which was so curtailed during the war period. The accompanying photo shows a window display of these goods made by the Chinic Hardware Co. of Quebec City.

Works a Winning Combination

Hardware, Plumbing and Electrical Fixtures Bring Steady Business and Good Profits to Davison & McInnis of Woodstock, Ont., the Year Round—Splendid Results Obtained From Window Displays and Advertising

Based on an interview by C. E. PARSONS, of Hardware and Metal, with G. A. Davison and A. L. McInnis, of Davison & McInnis, of Woodstock, Ont.

"WE were forced into the business. People came in asking for things and we had to get the stock. Now we have got more business at times than we can handle."

This was the statement made by A. L. McInnis of Davison and McInnis, hardware and plumbing, Woodstock, Ont., to HARDWARE AND METAL in reference to the firm's trade in electrical fixtures and supplies.

"Business has been better than ever," he said, "since we are allowed to do wiring again. We soon found when we went into the electrical business that we had to carry the stock in order to get the results we wanted and make money. Our constant aim in all our business is to stock good goods and back them up by good service."

Are Kept Busy

Within a radius of ten miles around Woodstock are a number of milk factories. From these as well as from the homes of the prosperous farmers all over that section Davison and McInnis get a lot of work. "We keep six men going ten hours a day the year round," said Mr. McInnis. "We never have any slack time. Last fall things got so busy that for six weeks we closed our order book and refused to take on any more work."

The firm has two good-sized display windows and these are devoted to showing seasonable hardware lines. They are changed each week.

Have Got Results

"I cannot speak too highly of the results we get from our window displays," said Mr. McInnis. "A single instance that occurred recently is typical. We had planned a special sale to clean out some of our stock of enamelware and fixed up a window display and put in cards announcing the special. We intended to advertise it, but we never got a chance. The stuff was no sooner in the window than it commenced to move and we cleaned out every piece in a short time. As far as our advertising is concerned, however, we do quite a lot and have always had splendid results. We find it a very effective way to reach the buying public not only in the city, but in the homes all through the countryside.

Keep Them Displayed

Davison and McInnis keep their store and their windows in spotless condition. The electrical fixtures are placed right up in the front of the store and on one side just behind the show window is a display of globes and other supplies. On the same side and right near the front stands a handsome silent salesman filled with electric flashlights. Mr. McInnis says it has sold a lot of goods and that his sales in this line are growing steadily. The left side of the store at the front is devoted to a display of enamelware which makes a fine showing on specially arranged shelves.

Keep Them Displayed

Out on the floor seasonable lines are kept on display, including such goods as electric stoves, electric washers, etc.

"We have been handling electric ranges for two years," said Mr. McInnis, "and in that time we have sold seventeen. This business grows automatically once it gets started. One satisfied customer sends another. We find that this business is developing itelf nicely and prospects are good for a steady trade."

Interior view of the Davison & McInnis store at Woodstock, Ont. This firm believes in getting goods out where the people can see them, as they find this a material aid in getting "turnover," the goal of good merchandizing. A neat arrangement of harvest tools is shown at the left.

The firm some time ago commenced the repair of electrical goods of all kinds and its business in this department has grown to such an extent that now one man is kept doing nothing else.

Out on the Floor

It has been found that handling one line of goods helps the sale of another. For instance perhaps a man who is building a new house comes in to see about the plumbing and select the bathroom equipment, the heating and other equipment. While he is in the store he can see a fine display of electrical fixtures and every effort is made to interest him in this line, not only for the lighting for the bathroom, but for the whole house. If his wife is along there are electric irons, electric washers and other lines in which she is interested and many sales are made in this way.

Sell Many Ranges

Gas ranges are a big seller with Davison and McInnis.

"We have sold over 200 in two years," said Mr. McInnis.

He stated that in the farm homes around Woodstock there is a noticeable tendency towards improvement and that the farmers are good buyers and want the best and are willing to pay for it.

In connection with the plumbing end of the business the firm works along the line of replacing parts that are giving trouble, with new goods instead of trying to repair the old.

"We have found," said Mr. McInnis, "that in most cases it is bad business to try and fix up something that is not worth fixing. It only gives trouble again, perhaps the next day and then the owner is dissatisfied. I generally advise owners to put in a new part and find that they are very willing to do this when it is explained to them why it should be done and that better results will be obtained."

Should Be Remedied

Mr. McInnis brought up a point in connection with the manufacturers that is causing a good deal of discussion among various firms.

"If a manufacturer sells us an article that is supposed to be tested and guaranteed and it proves defective," he said, "why should we have to stand the expense? Take thirty gallon range boilers for instance, I have taken out more than twenty. All were supposed to have been thoroughly tested. Each defective boiler costs me over $3 to change. I think that there ought to be some protection for the dealer and that the trade ought to take this matter up. The question of the range boilers, for instance, might be taken up at the Dominion convention in Montreal in June and some action taken to protect firms like ourselves."

In Close Touch

In both the hardware, plumbing and electrical business the firm keeps in very close touch with the contractors. In this way contracts are very often obtained which practically cover a house or new factory in all lines which Davison and McInnis are prepared to figure on. By getting large orders of this kind for builders' hardware, electrical fixtures, paints, plumbing and heating and other goods they reduce their selling costs to a minimum and increase their profits automatically. This is one of the advantages to be derived from carrying on a general business of this kind as all the profits on each line are secured by the one firm. As far as Davison and McInnis are concerned they are very, very well satisfied with the merchandising end of their business and with the results that have been obtained from the combination of hardware, plumbing and electrical goods.

The store front of the Davison & McInnis store in Woodstock, Ont. Good use is made of the windows, and a very good showing of electrical fixtures is seen suspended from the ceiling of the window to the left.

WINNING THE WOMAN'S TRADE

Continued from page 40

some arrangement within the store, the big impression being that of completeness of stock, with an unusually large variety in many lines.

The daily papers are used by the firm, and it is usually their plan to feature one line at a time in these advertisements. If builders' hardware is being featured, the space is devoted to this alone; if kitchenware or refrigerators, then the space is given to the advantages possessed by these.

HOW TO LOCATE EXPORT TRADE FOR CANADA

(Continued from page 43.)

trade, industry, and commerce of their area that may come under their notice.

The Trade Commissioners are also directed to furnish information in regard to tariffs, subsidies, bounties, contracts, open, or likely to be open, for tender, the opening of new industries, the extension of public works, financial and trade conditions, and other matters of commercial interest, whilst they are to report, as occasion required, on the nature and extent of foreign competition in local markets so far as it affects British trade. An important part of the work of the Trade Commissioners is to compile and furnish periodically the names of principal importers and buyers of British goods in the different localities of the area in which they act, with an indication of the classes of goods in which they deal, and also to compile an agency record in respect of firms or persons holding agencies for firms domiciled in the various parts of the British Empire and in foreign countries, supplemented by lists of firms or persons desirous of acting as agents for firms domiciled in the various parts of the British Empire. They also are to acquaint the Department of Overseas Trade with information in regard to important trade exhibitions or agricultural shows, etc., open to British exhibitors which it may be proposed to hold in their area. Special importance is attached to their obtaining and forwarding to the Board of Trade from time to time samples of:

1. Articles of foreign manufacture which may appear to be displacing British goods of a similar kind in the local markets.

2. Any new or little known natural or manufactured products of their area (such as minerals, fibre, earth, etc.) which appear likely to be of use for industrial purposes.

Canada has an extensive system of trade commissioners. It is up to the manufacturers to make use of them. The effort is well worth the making.

GOOD ROADS FOR JAPAN

The good roads movement seem to have taken a hold upon Japan, and it is reported that the city of Tokyo plans to spend over $1,000,000 on paving streets in the very near future. This would seem the opportune time for manufacturers of road-building equipment and materials to introduce their goods to the Japanese.

Many of the public works in the Dutch East Indies, which were suspended during the war owing to scarcity of materials, are being resumed, and a demand is developing for plant equipment and materials for waterworks, electric and railway undertakings, and harbor improvements.

Locating Export Trade for Canada

Things That the Canadian Manufacturer Would Do Well to Bear in Mind—Ask Specific Questions and Make Use of the Trade Commissioner's Service.

THERE are certain things that the Canadian manufacturer should bear in mind when completing his preparations for foreign trade. Attention to these will have much to do with the success or failure of any selling plans that may be contemplated. HARDWARE AND METAL, in conversation with an authority on this matter, secured considerable information that should be helpful.

In the first place the Canadian firm that is desirous of securing export business should make use of existing service provided for that purpose. Following is the correct list of representatives of the Canadian Trade Commission:

Argentine Republic—B. S. Webb, Reconquista No. 46, Beunos Aires. Cable address: Canadian.

Australia—D. H. Ross, Box 140, G.P.O. Melbourne office, Stock Exchange Bldg., Melbourne. Cable address: Canadian.

British West India Islands and British Guiana—E. H. S. Flood, Bridgetown, Barbadoes. Cable address: Canadian.

China—J. W. Ross, 13 Nanking Road, Shanghai. Cable address: Cancoma.

Cuba—J. C. Manzer, 501 and 502 Antigua Casa de Correos, Teriente Rey 11, Havana. Cable address: Cantracom.

France—Phillipe Roy, Commissioner-General, 17 and 19 Boulevard des Capucines, Paris. Cable address Stadacona.

Holland—Ph. Geleerd, Acting Trade Commissioner, Zuidblaak 26, Rotterdam. Cable address: Watermill.

Italy—W. McL. Clarke, via Carlo Cataneo 2, Milan. Cable address: Canadian.

Japan—A. E. Bryan, 53 Main Street, Yokohama. Cable address: Canadian.

Newfoundland—W. B. Nicholson, Bank of Montreal, Water Street, St. John's, Newfoundland. Cable address: Canadian.

New Zealand—W. A. Beddoe, Union Bldgs., Customs Street, Auckland. Cable address: Canadian.

Siberia—L. D. Wilgress, Suifunskava Street, 10, Vladivostok. Cable address: Canadian.

South Africa—W. J. Egan, Norwich Union Bldgs., Cape Town. Cable address: Cantracom.

United Kingdom—Harrison Watson, 73 Basinghall Street, London, E.C.2, England. Cables: Sleighing, London; J. Forsyth Smith, Acting Canadian Trade Commissioner, 87 Union Street, Glasgow. Cable address: Cantracom; J. E. Ray, 4 St. Ann's Square, Manchester. Cable address: Contracom: J. Forsyth Smith, Century Bldgs., 31 North John Street, Liverpool. Cable address: Cantracom; N. D. Johnston, Sun Bldg., Clare St., Bristol. Cable address: Canadian.

Canadian Commercial Agents:

Australia—B. Millin, Royal Exchange Bldg., Sydney, N.S.W., Australia.

British West Indies—Edgar Tripp, Port of Spain, Trinidad. Cable address: Canadian; R. H. Curry, Nassau, Bahamas.

Norway and Denmark—C. E. Sontum, Grubbegd, No. 4, Christiania, Norway. Cable address: Sontums.

Have Other Help

Recently the British Trade Commission has made arrangements so that the services of its representatives can be made to serve any part of the British Empire where a trade commission is not already located. The list of British Trade Commissioners follows:

At Headquarters

C. Hamilton Wicks, 73 Basinghall Street, London, E.C.2.

Canada

Montreal—G. T. Milne, 367 Beaver Hall Square, Montreal. Telegraphic address: Britcom.

Toronto—F. W. Field, 257-260 Confederation Life Bldg., Toronto. Telegraphic address: Toroncom.

Newfoundland—G. T. Milne.

Australia

Melbourne—S. W. B. McGregor, Commerce House, Flinders Street, Melbourne.

Trade Commissioner's Office, Royal Exchange, Sydney.

New Zealand

Wellington—R. W. Dalton, P.O. Box 369, Wellington.

South Africa

Johannesburg—W. G. Wicklam (at present c/o Trade Commissioner's Office, Cape Town).

Cape Town—J. L. Wilson-Goode, P.O. Box 1346 Norwich Union Bldgs., Cape Town.

India and Ceylon

Calcutta—T. M. Ainscough, O.B.E., McLeod Buildings, 28 Dalhousie Square, Calcutta.

Straits Settlements

Singapore—P. J. McKellen (at present stationed at headquarters).

British West Indies and British Honduras

Trinidad—A. J. Pavitt, Port of Spain, Trinidad.

Must Be Specific

Above all else inquiries sent to any of these men should be specific and very much to the point. There are letters and catalogues sent out that might just as well be dropped in the waste paper basket here as elsewhere. British firms make a practice of working their trade commissioners for all they are worth. As an instance of this, one firm communicated to the Canadian office and presented a direct list of forty-two questions, each of which required a great deal of research work. The digging up of this material took up almost two weeks, and proved to be a valuable document for the enquirer and also for the office, as it was thus enabled to be in possession of a large amount of information that had not previously been available.

Point to Remember

When writing to the Trade Commissioners remember that they may know nothing of your business; they may be strangers to your best lines. Do not trust to a catalogue and a rubber stamp letter turning the trick. Ask fo these:

Prices that are paid for similar lines in the country you wish to enter.

Competitive lines that are now on the market.

Change in the markets and marketing conditions owing to the war.

Progress made by local firms making these lines. It is important to keep this information up to date as in nearly every country an effort is being made to produce at home the lines that have been extensively imported.

Value of the market. By this we mean an estimate of the possible amount of goods likely to be purchased in the district.

Merits of the competing lines. It is very necessary to know this in detail.

Differences in the selling methods employed. This includes the important matter of credit, terms, collections, etc.

What sort of representation a firm should have. Get a list of suitable firms or importers.

Change in tariffs. In fact get all information about this matter and keep it up-to-date as frequent changes are made.

Ask for the best way to ship and pack.

Use the trade papers of the lines you want to reach if such publications are available.

The British Commission

Although Canadian firms are more vitally interested in the Canadian Trade Commissioners, it is interesting to note the scope of the work carried on by His Majesty's Trade Commissioners.

The primary duty of His Majesty's Trade Commissioners appointed in various parts of the British Empire, comprises the collection of information in regard to opportunities that may arise for securing and developing the trade of the United Kingdom and such other parts of the British Empire as may express a desire to avail themselves of the facilities afforded by the Trade Commissioner service, but it is also a part of their general duty to endeavor to promote the trade of the British Empire as a whole, within the area to which they are appointed.

Instructions are also given to Trade Commissioners to report from time to time to the Board of Trade and to the Governments of such parts of the British Empire as may invite them to do so, all matters affecting, or likely to affect, the

What Hardware Men Are Doing

How Retailers From Coast to Coast Are Keeping Seasonable Lines Before the Buying Public—Many Dealers Featuring Electric Goods, Especially Stoves, Grills and Fans

Consumers Hardware and Supply Co., Lethbridge, Alta., features in an attractively arranged double column ad. an electric stove. A cut of the stove is shown, and the ad. reads: "This handy little electric stove (in large display type) is just the thing for hot weather. We have it in three finishes at $3.75, $4.25 and $5" (the price is also given in display type). Below this coal oil stoves are listed and then in display type: "Electric Iron Special —high grade in every respect and fully guaranteed, regular $5.50, sale price, $4.00. Only a few left. We have all such seasonable lines as refrigerators, ice cream freezers, electric fans, doors and windows, etc., all at modest prices."

* * *

The Bond Hardware Co., Ltd., Guelph, Ont., under the heading of "Summer Goods" shows an illustration of a handsome hammock and then lists the following: Couch hammocks, complete, $30; canopy, $6.50; frame, $7.50; couch only, $17; hammocks, $3.75 to $10; park seats, $1.50 to $2.75; camp chairs, $1.50, $2.00 and $2.75. All prices are given in large type and at the bottom of the ad. both the firm's phone numbers are given in display type.

* * *

The Manitoba Hardware and Lumber Co., Ltd., Virden, Man., in a three-column advertisement eight inches deep features coal oil stoves. Under the heading in display type: "Keep Up With the Times," it says. "In the old days we all used the cook stove every day, no matter how hot it was. Times have changed now and thousands of people are using coal oil for cooking, especially in hot weather. Remember it is no trouble to demonstrate and we would be pleased to operate these stoves for you." In another section of the ad. a cut is shown of a lawn mower and some descriptive talk given about the lines the firm handles. Sections are also devoted to screen doors and windows, and washing machines.

* * *

The Lawrence Hardware Co., Ltd., Halifax, N.S., leads off a double-column ad. six inches deep on refrigerators by an illustration two inches deep showing a housewife putting away a roast chicken in the ice box. In display type the ad. reads: "Cleanable one-piece refrigerators. These are lined with one piece of pure porcelain throughout, no crevices for dirt to collect or germs to breed. Easily kept snowy white and sanitary, three feet wide over four feet high. Of rich gold oak with nickel trimmings, $90—none like it on the market. Other excellent refrigerators for household use at $14, $16 and $20, as well as the Imperial lined with pure white enamel at $42."

* * *

McAvity's, St. John, N.B., in a double-column ad. feature electric grills and show an illustration of one. Under the heading of "Electric Grills" (in display) they say: "Will broil, fry, stew and toast; cook a meal for two or three persons right at the table. Four degrees of heat and unique arrangement of heating coils adds greatly to their efficiency. Cooking above and below element may be done at the same time. Thousands of these grills giving satisfactory service. Low operating cost. Complete with six feet of heating cord and plug, $11.00." (The price is given very prominently in type ¼-inch deep).

* * *

Cochrane Hardware, Limited, North Bay, Ont., advertises as follows: "Keep Cool (in display type). Come and see our complete line of electric and labor-saving appliances. Winter's cold in summer's heat. Electric irons, $4 to $6; electric toasters, $5 to $8; electric grills, $8 to $11; electric hot plates, $5 to $11; electric percolators, $12 to $25; electric fans, $8.50; vacuum cleaners, $48. Also see our —— Electric Washing Machine. Fifty users in North Bay alone. Sold on its merits, $85."

* * *

T. W. Lewis, Qu'Appelle, Saskatchewan, in a double-column advertisement, under the heading of "Auto Accessories," lists the following: Tire gauges, spark plugs, Ford robe rails, tire covers, all sizes; top dressing; oil, medium and heavy; tires, blow-out patches, tire chains, patching rubber, fan belts; spark plugs, shock absorbers, carbon remover; auto enamel, priming cups, Ford cylinder head gaskets, Chevrolet cylinder head gaskets, tire pumps, radiator compound. No prices are given of any of the lines listed. There are no illustrations in this ad.

* * *

Carter Bros., Picton, Ont., in a double-column ad., under the heading of, "We Are Not Alarmist" (in display) say: "But we study the hardware markets and hope to save you money by advising immediate purchase of any of your needs. Prices are still going higher, due chiefly to labor that is demanding and receiving so much. Example—pure linseed oil that we sell to-day for $2.76 is to-day in Montreal, $3.15. Nearly every other line of hardware is following upward. Our prices will not be advanced while our present, large, well-bought stock lasts. We sell quality hardware for every purpose, at prices marked in plain figures, which are lower because of our larger turnover."

* * *

Chas. W. Mullett, Bancroft, Ont., says, in large type at the top of a two-column advertisement: "When You Need Tires or Other Accessories, Think of Us. We carry a full line of popular auto accessories and can quote you prices as low as any of the big auto supply houses. Let us tell you how you can make your car look like new with our auto enamel. You can apply it yourself and it dries quickly, giving a finish that any professional would be proud of."

* * *

Jackson & Co., Gore Bay, Ont., use a space two columns wide and 12 inches deep to tell about their "Harvesting Tools." They say: "We carry a good supply of tools and accessories necessary for the hay harvest, hay forks and hay fork ropes, barn door tracks and barn tracks and cars. We always carry a good supply of motor oil and greases. Good selection of graniteware and tinware. We have the —— mop. See our stock." In this ad. no prices are given. Illustrations are shown of a preserving kettle and granite pail, and also of a floor mop.

* * *

J. H. Ashdown Hardware Co., Ltd., Winnipeg, in a four-column ad. five inches deep, surrounded by a five-line border, feature "Electric Toaster Stoves." In a section at the left of the ad., set off by a single line border three inches square, is shown one of the stoves, and in big display type beneath: "Special, $2.50." Under the heading in large display type: "Electric Toaster Stoves Special, $2.50," the firm says: "Just about the handiest little electric stove made—and at such a small price—no need to be without one—order it to-day—it's exceptional value. Can be used for boiling, frying or toasting, and is complete with cord."

Overseas Trade Expansion Will Come

Senior British Trade Commission in Canada Outlines Important Views on Future Trade Developments as Between Great Britain and the Dominions — Education and Publicity Are Essential

THAT there will be a great expansion in trade relations as between Great Britain and Canada is the opinion of G. T. Milne, senior Trade Commissioner of His Majesty's Government in Canada. In an interview with HARDWARE AND METAL this week Mr. Milne pointed out that, while there has not been the expansion as yet which is so much to be desired, this will come in due course. There have been conditions in the Motherland to cope with which have made it essential to deal with these problems, and some of which are still unsolved, but there will be a solution of difficulties in due course and with inter-Empire preferential trade arrangements already assured, actual trade expansion with the Empire will come. There is abundant reason to hope for greater strides being made than ever before, and many considerations must be weighed and plans more fully developed.

Details to be Announced

There has been considerable anxiety in some quarters with regard to definite commitments by the British Government as to just what the preferential arrangements for the development of overseas trade will be, Mr. Milne pointed out. In view of the far-reaching effects, it has probably been considered essential to make no mention of a definite character regarding the details of trade development. The reasons for this are obvious. Some countries are in a position to reach out at this time for greater trade, and it would appear that they are in some instances getting a firm hold on new trade in various parts of the world. In the meantime, some writers have asserted that Great Britain was losing ground and that her trade would be measurably lost if she did not aggressively pursue a foreign trade policy.

Just at the present time there are many problems at home, but, aside from these the assurance of ratification of the great peace treaty by the signatory powers, and particularly the Great Powers, is of great moment. Great Britain, always aware of the necessity of knowing her ground well, is taking no chances. She will make sure that the treaty is accepted and approved by the various Governments. So soon as this is accomplished she can, and Mr. Milne thinks she then will, make due and definite announcement as to the details of her trade policy. It may be a little while in coming, but the announcements anticipated when the above agreements are effected, will be important. Something definite, as bearing on this point, will be forthcoming before very long, it is expected.

Great Scope Possible

Asked as to the possibilities for increased trade, and as to whether the development possible would be in agricultural or in manufactured goods, Mr. Milne expressed his conviction that there would be opportunities for manufacturers. "Already," he said, "there is a great deal of movement in manufactured goods going from Canada, and this will increase. There are many goods made in Canada which will find a ready market in the Old Country."

It is largely up to the manufacturers themselves, and Mr. Milne is an advocate of "sales organization." In this connection the Senior Trade Commissioner has been advising his home Government of possibilities of trade with Canada. He has made a study of the trend of buying here and of the probable requirements of Canadians in the matter of manufactured products. It will therefore be quite in order to quote from a recent commitment by Mr. Milne, and in which some interesting observations are set forth.

Demands to be Large

"The extent to which future demand for imported goods seems likely to be reduced," said Mr. Milne, "owing to increased prices, or to the substitution of goods of local manufacture, is a matter difficult to determine owing to conditions varying in different trades, but it may be safely said that while in Canada, as in the United Kingdom, some lines of manufacture have been expanded and others entirely new started during the war period, there will still be a large volume of commodities of various kinds imported into the Dominion, and that, in particular, goods of British manufacture will be in considerable demand.

"The place of sentiment in international commercial relations is, under normal conditions, regarded as being unimportant. The importer buys where he can do so to the most advantage, price being the determining factor. Too often quality considerations are subordinated to those of price, but the world situation created by the war has, to some extent, modified this attitude, and there is in evidence in Canada to-day a strong desire on the part of traders and consumers alike to knit more closely the commercial relations existent between the Dominion and the Mother Country.

"The Canadian public recognizes that the educative influence of the war on British industrial production has been considerable. The productive capacity of the mills and factories of the United Kingdom having been increased, it is urged that the best means for strengthening the commercial relations of the United Kingdom and Canada is for the British manufacturer to adopt more aggressive and intensive methods in selling his products.

The Geographical Factor

"The assumption appears to be dominant in certain quarters in the United Kingdom that the handicap which Britain suffers in competition with the United States, owing to the proximity of the latter to Canada, is so great that it cannot be overcome, and that efforts to increase the volume of British exports to Canada are largely wasted. This assumption is not considered by persons well versed in Canadian trade matters to be well founded.

Organization of Sales

"The somewhat passive attitude of British industrial producers in regard to the marketing of their commodities should, it is considered, give place to the adoption by them of an active constructive policy. An ordered systematic study of the absorption capacity of the market should be made before deciding the form of selling organization. This preliminary step having been taken, the best method of organizing sales will naturally suggest itself. For large and important lines of trade, nothing short of a branch establishment carrying ample stocks and engaged solely in their distribution will meet the case. In the case of smaller and less important lines of trade, some form of co-operation between firms engaged in the manufacture of commodities, which are in some degrees allied to but which do not clash with other lines, suggests itself as an effective method of dealing with this market. In this case also, however, thorough investigation of the possibilities of the market by someone with, if possible, some previous experience of Canadian conditions should be regarded as an indispensable precedent to further action.

"The experience of British firms shipping stocks on consignment have in some instances been unfortunate in the past. This has been due in some degree to carelessness on the part of the consignor firm. Trust has been misplaced with resultant loss. If the consignor principal firm is satisfied that the consignee agent has the requisite knowledge and experience in a given line of trade, but it is doubtful of his financial stability, the most satisfactory method of overcoming this difficulty is to arrange for the consignee firm to give a guarantee bond, as is done in the case of employees of corporations. This, it is stated, is done to some extent between Consignor

(Continued on page 72.)

EDITORIAL COMMENT

CANADA'S EXPORT TRADE

FACTORIES all over Canada are busy handling export business. This was expected. It was well known that the markets of the world were bare after nearly five years of war and that many of the European firms who formerly sent their goods around the world would not be able to even look after their home needs for some time. With increased factory production in Canada and a rich supply of raw materials to draw from it was only to be expected that dealers all over the world would turn to Canada. Their queries have been coming in thousands. They are still coming in thousands. Every mail brings letters asking for prices and goods from all parts of the globe. Naturally a great deal of business has developed and it is with keen satisfaction that many Canadian manufacturers are getting repeat orders, showing that their goods are not only satisfactory, but that they can compete in the markets of the world against others. Dealers in distant lands who are in need of goods will do well to get in touch with Canadian business houses and give them a chance to quote on their needs. In this issue of HARDWARE AND METAL will be found a large number of names of firms prepared to supply high quality goods at reasonable prices and make prompt shipment. These firms are worth getting in touch with and by giving them a chance to figure on their requirements dealers in various parts of the world may establish a relationship that will be mutually profitable not only now but in the years to come.

OIL BURNING EQUIPMENT

MANY hardware dealers have had unusually fine sales of oil stoves this summer. This was due not alone to the fact that it was an exceptionally long and exceptionally hot season. There is another big factor in the matter. In the minds of the public there has grown up a desire to get away if possible from the danger of coal shortages. Last winter and the winter before saw enormous sales of oil heaters and hardware dealers all over the country handled them in numbers such as they had never turned over before. This winter with a coal shortage imminent they are expecting another big call for the oil equipment. Oil is being used more and more instead of coal and wood, in stoves and ranges and it is stated that there is a steadily growing demand for equipment of this kind. Oil is being used on many of the big liners purely as a measure of economy. All this development is worth watching and is of special interest to hardware dealers. If oil is displacing coal and wood in the summer why not in the winter? If householders find that oil for domestic fuel is better and cheaper or even as cheap as coal they will probably quickly shift to oil. Oil certainly has the advantage of being more convenient than coal and at times may be procured a great deal easier. Many retailers are looking forward to a development in not only their oil business, but in the handling of oil-burning equipment. The stoves and heaters they have sent out so far, they state, have given every satisfaction and many inquiries are being made from people who would like to use oil in winter as well as in summer. This is a field which may be well worth developing.

HOUSING DIFFICULTIES

NOW that many of the Ontario municipalities have called for tenders under the Housing Commission's plans some interesting developments are taking place. In a great number of cases it is found that the tenders are high. Many of them are so high that the local housing committees are endeavoring to get local contractors and in some cases outside contractors to figure. Others are trying to revise their plans. This whole situation is interesting in that it reflects the advances that have taken place in prices. When many of these housing plans were formulated, not long after the armistice was signed, there was a general impression in the minds of the public that prices were going to come down. Many of the figures in connection with the plans were based on prices prevailing early in the year. Six months has seen a lot of changes in prices but as far as building materials is concerned they have been upward and not downward. This is one reason why the housing committees are getting figures that are so far in excess of their estimates. Not only have commodities such as lumber, brick, hardware, glass, etc., advanced, but wages are higher and working days shorter. There are new conditions also which were not considered when the plans and estimates for the dwellings were secured. It is questionable if the efforts of the committees to lessen the cost of the dwellings is advisable and hardwaremen might do

well to use all their influence against any move of this kind. As the houses stand they were designed to meet reasonable demands at the lowest possible cost. Any further paring is likely to result not only in really "cheap" houses being erected, but in the building of dwellings which in five years or even less will look just as cheap as they are and will be unsatisfactory to their owners and unsaleable. According to one report in a daily paper regarding some dwellings which were gone ahead with, "The cheap design and the cheap materials used seem to be the one great cause of comment. One returned veteran points out that the sides are being stained only where the specifications call for two coats of linseed oil." This is merely a comment before the buildings are finished. What will be said after the houses have faced the wear and tear of five summers and winters? Hardwaremen can do a lot to check troubles of this kind by standing out now for the erection of good homes and no skimping of materials to slightly lessen the cost.

SPEEDING UP TURNOVER

IT is rather interesting to note that a great many of the hardware dealers who have discussed with HARDWARE AND METAL recently the ways and means by which they have been increasing their turnover invariably mention the value of display tables, interior store displays and their show windows. It is a simple truth, but one that is sometimes lost sight of by some retailers, that display is one of the very first requisites of successful selling. Dealers who keep a careful track of sales frequently note that if a line is not moving as fast as they would like it is because they have not been showing it enough. Sometimes a dealer finds that all the goods he had on display in some particular line are sold and that he is not selling more because the rest of his stock is packed away in boxes or is hidden away somewhere in drawers. The average customer who comes into a store cannot reasonably be expected to make his maximum purchases of articles he does not see. Conversely, and the statements of many dealers prove this, customers who came in with the intention of buying only one article, take home half a dozen because they see displayed here and there about the store things they need. It never pays to have goods that people want, and will buy if they see, hidden away, gathering dust. The merchants who are making the biggest turnovers are those who keep their windows full of attractive displays and their stores arranged so that everywhere a buyer goes he will find something of interest. One sure way of increasing the interest in any article shown either in store or window is to attach to it a neat tag or cadr showing the price. This is perhaps the thing the average buyer is most vitally interested in and certainly the first thing he asks himself about it. It is a simple thing to let everybody that sees the goods know how much you are asking for them and it will pay well.

YOU CAN'T BE TOO CAREFUL

THAT there is a whole lot of truth in the claim of fire chiefs that ninety per cent. of the fires start through carelessness is brought home to hardware men by two cases which have recently occurred in hardware stores. In one instance, the hardware man and an assistant were pouring roofing paint from a barrel and a match was lighted to see if the paint was all out. An explosion followed in which the hardware man and his assistant were painfully burned and the oil house practically destroyed by fire. In another case which happened only recently, a hardware store in an Ontario town narrowly escaped being destroyed. It was found later that a couple of small boys had got some matches and finding some rubbish in the rear of the hardware store set fire to it. The flames worked their way through a cellar window and when the employees of the store smelled smoke and investigated were burning briskly within a few feet of a large oil tank in the cellar. Five minutes more and a blaze would have been in progress which would probably have swept the whole store. It is in just the simple ways mentioned above and by others just as trivial that fires start which cost Ontario many millions of dollars every year. Losses of this kind are absolute waste and are preventable through a little care. In the first case mentioned above the use of a flashlight would have prevented any possibility of fire or explosion.

It can be said in the second instance the hardware man was to blame for allowing rubbish to accumulate, especially in the rear of his store. This has been a prolific source of fires, many of them bad ones. Carelessness with matches, not only in the hands of children, but of others has been responsible for losses which run into hundreds of thousands of dollars annually. The authorities estimate that probably twenty per cent. of the fires to which they are called start from matches carelessly thrown away or from cigar stubs or cigarettes dropped or thrown away without any regard as to where they may fall.

ADVERTISING BUILDS

ADVERTISING builds sales. Backed by good store service, it wins permanent customers. It pays best only when customers come time and again. Merchants know this, and they know that their advertisements must be truthful before they can win permanent trade.

Five Points in Window Dressing

Sales Punch in a Display is Equal in Importance to the Other Four Combined—Things to Keep in Mind When You Are Dressing Your Windows — Good Window Displays Have Real Value in Dollars and Cents.

WHILE there are five big points to be considered in connection with a window display, there is one point which, in itself, is equal in importance to the other four. The features of a display upon which its value may be based are first of all its selling force. Then in order come its display value, its advertising worth, its originality, and last, its artistic effect. A great many window trimmers centre their efforts on the last point, losing sight to a great extent of the fact that it is not how pretty or how striking a window looks, but how much goods it will sell that determines its value. There are scores of windows which people will stop to look at because they are artistic, or because they contain something striking. That is as far as the value of the window goes. The people merely stop and look in and never once think of going into the store and making a purchase.

Makes Them Buy

It is the window that sends them into the store with the desire to buy that keeps the cash register playing tunes and makes the profits grow. Considered from an analytical standpoint, the features outlined about on the basis of one hundred points might be classified as follows: selling force 50 points; display value 15 points; advertising worth 15 points; originality ten points, and artistry 10 points. Some merchants would give the selling force of the window even a higher percentage and reduce the allotment given to artistic effect.

Certain it is that selling value is the big thing to keep in mind when arranging a display. The best result is obtained when maximum selling value is combined with each of the other features.

Is Important, Too

Unquestionably display and selling force go hand in hand. Goods well displayed are, it is often said, half sold, but the display must be a timely one. A great deal of its value consists in being seasonable. One reason why some merchants get much greater results than others from window displays is that they always pay the most particular attention to keeping their windows seasonable. A hardware dealer who put in a window full of hockey skates in July would not expect to sell very many, for the simple reason that people could not use them at the time. Very few dealers would do this, but a great many of them do not draw the line sharply enough in regard to seasonable lines. Often because they are busy they leave goods in for two or three weeks longer than they should be in, and firms who do this are losing real money because an attractively-arranged show window has a definite value in dollars and cents and will pay splendid returns according to whether it is kept up to the minute or not.

Don't Forget This

Never forget that with the great mass of the buying public your store windows reflect your store, and the service that may be expected from it. They have a distinct advertising value in this way. It is seldom indeed that unclean, poorly decorated windows are seen in a store where good service may be had. People are quick to find out all these things and to talk about them, just as they will go home and say they saw this or that article downtown in Smith's window, especially if it is some new line or up-to-the-minute feature. Just as surely they will remark, if some goods are mentioned and another store is named, "Oh, that chap won't have it, he never has anything in his windows that is new!" Can a firm have a worse advertisement than scores, perhaps hundreds of people talking this way about it? On the other hand it will get a great amount of advertising of the right kind from windows that are kept well dressed, clean and attractive.

May Be Inexpensive

To be effective a window display does not necessarily have to cost a lot of money. Some of the very best "pullers" are extremely simple and inexpensive. If the display is timely the goods move quickly when placed on display. Firm after firm from coast to coast can testify to the very excellent results obtained from simply-arranged windows which they filled with seasonable goods.

One of the most important matters in connection with any display is to give all prices plainly. This is the first thing that everyone wants to know. The woman on her way downtown whose eye is caught by your window will in a great many cases pass on again unless she sees prices. The same thing applies to the thousand and one people who stop to look in. If you have good goods and do not let them know how much they are, a very large percentage of people will conclude, without ever taking the trouble to walk into the store and find out, that the things are expensive.

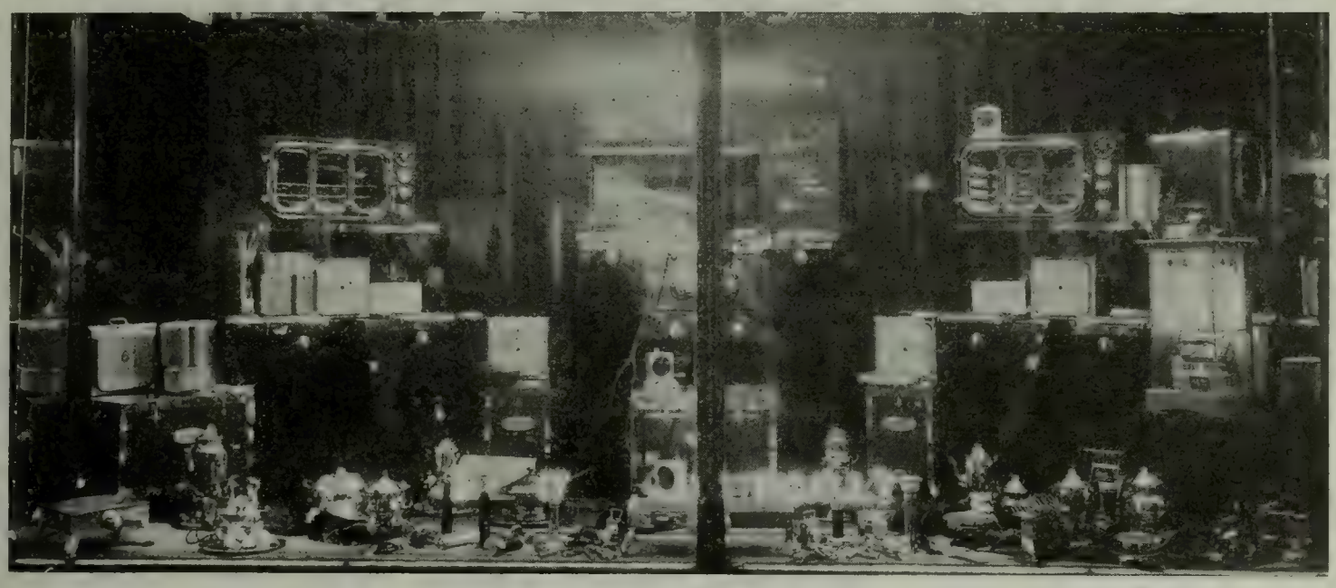
Is Easily Arranged

It is a simple matter to attach a price card. Then there is no possibility of misunderstanding. Many firms go even further. They have neat little cards on which not only prices are printed in very plain figures, but the firm name as well. They say that this undoubtedly has a value in impressing their store and their goods in the minds of the buying public. Some firms go even a step further, especially when they are showing new electrical lines or goods with which the general public may not be familiar. They attach a card stating what the article is, its price, and the firm name. This is only a little service but it is one that has helped sell a lot of goods. A great deal of originality is often shown in designing these cards and also in arranging the displays.

This is a Test

Arranging displays is where the taste of the window trimmer reveals itself. Some window dressers can put a "pull" into a display by following out a few ideas of their own that other men could not accomplish with the help of elaborate fittings and expensive equipment. Originality counts in a case of this kind. One thing that many of the best firms always do is, when making a "drive" on some advertised line of merchandise, to display the advertising matter which is furnished by the firm. This can usually be worked into a display in such a manner as to have not only a sales value but an artistic and display value.

Don't Scatter Efforts



It is usually found good business to centre a display on one line rather than to fill a window up with half a dozen different lines. For instance, a display of kitchenware, or of tools or of paints will make more sales than a window in which an effort is made to show all three. The effect seems to be to distract the prospective buyer's attention from any one of the lines it is desired to sell with the result that none are purchased.

No matter how good a display is, it should never be allowed to remain in so long that it gets either soiled or stale. People like to be kept interested, and one of the best ways of doing this is to continually show them new goods, new arrangements of the goods and so on. One of the best helps in creating business is a window, and the best windows are often those where the appeal is simple and direct.

AMERICAN TOY OUTPUT DOUBLED IN TWO AND A HALF YEARS

"American toy-making establishments have doubled in number and output since America went into the world war," according to Fletcher D. Dodge, New York secretary of the Toy Manufacturers of the United States of America, Inc. At the midsummer convention of the organization held in Atlantic City he stated that the United States is independent of the rest of the world in supplying toys for its boys and girls.

Seasonable Windows Always Attract

A greater appreciation of the place of "things electrical" in the home is constantly being realized. It is window displays of this nature which do much to make people think along these lines and an attractive, sales compelling window is the type to keep before the eyes of your customers at all times.

Being just a little ahead of the season is always good business when the line you are selling can be termed seasonable. Good window displays do much to start the public thinking and those which direct the public's footsteps into the store have that sales punch which is the best point in this form of advertising.

Once again is the call in evidence for stoves and ranges. With some dealers it is always apparent, though perhaps modified, but in another two or three weeks activity will be general and dealers would do well to beat the season by arranging a good selling window on stoves and brightening up the interior display. Get the people thinking stoves. With a possible coal shortage, the stove which claims a saving in fuel should be in demand.

EVENTS IN THE TRADE

Business Changes

ALLISTON, ONT.—J. A. McCague, formerly of McCague & Watson, Stayner, Ont., has purchased the hardware business of J. J. Cain. Mr. McCague is planning on remodeling the store.

Obituaries

The death occurred in Toronto of George M. Reynolds, of Reynolds and Co., manufacturers of varnishes.

The death occurred at Barrie, Ont., of James Archer, superintendent of steamfitting for the Grand Trunk from Belleville to North Bay. Mr. Archer was a former resident of Port Hope, where he learned the tinsmithing business, and was later employed with R. Dunn & Co.

Fire Losses

The hardware store of Joseph G. Leonard, Beauharnois, Quebec, was destroyed by fire.

New Firms

The Ideal Plumbing & Heating Co., Limited, has been incorporated at Edmonton.

Leclerc & Frere, hardware, has been registered at Montreal by Edward Leclerc and Luger Leclerc.

Personals

H. H. Gill has been appointed Eastern sales manager of the Sharples Separator Co., with headquarters at West Chester, Pa.

A. L. Knight, formerly New England sales manager, has severed his connection with the Sharples Separator Co. to become Eastern sales manager of the Sharples Milker Co., and Paul D. Smith, formerly sales manager of the Pennsylvania-Ohio district, has been appointed office manager of the Chicago branch of the Sharples Separator Co.

Thomas Gardner, for eighteen years with Peaker & Son, and latterly the Brampton Hardware, is retiring, and will make his home at Caledon, Ont.

W. Forward has joined the sales staff of W. E. Brown's hardware at Strathmore, Alberta.

Trade Notes

R. Leblanc, Montreal, stove dealer, has assigned to Vinet and Dufresne.

La Compagnie Julien Lambert, hardware, Montreal, has been dissolved.

The Canadian Waterproof Glue Co. has been registered at Acton Vale, Quebec.

Partnership has been dissolved in the Mechanics' Tool Case Mfg. Co., of Toronto.

J. Singer & Co., plumbers, has been registered at Montreal by Jack Singer and Eli Jacobs.

The Brantford Scale Co. has started work on extensions which will double the capacity of its plant.

N. L. Martin has been appointed interim liquidator of the Electric Oil & Gas Heating Co., Limited, Toronto.

The Provincial Machinery Co. has secured premises in St. Thomas, Ont., and plans to manufacture phonographs.

Normandin Prance & Co., Montreal, manufacturers of brushes, has been dissolved, and J. B. Normandin registered.

The All Way Oiler Manufacturing Co. of Toronto has changed its address from 77 York Street, to 196 King Street West.

The Interchangeable Counterbore & Tool Co. of Canada, Limited, Walkerville, Ont., has been granted an Ontario charter.

The Pacific Box Co., Ltd., of Vancouver, B.C., has now in operation a pail factory and is manufacturing pails, kits and tubs.

The Dominion Hammock Manufacturing Co. of Dunnville, Ont., is adding to its plant by the erection of a new dyehouse.

More than 6,000 people attended the annual picnic of the Dominion Rubber System of Kitchener, Ont., held at Waterloo Park.

The Standard Oil Company of New Jersey has increased its capital stock to $100,000,000, this being almost double the former capital.

The thirty-second annual convention of the National Paint, Oil and Varnish Association will be held at White Sulphur Springs, Va., September 22 to 25.

Vaughn & Bushnell, 2116 Carroll Ave., Chicago, are equipping their plant for the manufacture of planes, and expect to be ready to make shipments by January, 1920.

Messrs. J. Coobes and F. Reid, of Fort William, Ont., have taken over the plant of the Copp Stove Company at Fort William and will make some of the lines of stoves formerly manufactured.

The following Toronto companies have been granted Ontario charters: the Dayton Airless Tire Co. of Canada, Limited, Loren Bros., and the Wilson Motor Body Co., Ltd.

The hardware store of J. M. Adam at St. Mary's, Ont., has been purchased for a bank, and Mr. Adam has secured the premises occupied by the Maxwell Co. on Queen Street, and will move there in a few weeks.

F. C. Moore, Western manager of the Hamilton Stove and Heater Co., has just recently returned from a business trip through the Province of Manitoba and part of Eastern Saskatchewan. Mr. Moore reports that the crop outlook in these districts is good and that business, particularly in the stove and furnace line, is very active. He states that the farmers throughout the country are doing considerable building despite the high prices of building materials, and naturally this is making a market for a great many lines handled through the hardware trade.

Montreal News

Arthur Barnett, of Lewis Bros., Ltd., is taking his holidays.

F. C. Dannenberg, with J. Wiss & Sons, Newark, N.J., was a trade visitor to Montreal.

Gordon Hale, of the Starke-Seybold Co.'s office staff, is away on holidays for a couple of weeks.

Edgar Briegel and W. G. McCutcheon, of the Caverhill-Learmont staff, are away this week on holidays.

E. C. Secar, Canadian representative for Henry Hobson & Sons, cutlers and electro-platers, London and Sheffield, England, was in Montreal this week.

Colonel Robert Starke, of Starke-Seybold, Ltd., wholesale hardware, has been indisposed for several days and confined to the hospital.

John A. Frazer, sales manager Lewis Bros., Ltd., leaves this week for a trip to United States points, including Rochester and Buffalo. Mrs. Frazer will accompany Mr. Frazer and the return trip will be made by way of Toronto.

The many friends of "Charley" Dufresne, formerly of Lewis Bros., Ltd., and late of Chicoutimi, whither he went recently to manage a hardware department, will regret to learn of his confinement in the Montreal General Hospital. "Charley" is now reported out of danger and expects to recuperate for several months before taking up work again.

Carland Campbell, who has been connected with the Walkerville Hardware Co., Walkerville, Ont., has accepted a position with Lewis Bros., Ltd., Montreal, and will assume his new duties on September 1st. Mr. Campbell will cover Western Ontario territory with the full line sold by Lewis Bros.

Royal Cluxton, manager of the Canada Paint Coompany, Ltd., Montreal, was suddenly stricken on Sunday with appendicitis. Mr. Cluxton was removed to the Royal Victoria Hospital where an operation was successfully performed and his friends will welcome the latest report of his favorable progress toward recovery.

Incorporations

London Clay Products Company, Ltd., head office London, Ont., capital $50,000, plans to manufacture and deal in building materials, sewer pipe, tile, etc.

Pressure Proof Rings, Limited, head office Sherbrooke, Que., capital $100,000, plans to manufacture and deal in piston rings and piston packing.

Canada Stoker Company, Limited, capital $40,000, head office Galt, Ont., plans to manufacture and deal in machinery, tools and hardware.

The Rudy Decorating Company, Ltd., capital $40,000, head office Windsor, Ont., plans to carry on the business of supplying interior furnishings, painting and decorating.

Soren Bros., head office, Toronto, capital $250,000, plan to manufacture and deal in tinware, graniteware, sheet metal goods and also brass, copper and aluminum ware.

Modern Home Builders, Limited, capital $100,000, head office, Windsor, Ont., plans to carry on a general contracting business.

The Dayton Airless Tire Company of Canada, Limited, capital $200,000, head office, Toronto, plans to manufacture and deal in rubber tires, tubes and rubber goods.

The Wilson Motor Body Company, Limited, capital $40,000, head office, Toronto, plans to manufacture and deal in automobiles, bicycles, motor trucks and accessories.

Wolverine Limited, head offices Toronto, capital $60,000, has been granted a provincial charter and plans to acquire the business now carried on by the Canadian Wolverine Company, Limited, manufacturers and dealers in plumbing supplies.

President Chinese Chamber of Commerce Speaks Before Montreal Kiwanis Club

BEFORE the Kiwanis Club of Montreal at the Queen's Hotel last Thursday, Fairman Wong, president of the Chinese Chambers of Commerce Association and general manager of Le Main & Co., gave a talk on the future possibilities of trade between Canada and China. Mr. Wong was accompanied by Mr. Way, a Chinese student at McGill, who acted as interpreter, Mr. Wong not feeling sufficiently confident of his English to trust himself in that language.

Wanted Trade Missionaries

In his main address Mr. Wong said that China was really one of the richest countries in the world, with enormous, undeveloped resources, despite the many centuries of its civilization. The Chinese Government and people are opposing to the best of their power the settlement being forced on them by the Peace Conference, but he remarked that in China's present position all it can do is protest. He declared that the Government is anxious to foster trade, especially with their next door neighbor across the Pacific, Canada, which is only a few days away by steamship, and towards whom China has the most friendly feeling. For the Government he expressed the hope that Canadians would seize the opportunity of extending their export trade by sending trade agents and commercial experts to cultivate business, and find just what goods were suitable for the Chinese trade. There was, he said, an especially good opening for the export of machinery, agricultural implements, automobiles, flour, lumber products and similar articles to China, these being in strong demand there, with plenty of money to pay for them.

After visiting the British Columbia coast he said he was convinced that there was a great future for trade between Canada and China, which is being reborn since the war, and is rapidly preparing to take its place in peace as it has done in the war.

Trade Possibilities

In his address Mr. Wong had stated that the possibilities for trade between Canada and the United States with China were very good, especially in steel manufactures and all kinds of agricultural implements.

One of the members asked him how this could ever come about so long as the present low scale of wages prevailed in China, with the high and continually increasing scales of pay on this continent.

When this had been translated to Mr. Wong, he replied, through his interpreter, that most of the labor in China was agricultural, and there was a keen demand for Canadian and American agricultural implements, because they were much better and comparatively cheaper than any that could be turned out in China. Even at the prices they were sold for the Chinese needed them, with other metal products and machinery, and must have them, which was the reason why the market prospects were so good.

Mr. Wong stated that the present Government is well disposed towards their friends of the United States and the British Empire, and welcomed all who went to China for business purposes. With these increasingly stable conditions, and improved trade since the war, Mr. Wong expressed the opinion that the republican system of government in China is there to stay, and that under its aegis Chinese trade with foreign countries would flourish.

Toronto Hardwaremen And Travellers' Picnic

The fourth annual basket picnic of the Toronto hardware merchants and travellers, held at Credit Grove, Port Credit, on Wednesday afternoon, was a most successful and thoroughly enjoyable outing in every way. The party, which numbered more than two hundred, gathered at Sunnyside at two o'clock. Automobiles were waiting and took them all out to Credit Grove. The hardware men had fixed things with the weather man and he handed out one of the finest afternoons for a picnic, warm, but not too hot. Everyone enjoyed the ride to the Grove and the sports which were started immediately on arrival.

The program included something for everyone, with plenty of good prizes. Competition was keen and the crowd was kept enthusiastic over the efforts the contestants made and the close finishes. The only casualty of the afternoon occurred when John Caslor, who was a contestant in the Three-Legged Race, took a header. As Mr. Caslor was getting over the ground at 'steen miles per hour he went down heavily and his shoulder was badly bruised by the fall. However, he was game, and not only ran in the race, but also in a consolation race and won.

During the afternoon ice cream was served to everyone, and each youngster on the grounds was provided with a toy balloon. A feature of the sports during the afternoon was a baseball match between the Hardware Merchants vs. the Travellers. The hardware dealers played a splendid game, but were weak in their hitting, the Travellers winning out by a score of 5 to 0. The batters for the winners were J. Booth and R. Baden.

In the evening a dance was held at the Lakeview Inn and special prizes were awarded for the best waltzers. After the dance the party returned to the city in autos.

The committee in charge of the arrangements and responsible for the success of the outing, comprised: J. C. McFadden, chairman; John Caslor, treasurer, and O. F. Morrison, secretary.

HOWLAND-WORTHINGTON

The wedding was solemnized on Saturday at Saint James Cathedral, Toronto, of Geo. W. Howland, vice-president of the hardware firm of H. S. Howland Sons & Co., Ltd., and Mrs. Norreys Worthington, formerly of Sherbrooke, Que. Mr. and Mrs. Howland have left to spend their honeymoon at Banff.

Says Impatience Won't Speed Building

Quebec Director of Housing Scheme Points Out Why Delays Are Necessary—No Loans to Individuals—Applications for Loan Assistance Already $17,000,000

DR. EMILE NADEAU, director for the Province of Quebec Housing Scheme as provided for by the Federal Government special fund of $25,000,000, says that time is required to mature plans for the expending of Quebec's apportionment of $7,000,000. To members of the Montreal City Improvement League and other citizens, Dr. Nadeau outlined what had already been accomplished and what was to be undertaken.

The Dominion Government, it was pointed out, have already approved of the plans outlined by the Provincial Government and this is considered an important development.

Loans to Municipalities

Contrary to the wish and expectation of many, the loans made would go to municipalities and not to individuals. This would ensure responsibility, and the municipality would, in turn, transmit the money to building companies, and groups of dwellings would be erected by them after the plan followed in England, where this community building scheme had been a success. In this connection the speaker outlined the plan of English "garden villages," and referred to the plan followed in this connection by Lord Leverhulme, the soap manufacturer. Reference was further made to the plans of the British Government in erecting homes for munition workers and to the proposal for further building of homes there under an apportioned loaning scheme entailing $800,000,000 outlay. This, it is stated, will build 100 garden cities.

It would be absolutely essential that land be available for the erection of houses at a reasonable price. If there was an apparent desire to quote an excessive price for the necessary land for the community the commission will secure land elsewhere.

The point was raised by one member that there might be difficulties in a community with regard to future ownership. Dr. Nadeau stated that those entering the plan would have to anticipate the requirements and abide by reasonable regulations to be decided upon.

British Plans Followed

In the matter of general plans providing for parks, playgrounds, etc., the British scheme will, it is expected, be followed. As yet the Civic Commission of Montreal had not applied for its apportionment. The tentative suggestions of the speaker were that the district of Montreal should receive $3,000,000; the cities and towns of the Quebec district $2,500,000, and the remaining cities and towns $1,500,000, but, up to date, the requests for assistance totalled $17,000,000, and in this large sum Montreal was not included.

A technical and advisory commission would be appointed, probably to assist Dr. Nadeau in his work to prepare plans for buildings, etc. The cost of this would require a levy of about 2½ per cent. of the various loans. It would be the work of this commission to prepare plans to be followed in the erection of all buildings. Houses would cost from $2,000 to $4,500, including land cost.

Dr. Nadeau voiced his hope that the plans, when carried out, would be a step in getting away from slumdom.

ASK REPRESENTATIVE OF RETAIL TRADE

The Manitoba Board of the Retail Merchants' Association of Canada has sent the following wire to Ottawa regarding appointment to Inland Trade Commission:

"Manitoba Executive Retail Merchants' Association of Canada respectfully request that a man with a full knowledge of the retail trade be one of the men appointed on the Inland Trade Commission."

PROGRAM FOR INDUSTRIAL CONGRESS PROMISES WELL

Important List of Speakers for the Gathering at Calgary, Alta., August 13

The forthcoming industrial congress at Calgary, Canada, August 13, 14, and the tour by special trains commencing at Medicine Hat, Canada, on August 11, and concluding at Banff, in the Canadian Rockies, on August 17, will be an event of outstanding interest and importance. The list of speakers given below will afford some evidence of the unusual nature of the gathering.

The congress will place before its visitors data in relation to the natural resources and industries of Alberta and the Canadian West, with the object that serious consideration may be given the economic development of the trade of the Dominion, the extension of markets, Oriental and Pacific trade routes, and generally the whole phase of the Western era now dawning.

Addresses will be given by the following men of international reputation:

E. W. Beatty, president Canadian Pacific Railway Co.

Henry Ford.

John N. Willys, president Willys-Overland Co.

Augustus L. Searle, general manager Peavy Grain Co.

D. B. Hanna, president Canadian National Railways.

A. R. Erskine, president Studebaker Corporation.

Harold McCormick, president International Harvester Co.

ON THREE WEEKS' TRIP

A number of members of the Automotive Equipment Association of the United States and Canada are making a three weeks' tour of the principal cities of Eastern Canada and the middle West. The Canadian part of the itinerary includes Montreal, Toronto and Hamilton. From Hamilton the party goes to Detroit and thence by boat to Port Arthur where they entrain for Winnipeg. After Winnipeg they will proceed to Calgary, Banff, Lake Louise and Regina. From this point they will disperse and return to their various homes.

Members of the Automotive Equipment Association who are in the party include: W. M. Webster, commissioner, Chicago; J. Ernest Millen, John Millen & Son, Limited, Montreal; Ludger Gravel Gravel, Montreal; A. J. Hopkins and J. W. Paton, Canadian Fairbanks-Morse Co., Limited, Montreal; N. Dwight Smith and L. A. Johnson, Northern Electric Co., Montreal; F. B. Caswell, sales manager, Champion Spark Plug Co., Toledo, Ohio; A. J. Hayes, sales manager, Champion Spark Plug Co., of Canada, Limited, Windsor, Ont.; R. R. Englehart, Davenport, Iowa; F. T. Chase, Frank Mossberg Co., Attleboro, Mass.; G. L. Brunner, Utica, N.Y.; H. A. Pegau, Omaha, Neb.; Fred. Campbell, St. Louis, Mo., and H. M. Dino, the Dino De Wees Co., Canton, Ohio.

Farmers Will Get Cash For Wheat

The decision of the Dominion Government as to how it is going to handle this year's wheat crop is of great interest, not only to all merchants, but to the manufacturers as well. As the United States has fixed its prices for another year at $2.26 per bushel, the decision of the Canadian Government to sell at prevailing world prices is likely to create a demand for the Canadian crop. The plan along which the Government will handle the wheat this year is as follows:

(1) A Board to buy and market the crop of 1919.

(2) A cash payment on account to be made to the farmer at the time he sells his wheat.

(3) The wheat crop of Canada to be sold by the Board at the prevailing world prices, and the surplus proceeds, after expenses are deducted, to be distributed to the original sellers of the wheat in proportion to grade and quantity.

(4) No speculating on exchanges or profiteering by handlers to be allowed in disposing of the wheat crop of 1919 to the disadvantage of either producer or consumer.

(5) A direct and immediate cash sale by the farmer, and a speedy movement of the crop along the usual channels of transport.

The personnel of the Board will be made known very shortly, as also will the initial cash payment to be made on account to the farmer at the time of the sale of his wheat.

How to Build Up the Home Town

By E. M. TROWERN, Secretary, Dominion Board, the Retail Merchants' Association of Canada, Incorporated.

THE place where most people congregate in a village is the country store. It is usually a Post Office, the place where the farmers exchange their eggs and butter, the committee room for the politician, the headquarters for countryside gossip, a meeting place for friends, and the place where the merchant is supposed to keep everything from a needle to an anchor. It is from these centres that the villages develop into towns, and the towns into cities. The more the merchant prospers, the better the village prospers, and so it is with towns and cities.

Goods in the retail stores in New York are of little value to the people of Canada. They want to be able to go into the shops in the place in which they live and examine the goods, price them, order them, and either take them home or have them delivered. They want to know also that the goods they select personally are the goods they get, and this is where the local merchant will always have the advantage over the mail order house system, which means that when you buy goods you must rely almost entirely upon the selection by other people, and not upon your own judgment. Perhaps the best illustration that can be given of the advantages of buying in the home town will be understood by those who are familiar with the question of selling boots and shoes at retail, and the correct fitting of the same.

Goods Not Satisfactory

Not long ago, the writer's attention was called to a rather singular circumstance. Visiting a small town in the cool of the evening, when the ladies of the town were visiting the Post Office for the evening mail, a merchant, well posted in the Boot and Shoe business, called attention to the fact that ten ladies out of twelve who passed were wearing mail order shoes. He discerned them by the way in which they fitted the feet. Some were too high in the heel, others too low; some too broad and others too narrow. They were not only uncomfortable but they interfered with the poise and carriage of the wearer. Had these shoes been purchased in the home town, these faults could have been avoided, much to the comfort and well-being of the wearer, and at perhaps less cost in the end. This illustration might also apply to a large number of other articles.

Merchant Should Emphasize the Point

The retail merchants themselves are not entirely blameless for this condition of affairs. Every merchant in business knows that the best way to shop is the legitimate way of shopping, and that is for the purchaser to see the goods, examine the quality, ascertain the price, and find out if they suit before the money is paid. The reason why these facts are not pointed out more prominently by the retail merchant is that they know so well that the above is the proper plan of buying that they believe the public generally should have the same information, whereas perhaps there is more ignorance existing among the general public with regard to the quality of merchandise than there is in connection with almost any other subject. Every merchant will bear testimony to the fact that there are many customers who have an idea that they know all about the quality of goods, whereas, as a matter of fact, they know very little, and it would pay them far better to explain their requirements to an honest merchant who knows his business, and secure his assistance in selecting the goods, and in this way they would secure better value, as well as the styles that would best suit them.

> The great city is merely a development of the small town. Every town is potentially a city, and has nothing to fear from the competition of the larger centre, providing that this competition is wisely met, and that the merchant of the smaller place makes the most of the really overwhelming arguments in his favor. The satisfaction, the convenience, and the promptitude of the service that the small store can offer are conditions that cannot be equalled by the strongest outside selling interest. But the people must be made to see and understand and this is the work of the merchant, and thus will he build up his town.

The citizens of every city, town or village should take a pride in their retail stores in their community. The better the stocks the merchants carry, the better the selection the citizens have, and the greater the number of people who purchase in the home town the better the opportunity the merchants have for increasing their stocks and carrying the latest styles. All citizens who send their money out of the town are injuring the business of the town to that extent, and they are doing an injury to those citizens who patronize the local retail merchants.

The Personal Element

Retail merchants select goods for the convenience of their customers. They study their requirements; they understand the extent of their purse, and the goods are always on hand, ready to be delivered at a moment's notice. Merchandise in Europe is of a very little use to the citizens of any city, town or village in Canada. The goods must be here, ready and waiting, and our system of distribution is so arranged that if trade is developed along natural lines, and those who receive their money from the town patronize the town, they are not only making it convenient for themselves but also for every other resident of that town. If the retail stores were taken out of the cities, towns and villages of Canada, it would be equivalent to destroying the commercial life of Canada.

Appearance A Large Factor

Although not generally mentioned, when the development of a city is questioned, the first thing that strikes a stranger when he enters any city or town is the character of the shops in that city or town. If they are poorly kept and poorly stocked, with unpainted fronts, the town can be considered to be on the decline. If the store fronts are well painted, and the stocks well kept, and the retail merchants alert to their business, the town is always prosperous, and it becomes an attractive place for the farmers and mechanics to congregate. It generally develops into a community hub, and the effect is reflected in the homes and in the surrounding farms. The nearer a good farm is to a thriving city, town or village, the more valuable the farm becomes, and the more valuable that farms become, the better will be the business done in the city, town or village. In this way the whole community thrives.

Buying in the home town, therefore, means very much more than appears on the surface. It benefits both the buyer and the merchant. It helps to improve the streets, to reduce taxation, to add to the enjoyment of life, to bring the goods that are made at a distance to a common centre where they are needed. It circulates money, giving all an equal chance to secure some of it, and in this way buying in the home town helps the merchants, lowers the price of goods to the consumer, aids the financial institutions, gives more money in taxes for better roads, better police and fire protection, helps the newspapers, enables the municipality to pay better wages to school teachers, assists in the erection of better churches and public institutions, and, finally, establishes better residential districts, and in this way prosperous cities and towns are built up. The object, therefore, of all loyal citizens should be to buy the things they require in the place in which they live.

THE CLERKS DEPARTMENT

It's One Thing to Desire a Good Job and Another to Determine to Get It

J. C. Penney, Who at the Age of 44 Owns and Operates 197 Stores, Tells About His Work—He Started Out With a Capital of $500

J. C. PENNEY, head of the J.C.Penney Co., started out with a capital of $500 in a small town. Now he owns 197 stores and is still developing his business steadily. In the American Magazine he tells how he picks his men, and says:

Last year, I, as an employer, talked with at least five thousand applicants for jobs. Many of these men were not out of work. They already had positions, but they wanted to make a change.

Part of my problem in picking those I wanted out of this mass of applicants was to find what was at the bottom of their desire for a new position. For that desire may be a sign of weakness or it may be a sign of strength.

Gives Him Clue

If I can get the truth about this one thing, I shall have a pretty good clue to a man's value in business. In response to my questions, he may unconsciously show that he can't stand criticism, that he resents being asked to work hard, that he hasn't the grit to live on a small salary until he has made himself worth a big one. He may not be able to get along with other men. He may be looking for a soft snap, an easy boss. If he is guilty of any of these things, I don't want him.

Sees No Future

But, on the other hand, he may want to change because he has come to the conclusion, after an honest effort, that his present job holds no future for him. He is willing to start at the bottom, to work hard, to get along on small pay; but he wants to see footholds above him by which he can climb. He may be in business where the very top isn't much of a height itself. He wants to go higher and he is bound to do it. That kind of a desire for change is a sign of strength—if it doesn't stop at being merely a desire.

Make a Move

I have to study very often the type of man who sticks at an unpromising job until he loses all hope, all initiative. And I want to say right here, if you can't see any future in your work, get out! Take a position at a lower salary, if necessary. If you lack the courage to make the plunge, all right! Stay where you are. But blame yourself, then; don't blame the job. And remember that "desire" is not "determination." They begin with the same letter but they don't end on the same pinnacle of success.

Must Have Vision

You notice that I said to get out if you can't see any future in your job. As a matter of fact, there is a future in most jobs. But it probably isn't there for you, if you can't see it. You must have a vision before you of something toward which you are striving. And if, even after opening your eyes and honestly looking for something worth attaining, you still can see nothing ahead—then you never will go far.

Lacked Courage

Many times I have been sick at heart over the crushed, discouraged men who have come to ask timidly for a position. Unhappy, hopeless, they feebly beat their wings against the bars, trying to escape from their prison. Had they made the attempt when they first realized that their job held no future for them, they probably would have succeeded. But they lacked the courage. When they came to me, they were still moved more by desire than by determination. Thy wanted rather than willed. And their attempt to escape was almost pitiful.

Chances For All

Don't misunderstand me. I do not mean to say that if you are middle-aged, discouraged, in a rut, it is impossible for you to get out of it. Although as a rule I prefer to hire young men, I have taken on middle-aged men who had got into a blind alley, but, through some revival of will and courage, had broken through the wall that blocked their way and had come to me for a chance to begin in another direction. And they made good. Courage is a quality which grows with use. It may take nerve to give up a position where you are doing fairly well and to take a lower one somewhere else. But if you have courage and ambition you can do it. The breaking away is the hardest part. But the man who does it when it does cost him an effort has the right stuff in him. The man who makes a change just for a change is merely a floater.

The Only Way

Real success has never yet been obtained except through sacrifice. My job is to try to develop men into good merchants; and someone asked me the other day how these men could help themselves in this process of development. My reply was:

"By study, more study, and then some more study."

I had the opportunity recently to look over the records of a New York business school which trains men by correspondence, and I confess that I was amazed at what I found. On its lists were over 1,300 presidents of corporations! There were 2,500 vice-presidents; 2.000 treasurers, 5,000 secretaries, and 11,000 managers. Do you realize what that means? Here were more than 20,000 men who had reached positions of high authority in business, but who were still eager to learn, to study, in order to become more efficient. That's the kind of stuff in a man which keeps him growing. It is perhaps a platitude to say that what you do in business hours does not count as much as what you do outside of them. But, like most platitudes, there's a lot of truth in it.

Only Picked 100

From among the five thousand applicants I examined last year I picked a hundred men. I was choosing them with a view to making them partners in our stores, but I think most employers also want men with the qualities for which I was looking. Of course I am glad to have a man understand the business. But there is something much more important than technical knowledge, and that thing is character.

One of the first tests to which I put an applicant is make our offer just as unattractive as possible. I tell him baldly that he will have long, hard hours of work. I describe the dull little towns in which he may have to live. I emphasize the small salary on which he must start. I make everything, except the ultimate goal of a partnership, as little tempting as possible. If the man is the kind that thinks through to the end, sees what he wants to gain, and is willing to pay the price for it, I'll find it out then and there. Men often smile, when I have painted the prospect in dreary colors, and say, "You can't frighten me. I want that job!" And if they are that kind, then we want them.

The Supreme Test

If they flinch at the picture I draw, they are not for us. Sometimes they hem and haw and say, "Well, of course, I have my wife to consider. I don't know how she'd feel about living in a little town."

When they talk like that I mentally reject them. Unless a wife is right behind her husband, encouraging him and spurring him on, she is more of a handicap than a helpmate. As a rule, a man with a nagging, selfish wife is not a success. He is discouraged and discontented. So when men suggest that their wives may protest, I agree with them—and they pass out of the door. I want a man who knows that his wife will go through anything to aid him in achieving success.

Must be Fair

Another quality which seems to me very important in a man is that he shall be fair and generous in his dealings with others. Recently I heard a story which illustrates my point: It seems that the manager of a chain store had run out of a certain line of goods and had appealed to the manager of another store in the chain for a share of the supply which this second man had on hand. This man consented—but sent some goods of poor quality which he had not been able to sell. He thought he was being very shrewd. But if I had the chance I would fire that man. He was not square. He hadn't the instinct of fair dealing. You can't build a solid, substantial house with decayed planks, no matter what kind of a veneer is put over their rottenness. That man's action was rotten, even though it was veneered with temporary shrewdness.

Makes Better Men

I am not orthodox, in a religious way, but I like to employ a man with what I should call the mind and morals of a

Christian. Somehow I think a man is better anchored who has a belief in a Supreme Being. His idea may not be the same as mine, but if he has one that really means something to him I find that he has a steadiness which other men lack.

I think it is a good thing for a man, a business man, I mean, to know something about the Bible. I was past thirty before I discovered that the Bible was a pretty fine business textbook! I do not mean to be irreverent when I say that Jesus and Moses were two of the greatest salesmen the world has ever known. Just take one of the Bible's stated principles—and there are scores of others which might be picked out —and see how it applies to business. I refer to the declaration that if a man would be first among you, let him become your servant. That principle is at the foundation of business success. I think it would be a good idea if the business colleges would include the Bible in their list of textbooks. I suppose its value lies in the fact that it teaches character, which is the very fundamental of success.

Studies His Face

In personal interviews I always study a man's fact, because his character is more or less plainly written there. I don't measure his eyebrows, or say that because his ear is formed like that of a criminal he must be dishonest. But experience has shown me that it pays to study a man's face. If he is furtive, sneaky, and unreliable, his eyes betray him by shifting constantly. If he is mean, spiteful, hard to please, his lips are thin and compressed. And while a receding chin may label wrongly a man who is really strong and forceful, it is usually the mark of indecisiveness.

I do not mean to say that these points are infallible. One of the most depraved men I have ever known could look me straight in the eye without batting an eyelash. But he was the exception that proves the rule.

Can Tell Quickly

One time when it pays to watch a man is when you ask for his references. If you do it suddenly and catch him off his guard, a man who has nothing to conceal answers without hesitation that he has worked for So-and-so. When men hesitate and look embarrassed it is the time to begin wondering why they do not speak up at once. We often find that such men have been discharged for reasons which they know would influence us unfavorably.

Men who talk too much or who jump at the chance too eagerly, without asking questions about the work, are also the kind of men to avoid. A boaster and braggart rarely makes good. And another thing: the man who changes jobs without knowing all about his new job is not displaying very much sense. A man should ask questions and show intelligent interest in his new work.

Likes Confidence

Because I want men who have self-confidence I watch for signs of nervousness and timidity. I have found that many men come to an interview of this sort with a feeling of "Well, I don't suppose I'll get the job, but I might as well try." Such men, of course, make pretty poor salesmen. They are the kind who lack initiative, dash, personality and, almost always, ability. We don't condemn a man just because he is nervous, of course, but we do expect his nervousness to wear off when he has been talking a few moments.

Of course, what we especially want is what you might call partnership material. And to fit this requirement men must be workers and salesmen, but also able and willing to train other men. This is the way I put the scheme to them.

Become a Partner

Suppose you come to one of our stores and, after you have proved your ability as a salesman, you become head man, or assistant to the manager. While you have been working there the manager who trained you has been seeking the opportunity to open new stores in other towns. When he finds the right town, he recommends you as the prospective manager of the new store. If we approve the recommendation, we then put you in charge of a tryout store. If you make good, you become manager of one of our stores with the privilege of buying a one-third interest with the money loaned to you by me, or the senior partner. In other words, you are now a partner in a store.

An Endless Chain

Now begins the working of the endless chain. You, as manager, must train a head man in your store, and in time recommend him as manager for another which you desire to open. When he is placed in charge and makes good in a tryout store, he is then sold a one-third interest in a new store, and, as manager, proceeds to train another man. In this way, new stores are constantly being opened.

Every employer is always looking for men who really love to work. Yet work alone is not enough to make a man truly successful. Thousands of men can echo that, some of them very bitterly. They have worked, they say, but have not reached any real height of success. Unorganized work, work performed without an eye fixed on the ultimate goal, is generally futile. A writer has said that a man of ordinary mind, body, and attainments, if inspired by some high ideal, accomplishes far more in life than the man of the finest mental and physical equipment who drifts.

Requires Attention

Unlike the famous epigram of the cowboy who said, "I have always liked my business, but it has never attracted my attention much," a man's business must attract his attention. History has shown us that everything really worth while was accomplished because something did attract someone's attention very much. When Herschel, the astronomer, was working with his instruments, he often refused to take his hands from his work, even to eat his supper. So, in order that his work might go on, his sister Caroline often fed him with her own hands. Meanwhile, Herschel himself was so absolutely aborbed in his work that he did not even know he was eating. It is that type of concentration and unswerving purpose that wins in life.

On Small Salary

In training men we always start them on a small salary, partly because we want to see how they will manage on it. We figure out what it will cost a man to live in a small town, and in accordance with what the volume of business justifies. How he gets along is not only a clue to his character, but it shows what his business capacity is. If he finds ways and means to eliminate waste in his own affairs, to practise economy, to get good value for every dollar of his income, it is fairly safe to conclude that he will be able to run a business on those same sound principles.

We even make our managers live within their salaries, without drawing on their profits. Some men in business often get their pockets mixed, you know. Instead of living on the money in their own pocket, they draw some from the pocket of their business. Instead of running the business as something distinct, they confuse themselves with the business, and soon begin to think that they and the business are one; that the profits can be used as desired, and that the current cash is always available for their needs or pleasure.

Needed in Business

Some managers, for example, want to buy a home or an automobile with the profits of the first year or two of the business. They do not realize that, though they have earned their dividend, the profits must stay in the business until it has flourished sufficiently to warrant the drawing out of a few thousand dollars. In addition, managers are expected to take their profits and open up new stores in which to put their head men. But, unless they are saving, this cannot be done.

In training men we have the unusual advantage of being absolutely confident that our managers will help us in every way possible. It is to their interest to do so, you see, because until they have a man properly trained they cannot put him in charge of a store. Therefore, they encourage and aid him in every way, whereas under other systems a manager who sees a man coming to the front worries for fear he will take his job away from him. Then, instead of aiding him, he either discharges him or holds him down as much as possible, this naturally being to the detriment of the business.

Other Essentials

Yet, while hard work and determination are factors, there are other things which must be considered. We ask our men if they are going along doing every day the things they did yesterday in the same old way, or whether they are studying, trying to improve themselves in order to prepare for the larger duties and responsibilities which may arise.

In twenty years, the entire personnel of an organization changes to a large degree. Therefore I ask a man if it is his aspiration to be the president, or one of the board of directors? Or, is he saying to himself, "Oh, there's no chance! I can never get there." If they are doing that, I point out that they certainly will not get there if they do not see the possibility and make the effort.

Encouragement Pays

Each year, as I see more of men, my belief that encouragement and cheer always pay increases a hundredfold. Time and again I have seen men who were about to give up in despair get back on their feet simply by knowing that someone believed in them.

I remember once that a young man from my own home town was about to quit his job in one of our stores. His friends and my friends had told me, when I put him to work, that he had never been any good, and never would be. They even told him that fact; but wanting the chance to see for himself how he would turn out, he asked for a job and I gave him one.

In less than a year I heard how discouraged he had become. He was out in Idaho, in the dead of winter; and knowing the situation there at that time I sat down and wrote him a long letter, telling him I believed that he could make good and that I would be bitterly disappointed if he didn't.

Stayed and Won Out

As I afterward learned, the same day he got my letter a letter from his home town arrived scoffing at his pretentions of being a business man and telling him that he had better quit, and come home and have a good time.

He said that if my letter hadn't arrived the same day he would have given up the ship. Encouraged by my faith in him, however, he remained in Idaho and won out! To-day he is one of our most successful men.

To help men succeed, you have got to have faith in them. And you must let men know that you do believe in them. I remember another time when faith and encouragement helped another man to make something of himself. This man, put in charge of one of our stores, fell down on the job. He came to see me, and when I asked him if he thought he could make good if given another chance, he said he thought he could. Whereupon I offered him another job on the spot.

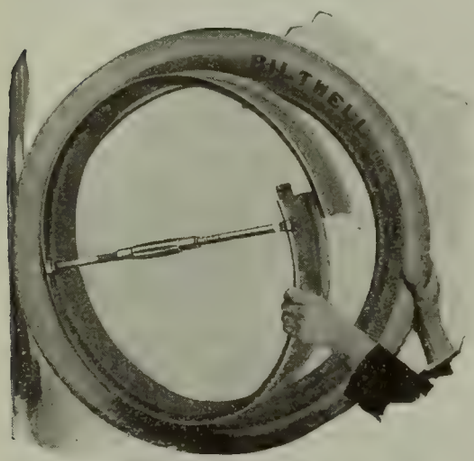
"But I haven't a cent in my pockets," he told me. "I can't even move my wife and children to that town."

Loaned Him $50

I loaned him fifty dollars, and he packed up and went to the store to which I had

(Continued on Page 66.)

NEW HARDWARE GOODS

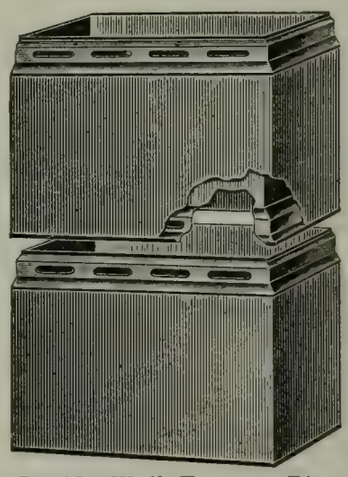


OFFERED TO CANADIAN HARDWAREMEN

STEP PLATE

The Tyler Manufacturing Co., 64 Pearl Street, Boston, is putting on the market a safety step plate. The new type has a separate centre in colors, and the plates are supplied bearing the names of popular makes of cars in the centre. These foot-plates, it is claimed, provide a sure footing at all times, and thus help in preventing accidents. It is stated that they keep the inside of the car clean, that they are easily cleaned by washing or brushing, and that they may be readily attached to any car.

SPLIT RIM EXPANDER



The Universal split rim contractor and expander, manufactured by the Moss-Ochs Co., 9801 Manor Ave., Cleveland, Ohio, makes tire changing easy, it is stated. Any car owner, it is claimed, with this device, can change tires on the road quickly. It is stated that all that is necessary is simply to clamp the tool on the rim and twist the buckle to expand or contract, the tire being quickly removed or replaced. It is claimed that this is the only tool of its kind that will operate successfully on every size and make of split rim, and that it unlocks, contracts and removes a rim in a few seconds without prying, hammering or damaging the rim or casing. It is stated that the tool will pay for itself many times over in the saving of tubes, casings, rims and clothing.

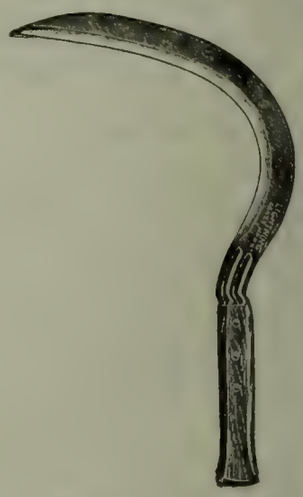
Universal Split Rim Expander

DOUBLE WALL FURNACE PIPE

Double wall furnace pipe, manufactured by the A. H. Power Furnace Co., 1-3 Hayden Street, Toronto, will, it is claimed, give more heat with less fuel, and is quicker and easier to erect than other kind. It is made, it is stated, with an air space all around. This, it is claimed, makes it an absolutely safe pipe and will prevent fires due to over-heated piping. The double wall furnace pipe, it is stated, is perfectly insulated, and is the most efficient and least hazardous pipe on the market. It may be installed, it is stated, in old as well as new houses.

Double Wall Furnace Pipe

FIRELESS COOKER



The Thermiso fireless cooker is manufactured by the Thermiso Company, whose selling agents in Canada are Joseph Taylor & Son, 53 Yonge Street, Toronto, and J. Arthur Painchaud, 40 St. Ursule St., Quebec. This cooker, it is claimed, has maximum heat retaining power, because it is cylindrical in shape and has ample and uniform thickness of insulating space in all parts. It is made, it is stated, of galvanized sheet steel in three sizes. It has an adjustable nest cover. The cooker, it is stated, is built on the same principle as a thermos vacuum bottle and it is claimed it will keep food, beverages and waaer hot or cold for a long time.

Thermiso Fireless Cooker

GRASS HOOK

The "Lightning" Grass Hook, manufactured by the Dunn Edge Tool Co.,

Lightning Grass Hook

Wiebusch & Hilger, Ltd., exclusive sales agents, 106 Lafayette Street, New York, has a blade, it is stated, of tempered steel, oil finish, ground sharp and polished on cutting edge. It is specially designed, it is stated, for easy and very rapid cutting, having a flat tang riveted to a hardwood handle. The offset handle, it is claimed, saves the knuckles.

KLOSET KLEAN

Kloset Klean, manufactured by the Chamberlain Desolvo Co., Ltd., of Toronto, is made, it is stated, for cleaning closet bowls only, and, it is claimed, it will keep them clean and sanitary. It is also claimed that it will not in any way injure the bowl or affect the pipes or plumbing connections. It is claimed that it will work quickly and thoroughly and that it leaves no fumes, no odor and no dirt.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

HARDWARE markets continue to show firmness. This is shown in a higher level of prices on brass goods, such as compression bibbs, stop cocks, stop and waste cocks and some lines of valves. Even at the new levels established, which approximate an 8 to 10 per cent. increase, the market is strong and no signs of any let-up are apparent. The situation in copper is the principal contributing factor.

The advance in ready roofing prices mentioned last week has become general. The market at the new levels is very firm and the outlook seems to be that the peak is still to be reached.

Cotton goods have come in for a further general revision upward. The lines affected include cotton rope, sash cord, awning cord and clothes lines. Lamp wick has also joined the advancing list and candle wick is also higher.

An advance in cartridge belts, gun cases and similar lines made in part or whole of leather has been recorded. This is a sharp jump and extends to practically the entire list. Brass curtain goods, such as curtain rings, pole sockets and kindred lines, including furniture handles, have reached higher levels.

The upward move in turpentine continues, another 13c per gallon being added to quotations prevailing last week. This establishes a new high record and the outlook seems to be for a continued firm market. Overseas demand for turpentine and rosin is heavy and insistent which, with the short crop, is boosting prices skywards.

Linseed oil has steadied down somewhat and whereas a slight advance is shown, the record jumps of past weeks are not revealed. The flaxseed market is rather a nervous one, buying, or the absence of it, moving prices up or down quickly. Supplies of oil are none too heavy, but buying has eased off, which is helping out in this respect.

MONTREAL MARKETS

MONTREAL, July 31—Price tendencies are still upward and some important advances are recorded. Sleigh bells of all kinds are advanced and further advances are probable for padlocks. Rat and mouse traps are up ten per cent. and prices on Reach goods withdrawn, advances being contemplated for this line. Jack screws are higher and drills and screw drivers of North Bros.' make are marked up about 10 per cent. All the regular lines of mirrors are advanced about 10 per cent. Cotton goods of all kinds have been revised upward and this includes rope, twines, wicks, clothesline, etc. Some of the lubricating oils are ruling with an easier undertone, but remain unchanged. Sisal rope is also ruling easier in tone, but without change as yet. Black sheets are firming and advances may be made for tinplate soon. Old materials are active and firm. Ingot tin is higher in price.

Sleigh Bells Advance; Jack Screws, Drills

Montreal.

SLEIGH BELLS, SCREWS, DRILLS, ETC.—Advances are in effect for all kinds of sleigh bells. This affects the string and team and shaft varieties. Some of the new prices are as follows: No. 033 per string, $1.05; No. 041, 85c; No. 096, $1.25; No. 79, $3.45; team bells, polished, No. 2, $5.40; No. 3, $6; No. 4, $8 80; No. 5, $10, and No. 6, $13. The corresponding prices for the rough finished are: $4.50, $5.50, $7.50, $8.80 and $11.20. The "Swiss" team bells are quoted at: No. 3, $8.80; No. 4, $10.50, and No. 5, $15.80. Jack screws are now quoted at a discount of 50 per cent. North Bros.' drills and screwdrivers are advanced about 10 per cent.

Rat and Mouse Traps Advance; Sport Goods

Montreal.

TRAPS, BASEBALL GOODS, ETC.—Advanced prices are in effect for rat and mouse traps of the Victor make. The increases approximate 10 per cent. Prices have been withdrawn on Reach baseball and other goods made by this firm and this presages an advance, the jobbers state. Increases in these lines may be very considerable.

Mirrors Advanced; Cotton Goods, Too

Montreal.

MIRRORS, TWINES, ETC.—Advances are made in the various lines of mirrors usually handled by the hardware trade. The approximate increases will amount to about 10 per cent. Cotton goods of most kinds are up in price. Wrapping twine in 3-ply balls is quoted at 77c per pound, and at 80c in 4-ply. In cones, the 3-ply is quoted at 75c. Sash cord is quoted at 77c, 76c and 75c per pound in Nos. 6, 7 and 8 to 12, respectively. Cotton clothes lines in 30 ft. are quoted up at $2.85 per dozen, 40 ft. at $3.60, and 48 ft. at $4.25. Cotton rope, 3-16 is quoted at 69c, and at 68c for ¼ inch and larger. Awning cord, No. 3½ is quoted at $3.30 for drab, and $2.65 for white, and at $5 and $4.25 for the No. 4 respectively. Cotton oil stove wicks are quoted at $1.10 per 32 yards for "A," $1.60 for "B," and $2.55 for "D." Oil stove wicks 3 by 8 are quoted at $6.60; 4 by 8 $9.25, and 5 by 8 $11.80.

Lubricants Easier; Gasoline; Oils Held

Montreal.

OILS AND GASOLINE.—There has been somewhat of an easier tone on

lubricating oils, but there are no changes and the distribution for the season having been pretty fully made there is simply a good sorting movement. Prices are held on coal oil without change at 21 to 24 cents per gallon. There has been a splendid movement of gasoline and gasoline lubricating oils. The better grade of gasoline is a big seller. Motor grade still holds at 33c per gallon.

Sisal Rope Easier; No Declines Yet

Montreal.

ROPE AND CORDAGE.—Just now there is not a great deal of business passing in rope. Sisal is ruling with an easier undertone, and while declines are not suggested as likely, there might be a revision downward if the market changes much for the raw material. Manila fibres are firm. One report stated that there has been a reduction in the production in the Philippines of 25 per cent. through drought conditions. This may not be definite but the conditions there have, at least, caused some alarm. The price basis still holds as follows: Pure manila, base, 34c; British manila 30c, and sisal 27½c.

Firm But Unchanged Are Wares and Stoves

Montreal.

WARES AND STOVES.—At this season of the year there is not a big present movement of various wares, but there is quite a seasonable outturn, the manufacturers report. Placing orders for fall delivery have been good. It is not improbable that there will be some changes an various wares made of tinplate as soon as the present manufactured stocks are disposed of. Stoves are, seasonably speaking, moving out fairly well and the undertone is very firm.

Firm Market on Wire and Wire Nails

Montreal.

NAILS AND WIRE.—Basic prices for raw material make the undertone a firmer one for there is a bigger and wider distribution in the larger centres of the States. This reflects here in a steadied undertone and the probabilities are that full values will be maintained. Standard wire nails and cut nails are unchanged at $4.75 per keg, while steel smooth wire No. 9 base is $5 per hundred pounds.

A Steadier Trade For Various Bars

Montreal

STEEL AND IRON.—The jobbers make no complaint of the volume of trade secured for iron bars and steel. There is not a heavy movement at this season of the year but it is quite satisfactory now. The undertone is, if anything, a firmer one and declines are not anticipated.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond too steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

BRIEFS FROM THE WEEK'S MARKETS

Cotton goods have all advanced again this week, sash cord, cotton rope, lamp wick, etc., being affected.

* * *

Linseed oil stepped up another nickel this week. Three dollars is about the lowest figure any place.

* * *

Compression bibbs are higher along with other brass goods. The advance is about 10 per cent.

* * *

Turpentine is up another 13c per gallon. Two-dollar turps is not far away now.

* * *

Mirrors have advanced about 25 per cent. "Looking up," one might say.

* * *

Yankee drills, screw drivers and kindred lines are up about 10 per cent.

* * *

Cartridge belts, gun cases, etc., are on the upward move.

* * *

Brass curtain rings, pole sockets, furniture handles, etc., have followed the advancing hosts. The advance equals about 10 per cent.

* * *

Door bells show an increase of 10 per cent. this week.

* * *

Soldering coppers at 44c per pound are up 2c over former figures.

Tinplate May Go Up; Black Sheets Firmer

Montreal.

SHEETS, PLATES, ETC.—There is indication now of some advances being made for various sheets. The low levels obtaining for some time, and particularly in view of firming tendencies in the south for some of these lines, may have to be revised, and if they are this will mean an increase. This will apply to tinplate particularly. In the meantime one jobber has advanced his prices for black sheets 25c per cwt.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 50	$6 25
12 gauge	5 55	6 20
14 gauge	5 60	6 35
16 gauge	5 70	6 50
18-20 gauge	6 25	6 35
22-24 gauge	6 30	6 40
26 gauge	6 35	6 50
28 gauge	6 65	7 00
GALVANIZED SHEETS—		
10¾ gauge	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Good Movement of Lead Products

Montreal.

LEAD PRODUCTS.—There is this to report on these products, and that is that the demand over each succeeding month totals up very well. There has been considerable plumbing work and this means that the made-up lines sold are considerable. Price tendencies are on the firm side for the pig market has been pretty well maintained.

Lead pipe	0 12½
Lead waste	0 13½
Lead traps and bends	15c
Lead wool, lb.	0 13
Lead sheets, 3 to 3½ lbs., sq., ft., lb.	0 12½
Lead sheets, 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra.	
Solder, guaranteed, lb.	0 35½
Solder, strictly, lb.	0 31
Solder, commercial, lb.	0 29
Solder, wiping, lb.	0 27
Solder wire (8 gauge)—	
40-60	0 35
45-55	0 37½
50-50	0 40¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Activity Reported In Old Metal Trading

Montreal.

OLD MATERIALS.—A speculative element has entered and there has been considerable trading as between the smaller buyers. They feel that a demand will come from the manufacturers soon and that this will be very considerable and ensure them good prices. As a consequence they are taking a chance and paying good prices. The quotations for the week are unchanged but full prices are maintained.

Dealers' Buying Prices—		
Pipe scrap, ton		12 00
Stove plate, ton		15 00
No. 2 busheling	7 00	8 00
Old rubbers, boots and shoes	0 07	0 08
Overshoes, lumbermen's rubber boots		0 05
Overshoes, etc. (trimmed)	0 05	0 06
Bicycle tires		0 03½
Automobile tires		0 04
Yellow brass	0 09	0 10
Red brass	0 17	0 18½
Light brass	0 07½	0 08½
Scrap zinc	0 07	0 08
Heavy copper	0 20½	0 22
Wrought iron, No. 1, per gr. ton		16 00

Ingot Tendencies Are More Steadied

Montreal.

INGOT METALS.—Comparing the present with even a month ago there has been a decided change for the better. Prices have been advancing on some lines, and in general there is a better basic condition. Tin is higher this week.

COPPER.—After a steady increase almost daily for some time, copper has rested and still holds at 27c to 28c. There is some movement although buyers are inclined to purchase sparingly at these figures.

TIN.—Higher prices are obtaining in England and the quotations are advanced

here. Fifty-nine cents is the base price this week.

LEAD.—Supplies have been held quite steadily and 7¾c per pound is named as the local quotation.

ANTIMONY.—At 10¾c per pound there is a fair but moderate amount of trading.

ALUMINUM.—Little interest is manifest in this. The price holds without change at 35c per pound.

SPELTER.—No new feature is reported. There has been a seasonable sale for the product at 10c per pound.

PIG IRON.—While manufacturing interests have been buying somewhat more freely of late, there is no local change and prices hold at $48 per ton.

TORONTO MARKETS

TORONTO, July 31—Higher prices on cotton goods are again in evidence this week, sash cord, cotton rope, awning cord, lamp wick, etc., all being affected. Gun covers, cartridge belts and kindred lines show a substantial advance also, with increases being evident in quotations just issued on automatic hand drills, screw drivers, mirrors, door bells, brass curtain goods, such as rings, pole sockets, etc. Ingot metals have shown activity again with tin and copper registering advances. Solder is higher and manufactured lead products are ruling with a very firm undertone.

Sash Cord Makes an Advance

Toronto.

SASH CORD.—The revision which has occurred in the price of cotton products has affected the figures which are being named on sash cord. An advance of 2c per lb. is shown in the new figures issued this week, the No. 6 now being quoted at 77c per lb.; the No. 7 at 76c, and the Nos. 8 to 12, 75c.

There has been an increase in lamp wick, which registers an advance in proportion to that named on the various other cotton products.

Cartridge Belts, Etc., Go Higher

Toronto.

HUNTING CLOTHING.—There has been an advance in various lines of hunting clothing and gun covers, cartridge belts and kindred lines. One jobber stated that on one line of gun covers which they have not had to buy for two or three years, they found that in replacing their stock they had to raise their prices from around $7 to about $16. This will give some idea of the rise in the market in these commodities in the past two or three years. Other lines have been quite similarly affected.

25 Per Cent. Jump Shown in Mirrors

Toronto.

MIRRORS. — New prices which have been named in the trade this week on mirrors provide for a sharp advance. New quotations which are now given out show an advance over former figures of about 25 per cent.

Automatic Drills, Screw Drivers Up

Toronto.

DRILLS, SCREW DRIVERS.—There has been notification come through, it is understood, of an advance in the price of Yankee automatic hand drills and screw drivers. As a matter of fact it is understood that the entire list of the Yankee products has been affected by the new prices which are out, and which will show a fairly substantial increase.

Higher Prices Named on Cotton Rope, Lines

Toronto

COTTON ROPE, CLOTHES LINES.—There has been a further advance recorded this week in the price of cotton rope. Quotations which are now in effect are for ⅛ in., 82c per lb.; 5-32 in., 81c; 3-16 in., 77½c, and ¼ in. and up, 76¼c to 76½c per lb.

Higher prices are being asked on cotton clothes lines, the figures now available being for the 30 ft., $2.80 per doz.; 40 ft., $3.35 to $3.40; 48 ft., $4.05 to $4.10, and 60 ft., $5.05.

New Prices Named on Awning Cord

Toronto

AWNING CORD. — The continued strength of the cotton market is reflected in a further advance this week in the price of awning cord. Quotations which are now being made to the trade are for the white, No. 3½, $2.40 per doz.; No. 4, $3.85, and No. 4½, $5.25 to $5.30. The prices which prevail on the drab are for No. 3½, $2.90 per doz.; No. 4, $4.30; No. 4½, $5.75.

Soldering Coppers Up 2c lb.; Door Bells Higher

Toronto.

SOLDERING COPPER, DOOR BELLS.—An advance of 2c per lb. is shown in the new price of soldering copper which is given out this week. The quotation which is now being named to the trade for the 3 to 8 lbs., which represent the base, is 44c per lb.

Door bells, a new price on which has been issued this week, show an advance over former levels of 10 per cent.

Brass Curtain Trimmings Higher

Toronto.

BRASS CURTAIN TRIMMINGS.—Brass curtain rings, curtain pole sockets, furniture handles and the various lines which are allied with these have undergone an advance during the past week amounting to 10 per cent. The stiffening market in copper is considered a contributing cause.

Compression Bibbs Undergo Revision

Toronto.

COMPRESSION BIBBS.—There has been a revision upward in practically all lines of brass goods and those which have not yet been changed will be revised very shortly and new quotations will show a higher level. The advance approximates from 8 to 10 per cent., and the lines affected include compression bibbs, stop cocks, stop and waste cocks, radiator valves, etc. The complete list with quotations which are now prevailing appear in the current market quotations.

Cordage Shows No Change; Twine

Toronto

CORDAGE, TWINE.—The market is still marking time and no developments of particular interest to the trade are reported during the week. The market on sisal is very weak, and that lower prices will prevail seems to be generally conceded. Whether this will extend to the manila is still problematical. However, in the meantime business is just a little bit quiet with the outlook considered quite satisfactory. Quotations which are now being made to the trade are unchanged for the pure manila at a base of 34c per lb.; British manila, 30c; New Zealand hemp, 30c, and sisal at 27½c. Sisal lath yarn is holding at 27½c per lb. base. Binder twine repeat business is not up to early expectations, owing to failures of grain crops in many localities.

Stove Outlook Good; Wares Move Well

Toronto.

STOVES, WARES.—Indications seem to point to a very active season in stoves and ranges. Stocks do not seem by any means too heavy, and, as far as can be learned from the manufacturers, production does not seem to be shaping up quite as heavily as they had hoped and this may result in a distinct shortage later on. Dealers are being urged to take delivery of their supplies early as there does not seem to be any indication that lower prices will prevail, and for those who want to have a stock to supply their customers, early buying will give them this desired result.

There is a very nice amount of business coming to hand on the various grades of wares and whereas booking business for fall is still curtailed somewhat, manufacturers view the outlook with optimism. Stocks are being ac-

cumulated as rapidly and in as great volume as possible to take care of the rush which is expected to develop at a little later date.

Oils Continue Active; Gasoline Too

Toronto.

OILS, GASOLINE.—Business continues to come along quite briskly in the various lines of lubricating oils and gasoline. Trade has been remarkably good all season in these products and there is no indication of any let up as yet. Prices have been maintained on a steady level, the quotation which is prevailing on gasoline being 32c per gallon, which is an unchanged figure. Quotations on coal oil range from 20½c to 23½c per gal., according to grade. These figures are steady at the advance which was put into effect two or three weeks ago.

Nails Hold Very Firm; Wire Firm Too

Toronto.

NAILS, WIRE.—Advices from the U.S. indicate that another maker has advanced his prices on wire nails 25c per keg, and the tendency seems to be towards firmness all the way through the market. Locally the situation shows no change from the past two or three weeks although there is an undertone of strength. Quotations are maintained at $4.70 per 100 lbs. base for the wire nails and $4.75 for the cut nails.

The situation in wire products is without any material change. There is a very nice volume of business coming to hand from all accounts and quotations are very firm at the base of $5 per 100 lbs. for smooth steel wire. Kindred lines are unchanged, in line with the usual extras from this base.

Bars Unchanged; Business Very Fair

Toronto.

IRON AND STEEL. — There have been no price changes recorded in the market on iron and steel during the week. The volume of business which is coming to hand seems to be very fair and jobbers are able to handle the business very satisfactorily. Receipts from the rolling mills are in line with the requirements of the jobbers.

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Wrought Pipe Firm; Tubes Unchanged

Toronto.

WROUGHT PIPE, BOILER TUBES. —A very firm market prevails on wrought pipe though no actual change in quotations is yet effective. Prices appear in current market quotations.

Boiler tubes reveal a little more activity than they have for some time past and quotations are unchanged at the following levels:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder Moves to Higher Levels

Toronto.

LEAD AND ZINC PRODUCTS.—Solder has undergone revision upward this week, and prices being named to the trade to-day are for the guaranteed, 35c to 37c per lb.; strictly, 34c to 35c; commercial, 32c to 33c; wiping, 31c to 33c; wire, 35c to 40c. This is due to the firm market in lead and sharp advance made this week in tin prices.

Manufactured lead products are very firm and an advance seems to be the outlook on this line. There has been no change this week from prices shown herewith.

Lead pipe, list, per lb.	$0 12½	
Lead waste pipe, list, per lb.	0 13½	
Do., over 8 inches, list, per lb.	0 14½	
Above subject to discount of 10%.		
Lead traps and bends	15%	
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 12	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 35	0 37
Solder, strictly, lb.	0 34	0 35
Solder, commercial, lb.	0 32	0 33
Solder, wiping, lb.	0 31	0 33
Solder, wire, lb.	0 35	0 40
Zinc sheets, per lb.	0 17	

Sheets Rule With Firm Undertone

Toronto.

SHEETS, PLATES.—Sheets are ruling with a firm undertone and there seems to be some prospects of higher prices being named. A very fair volume of business is being handled and outlook in this respect is good. The quotations being named to the trade are as follows:

14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

No New Developments in Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — No new developments are reported in corrugated sheets. Trade is very good and outlook promising. Eavetrough, conductor pipe and kindred lines are active and market rules with a firm undertone. Prices on these lines appear in current market quotations and are unchanged. Quotations on corrugated sheets follow:

Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Scrap Market a Little Quieter

Toronto.

OLD MATERIALS. — Business has eased away a little from the brisk tone shown the preceding couple of weeks, but this is not considered an ominous sign by any means. Prices show no change from following levels:

Dealers' Buying Prices—	
Tea lead	0 03½
Heavy lead pipe	0 05¼
Pipe scrap	6 00
Stove plate, per ton	13 00
No. 2 busheling	11 00
Yellow brass	0 09
Red brass	0 16¾
Light brass	0 07
Scrap zinc	0 06
Heavy copper	0 18
Wrought iron, No. 1, per gr. ton	14 00
No. 1 machinery cast, per net ton	18 00
Heavy melting steel	13 50
Old rubbers, boots and shoes	0 07
Overseas, lumbermen's rubber boots	0 04½
Bicycle tires	0 02½
Automobile tires	0 03¾

Tin Shows Sharp Jump; Copper Higher

Toronto.

INGOT METALS.—In a market where advances are quite rapid, there very often develops quite a wide range of quotations. This is shown this week in prices quoted on spelter, lead and antimony. Tin is up 4 to 5 cents per pound, and copper has advanced another cent.

COPPER.—The market is somewhat quieter but there is a strong undertone and higher prices have been named locally, to-day's figure being 27c per pound. There is a very nice volume of business being done.

TIN.—A sharp advance of from 4 to 5 cents per pound is shown in this metal this week in new price of 60c per pound which has been established. Greater activity is shown in sales.

SPELTER.—Quotations show a wide range of from 10c to 11½c per pound with the prospects pointing to the higher figures being generally adopted. A fair volume of business is offering.

LEAD.—Little change in prices is shown this week though the range has widened towards a higher level. Buying is quite brisk with quotations ranging from 7c to 8c per pound.

ANTIMONY—A somewhat stiffer feeling is apparent in this metal. Prices are named at from 10c to 11c per pound, which represents a 1c advance in some

quarters. There is a good amount of business being handled.

ALUMINUM.—New developments are lacking though somewhat greater activity in sales is noted. The price remains unchanged at 35c per pound.

LONDON MARKETS

LONDON, Ont., July 31—One of the difficulties many hardware dealers in this district are experiencing is to get enough goods to supply the demands. Many lines are scarce and very hard to get. A splendid volume of business is offering, not only in London, but throughout the whole district. Prospects for fall and winter business were never better. Collections are excellent. Building figures in London are surpassing all expectations and this is creating a brisk demand for many lines. Prices of all hardware goods are very firm and many lines are either advancing or are about to advance.

Coaster Wagons Have Been Advanced

London, Ont.

COASTER WAGONS. — Auto wheel coaster wagons have been advanced about fifteen per cent. The new prices have not yet come to hand.

Ready Roofing Likely To Advance Again Soon

London, Ont.

READY ROOFING.—Prices of ready roofing have advanced ten cents a square and, it is expected, will undergo another revision upward shortly. Firm situation in felt is given as a contributing factor.

Copper Rivets and Burrs Are Higher

London, Ont.

COPPER RIVETS, BURRS.—Steadily increasing prices of copper have resulted in advances being made in copper rivets and burrs. The advances on the list prices are as follows:

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding 1-3 of combined weight of copper rivets and copper burrs, list plus 5 per cent. Before there was a discount of ten per cent.

Copper rivets with copper burrs where the burrs are more than 1-3 of the combined weight of the copper rivets and copper burrs; copper rivets, now list plus 5 per cent.

Copper burrs up to 1-3 combined weight of copper rivets and copper burrs, list plus 5 per cent.

Copper burrs in excess of 1-3 of combined weight of copper rivets and copper burrs, list plus 40 per cent.

Copper burrs only, list plus 40 per cent.

Braided Awning Cord, Mason Lines Higher

London, Ont.

BRAIDED AWNING CORD, MASON LINES.—New and higher prices for braided awning cord are now in effect as follows: No. 3, $2.10 doz. hanks; No. 3½, $2.40; No. 4, $3.85; No. 4½, $5.25.

Mason lines are higher, the quotations being, No. 18x100 feet, $1.85 per doz.; No. 18x100 feet, yellow, $1.95 per doz.

Twisted cotton clothes lines are also higher, the new prices being, 30 feet, $3.35 doz.; 48 feet, $4 doz.; 60 feet, $5 dozen.

Seine Twine and Cotton Rope Higher

London, Ont.

SEINE TWINE, COTTON ROPE.—New and higher prices in effect on seine twine are as follows: No. 18 and larger, 1 lb. spools, 91c lb.; No. 18 and larger, ¼ lb. spools, 92c.; No. 15 and smaller, 1 lb. spools, 92c; No. 15 and smaller, ¼ lb. spools, 93c. Cotton rope quotations have also advanced, the prices being 3-16 in. 74c per lb.; ¼ in. and larger 73c per lb.

Lamp Wick, Candle Wick Are Revised Upwards

London, Ont.

LAMP WICK, CANDLE WICK.—Higher quotations on lamp wick are on the following basis: No. 0, 80c per roll of 32 yds.; No. A, $1; No. B, $1.40; No. I, $2 25.

Candle wick is now being quoted at 80c per lb.

Brass Moulding Hooks Are Reduced Slightly

London, Ont.

BRASS MOULDING HOOKS. — This line has been reduced slightly, the new quotations being, for No. 119, 60c per gross; No. 127, $1.20 per gross.

Snow Shoes Being Booked For Fall

London, Ont.

SNOW SHOES.—Snow shoes for fall booking are quoted as follows: Boys' No. 3 10x33 in., $2.40 pair; Ladies' No. 23, 11x36 in., $3.10; Men's tramping No. 22, 12x42 in., $3.50; Men's club No. 20, 14x42 in., $4; Men's shanty No. 30, 16x42 in., $4.35.

Sash Cord Prices Revised Upwards

London, Ont.

SASH CORD.—Cotton goods have advanced and higher quotations on sash cord are as follows: No. 6, 77c per lb.; No. 7, 76c per lb.; Nos. 8 to 12, 75c per pound.

Advance is Made in Price of Lampblack

London, Ont.

LAMPBLACK.—New and higher prices are in effect for genuine Germantown lampblack as follows: ¼ lb. pkgs, 40c lb.; ½ lb., 33c; 1 lb., 26c; assorted pkgs., 33c.

Both Wood and Felt Weatherstrip Higher

London, Ont.

WEATHERSTRIP.—Both wood and felt weatherstrip are higher for fall, the list prices being as follows, and subject to a discount of 55 and 5 off. No. 60, list 5c ft.; No. 61, 5c; No. 61½, 7c; No. 64, 10c.

Tinned Picture Wire is Slightly Lower

London, Ont.

TINNED PICTURE WIRE.—Prices of tinned picture wire have been reduced slightly and quotations are now, 25 ft. x No. 0, 50c doz.; No. 1, 60c; No. 2, 75c; No. 3, $1; 25 yds. x No. 1, $1.40 doz.; No. 2, $1.90; No. 3, $2.35.

Food Choppers and Bread Mixers Advance

London, Ont.

FOOD CHOPPERS, BREAD MIXERS.—Both Universal food choppers and bread mixers have been revised upwards, the new prices being: Universal food choppers, No. 0, $21 doz.; No. 1, $25.50; No. 2, $31; No. 3, $39.50. Universal bread mixers are quoted at the following figures: No. 4, $40.75 doz. and No. 8, $49.75.

Prices of Bolts May Be Advanced Shortly

London, Ont.

BOLTS, COACH SCREWS. — Prices on bolts are very firm and it seems possible may be advanced shortly. Quotations are as follows:

Bolts: Carriage—⅜ diameter and smaller, 6 in. long and shorter, 35%; ⅜ diameter and smaller, longer than 6 in., 20%; 7/16 diameter and larger, 15%. Machine—⅜ diameter and smaller, 4 in. long and shorter, 40%; ⅜ diameter and smaller, longer than 4 in., 25%; 7/16 diameter and larger, 25%.

Coach screws, 50% off list.

Tire bolts, 50% off list.

Stove bolts, 65% off list.

Rope is Firm; Nails May Advance

London, Ont.

ROPE, NAILS.—Rope is in steady demand and very good sales are reported. No change is shown in prices, which are as follows: Pure manila, 34c per lb. base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c. Nails are very firm and an advance in prices is expected. Quotations are at present: Wire, $4.70 base; cut, $4.75 base.

White Lead in Oil is in Good Demand

London, Ont.

WHITE LEAD IN OIL.—White lead in oil is selling well and the price is very firm, quotations being as follows: Pure, in tons, $16.35 per 100 lbs.; less than tons, $16.70.

Turpentine Firm; Rosin Advancing

London, Ont.

TURPENTINE, ROSIN.—Turpentine prices are very firm and the market is strong. Quotations are as follows: 1 bbl. lots, $1.95 Imp. gal.; 2 to 4 bbl. lots, $1.94 Imp. gal.; 5 gal. lots, $2.05.

Rosin has been very strong and advances are expected. Prices are at present: Casks, $9.50 per 100 lbs., gross weight; small lots, 12c lb.

Linseed Oil Prices Are Holding Steadily

London, Ont.

LINSEED OIL.—The linseed oil market remains very firm and good sales are being made. Prices are as follows:

	Raw.	Boiled.
1 to 2 barrels, gal.	$3 30	$3 33
3 to 5 barrels, gal.	3 29	3 32
6 to 9 barrels, gal.	3 27	3 30

Less barrels, add 10c gallon to above.

Wood Screws May be Revised Upwards Soon

London, Ont.

WOOD SCREWS.—Prices are very firm and it is expected that an advance may be made before long. Quotations are: F.H. bright, 77½ per cent.; R.H. bright, 75 per cent.; O.H. bright, 75 per cent.; F.H. brass, 55 per cent.; R.H. brass, 52½ per cent; O.H. brass, 52½ per cent.

WINNIPEG MARKETS

WINNIPEG, July 31—Price changes during the week are again fairly numerous, the majority showing declines over former quotations. Among these will be noticed such staple lines as shovels, spades, scoops, coil chain, log chains and tin plate, while lead pipe, lead waste and linseed oil advance.

Business in all lines is very brisk and many jobbers are working overtime to keep abreast of the rush. With harvesting operations started in many districts there is a heavy demand for all such lines as valves, packing, oilers, forks, etc.

Fifty Cent Drop in Annealed Wire

Winnipeg.

ANNEALED WIRE. — Prices on annealed wire have been revised downwards during the week and show a reduction of 50c per 100 lbs., making the base price for No. 9 $5, head of the lakes, and $5.50 f.o.b. Winnipeg. Net selling prices from Winnipeg stock is given herewith: No. 9, $5.50; No. 10, $5.56; No. 12, $5.70; No. 14, $5.90; No. 15, $6.05; No. 16, $6.20 per 100 lbs.

Reduction Made in Scoops and Shovels

Winnipeg.

SCOOPS, SHOVELS. — New prices just to hand from the manufacturers show a general revision in all lines of shovels, spades and scoops, all of which show a reduction on previous quotations. To-day's ruling prices on the various lines are as follows:

Shovels: Jones and Bulldog—"Black,, No. 2 D.H. round point, $15.95; L.H. round point, $15.95; D.H. square point, $15.95; L.H. square point, $15.95; Contractors No. 3, $14.15; $14.15; Corporation No. 3, $16.20 dozen. Olds and Fox—"Black" No. 2, D.H. round point, $13.75; L.H. round point, $13.75; D.H. square point, $13.75; L.H. square point, $13.75 dozen.

Spades: Jones and Bulldog—$15.95 dozen. Olds and Fox—$13.75 dozen.

Scoops: Jones' Rivetted—"Black," No. 6, $22.65; No. 8, $23.15; No. 10, $23.65 dozen. Jones' Socket—"Black," No. 5, $20.25; No. 6, $20.50; No. 8, $21.00; No. 10, $21.50 dozen. Black Cat and Crescent—"Black," No. 2, $18.10; No. 4, $18.60; No. 5, $18.85; No. 6, $19.10; No. 8, $19.60; No. 10, $20.10 dozen. "Moose"—No. 2, $19.50; No. 4, $20.00; No. 5, $20.25; No. 6, $20.50; No. 8, $21.00; No. 10, $21.50 dozen.

For full polished add $1.00 dozen net to above prices. For half polished add 50c dozen net to above prizes.

Prices of Cow Chains Will be Very Firm

Winnipeg.

COW CHAINS.—Bookings are now being taken by the Winnipeg jobbers for cow chains for fall delivery at present prices. Prices on this commodity are very firm and no further changes are to be expected this season. To-day's market prices are confirmed as follows: Open ring, No. 1-0, $2.60, special, $2, three chain, $2.60; No. 2-0, open ring, $2.90, special, $2.15, three chain, $2.90; No. 3-0, open ring, $3.15, special, $2.50, three chain, $3.15; No. 4-0, open ring, $3.95; No. 5-0, open ring, $5.05 doz.

Reduction Shown in Coil and Log Chain

Winnipeg.

COIL CHAIN, LOG CHAIN. — Coil chain and log chain prices have been revised downward during the week, based on new prices received from the manufacturers, all lines showing a reduction of from 50c to $1 per 100 lbs. To-day's market prices on the various lines are given as follows:

Coil Chain, "electric welded," 3/16 inch, $17.25; ¼ inch, $15.75; 5/16 inch, $13.00; ⅜ inch, $10.25; 7/16 inch, $10.00; ½ inch, $9.75 per 100 lbs. "Fire welded," ⅜ inch, $11.25; 7/16 inch, $11.00; ½ inch, $10.50; ⅝ inch, $10.30; ¾ inch, $10.20.

Log Chains, with hook and swivel, ¼ inch, $17.50; 5/16 inch, $14.75; ⅜ inch, $12.00; 7/16 inch, $11.75; ½ inch, $11.50 per 100 lbs.

Open Prices Only For Formaldehyde

Winnipeg.

BLUESTONE, FORMALDEHYDE.—Bluestone and formaldehyde are being booked for delivery up to March 1, 1920, but only at open prices, as it is said market conditions do not warrant manufacturers naming a price at such an early date.

Lead Pipe and Waste Are Revised Upward

Winnipeg.

LEAD PIPE, LEAD WASTE.—Lead pipe and lead waste, which have been declining steadily for some time, reacted during the week, prices advancing $1 per 100 lbs., making to-day's market price as follows: Lead pipe, $13.40 per 100 lbs.; lead waste, $14.40 per 100 lbs.

Slight Reduction in Tin Plate Price

Winnipeg.

TIN PLATE.—A slight reduction is recorded during the week on tin plate, which declined approximately 2½ per cent. below former quotations, with only a limited demand. To-day's market prices are given herewith:

Tin plate—	Full Boxes	Half Boxes
1C, 20 x 28 inches, each	$22.50	$11.75
20 x 38 inches, each	27.00	14.00
20 x 39 inches, each	.....	16.25
1X, 20 x 28 inches, each	26.00	13.50
20 x 38 inches, each	31.90	16.00

Bale Ties Drop 50 Cents a Hundred

Winnipeg.

BALE TIES.—Following a reduction by the manufacturers, new prices have been issued on bale ties, showing a drop of 50c per 100 lbs., both at Winnipeg and the head of the lakes. Good sales are reported in this commodity, particularly in districts where there has been plenty of rain. Prices now ruling are given as follows: 14 ga., Winnipeg, $6.75 per 100 lbs.; head of the lakes, $6.25 per 100 lbs.

Linseed Oil Shows Very Firm Tendencies

Winnipeg.

FLAX SEED.—Flax seed prices continue to advance with the result that a further increase is reported during the week on linseed oil, which moves up another 10c per gal., making to-day's selling price as follows: barrel lots, raw linseed oil, $3.10 gal., boiled, $3.13. A good number of sales is also reported even at this figure.

Very Strong Market For Turpentine

Winnipeg.

TURPENTINE. — Turpentine prices remain unchanged during the week, after a rise of 35c per gal. last week, and sales are reported around normal with fairly good stocks. To-day's ruling price is confirmed as follows: Barrel lots, $2 gal.; ½ barrel lots, $2.03 gal.; 5 gal. lots, $2.05 gal.; 1 gal. lots, $2.05 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., July 31.—The American Iron and Steel Institute has just given out the complete statistics of production of steel ingots and castings, rolled iron and steel, etc., in 1918. These statistics put the matter in a somewhat new light, by reason of the divergence between production of ingots and of rolled steel. During the year the trade had the benefit of monthly reports of the steel ingot production, and last April a preliminary statement of the year's total was given, agreeing almost precisely with the final total now given. It turns out, however, that the rolled steel output was a much smaller proportion of the ingot output than usual. This was due, of course, to the heavy cropping of ingots required by shell steel specifications, but so much was said about uses being found for discard steel that one had some reason to suppose that this heavy cropping would not operate to decrease greatly the production of finished rolled steel. If, for instance, one-third of the ingot was cropped, that steel would be lost as regards shell material, but if it was rolled into light rails, or angles for cots, or concrete reinforcing bars, it would constitute rolled steel. The fact, however, is that while in 1912 and 1913 the total output of finished rolled steel was 76 per cent. of the steel ingot production, in 1918 the proportion was only 69 per cent. That difference of 7 per cent. meant, on the 43,051,022 gross tons of ingots produced in 1918, no less than 3,000,000 gross tons of rolled steel, or 250,000 tons a month. This information helps to explain, to an extent, why the director of steel supply found the supply of steel so much below what he wanted, when nearly every month the statistics of ingot production seemed rather favorable.

The production of ingots in 1918 was 1 per cent. under that of 1917, while it was 4 per cent. above that of 1916. Thus the three great war years ran quite closely together. The 1918 production was 42 per cent. greater than the production in 1912 and 1913, years that showed practically the same tonnage, and by far the best tonnage years before the war. The rolled steel output in 1918 was 29,581,778 tons and the rolled iron output 1,573,976 tons. The rolled steel output was only 28 per cent. more than the 1912-13 output, while the rolled iron output actually showed a decrease of 5 per cent. from these pre-war years. The total of the two was 26 per cent. greater in 1918 than in 1912-13, while ingots showed an increase of 42 per cent

The production of sheared plates, ¼ in. and thicker, was 3,445,284 gross tons, or more than 2,000,000 tons increase over the 1913 output. This was due to the pressure for ship plates, and the increase was accomplished only by the building of many new plate mills. Some of the mills, however, were not completed until nearly the end of 1918, and thus the present capacity is much larger even than the heavy output in 1918. Undoubtedly there will be a surplus of plate rolling capacity for many years.

Production of shell steel is not shown in the statistics. The rolled rounds are included with "merchant bars," which showed a gain in 1918 of about 2,500,000 tons over the 1913 output, while the steel for forged shells was included with "rolled forging blooms and billets," which showed an increase of over 1,000,000 tons. As there was no other demand of importance that would swell the production of either merchant bars or forging steel, it may be assumed that the production of shell steel in the United States was somewhere in the neighborhood of 3,500,000 gross tons.

Other lines of rolled steel showed about the same tonnage in 1918 as in 1912 and 1913, except that some showed rather sharp decreases, rails, for instance, falling off about a million tons, to 2,540,892 tons.

Production of steel ingots at present may be estimated as being at the rate of about 35,000,000 gross tons a year, which would be 71 or 72 per cent. of capacity, taking capacity at 49,000,000 tons. While a 35,000,000 ton rate would show quite a decrease from the 43,051,022 tons actually produced in 1918, the output of finished rolled steel would not show a corresponding discount, for it may be assumed that the proportion of rolled steel to ingots is back to the 76 per cent. recorded in 1912 and 1913, and thus it would be equal to a rate of about 26,500,000 tons at the present time, this comparing with the output of 29,581,778 tons in 1918. The difference is less than last year's output of shell steel, and thus one may say that in all rolled steel outside of shell steel the present production is at a greater rate than the average of 1918.

Steel Demand

Demand is improving somewhat, even in this summer period, usually so dull in the steel trade. Merchant steel bars are mentioned in particular. For some time there has been heavy demand from the cold drawn steel makers, producing shafting and screw stock, and now there is much more widespread demand, the current orders being not much below capacity. Demand for butt weld sizes of pipe continues to improve. As for lap weld, the mills are turning away more business than they accept, being filled up on account of the oil boom.

Export demand is not as heavy as a month ago. The slump in exchange is probably responsible for some of the decline in European buying. Japan and China are still mentioned as being the best buyers. In their case there is no difficulty about exchange, and transportation conditions are particularly good as the Japanese vessels operate under quite favorable conditions. While the export market is somewhat quieter, it is not expected that there will be any material decrease in exports over the average of the past few months, exports having been reported at about 400,000 gross tons a month, in pig iron, billets and finished steel products.

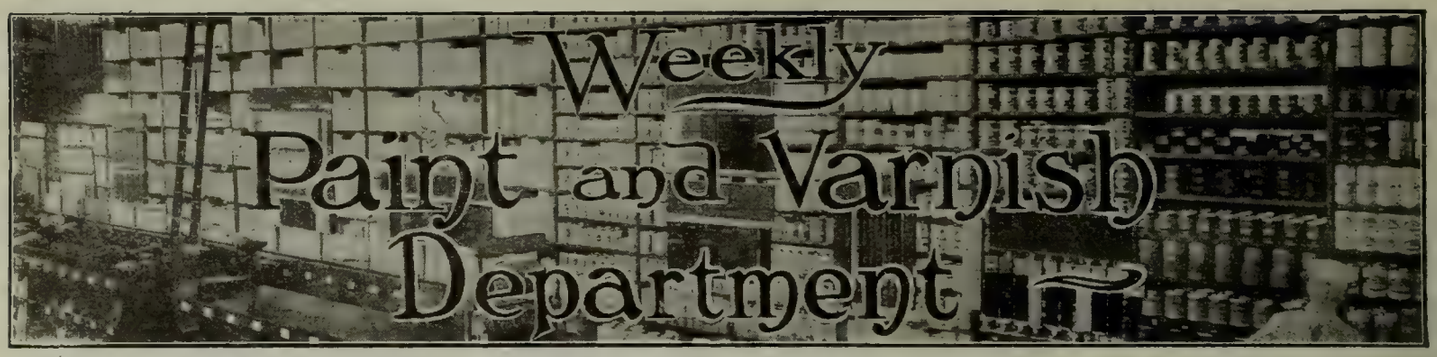
Prices

The balance of probability is that there will be no general advances in steel prices in the near future. All possibility of there being declines is regarded as removed. It is true that a few independent producers have been disposed to advance prices, but such advances when made have not been followed by others. It was July 10 when the Wheeling Steel & Iron Co. advanced butt weld pipe $5 a ton, and lap weld pipe $10, but up to date no other producer has advanced pipe. A fortnight ago the Youngstown Sheet & Tube Co. advanced nails 25c a keg, staples $2 a ton and the extra for coppering wire $5 a ton. A few days afterwards the Cambria Steel Co. made some advances in its wire products, but not the same advances as had been made by the Youngstown Co. Cambria advanced both polished and cemented coated nails 25c a keg, but also advanced plain and barb wire $2 a ton, products which the Youngstown Co. did not advance at all. The Steel Corporation continues to be opposed to the making of any price advances, at least before the end of the year.

On the Side

CLOTHES AND COFFEE

When in the army I was accompanied by a sergeant that, to hear him talk, was one of the brainiest men Uncle Sam had hired. On pass one Sunday, in a certain town, a young woman we met on the street asked us if we cared to go to her house and have a cup of coffee. On arriving we were introduced to her mother, who made excuses in regard to her appearance. She remarked: "I'll go and put on the percolator."



The sergeant said: "O, you look all right the way you are."—T. F. in the Chicago Tribune.

TIP FOR BURGLARS

A Pennsylvania man advertised a liberal reward for a bunch of keys he had lost. That night the finder of the keys entered the man's office, unlocking the door to the office and his safe with the keys, and took $184. Burglars, as well as chicken thieves, read advertisements.

RETAIL CLERKS MEET

Tom Mellalieu and James MacArthur Conner addressed a well-attended meeting of the Retail Clerks' Union, held recently in the Labor Temple, Toronto. This association has been organized some weeks and is adding to its ranks every week.

"Oh Ye of Little Faith"

Loss of Belief in Paint as Means of Protection and Preservation Spells Loss of Business —Morale Represents Three-Quarters of Selling Campaign—Consider Relative Values and Paint is Cheap

LACK of faith engenders lack of initiative and lack of enterprise and fosters slow business and little profit.

If you have lost faith in the service and efficacy of paint, quit selling it.

Some paint dealers have developed the spirit of a knocker, whilst they try to show the face of a booster—it can't be done—no paint dealer can profitably serve two such diametrically opposite business masters.

If a man loses faith in the fact that paint is a vital necessity to mankind, he had best quit when he loses that faith. If he does not believe that paint is an economic necessity then his sense of values are out of perspective. If he does not realize that the relative value between paint and the materials it protects have scarcely changed, then it is high time for him to cast about and see where he is at.

Increased Value

Paint as a means of protection and preservation has taken on an increased value to the consumer, beyond its actual rise in cost.

Go out into the market for lumber, structural steel, and labor for their erection, and compare prices with those that existed five or six years ago. Then consider the protective and preservative value of a gallon of paint against the three or four hundred square feet of surface it will cover two coats.

Figure the Problem

Figure the problem soberly. Isn't paint worth its price? The value of the service that paint can give has risen in proportion as lumber, steel and labor have risen. From this standpoint the actual price of the paint can soon be forgotten.

It is the purpose of this article to go into the whys and wherefores of the rise of the cost of paint. That doesn't concern the consumer in so far as the paint merchant's selling plans are concerned.

What one should be concerned about is, whether the value of service of paint has increased or lessened.

Protective Services Greater

The protective service of good paint has increased. Relative to the value of property, paint is more needed to-day than ever before and costs less from the fact that each square foot it preserves costs more.

Why Lack of Faith?

Then why the lack of faith shown by not a few merchants in selling paint?

Is it cold feet, or lack of backbone?

Because the prices of paint had to go up, purely from fundamental conditions existing in the markets for raw materials, do you do your customer any less service in selling him paint?

If a man thoroughly maintains his belief in paint, not merely as an article to be bought and sold, but as an article that renders mankind an economic service, he is going to forge ahead and make his paint department a success.

A Few Questions

Will the price of paint maintained to a standard quality under present conditions lessen the sanitary safeguards that it provides on walls, woodwork and floors? Will it, because of price, become any less the insurance than it has been against weather and decay? Will its decorative results, become of less assistance in renting or getting a good selling price for a piece of property?

Paint of good quality has lost none of its cunning nor its service in these respects.

Prove Your Faith

Then why lay down to a customer who raises these objections and lose a good sale?

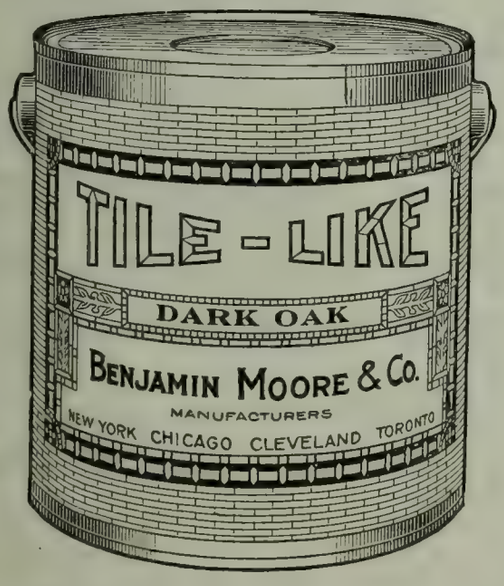
Such arguments should bring out the qualities of your salesmanship, and your ability as a merchant. Overcoming them will prove your faith in paint and service.

Laying down to such arguments as the customer brings up and letting him run all over you prove both lack of faith and lack of ability to go against the stream of fight.

Expense of Doing Without Paint

Lots and lots of customers are coming into the stores of retail paint dealers to-day and exclaiming: "Paint prices are too high, I won't pay that for paint."

Have you ever stopped such men and pointed out to them what it is costing them to do without paint? Have you ever seriously undertaken to imbibe into your sales staff the fact that it is not so much the high cost of paint as it is the high cost of doing without it that will much sooner put a hole in the property owner's pocket book?



Of course if you haven't faith in paint you can't do it; but it you have an everlasting stand-patter's belief that you have a commercial mission in benefiting the physical, material, and aesthetic welfare of your customers you can do it.

The Brush Department

Sell More Brushes by Creative Methods

Everyone Who Has a House, a Store or Building is a Prospect, Also Every Farmer, Every Painter and Every Mechanic—Keep Your Stock Well Displayed

IN a previous article mention was made that a hardware man might possibly triple his brush business this year, and emphasis was laid on Painters' and Household brushes, with special effort to sell the better grades, as these yield greater profit to the dealer and greater satisfaction to the customer. This will carry you a long way to a triple brush business, but there are other ways to speed up sales of which mention should be made here.

The Steady Demand

Brushes are always in steady demand, but to the hardware merchant who will realize the opportunity this demand can be multiplied by creative methods. Every householder, every farmer, every mechanic, every painter, every building in your community is a prospect, with floors to sweep and scrub and clean, with inside and outside walls to paint, with windows to wash, clothes to brush, and chins to lather, and shoes to polish; one customer may wish to brush out his furnace pipes, or he may require an automobile brush to clean his car, or a brush to clean his horse or cow, or even his dog.

Or it may be a brush to get the cobwebs down, or a brush to scrub his back, or to clean his milk cans, or his separator tubes, or closet bowls, or even to tar his roof, or stencil his fruit boxes. This list of creative business ideas for brushes is a never ending one.

Keep Them Displayed

There are a hundred ways and means of getting your customers interested in brushes, no matter how many you now sell. Selling more is only a matter of getting them out of drawers and beneath the counters, displaying them attractively, and telling of their usefulness.

Did you ever make a canvass of your fellow merchants? Every drug store, barbers' shop, every pool room, every dry goods, jeweler's, grocer's, in fact ever kind of store, have floors to be swept twice every day. They need a hair floor broom, 16 or 18 in. wide, to sweep them with. Here is a fertile field for your labor, but that is not all. They will need other brushes, floor oil and the like, and your solicitation of them will get you better acquainted and will bring trade to you from them whenever hardware goods are needed.

Mail Order Paint Firm To Seek Canadian Trade

Under a Chicago date line the American Paint Journal runs the following:

The mail order houses evidently are finding the paint and varnish business a good thing and certainly they have been working it to a frazzle this year, and coincident with the rumors that the "Big Five" packing houses contemplate entering the paint and varnish field, along with edible oils, etc., it has also been said that the mail order houses intend to develop their paint and varnish trade on broader plans than before.

This has some confirmation in the announcement that Sears-Roebuck & Co., Chicago, will erect a large factory for the manufacture of paint and varnish exclusively. The factory site fronts 400 feet on Filmore street and the B. & O.C. T.T. Railway, and 147 feet on Kosture Avenue. The ground was purchased from Lucy Kimball Battle, of St. Louis, for $20,100.

The plans are being prepared by Architect Geo. C. Nimmons & Co., and it is said the building will be five stories high, will cost approximately $400,000, will cover the greater portion of the lot and will be equipped with the most modern machinery and labor-saving devices to facilitate quantity production.

Obviously the company has an optimistic view of the future paint possibilities. It is said that while they will take an aggressive part in the distribution of paint products throughout the United States and Canada, they also plan to sell paint direct to consumers throughout the civilized world.

FINDS ELEVATOR USEFUL

It was an advertisement of a well-known elevator company in HARDWARE AND METAL *that caught the eye of the manager of the Miller Hardware Company, of Virden, Man. It read: "Put in a freight elevator and double your floor space."*

It so happened that this firm was making little use of a large flat over its store. It was customary to place the larger articles of heavy hardware in the basement as a narrow stairway presented difficulties in the way of storing them upstairs. The elevator was installed at a figure below the hundred dollar mark (for this was before the war) and the firm virtually doubled its floor space. Not only is the upper flat filled to capacity with stock, but the elevator runs through to the basement, and a pull of the rope conveys the heaviest articles up or down.

"The price of these things is ridiculously low," said the manager, "so low in fact that even the poorest merchant in the country cannot afford to do without one. It has been worth its weight in gold to us. Any carpenter can instal it."

FIRST LARGE VESSEL

The first large steel cargo vessel built in Australia was launched at Walsh Island, Newcastle, in May, 1919.

CHINA PRODUCING CEMENT

The cement requirements of North China will probably soon be supplied by domestic production. One large concern is said to control this industry in North China, and its plant is located at Tangshan, a small town about one hundred miles north-east of Tientsin, on the Peking-Mukden Railway. It is equipped with modern machinery, and secures its supply of limestone on the site of the works.

IT'S ONE THING TO DESIRE A GOOD JOB

Continued from page 55

sent him. Two months later, I got back my fifty dollars, and a few years later I was in their house having supper with them. Backed by faith and courage, he had achieved success and was on the road to prosperity.

But it wasn't until a friend of his told me that I learned how the fifty dollars had been paid back in two months. This man, his wife, and his children had lived on bread and water in order to return the loan.

Faith and encouragement will work wonders in a man. Yet there must be a foundation in the man himself to work these wonders on. Remember that it is up to you! If you are not getting along where you are, first study the whole situation honestly and see whether the trouble isn't with you and not with the job.

But if you make up your mind that the job is wrong, or, at least, the wrong one for you, and if you have the nerve and the will and the faith in yourself and in humanity to do it, break away, and start out for a goal you can see and one you will fight to reach.

Brushes that Pay

Build up a profitable brush trade by recommending and selling brushes that give satisfaction --- maximum wear with efficient service, resulting in satisfied customers and bigger sales. Boeckh's Rubber Set Brushes enable you to do this.

BOECKH'S RUBBER SET BRUSHES

are guaranteed to give complete satisfaction. The bristles can't come out, and users are assured of a finished job, unspoiled by imperfections and streaks caused by loose bristles.

Further interesting particulars and prices will be cheerfully submitted.

The BOECKH COMPANY, Ltd.

TORONTO, CANADA

"OH YE OF LITTLE FAITH"

Continued from page 64

Have You the Right Line?

Perhaps you have lost faith in the brand of paint that you handle. If such is the case, then switch your account and be quick about it. Like as not you are doing an injustice to the manufacturer who is selling you. You and he had better part company right away. Get a brand of paint you can believe in and put large-sized chunks of faith in along with your selling talk and advertising.

If you are selling a man who is engaged in any manufacturing business it will not be difficult to show him why prices have gone up, and that the relative service value of paint has not gone down. The chances are he is up against the same proposition in the product that he is putting out.

Relative Values

It can be easily shown to farmers that the same amount of wheat that bought a gallon of paint five or six years ago will buy more paint to-day than it did then. Butter and eggs and bacon and lamb look smaller besides a gallon of paint than they did five or six years ago.

The laboring man and the mechanic do not have to work as many hours to-day to buy a gallon of paint as they did five or six years ago.

And yet that gallon of paint will protect property that is of a great deal more value to them to-day than it was that length of time ago.

What is there to lose faith in, in selling paint, good paint, paint that is made to protect and preserve and maintain the value, comfort and luxury of the home?

Means Loss of Money

Again let it be repeated that if you are losing faith, you are losing money, and when you lose these you are letting the whole foundation of your business morale slip away from under you.

Napoleon said that three-quarters of a victorious army consisted in morale, the other one-quarter, guns, ammunition and officers.

Keep Up Your Morale

If you are letting the necessity of present high prices rob you of your morale, the three-quarters of your business necessary for success, then it is high time to take stock of your own mental attitude towards your goods.

Paint selling has behind it sufficiently numerous and sound economic arguments to maintain a good aggressive business fight.

Think over these ideas about faith, morale, and belief in your goods and it is a pretty safe guess that prices will take care of themselves.

SAYS WINDOW GLASS OUTPUT WILL SHOW A DECREASE

Among the speakers at the convention, National Association of Window Glass Mfrs., in Atlantic City, was H. S. Wherrett, vice-president and chairman of the commercial department of the Pittsburgh Plate Glass Co. He stated that the plate glass outlook was most encouraging and that as the stocks of the country were below normal, and the manufacturers having plenty of orders on their books, there would be a demand for all the plate glass produced this year. H. R. Hilton, statistician of the association, stated that the total window glass manufactured in the United States in 1919 will not exceed 6,500,000 boxes, a decrease of about six per cent. from that of 1918.

Putty and White Lead in Oil May be Advanced

THERE is every reason to anticipate advances for both white lead in oil and putty. The immediate reason for this is the higher prices now obtaining for linseed oil, and in view of the fact that costs were based on oil at around $2 when putty prices were last fixed, it is obvious that the cost to manufacture has greatly increased.

The Montreal makers feel that there will be early increases made for putty. The market has ruled with a strong undertone for some time past, and with new high prices each week for linseed oil the prospect of revised prices becoming effective for putty have become a stronger possibility. With quotations over $3 this week on oil the likelihood of advances materializing before the week-end is a very strong one.

White Lead in Oil, Too

While the content of linseed oil required to compound dry lead into the commercial white lead in oil is rather small, the price of oil has so soared since last prices were established that new manufacturing costs have been established. In addition to this there has been a firming of the pig lead market within the past week or two. This leaves the cost of pig lead higher than for some time past, and there is prospect of further advances being made. Corroders anticipate that there will be advances therefore in the commercial mixed commodity soon. The change, if made, will probably come within the next week or ten days, perhaps sooner.

SUBSTITUTES FOR LINSEED OIL ARE BEING DISCUSSED

Discussing the linseed oil situation as it exists at present, the "Paint, Oil and Drug Review" says:

"Whatever the advantages of linseed oil may be as a vehicle for paint, and they have been shown by the experience of centuries to be many, they are to a great extent offset at the present time in the minds of many manufacturers by a prohibitive price, and as a result the sales of soya bean oil, china wood oil, perilla, and many grades of fish oil have begun to jump. It may be that the present scarcity will prove a blessing in disguise by teaching grinders generally the good qualities of a number of substitutes already known and perhaps turning the attention of chemists and scientific paint men generally to the development of new vehicles as yet unknown.

The most important property of linseed oil is, of course, its "drying quality," which means that when exposed to the air it undergoes a change which gives it an elastic semi-solid surface. This process can be hastened by the use of certain chemicals. Other oils have the same property in greater or less degree and the chemical dryers for linseed are far better understood than those for fish oil, for example, and yet no New Englander has to be told that after a paint mixed with fish oil once dries it has a surface which will far outlast any linseed oil paint, and the same may prove true of other oils.

It is not the purpose of this article to boost any paint vehicle to the detriment of any other, but simply to call the attention of the trade to the wide and interesting field for investigation and the intriguing possibility of large profits for the man who discovers a vehicle which will give the trade relief from the present embarrassing situation. This has been brought about by a combination of circumstances which includes not only a shortage in the American crop of flaxseed and of vessels in which to import a foreign supply, but also the very large and increasing demand for linseed oil from various other lines of manufacture, notably soap and linoleum, not to mention oleomargarine and other food products, which are an important factor in the foreign demand. It is no time to lie down and cry over spilt milk. The situation demands all the adaptability and ingenuity which the American business man can apply and that is more than any other nation in the world has yet developed. The point is that now is the time to put your chemists and practical men on the job, and it is safe to say the results will justify the effort."

JAPANESE LACQUER WARE INDUSTRY

The lacquer ware industry forms a prosperous trade in the Fukui Prefecture of Japan. During the year 1918, $274,430 worth of this product was manufactured, as compared with $20,000 worth in the preceding year. The rise is the price must be noted, of course, in making this comparison.

Varnish Advice

Now that most buyers realize so thoroughly the necessity and economy of careful discrimination in varnish buying, they appreciate more than ever reliable advice as to what finishes to select for their finishing operations.

The dealer has many opportunities of posting his customers along this line and earning their permanent good will.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 31.—Stronger tendencies characterize the putty markets and also those for white lead in oil. There may be early advances for both and this is made the more probable owing to late advances for linseed oil which, for raw, is now quoted at $3. There is a strong undertone also to turpentine and advances of 12c to 20c per gallon were made during the week. A price of $2 per gallon will not be far off if the tendencies are maintained. Shellacs are up 50c per gallon again. The paint market is firm all through and business is reported as seasonably better than a year ago.

Another Advance Puts Linseed Oil Over $3

Montreal.

LINSEED OIL.—The low price for linseed oil this week is an even $3 for raw. This means an advance of 5c within the week. The price of flax reached $6.25 for July and there is no encouragement that permits of relief even being suggested. Few will name prices at all and there is little to go around. One of the saving features of the situation, perhaps, is that of a somewhat modified demand from the trade, otherwise the tendencies are strongly upward.

	Imp. Gal.
Raw—	
1 to 4 barrels	$3 00
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	
1 to 4 barrels	$3 02½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Turpentine Up, Too; May Yet Reach $2

Montreal.

TURPENTINE.—The demand for turpentine has somewhat lessened but the price merrily climbs and there is no sign of abatement just now. A price of $1.82 per barrel is quoted by one jobber, and another quotes $1.95. Supplies are never certain, and the outlook is for continued high prices.

Turpentine—	Imp. Gal.
1 to 4 barrels	$1 82 $1 95
Small lots	....

(Packages extra.)

Some Say More Money For Putty

Montreal.

PUTTY.—There is strong probability of advances coming along at once for putty. This is due to the situation on linseed oil where the increases have been so great that those making putty feel that an advance is imperative. Had the demand been greater the probability is that prices would have advanced some weeks ago. In the meantime a decidedly strong undertone prevails.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70

Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%. 15 days, net 60.

Some Say New Prices For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—With several of the jobbers in this line, the tendencies reported are strongly pointing to a revision of price upward. Linseed oil has not only greatly advanced since prices were last named, but there has been an advancing pig lead market. Increases may be shortly put into effect. In the meantime the prices are unchanged and standard grade is quoted at $15.50 per cwt. in 5-ton lots; $16 in ton lots, and $16.35 in small quantities.

Better Trade is Stated For Paints

Montreal.

PAINTS AND SPECIALTIES. — In spite of the advances made for prepared paints, the sales reported by the manufacturers are very satisfactory. True, business has somewhat lessened, but there is still a great deal of activity, and many orders are received. From a seasonable standpoint there has been better business than was looked for and this indicates a good spirit in the country, with painting being undertaken regularly. Specialties are moving well, too.

Fifty Cent Advance Made For Shellac

Montreal.

SHELLACS.—Constantly increasing prices and scarcity have made it necessary to again revise the price on shellac. The white and the orange are both affected, and new price on the former, per gallon in tins, is $6.55, and orange in gallons, $6.05. The usual differentials apply on other sizes.

TORONTO

TORONTO, July 31.—Turpentine prices are now the highest in the history of the trade, and with steadily increasing overseas demands, accelerated by Germany coming into the market, and a crop estimated at one-half of normal pre-war years, the market is expected to be very firm. To-day's quotations are at $1.95 per Imperial gallon. Linseed oil has advanced, but only slightly, the quotations to-day being $3.30 for raw and $3.33 for boiled. Rosin prices are steadily climbing, and even higher markets are looked for as crop reports indicate that supplies will be short. Shellac prices have been advanced this week. While no increase has as yet taken place in white lead in oil, a rise is expected at any time. This would affect putty prices also.

Turpentine Reaches Highest Prices on Record

Toronto.

TURPENTINE.—All past records have been shattered in prices of turpentine, and still higher prices are looked for as a result of the way in which overseas orders are coming in. Two of the largest American producers have notified their customers that their entire output for the season has been disposed of and that they are out of the market. The whole turpentine situation centres around the fact that with a production that will be at best, only half of that of pre-war years, there is a tremendous demand. Germany is now coming into the markets, and before the war took from 2,000,000 to 3,000,000 gallons yearly, and from 700,000 to 800,000 casks of 280 pounds each of rosin. The German demands, added to the orders pouring in from England and other countries and an increased home consumption, together with a short crop, creates a situation that is perhaps unparalleled in the history of the trade. From the standpoint of Canadian buyers the situation is still further complicated by the fact that at the present rate of exchange about six cents per Imperial gallon is added to the cost. To-day's quotations in Toronto on turpentine are $1.95. Rosin prices have been climbing steadily, and grades of rosin that a year ago were selling at $9 are now in great demand from $21 to $22. The rosin crop is reported short. Deliveries of both turpentine and rosin are slow, and this is causing considerable annoyance. Quotations on turpentine are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	.... $1 96

Paints & Varnishes For All Purposes

Brandram-Henderson Paints and Varnishes have a reputation for excellence owing to the exacting care used in the selection of all materials and the thorough methods of manufacture.

The buyers from the markets of the world recognize our ability to supply paint and varnish products of the highest quality. With four large factories in Canada, in which white-lead is corroded for the domestic market, linseed oil is crushed and refined, dry colors are chemically produced and paints, varnishes, enamels, stains, are manufactured for both home and foreign trade, excellent service and quality products designed specifically for buyers' requirements are assured. Canada has excellent facilities in shipping ports on both Atlantic and Pacific ensuring prompt and satisfactory transportation service.

With Respect to Linseed Oil

In the centre of the largest flax-growing districts of Canada are located the oil crushing and refining mills of the Alberta Linseed Oil Company, Limited, owned and operated by Brandram-Henderson, Limited.

A constant supply of linseed oil of maximum quality is thereby assured to the various manufacturing plants of Brandram-Henderson, Limited.

The output of the mill also permits of furnishing supplies of linseed oil, either as raw, boiled or refined to the many customers of the Company.

The following representation in various countries has been arranged:

South Africa
H. Parker Wood, Capetown, Durban, Johannesburg.

New Zealand
A. S. Paterson Co., Limited, Wellington, Auckland, Christchurch, Lyttleton

Russia

Very Firm Market For Linseed Oil

Toronto.

LINSEED OIL.—Not for a long time has there been a more sensitive market than just now for flaxseed. The slightest demand sends it up, and a slowing up in buying causes it to react instantly. Prices of seed, which went up to $6.40 during the week, have dropped back today to $6.26. Prices of linseed oil have advanced to $3.30 for raw and $3.33 for boiled. In spite of the high prices there is a steady demand. Crop reports vary widely, many of them apparently lacking authenticity, but it would appear that prospects look better in the West than they did a short time ago. The range of quotations is as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$3 30	$3 33
3 to 5 barrels, gal.	3 29	3 32
10 barrels and over	3 27	3 30
	Boiled	
1 to 2 barrels, gal.	....	3 33
3 to 5 barrels, gal.	....	3 32
10 barrels and over	....	3 30

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Prices of Shellac Again Advancing

Toronto.

SHELLAC.—Prices of shellac have been advanced during the week by some firms, the increases ranging from fifteen to fifty cents per gallon. Supplies are reported scarce and the markets very firm, with prospects that they will continue so. Prices of white shellac range from $5.45 to $6.55, and of orange from $5.25 to $6.05.

Orders Still Good For Prepared Paints

Toronto.

PREPARED PAINTS.—Orders continue to come in steadily for prepared paints from all parts of the province, and the business to date is much larger than at the same time last year. The manufacturers have had one of the best seasons in their history.

White Lead in Oil Likely To Advance

Toronto

WHITE LEAD IN OIL.—There is every indication that an advance in white lead in oil is due before long as a result of the steady increase in the quotations on lead and the steadily rising prices of linseed oil. In anticipation of higher quotations some fairly large orders have been placed at present quotations. Business in general is reported as satisfactory. Prices are as follows: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

No Changes Shown in Window Glass or Putty

Toronto

GLASS, - PUTTY.—There is little change in the situation as far as window glass is concerned. Prices remain stationary. A fair volume of business is being handled.

Putty prices are firm and in many quarters an advance is looked for before very long. Quotations are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 50

OVERSEAS TRADE EXPANSION WILL COME

(Continued from page 45.)

principals and consignee agents in Canada.

Overseas Functions for Trade Associations

"One notable feature among the many changes which have affected British industrial production during the war period has been the organization in many United Kingdom industries of associations, representative of the interests of an industry as a whole, as distinguished from the individual interests of the component members. In relation to the export trade of the United Kingdom these associations seemed to be called upon to play an important role, and it is submitted that they can more conveniently and more adequately than any other organization, official or otherwise, undertake the investigations to which reference has been made in the preceding paragraph. It is not suggested that an investigation undertaken by these associations will of itself suffice; among the more important industries it is considered that the trade association should have a permanent overseas organization to assist its members in organizing their selling campaigns and to keep the local market informed on matters of interest to the local importer and consumer.

"If these suggestions or some modification of them were adopted, it is felt that the products of British industry would be assured of a wider measure of support than they have had in the past owing to inattention to local requirements or to defective distributing methods.

Sentiment in Favor of British Goods

"In order that the prevalent sentiment in favor of British goods may be taken advantage of to the fullest extent, it behooves British manufacturers to organize their selling campaigns without delay. Well considered policies, the execution of which is entrusted to experienced men familiar with local conditions, will merit and receive support, while those characterized by hesitancy, due to ignorance of local requirements and by a degree of parsimony that makes failure sure, will meet with a chilly reception. Policies of the latter character react not only on their imitators but indirectly on British trade as a whole."

Must be Publicity

As set forth at the beginning, Mr. Milne believes that there must be an increased interest manifest in the development of trade relations. To this end the public and those interested in matters of trade should avail themselves of the advantages afforded by the established offices of overseas trade. Much valuable information is to be had for the asking, and the Senior Trade Commissioner or any of his associates will always be glad to extend every information possible to those interested. It is but natural that a full appreciation of the possibilities of trade can be grasped only when facts are secured and plans mapped out accordingly. Education and increased publicity will go far toward a real solution of what has been a curtailed trade programme heretofore.

SENIOR TRADE COMMISSIONER PROMOTED

G. T. Milne for some time past the senior trade commissioner for Canada and Newfoundland, has been transferred to the commercial diplomatic service at Havana, Cuba.

It is somewhat over a year since Mr. Milne came to Montreal, and during his term of office here new branches of the service have been opened in various parts of Canada. There will be additions to these in the course of time.

In speaking with Mr. Milne, HARDWARE AND METAL was informed that the change would bring the senior trade commissioner a little nearer the territory which he formerly made his home—South America. It was in the Latin-America territories that Mr. Milne saw much service, and through his association with the people and their language and customs he developed great interest in this field. In the territory to which he is now assigned, there will, Mr. Milne stated, be great trade opportunities and development, the per capita trade of that country being greater than most countries in which the British Department of Trade and Commerce is interested. Mr. Milne will leave shortly for his new field, but as yet his successor has not been named.

IMMENSE DEMAND FOR BETTER GASOLINE

A Montreal refiner stated to HARDWARE AND METAL this week that if the present demand for the higher grade of gasoline continues it will be impossible to supply the trade with their requirements. "If the car users continue to use this more highly refined gasoline there will be a shortage. And, as far as we are concerned the regular grades are just as satisfactory at this time of the year. We find it so in our own experience."

It appears from further enquiry that there has been a disposition upon the part of the dealer to recommend and push the sale of the better grade gasoline. This gives him, perhaps, a little greater profit, and he is probably pushing its sale for this reason, but with the production of high-test gasoline only a moderate one, the supply will, this refiner asserted, soon run itself out.

It's Impossible!

So said a man who heard our claims about WINDSOR SOLVENT STAIN. He didn't believe that the stain could be put on over former varnish, penetrating the varnish and the wood itself, **changing the color completely,** from OAK to MAHOGANY, or GREEN, or WALNUT, and **LEAVING THE ORIGINAL SURFACE FINISH.**
WE QUICKLY SHOWED HOW IT IS DONE.
THINK, MR. DEALER, OF THE POSSIBILITIES IN THIS!
DEMONSTRATION is very simple.
If you are not already handling this wonderful line of stains, get in touch with us at once.
PROFIT and MORE TRADE for your Paint Department.

IF YOU CONVINCE

a prospective buyer that she should have a washing machine and wringer—one point is settled.

To satisfy her and uphold the reputation of your store you must supply absolutely dependable goods.

The first point is up to you—the second up to the manufacturer.

So choose a line that is favorably established.

Such a line is made by Dowswell, Lees & Co., Ltd. The name has a real sales value—because for thirty years it has represented the best in washing machines and wringers.

Arrow Brand Wringers

TO CLINCH A SALE THE NAME "DOWSWELL" CARRIES CONVICTION

THE

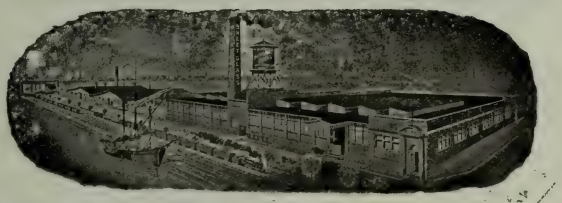
Why Not Stock Them?

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They are mechanically perfect and give wonderful satisfaction.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" within your reach.

"1900" Agitator Electric

"1900" Cataract Electric



Extensively Advertised And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory resulting from our twice-a-year advertising campaigns.

If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

Stephen House Paint Especially Adapted for Service in Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

The MANITOBA STEEL & IRON COMPANY.

WINNIPEG, MANITOBA LIMITED

THE BIG MARKET

IS AT HAND

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge.

The Eden dominates its market

Because its construction is time tested.
Because it has twenty-five inimitable and exclusive features.
Because it is nationally advertised.
Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

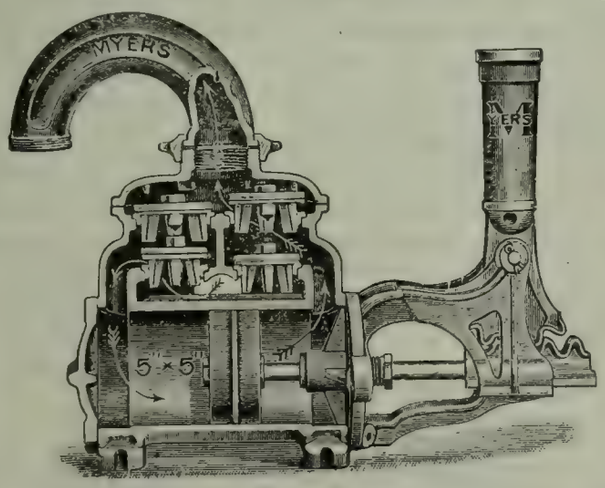
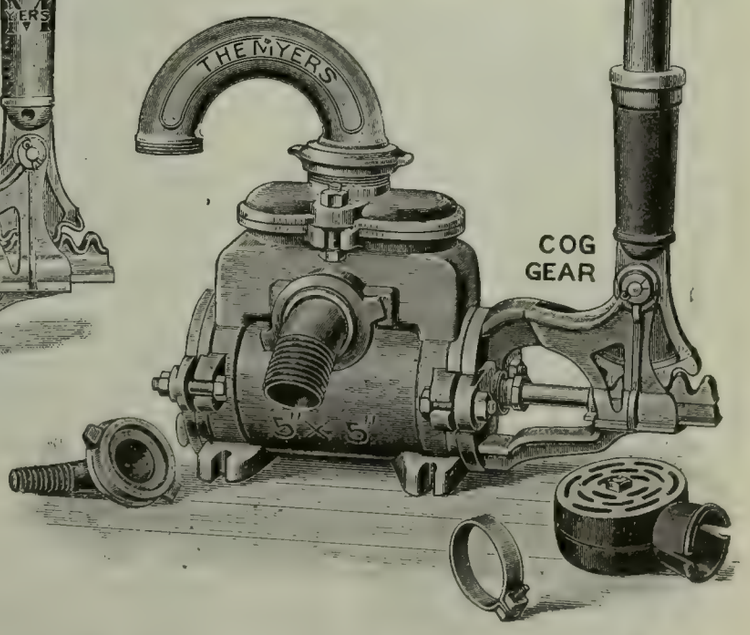
Myers Pumps

For General Service



You are safe in recommending Myers Pumps. Well designed and correctly made, they meet the requirements of general service.



Myers Cog Gear Double-acting Force Pump is ideal for filling Thresher Tanks, Washing Out Boilers, Irrigation Purposes, Pumping Water from trenches, Shallow Wells, Cellars, Barnyards, etc.

An easy working pump, by means of the reversible cog gear head, the power required to operate is reduced one-third. Will throw an abundance of water with the least of pumping labor. Large and direct waterways, ample valve capacity, compact and extra strong, etc., etc.

Myers Deep and Shallow Well Pumps have solved the well pump problem. The correct principles embodied in these pumps are productive of maximum service at minimum cost. Their adaptability to meet all well conditions demanded of a good pump is indicative of extraordinary efficiency.

Made with cog gear, ratchet handle and double-acting; anti-freezing; with new adjustable base and union spout; brass lined lower cylinder, tapped on outside, brass upper cylinder; patented glass valve and rubber gaskets. Myers pumps fill so many conditions and give such complete satisfaction that the dealers handling them have much to gain in addition to the profits.

Fifty Subscriptions from One Firm

THE International Business Machines Company, of which Mr. Frank E. Mutton is vice-president and general manager, subscribed to 10 copies of THE FINANCIAL POST some months ago—these copies to go to their travelling salesmen. Now this company has increased the number of these subscriptions to 50 because the results of the experimental subscriptions have proved so satisfactory.

FRANK E. MUTTON

Mr. Mutton explained that the object of putting THE POST in the hands of the men of his company was to keep them intelligently acquainted with general business conditions in Canada. He said he knew no better paper than THE POST for the purpose. It would seem that his men have responded fully to effort made to keep them well informed about Canadian business affairs—so much so that the management have added 40 other men to the original 10 to receive THE POST.

When Mr. Mutton was with the National Cash Register Company as its Canadian manager, he was the king of all managers in the matter of sales records. In this position he achieved a big reputation built on solid achievements. He learned salesmanship in a school where competition was of the hottest kind, and where the competitors were brilliant men. Giving Mr. Mutton full credit for superior personal qualities and energy of the most ardent kind, it is taking nothing away from him when it is said that not a little of his success was due to his intimate and sympathetic knowledge of the other man's business. And he taught the men associated with him as salesmen to know the point of view and requirements of the men they called on to sell machines to.

As vice-president and general manager of the International Business Machines Company, Mr. Mutton is putting into operation an idea used by him in past days with brilliant results—he is causing his salesmen to know the business and requirements of their prospective customers. To establish points of contact swiftly and surely is one of the open secrets of successful selling.

In the case of **your** solicitations of customers and desired customers, it is excellent strategy to have your salesmen so well informed about business conditions generally, and about the interests of the men they canvass, that they will be able almost instantly to relate their proposals to the interests of the buyer. When a salesman shows himself intimate with the interests or business or objectives of the man whose order he wants, he is immensely strengthened as a salesman, and his percentage of successful canvasses goes steadily up.

Our definite suggestion to you is: Subscribe to THE POST yourself, and learn from its pages how your salesmen or executives can draw power from this newspaper. Then, having acquired the sought-for knowledge, subscribe to THE POST for each man in your service who can profit you by knowing what is in THE POST each week. If Frank Mutton and other prominent executives are making a success of THE POST as a salesman's aid, it is reasonable to suppose that other managers of salesmen and executives can likewise employ THE POST as a producing agent. And so we ask you to sign and forward the coupon below.

The MacLean Publishing Company, Limited,
143-153 University Ave., Toronto.

Send me us THE FINANCIAL POST OF CANADA (weekly). Subscription price of $3 will be remitted on receipt of invoice in the usual way. Have this copy sent to

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

For months we have looked for the day **The Peace Treaty** would be signed and the event will be marked by thanksgiving and celebrations of various kinds. No celebration will be complete without the **glorious old Union Jack** floating everywhere. Flags are continually wearing out. Stock up for immediate sales and delivery. We have a large stock and our prices are right.

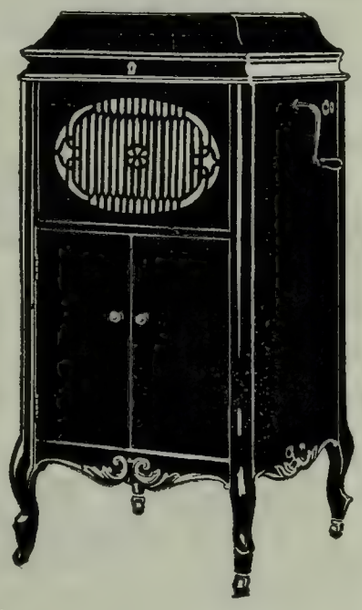
You Can Develop A Really Profitable Phonograph Business

With the ONLY Phonograph that plays ALL records CORRECTLY

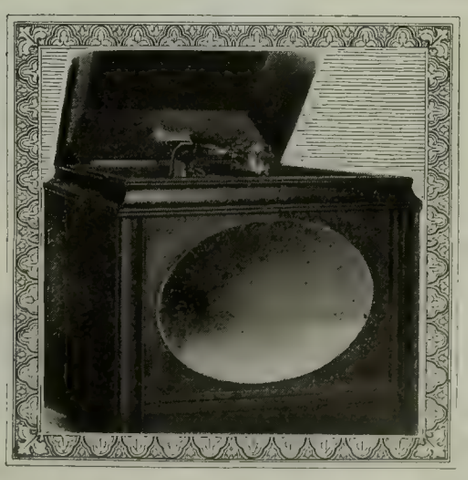


The Brunswick
ALL PHONOGRAPHS IN ONE

In our advertising to the public—your customers—we frequently say: "Let your **ears** be the judge" and "Just you **hear** the Brunswick." It is in **tone** and the **versatility** that the Brunswick wins instant and enduring favor. Generally speaking, our **dealers,** no less than the public, are convinced by the Brunswick's marvellous tone and its unique ability to play ALL makes of records CORRECTLY. You, too, will be convinced if you will let **your** ears be your judge.

THE "ULTONA"

A feature invented by Brunswick experts and exclusive to the Brunswick Phonograph. It plays EVERY make of disc record with the proper DIAPHRAGM, correct NEEDLE and exact WEIGHT. This means that ALL records can be played on the Brunswick exactly as they were designed to be played and WITHOUT INJURY to any record.



THE ALL-WOOD OVAL TONE CHAMBER

Built like a violin, moulded from choice woods with all the superior skill derived from 78 years of leadership in the woodworking craft. This feature with the ULTONA eliminates harsh, metallic notes.

The superior versatility of the Brunswick makes it a most profitable line for the dealer. If you have ever thought of going into the phonograph business—get in with this Final Phonograph. Not much use wasting energy on anything inferior to the best. Besides, our profit proposition for live dealers is wonderfully attractive.

DON'T DELAY

Write us to-night for full particulars of our special hardware dealer's proposition on Brunswick Phonographs.

THERE ARE NO SUBSTITUTES FOR DAIRY FOODS

P.M.Sharples

The above slogan appearing in every advertisement of the Sharples Separator Company is the slogan of every North American dairyman.

For nearly forty years, Sharples has been identified with the North American dairy industry and at all times has been fighting for the ideals of the North American Dairyman.

For nearly forty years the Sharples dairy machines have been the standard for North American dairymen. Dealers identified with the Sharples institution realize the value of this Sharples goodwill.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

Have you received Hardware and Metal Stock Electro Catalogue yet?

Canada's Rich Resources

Because They Have Raw Materials in Unlimited Quantity and the Machinery For Production, Canadian Firms Are Filling Orders Promptly—Every Mail Brings Inquiries From All Parts of the World

NINE months have rolled around since the signing of the armistice. They have been eventful ones for Canadian industry. As was expected when hostilities ceased the markets of the world were found to be bare and all eyes were turned to Canada with her rich natural resources and orders have been pouring in ever since from all parts of the globe.

It was a good thing for those needing commodities, that Canadian manufacturers during the war speeded up their production facilities until their factories in many instances were turning out many times their output in pre-war days. With modern machinery and the latest labor-saving equipment, Canadian firms have been able to look after a volume of business that only a short time ago would have swamped them.

Steadily Expanding

It is a significant thing that many firms who, during the war, found it necessary to double and treble their factory capacity to keep pace with business, are again enlarging. They are finding not only an increased business at home to take care of, due to the fact that many lines formerly imported from Europe are now off the market, but that the markets of the world are open to them and that everywhere Canadian made goods are in demand.

The speed with which firms, who twelve months ago were straining every nerve to meet war time demands, especially munitions, have resumed a peace footing speaks volumes for the adaptability of Canadian industry. Canada has never been busier or more prosperous than during the reconstruction period.

Got to Work Quickly

With the end of the five years of fighting Canadian business men, Canadian farmers, in fact everybody in Canada set to work to resume development where it was arrested by the war. For four years scores of firms, which in 1914 were going steadily ahead found that they had to mark time because of conditions. On the other hand, great numbers of firms found the demands for their goods multiplied many times by the needs of those on the firing line.

Practically all of these firms, those whose activity was interrupted by the war, and those whose output was increased, now find themselves busier than ever, trying to keep up with normal home demands and export demands.

Are Meeting Demands

They are doing it though, and are making a splendid showing. One of the big troubles many firms are experiencing is to get enough help, especially skilled help, to handle the increasing business. Just how large a business is being handled may be gathered from the fact that the latest yearly figures available for export trade show a total of $1,270,095,643. When this is compared with the export figures of pre-war days, totals of $356,000,000 for 1913 and of $432,000,000 for 1914, it will be seen what splendid progress has been made.

Canada to-day is in a better position than ever before to take care of orders from all parts of the world. One result of the shutting off of European goods was that Canadian firms made their own, and in all cases, an article at least equal and very often superior to the articles formerly imported was produced.

Made Big Development

Firm after firm, with commendable enterprise, added to the lines it was producing and made up the shortages caused by overseas firms not being able to ship. Now these Canadian firms find a steadily growing market for these goods and as any number of the European firms will not be on a producing basis, from an export standpoint for some time, the Canadian firms can promptly fill orders. No matter where a merchant is located, it will pay him to get in touch with the firms whose advertisements are to be found in HARDWARE AND METAL. It will pay him to get their prices and learn all about the goods they are offering and to build up a connection with them. These firms are in a position to make prompt shipments of quality goods and the lines that they make are winning their way steadily in the markets of the whole world.

A Splendid Increase

The splendid progress that has been made along this line is shown by the fact that exports of Canadian manufactured goods increased 1,015 per cent. in four years. This was due to the aggressive methods adopted by Canadian firms to extend their export connections and establish new markets. It was also helped along by the reputation that Canadian goods have established. In addition to building up a steadily growing business with South Africa, Australia, New Zealand, the West Indies, and South America,

SEES SPLENDID BUSINESS

Walter B. Ramsay, president A. Ramsay & Son Company, Montreal, and vice-president of the Canadian Paint, Oil and Varnish Association, who went to Europe on a special mission in connection with export business and returned with substantial orders, expressed the following views to HARDWARE AND METAL *regarding the trade outlook:*

"I believe that Canada will now be placed on the map of Europe with respect to exports. She is well thought of there. The Balkan States in particular are very kindly disposed towards this country. Canada's extension of credit to these countries is very much appreciated there and this will, in itself, be a big factor in the future business relations that we may have with them."

Mr. Ramsay eulogized the co-operation of the Canadian Government, and the Canadian Trade Commission in working with manufacturers and paving the way for extensive business abroad. He was enthusiastic regarding the whole prospect for overseas trade for Canada.

Canadian firms have greatly expanded their trade with British firms and in the past few months have been looking after the needs of Belgium and Roumania to the extent of $25,000,000. Owing to the enormous damage done in these countries by the Huns and the complete disruption of all financial organizations temporarily the Canadian firms not only agreed to supply goods, but to arrange for credits. They have also granted to Greece a credit of $25,000,000. Among the goods rushed for the relief of Roumania, were cotton goods valued at $2,624,512, paints and oils valued at $189,845, binder twine worth $940,996, binders and parts valued at $670,995, woollen goods worth $4,750,-527, edged toools valued at $136,743, ready-made suits to the extent of $3,453.-812. and shirts and overalls valued at $1,672,527.

Important Industry

The total production of steel ingots and castings last year is officially placed at 1,910,000 tons. Of this 125,000 tons was made in electric furnace plants and 1,785,000 tons in open hearth and other steel furnaces. The steel industry is steadily growing in Canada and recent developments in steel ship building are expected to accelerate it materially. A number of ships have already been built and contracts were recently awarded for others. The Canadian Government merchant marine alone expects to have between thirty and forty ships in its service this year. These will all help Canadian firms in making prompt delivery of goods to all parts of the world and are the forerunner of a great fleet of merchant ships which will carry Canadian products in Canadian ships around the world.

Autos Increasing

No development in the general life of the people better reflects the progressive spirit of Canada than the sales of autos. These have doubled every two years, and at the present there are more than 300,-000 autos and trucks in every-day service. In many of the farming districts, every farmer in the township owns his own car and uses it continually to deliver his produce for shipment. Very frequently farmers will be found with two or more cars. This development of the automobile business has been more marked than ever since the first of the year, and in one Canadian city, automobile firms are expending no less than $7,000,000 in new plants and extensions. These are planned to take care of the home trade as well as export business.

Canadian Government harbor improvements at Halifax. The Government is not only spending large sums to provide adequate harbors but is also having a number of steel steamers built to carry Canadian goods to all parts of the world.

Pulp and Paper

There are at the present time more than eighty companies in Canada engaged in operating pulp and paper mills. The aggregate invested capital in these industries is approximately $200,000,000, and their output has passed the $100,-000,000 mark. A good deal of this goes abroad. Each year sees the output increasing and with her tremendous forests in the north country Canada seems destined to supply a big share of the world's paper.

Mineral Resources

Few countries are richer in minerals than Canada, and mining development has received a great impetus during the last five years. The greatest activity now prevails, and new companies are constantly being formed to develop resources which are as yet practically untouched. The largest nickel refining plant in the world is located at Port Colborne, Ont. Not long ago the Baldwins, the great Welsh tin smelters, acquired a site at Toronto formerly used by the British Forgings for making munitions. The Welsh firm plans to expend $3,000,-000 in equipping a large and thoroughly modern plant to look after the tin plate business in Canada. Last year the total output of Canadian mines was valued at $300,000,000. Of this, copper was valued at $115,000,000, nickel at $90,-780,000, and gold $14,750,000.

Converter in a big Western smelter. No country in the world has richer mineral deposits than Canada, and rapid development in mining is taking place. The output of copper and nickel last year exceeded $200,000,000.

The Lumber Output

There are 2,879 lumber concerns in operation, and the capital invested in this big industry represents approximately

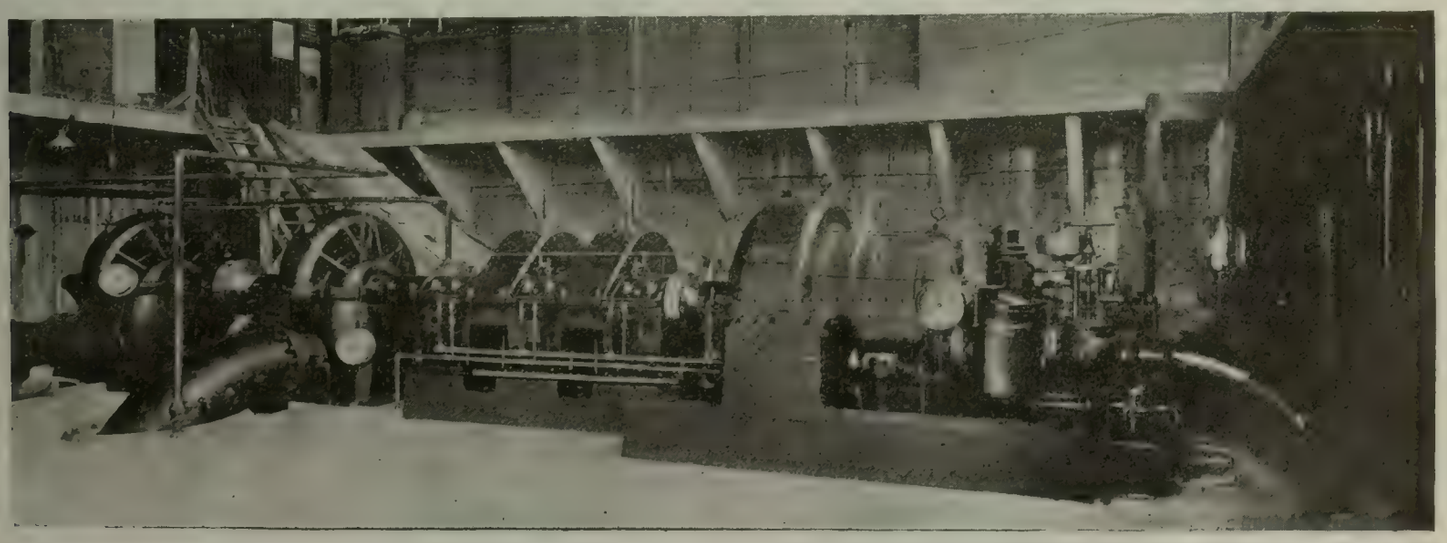
Millions of feet of Canadian lumber are being sent overseas to be used in rebuilding the devastated areas. The illustration shows a typical lumbering scenes on a Canadian river, the logs being floated down to the mills.

$150,000,000. Canadian wood and wood products are now going to all parts of the world, and recently there have been many large orders received from the United Kingdom for timber and also for manufactured products.

Aside from rich natural resources Canada is essentially a producing country from an agricultural standpoint. Shipload after shipload of foodstuffs of all kinds leaves for Europe to take care of the needs of the millions there who, because their farms have been destroyed and their homes wrecked, cannot for some time look after their own needs. To these people Canada is sending not only food, but agricultural implements and necessities of all kinds. The field crops of the Dominion for the last year were valued at $1,383,000,000. The yield of wheat was estimated at 210,315,600 bushels, and of oats at 456,733,900 bushels.

Has Fisheries Too

In addition to all the above, Canadian fisheries form an extensive industry, and last year the value of the fish taken is estimated at $60,000,000.



The figures shown above will indicate that Canada is not only busy industrially, but is a real producer of necessities required all over the world. Canadian firms not only have the resources to work with, but the people behind them to turn out good goods, and turn them out promptly. In these days when so many firms which formerly sent goods from Europe to other countries, are struggling to get in a position where they can take care even of home needs, and are finding difficulty in obtaining the raw materials to work with, Canadian firms have both the materials and the machinery necessary for quick production. This is one reason why orders are pouring in with every mail. Buyers in distant lands have found that by getting in touch with Canadian manufacturers they can get good goods, at reasonable prices, and get them promptly.

SAYS GERMAN ADVANTAGES WOULD BE TEMPORARY

Reports from Sheffield, England, regarding the latest developments in trade are as follows: A considerable volume of business is being done in certain branches of steel which suffices in these days of low production to provide full employment. Overtime scarcely exists and the men seem keen to take full advantage of the shortened working day. The new conditions as regards hours, however, do not please the piece hands because, in the absence of an increase of their rates they are earning less than when the longer day was in operation, and many of them are agitating to go back to the datal system. A considerable weight of manufactured steel is going to Scandinavian countries, and India is buying on an increasing scale. Italy is almost a blank as regards business, and French trade is marking time. An all-round advance in steel prices came into operation this week, and may have the effect of curtailing overseas buying. The state of the exchange is likely to aid Germany materially in regaining foreign trade providing that her works are capable of producing the goods, but the advantage cannot be of long duration. Even should the present rate continue the adverse margin will be simply ruinous to Germany in her purchases of materials and food.

L. & P. Manufacturing Company, Limited, capital $250,000, head office Niagara Falls, Ont., plans to carry on a general foundry business.

The Goderich Mercantile Company, Limited, capital $40,000, head office, Goderich, Ont., plans to manufacture go-carts, toys, and furniture.

High duty waterworks pumping equipment made and inst alled by Canadian firms. Many lines which before the war were purchased abroad, are now being made in Canada, an d are standing up to the most exacting tests.

Sees Big Demand For Implements

Secretary-Treasurer of Brantford Firm Sees Unprecedented Prosperity Ahead For Canada and Expects Big Trade From Europe

W. H. WHITTAKER, secretary-treasurer of the firm of Goold, Shapley and Muir, Brantford, Ont., looks for a big demand for farming implements and is most optimistic regarding the outlook for business for the future.

"There will be many opportunities for the manufacturers," he said, "particularly the makers of farming implements, as the farming equipment of the world has been depleted. Farmers in Canada had enjoyed unprecedented prosperity, and they would be in a position to obtain entirely new stocks.

Expects European Orders

"Before the war our firm did considerable export business in windmills, but it was greatly reduced owing to the restriction on shipping facilities. We look for a ready return to this line, and expect to obtain a share of the orders that will come from all over Europe.

"Canada's prospects for the future are the greatest in the world," said Mr. Whittaker. "I do not know of any country that stands in a more favorable position. Her enormous resources, vast areas of fertile land, and her great record in the four years of bitter struggle assure her of success in the years to come. While we should all face the readjustment period with confidence and courage we must also proceed with care as the new conditions will require much adaptability.

Look After Returned Men

"First and foremost there is the problem of our soldier boys. They must get careful consideration, and every effort should be made by all business firms to assist in the work of re-establishing them in civil life. As far as possible we are giving preference to returned men and are placing the men who enlisted back in their old jobs, or in some other suitable employment. By doing their share the firms will make the work of absorbing the soldiers comparatively easy."

SENDING NAILS TO ENGLAND

Discussing with HARDWARE AND METAL *export business in regard to nails, President Robert Hobson, of the Steel Company of Canada, Hamilton, stated that before the war Great Britain used to get practically all her nails in Germany. London agents of German manufacturers, he said, used to take orders for very large quantities of nails and give quick delivery. When the war commenced, much of this business came to Canada, and a good deal of it may still be retained. Both the Hamilton and Sydney steel companies are now shipping rods to great Britain for use in the nail mills they are establishing there.*

VALUE OF TRADE MARKS

The following report by G. S. Stewart, the American consul at Chihuahua, Mexico, is of interest in that it reflects not only the ideas of the people of Mexico, but of many other countries as well. He says:

"While many articles exported to Mexico bear some sort of an illustrated trade mark, many do not, and of these which do a good percentage are not simple or outstanding enough. Retail merchants of Chihuahua state that their customers invariably ask for the "rose" brand or the "deer" mark, for instance, whether they are calling for canned goods, a penknife, a plow or a piece of muslin. Using the words "Our beauty" or a trade mark not easily remembered or called is a poor substitute for the picture of an "Indian" or "steamboat." The poor, illiterate class of Mexicans call for an article by "picture," and for this reason, also, firms advertising their wares and using posters and signs would do well to illustrate their advertisements with a picture or an easily remembered mark, thus enabling the buyer to readily identify their products. In the United States the consumer asks for "Smith's bacon" or "Jones' saw," but in Mexico he wants "Donkey" brand soap or "Star" brand hatchets.

When the Mexican forms the habit of buying a certain article it is difficult to persuade him to change to another or accept a substitute. A hardware dealer in Chihuahua some years ago undertook to introduce American-made files far superior to the European files then so extensively on the market. All his customers insisted on the "arrow" file, until finally, after distributing several dozen American files gratis, he convinced the blacksmith and carpenter that the American file was a better article.

The color of an established article should not be changed unless absolutely unavoidable. If a certain plow is painted green, the wheels of a wagon yellow, the retail merchant is sure to experience difficulty in selling an old customer the same plow and wagon if the color of the plow and that of the wheels are changed. An American manufacturer did actually, at one time, make the mistake of changing the color of the wheels of their high grade farm wagon, and the farmer was not easily convinced that the red wheels were "as good as" the yellow ones of his former wagons. Needless to say the complaints were many, and the old color continued after a short, costly interruption."

CANADIAN NATIONAL EXHIBITION NOTES

In order to accommodate the Canadian War Memorial paintings at the Canadian National Exhibition, an extension of 130 by 30 feet to the fine arts gallery is necessitated. Some of the paintings are over 20 feet long.

The "Hell of Death" that faced the Canadians at the second battle of Ypres, when they were sent against the first German gas attack, is vividly portrayed in the War Memorials paintings to be shown at the Canadian National Exhibition this year.

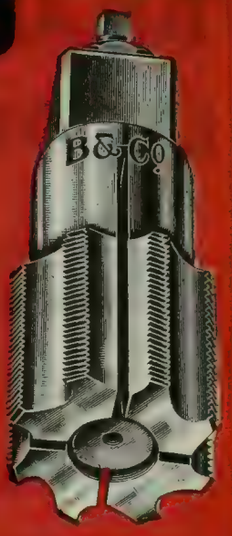
One whole building will be devoted to Canadian war trophies at the Canadian National Exhibition, while the big guns, aeroplanes and other large relics will be distributed around the grounds, giving the big fair a truly victory atmosphere.

H.R.H. the Prince of Wales will spend three days in Toronto during the big fair. He will open the Exhibition on Monday, August 25th, in the open air, where many thousands may see him, and will remain in the city until Wednesday, spending all or part of three days at the Exhibition grounds.

Seventeen American flyers have already entered for the New York to Toronto aeroplane race to be started from the Canadian National Exhibition by the Prince of Wales on August 25, the opening day of the big fair.

Over ten thousand dollars in cash prizes and trophies will be awarded the successful flyers in the Canadian National Exhibition aeroplane race from Toronto to New York and return.

Cols. Barker and Bishop, the world's greatest aces, will have charge of the flying circus at the Canadian National Exhibition this year. They will fly surrendered German Fokkers and types of British, French and Italian machines.



There are already 32 surrendered German aeroplanes assembled at Toronto, and all will be displayed or flown at the Canadian National Exhibition. August 23rd to September 6th. Canada owns nearly 100 German or allied planes, and they will eventually become part of the official museum display or be distributed around the various cities by the Ottawa Government.

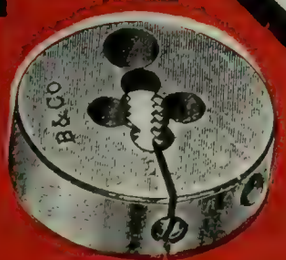
Canada owns over 450 big guns, scores of aeroplanes and many thousand rifles and machine guns. The trophies are too many to house in the proposed War Museum at Ottawa, and a great number will fall to the lot of various municipalities throughout the Dominion. The distribution will start immediately after the Canadian National Exhibition.

Prince Joachim's helmet, the plume of which alone is worth $350, is among the war trophies owned by the Canadian Government, to be shown at the Canadian National Exhibition, August 23rd to September 6th.

BUTTERFIELD

Used in America's Foremost Industries

35 years of successful high-speed tool manufacturing has put Butterfield's in a position known to all the mechanical field of America.



Butterfield's is especially well qualified to export promptly and efficiently to all parts of the world. Years of careful attention to export has made business friends in many lands.

WRICO NESTABLE EXPORT GOODS

E. T. WRIGHT CO., LIMITED, HAMILTON, CANADA

Wrico

Registered Trade Mark. The world-wide symbol of guaranteed "Made in Hamilton" goods.

They nest for shipping. They expand into a good display when unpacked. It is not possible to nest Oilers and Lanterns, but practically all our other export goods can be nested. Steamship space is costly, and nestable goods are the first consideration of the foreign purchaser.

WRICO CANADA FLY SWATTERS.

Nested 1 Doz. in a small carton. Japanned wire-web, velvet bound. Coppered handle. Rustproof and harmless to furniture, but sure death to the fly.

WRICO "CANUCK" BREAD MIXER.

Nested 1 Doz. in a wooden case. The modern sanitary method of home breadmaking. Renders the user independent of bakers' prices and free of bakers' substitutes.

COMET HOT BLAST LANTERNS.

Packed 1 Doz. in a carton. The three principal lines of export in Lanterns are our No. 4 Long Globe Cold Blast, our Comet (as illustrated) and our Nemo, which is an inexpensive Hot Blast pattern made exclusively for export purposes.

WRICO BALLOON FLY TRAPS.

Nested 1 Doz. in a small carton. Years of test have proven the "Balloon" to be one of the most efficient exterminators of the fly pest ever invented.

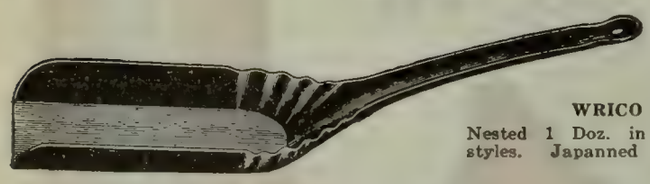
ASK FOR CATALOG.

Write us and give an idea of the lines in which you are interested, and we will quote you f.o.b. Canadian seaboard, packaged free. We are open to ship to any civilized country on the globe.

WRICO GALVANIZED BUCKETS AND PAILS.

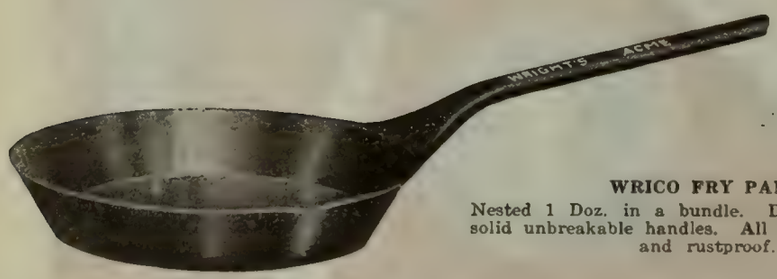
Nested 1 Dozen in a bundle. Straight pattern (as illustrated) or Flaring Pattern with bottom rim. Not cheap and flimsy, to meet foreign competition, but strong and durable, the same as made for home consumption. Our Galvanizing department is the source of supply for many of the foreign markets.

WRICO VICTOR SIFTERS



Nested 1 Doz. in a small carton. The original Victor with tin reel and soldered bowls. One of our most successful export lines.

WRICO BIRD CAGES.



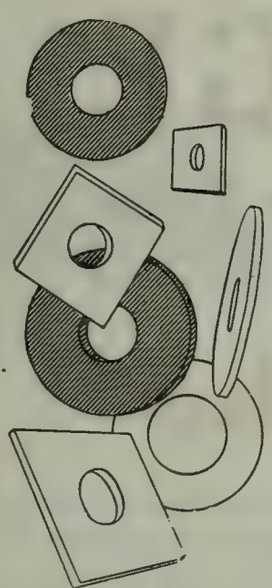
Nested ½ dozen in a small carton. Brass or Japanned. Parrots, Squirrels, Canaries, Breeders, Larks, Mocking-birds, White Mice and Rats, Chicken coops.

WRICO FIRE SHOVELS.

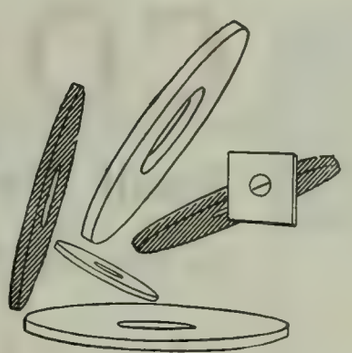
Nested 1 Doz. in a bundle. Many sizes and styles. Japanned and Galvanized. Light and Heavy.

WRICO FRY PANS.

Nested 1 Doz. in a bundle. Drawn steel, with solid unbreakable handles. All sizes. Well oiled and rustproof.



WRICO OILER ASSORTMENT.



1 Doz. assorted sizes packed in a display box. Heavily copper plated, and brightly burnished. Prices quoted on all styles and sizes of Oilers in gross lots.

NUMBER TWO

JOHN P. HOLLAND

ON August 12, 1914, two weeks after the outbreak of the European War, John P. Holland, inventor of the submarine, died at his home in Newark, N. J. Holland was born in Ireland in 1842—and at the age of 20 he commenced to concentrate on the submarine idea. He came to America in 1864; and in 1898 completed his first successful submarine at Elizabeth, N. J.

Holland's entire life was dramatic and in a sense, tragic. As a result of his great genius, he will become immortal as the inventor of the most terrible war-machine the world has ever known.

The dominant trait in this wonderful man's character was

CONCENTRATION

As Holland's invention has gained the approval of practically every nation, so has the Victor Hack Saw Blade won the admiration and confidence of mechanics and technicians all over America—and all over the world.

Like Holland, we have concentrated on one thing. For over twelve years we have been experimenting, testing, improving. In practical tests, the Victor Hack Saw has seldom been equalled—and never excelled. It is the result of a large organization of technicians and skilled mechanics concentrating on one idea—which is—to make the most honest and efficient hack saw blade in the world. We do not scatter our energies. We make hack saws for every metal-cutting purpose.

VICTOR SAW WORKS, Ltd.

Those Hard-To-Get-At Nuts

In every garage, machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically he. treated.

If your jobber cannot supply the "Westcott," write us and we will tell you who can.

POSTAL STATION B

The TRADE-MARK *of* SAFETY
known all over the world

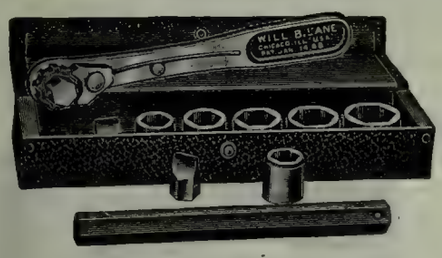
The famous picture of the carpenter's hammer striking the hammer of the revolver, tells the story of Iver Johnson safety in a language everyone can understand—the language of pictures.

And the trade-mark tells more than a story—it tells a truth. If ever there has been an instance of an Iver Johnson being discharged by a drop, thump, thud or knock—we have not heard about it.

Its automatic safety, the fact that there is nothing to remember to do to make it safe, its accuracy, its constant alertness and readiness for use, its simplicity of construction—all combine to make the Iver Johnson the most wanted revolver for home protection—therefore the obvious revolver for you to sell.

Stock the entire line—22, 32, 32 special and 38 calibres. Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.



Write for firearms catalog and complete dealer information. Ask for literature on bicycles and motorcycles, too.

Iver Johnson's Arms & Cycle Works
330 River Street, Fitchburg, Mass.

"The Safe Revolver to Sell"

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight, 22 ounces.

STANDARD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 7 Sockets to fit all size nuts in U.S. Standard from ¼ inch bolt to ½ inch bolt; S.A.E. Standard from 5-16 inch bolt to 11-16 inch bolt. Cap screws from 5-16 inch bolt to ⅝ inch bolt. Put up in strong leatherette case. Weight, 18 ounces.

The **"Standard"** and **"Ford"** Sets of the Lane **"Unique"** Ratchet Wrench and the Lane **"Super-Unique" Ratchet** Wrench Set, together with the Lane **"Unique"** Off-Set Ratchet Screw Driver, present unusual selling opportunities for the dealer.

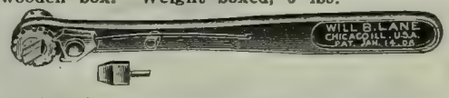
All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

Their ability to perform tasks, where other wrenches fail, make them easy to sell.

Your jobber has them.

Manufactured by

WILL B. LANE

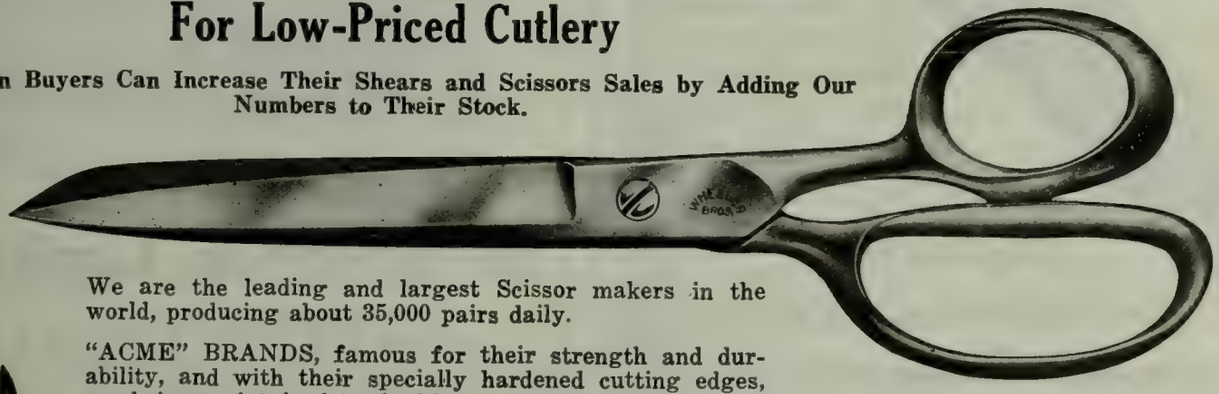


180 N. Dearborn St.

CHICAGO, ILL.

SUPER-UNIQUE SET

Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.



OFF-SET RATCHET SCREW DRIVER

Consists of—1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight, in paper box, five ounces.

"ACME" SHEARS AND SCISSORS ARE STANDARD

For Low-Priced Cutlery

Canadian Buyers Can Increase Their Shears and Scissors Sales by Adding Our Numbers to Their Stock.

We are the leading and largest Scissor makers in the world, producing about 35,000 pairs daily.

"ACME" BRANDS, famous for their strength and durability, and with their specially hardened cutting edges, are being maintained to the high standards of quality and finish we have established.

Realizing the importance of prompt service to orders, we are now in a position, on account of improved manufacturing facilities, to give all Canadian orders special service.

Our Canadian representative at Toronto will be pleased to show our samples to you, or have his traveller call on you.

We would esteem it a favor to demonstrate through a trial order the excellent goods we furnish and their fast selling ability.

Have you seen our new No. 5 Catalogue? Let us mail one to you.

ASK YOUR WHOLESALE HOUSE

Mr. Merchant:

When you are finished with this paper pass it on to your clerks. It will help them to help you, which means increased business.

Result of 31 Years of Service

We have been building up our publications for thirty-one years on the basis of the very best service we could devise for subscribers and advertisers, and to-day we offer to you, at a very reasonable rate, the use of the connection we have established.

The proof of the high standing of the MacLean Trade Newspapers is:

(1) Large percentage of trade in each field who subscribe and renew year after year.
(2) Practically all subscriptions are paid in advance.
(3) No premium or special inducements are offered to secure new subscribers.
(4) Subscription price. Weekly papers, $3 per year; monthly papers, $2 per year. This ensures papers will be read.
(5) Written testimony of hundreds of subscribers that they read each issue, both editorial and advertising pages, and then pass on to members of their staff.

Ask us for further details on any of these points.

You will admit you must get dealer co-operation, a good trade newspaper offers you the most economical, the easiest and most satisfactory method. You have no trouble about mailing list, job printing, addressing, etc. You merely get up good, live copy, or have it prepared by our Service Department or by some capable advertising agency; send it to us and it goes out quickly to subscribers who have formed the habit of looking for such announcements in their trade newspaper.

MacLean's trade newspapers furnish the one dependable method by which you can create dealer enthusiasm when figuring on a plan for any line of merchandise sold through the following classes of retail stores: Dry Goods, Clothing and Haberdashery, Hardware, Grocery, Plumbing, Books and Stationery.

The Maclean Publishing Co. Ltd.

Nothing Mysterious About Writing Ads

If it were possible to get together in one audience every worthwhile hardware buyer, wholesale and retail, in Canada and you were given an opportunity of addressing this powerful buying organization on your goods or service, what would you say? You cannot get the hardware buyers together in one body, but you reach them with your message just the same. The Annual Fall Directory and Sales Number of HARDWARE AND METAL will receive a welcome from practically every big buyer of hardware in Canada. This feature number has been an annual visitor for 31 years. Write your message—send the information along to us and our "Ad Service" department will set it up without additional cost to you. The Fall Number will be the first "Peace Time" number. The trade is awaiting it. Stocks are low and Fall business will be good. It reaches wholesale buyers as well as retailers. There is no mystery about ad-writing. Simply tell the hardware buyer, through your ad what you would tell him if you met him face to face. This is a real opportunity. Send reservation without delay and we will give you prompt attention and service.

Date of issue Aug. 23. Last advertising form closes Aug. 15. The Fall Number is going to be the largest and best number produced in Canada. Will you be represented in it? If reservation has not been made wire immediately to

L. Cheeseman & Son, Burin North, Newfoundland, 100 miles from railroad.

The Edmonton store of The Hudson's Bay Co. One of fourteen stores operated in Canada by this company.

National Cash Registers are used in the largest and the smallest stores in Canada

THE way Canadian retail merchants have turned to labor-saving machinery during the past two years is very significant.

The movement began when the war's great dragnet started taking the young men and women "over there."

Retail merchants, forced to adopt labor-saving machinery, were quick to see the advantages of National Cash Register speed, accuracy, protection, and economy.

Month by month, and town by town, National Cash Registers have earned their way into the daily business life of Canada.

Every city and hamlet is using them —and calling for more.

A store system that helps these stores will also help yours

HARDWARE AND METAL, August 9th, 1919. Volume XXXI., No. 32. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

Every sort of a tool, from those used by skilled workmen to those filling the requirements of the home man.

There's a renewed interest in building these days—houses are needed and they are being built; mechanics who have been serving their country are getting back into harness again; householders are beginning to see the defects in their homes—in short, it's time now to look to your tool stock for the demand is growing stronger every day.

We carry the finest line of tools procurable at the various prices. Among others are the Stanley Carpenter Tools, Shurley & Dietrich, Simonds and T. F. Shirley Hand and Cross-Cut Saws, etc; Millers Falls, Goodell-Pratt and North Bros.' Tools; Lufkin Tapes and Rules, etc.

Don't overlook your stock of Portable Tool Cabinets. With tools expensive the average mechanic is becoming more careful to see that his kit is kept in good shape away from "light fingers."

Order snow shovels, cow ties, etc.—winter is coming.

The "Rice Lewis" man will be pleased to quote on above lines. If he's not there, write direct to us.

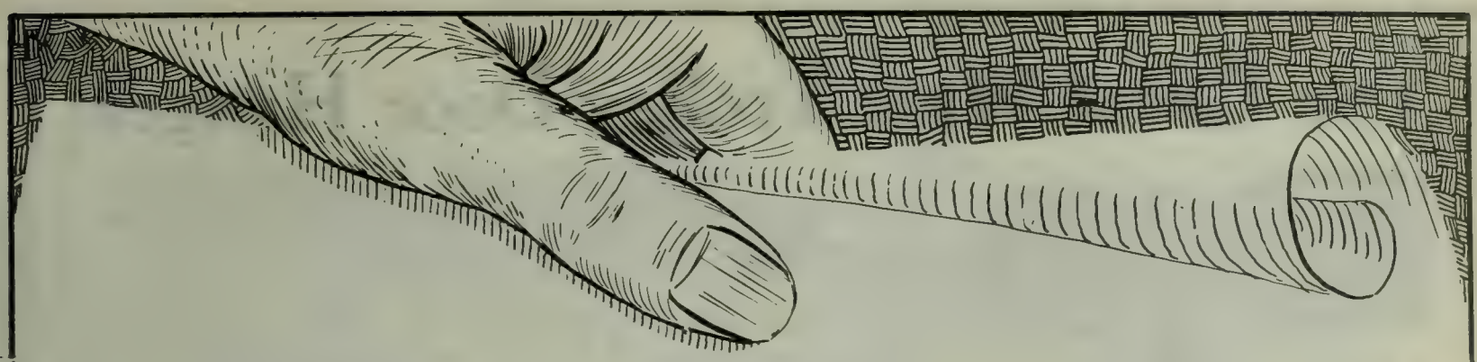
Make DOUBLY SURE *of* Every Catch

WITH fur prices as high as they are to-day it *pays* to use DOUBLE GRIP VICTORS and make *doubly sure* of every catch. It pays to know that every 'rat is caught *twice*—with no chance of escape.

The double jaws catch high on the animal's leg without bone breakage. No twisting out—no pulling out. No lost fur charged against traps that aren't right.



The Double Grip Victor is made in two sizes:

No. 91
Spread of Jaws, 4¾"

No. 91½
Spread of Jaws, 5⅝"

Butts; 1 only No. 820 Chain Bolt; 1 only No. 830 Foot Bolt; 1 only No. 5 Pull; 1 only 4½-inch No. 30 Safety Hasp. All necessary bolts and screws. Comes packed in the *"unusual national way."* Japan finished. Write for prices, etc.

NATIONAL MFG. CO.

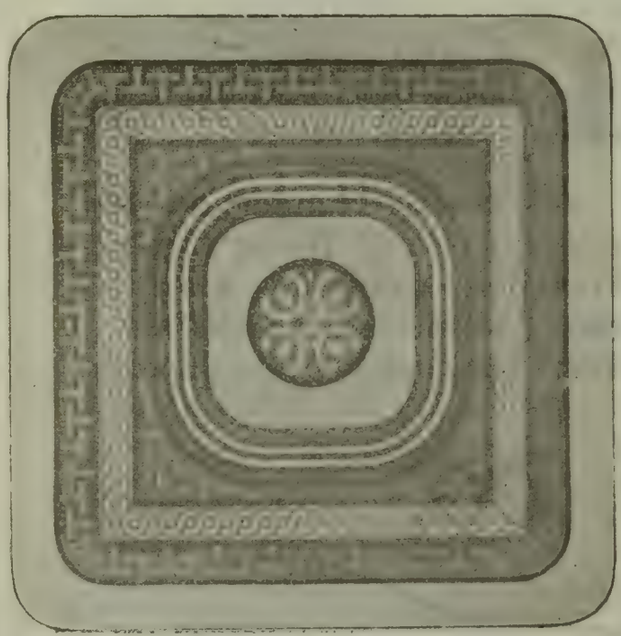
STERLING, ILL.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.



The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

Chips from cold cutting saw

Chips from hack saw

Starrett Hack Saws make less waste

Economy of material is almost as important as economy of time—or power.

The Starrett idea is to always use the particular blade that does the work in hand most economically—to save material, time and power.

That's why the Starrett Hack Saw Chart recommends blades of different thicknesses as well as different numbers of teeth to the inch for certain classes of work. And it's the reason why you find Starrett Hack Saw blades and charts in the tool rooms of so many shops—it pays to use them.

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

The Stewart "Handy-Worker"

is meeting with a hearty welcome. It is the best general utility tool on the market which gives the user SIX TOOLS IN ONE.

Everyone who sees it starts thinking about the work he could do with it himself.

Its all-round usefulness appeals strongly to farmers, mechanics, auto-owners, garage men, and the man who likes to "fix things" in his little repair shop at home.

The "Handy Worker" is a fast seller without a competitor.

The price is within reach of all.

Weight, 90 lbs. boxed. List price, complete with all tools and attachments as shown above. Retail price, $27.00.

Consists of:

1. Strong, powerful VISE, 4½" jaw, opening 4½".
2. A practical, two-speed **drill press.**
3. An all round grinding outfit which will grind anything from a penknife to an axe.
4. A powerful **pipe vise,** for cutting, threading, coupling and uncoupling any pipe up to 1½" diameter.
5. A **cutting hardie** for cutting all sorts of metal.
6. Last, but not least, a staunch and sturdy **anvil,** useful in a thousand ways.

Substantial discount to dealers. We furnish newspaper cuts and literature to aid in pushing sales.

Sold direct or through jobbers.

PLYMOUTH ROPE

This picture illustrates what may be easily accomplished in the way of Plymouth Rope window displays. Simple arrangement of the rope itself, together with the Dealer Helps which are free for the asking, will attract attention and stimulate your rope sales.

The following letter accompanied the picture which we reproduce:

"I thought that you would be interested in this because it is Plymouth Rope and the various knots, hitches, and ties were copied from the series of illustrations which you ran in Plymouth Products recently. These various knots were tied and fixed during spare time, but they have been very interesting and attracted considerable attention. Several gentlemen were looking at them and one said that they must have been tied by a sailor, but he didn't know that the work was done by a 'land lubber' who has only seen the ocean a few times during a short visit of two weeks to Boston and vicinity some twelve years ago.

"We are still selling Plymouth Rope because we find it more satisfactory than any other and also we are still selling it by the foot, because that is the only way for a retail merchant to sell it."

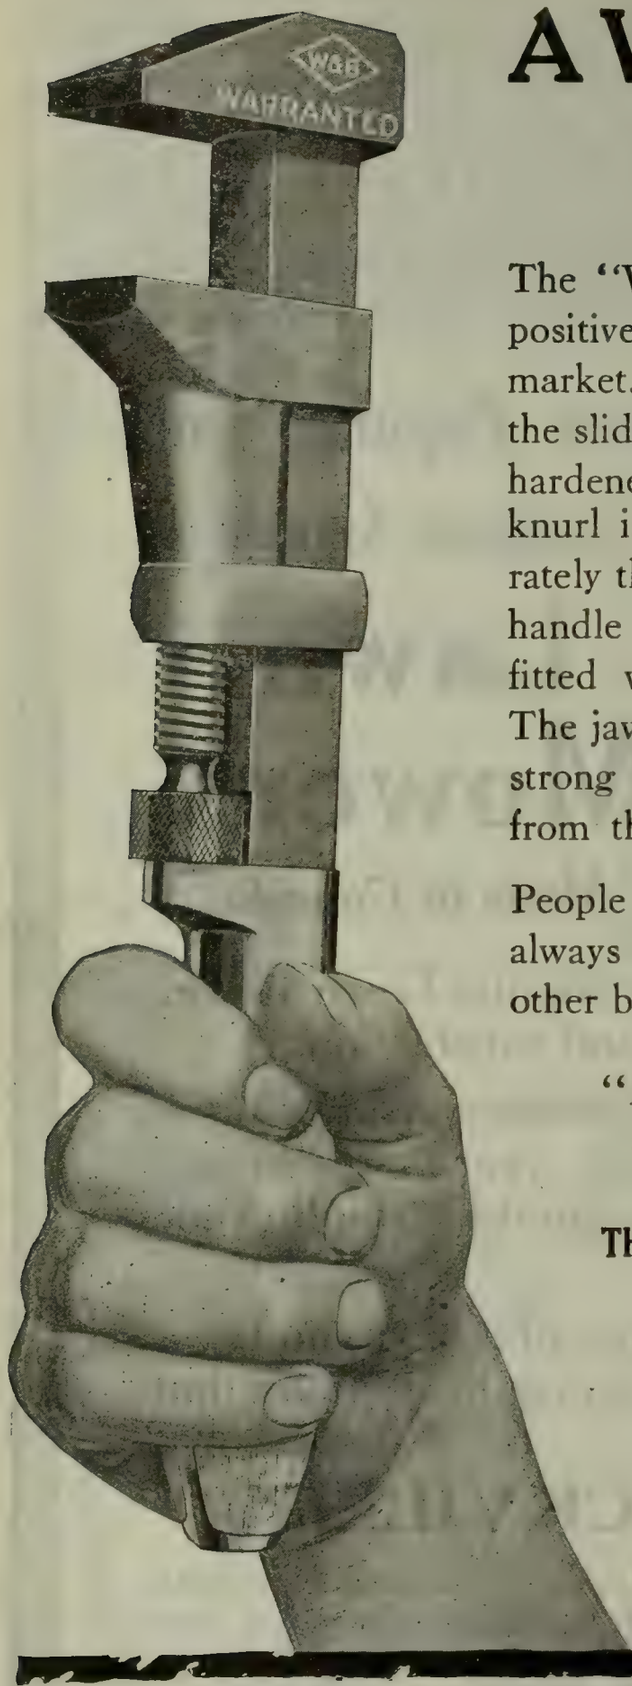
Most Popular and Highest Grade
Lawn Mowers
Made in Canada

What has made "Smart's" the most popular Lawn Mower on the Canadian market? Service and satisfaction.



First, the machine itself—then the endorsement of satisfied users—people are buying each year more "Brockville" Lawn Mowers than any other make of high-grade machines.

Then remember that the sole purpose of a lawn mower is to cut grass. No other machine has ever been made that cuts grass like

"SMART'S BROCKVILLE"

These mowers have long since proven their unmatchable cutting efficiency on good lawns everywhere with the least effort and best results. Handle the lawn mower that requires the least *"push,"* both to *use* and to *sell.* Send for catalogue and prices.

JAMES SMART PLANT
Brockville, Canada

A Wonderful Wrench

A Typical "W & B" Product

The "W & B" Machinists Knife Handle Wrench is positively the strongest wrench of its class on the market. Head and bar are drop forged in one piece; the sliding jaw is of heavy, high-grade, malleable iron, hardened to withstand severe service. The screw and knurl is turned from solid steel, is deeply and accurately threaded and fits the lower jaw perfectly. The handle frame is of first quality malleable iron, frame fitted with hard maple wood sides, waterproofed. The jaws are fitted evenly front and back, insuring a strong grip, equalizing the strain on the lower jaw from the bar to the end of the jaw.

People who do big jobs have big ideas, and they always prefer to use the products that come from other big ideas. The "W & B" idea is—

"Make it better than anybody else can make it, put your name on it and stand by it."

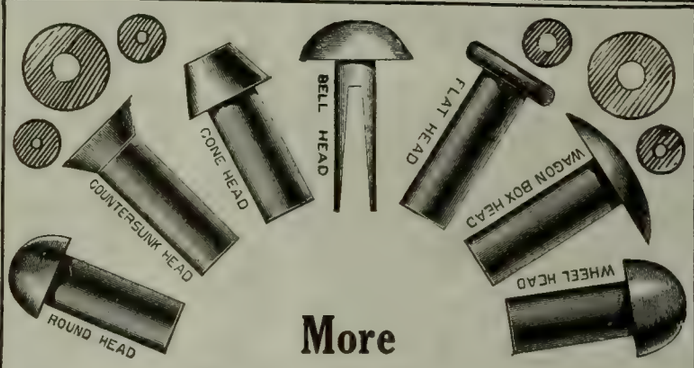
4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:



BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

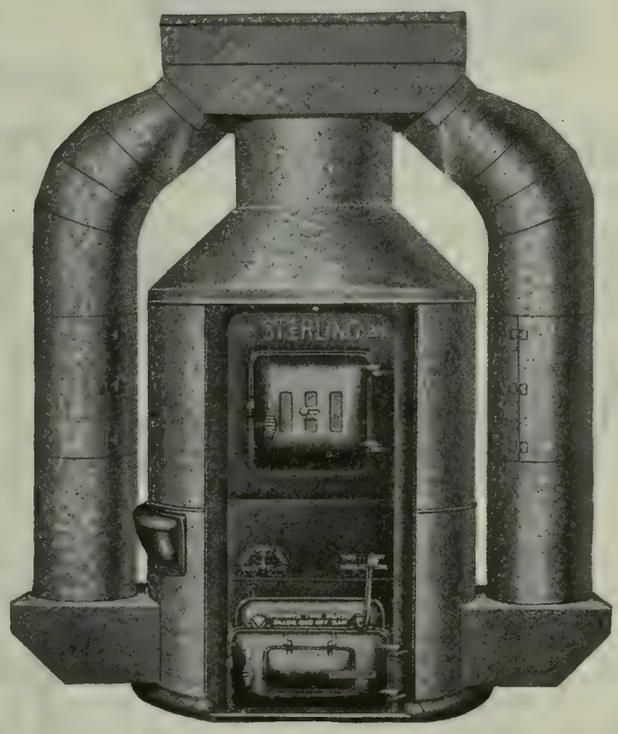
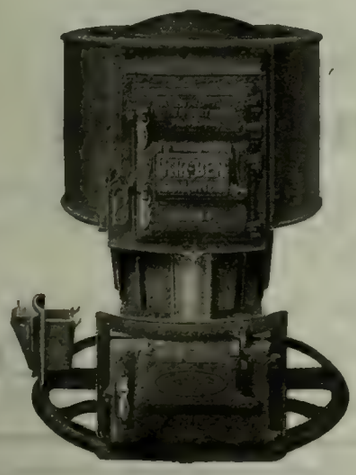
Findlay's Line of Furnaces

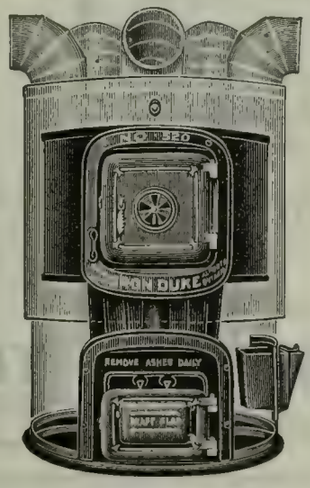


Big Pipeless Furnace Business Coming This Year



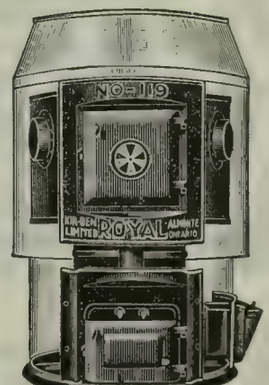
The question is no longer being asked: "Will the Pipeless Do the Work?" It is now a tried and tested product and the question that interests the dealer is WHAT TYPE OF PIPELESS FURNACE.

The STERLING PIPELESS with its side cold air construction is scientifically correct and mechanically right. The Heat Retaining Apron, which is a distinctive patent of the STERLING makes it possible for us to adopt this exceptional method of construction without heating the basement. We, however, make the Sterling Pipeless with double casing when desired.



The Sterling is made in five sizes in Pipe and Pipeless style, fire pots ranging from 17 to 27 inches.

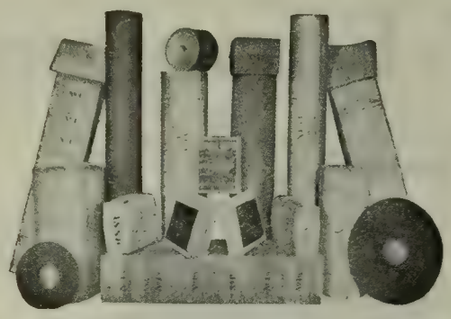
A line from you, Mr. Dealer, will bring a full description of this furnace, or, better still, our representative will call and talk it over with you.



Kir-Ben—five sizes, fire pots, 17 to 29 inches.

Iron Duke—three sizes, fire pots, 17 to 21 inches.

Royal—two sizes, 19 and 21 in. fire pots. An A-1 furnace, but so constructed that it can be sold at a price to meet any kind of competition.



THE LARGEST LINE OF FURNACES MADE IN CANADA TO CHOOSE FROM

We make a furnace to meet any requirement whether it be quality, size or price. Write for fuller particulars. Will exhibit at Toronto and Ottawa Fairs.

Stoves and Sporting Goods Big Sellers

J. Y. Smiley & Son, of Woodstock, Ont., Find Departments Are Developing Rapidly —"Never Interrupt a Stove Salesman" is Proprietor's Advice

Based on an interview by C. E. Parsons with J. Y. Smiley of J. Y. Smiley & Son, Woodstock, Ont.

View of the stove department of the J. Y. Smiley & Son store, Woodstock, Ont. This department is separate from the others in the store. The store salesman is not to be interrupted under any pretext. Concentration on the customer is thus possible and sales more easily completed.

"OUR principal trouble for some time past has been to get enough goods to meet the demands of our trade," said J. Y. Smiley, of the hardware firm of J. Y. Smiley & Son, Woodstock, Ont., in discussing his sales of sporting goods.

"We started to handle sporting goods three years ago merely as an experiment," said Mr. Smiley, "and the department has grown and grown until now it is one of the most important in the store. Fishing tackle is one of the big lines. Some of the other goods change and one has to watch closely to see just what is going to happen. For instance, for a while we sold a great lot of lacrosse sticks. I have sold fifty a day to boys. Now there is little or no demand for lacrosse goods but a steadily increasing demand for baseball goods."

Want Quality Goods

"We do not handle any cheap grades of goods as we find that people are not only willing to pay for but are demanding the best. Here is an example of what I mean. The other day a man came in and wanted to see our reels. I showed him everything we had, the highest priced being $12. He said we did not have what he wanted, and when I enquired to find out just what he was looking for I discovered he wanted a reel that retails at $18. I took his order and procured one for him. Sales are made every day which show that price is not the consideration any more than it used to be. If you have the goods you can sell them. We have several orders in for goods now that we have not been able to get. Last season we sold over one hundred steel fishing rods."

Good Display Helps

Not many stores, even in large cities, have a nicer store display than J. Y. Smiley & Son. "Six years ago," said Mr. Smiley, "we had one silent salesman in the store, now we have seven, and we will have more before long. Every one of them paid for itself in increased sales in a short time. They keep the goods clean, make a nice effect in the store, and are one of the best sales producers we have."

Throughout the spring and summer Mr. Smiley reserves one of his display windows for various lines of sporting goods. The window is changed every week and in nearly every article shown there is a price ticket. "Our display windows are another of our most valuable sales producers," said Mr. Smiley. "We no sooner put in a window of fishing tackle or some other goods than sales are increased."

Double Entrance

J. Y. Smiley & Son have a double-ended store and three display windows. One of these looks out on the city market, and special displays of a practical nature are kept in it. Roofing, stoves,

etc., are shown, and the displays are always kept seasonable.

Since starting business in Woodstock, Mr. Smiley has trebled his store space. One of his biggest departments is stoves, and almost one half of his space on the main floor is used as a stove show room. His sales, he states, in both stoves and ranges and in summer stoves have been most satisfactory.

"We sell on an average two hundred stoves a year," he said. "Business in all lines has been good. Oil stoves are good sellers as well as the stoves and ranges. Last season we sold 85 oil stoves, and this season we expect to do better."

Lists All Prospects

Mr. Smiley keeps a special book in which all prospective buyers of stoves are carefully listed. Many of his best sales have come through satisfied customers who talked about the stoves to their friends or sent them in direct to the store. A great deal of business has been obtained through newspaper advertising.

"We get excellent results from our newspaper copy," said Mr. Smiley. "We try to make our advertising attractive and interesting. It is hard sometimes to trace results from advertising, but I know of people who have come in twenty miles. Other people will phone in, but I am well satisfied with our newspaper results."

Special demonstrations is another sales plan which has been tried most successfully by the firm. "We always hold two-day demonstrations in the case of stoves," said Mr. Smiley. "We find we get the best results in that way, especially if the weather happens to be bad. People will often come out on the second day when, if we had only had a one-day demonstration and it happened to be stormy or wet they would not have come. We frequently sell from five to ten stoves on a Saturday.

Never Knocks Others

"I have been complimented by prospective buyers upon the fact that we never knock our competitors' goods. When a man or woman comes in and asks about our stoves I always tell them all the good points I can about the stoves we handle. I never run down any other makes of stoves, and if they ask about such and such a stove I usually tell them it is a good stove, and then try to explain just where ours is better. Frequently people say, 'Well, we like your way of doing business because you do not run down other people's goods. We were in a store down the street and the man could not say anything too bad about the goods handled by other stores. It is a mistake to do this. People do not like it."

Concentrated Effort

When he is selling stoves, Mr. Smiley concentrates all his energies on that end of the business. "It is understood," he said, "that if a man is selling stoves he is not to be interrupted. It is remarkable what bad effects will follow an interruption of this kind. I have had cases where I had a stove sale just about through and somebody came in and wanted to ask about something. It may have only taken a moment to dispose of the business, but in that time the prospect's mind was taken off the question of stove buying and I have had to talk again for an hour to get back to the point where we were before the interruption and close the sale."

Back the Goods

No matter whether it is stoves or roofing or any other line, the firm stands absolutely behind its goods. If they are not right they are made right, and this policy has not only helped to hold trade but has brought new business.

Mr. Smiley uses somewhat similar methods in going after roofing business that he does in selling stoves. All prospects are carefully noted in a special book kept for the purpose and are carefully followed up.

"We have sold three carloads of roofing in two months this year," said Mr. Smiley. "Our window displays bring in a lot of customers, and the newspaper advertising brings in a lot. We also go out in our auto and get in touch with business in the country. I figure that we sell to two out of every three prospects we get in touch with."

Near Cash Basis

The firm works as nearly as possible on a cash basis. There are some accounts where it is necessary to provide accommodation, but as a general rule Mr. Smiley plans to get the money when the goods are sold. He says that he finds that many farmers like a small inducement in the shape of a discount but are perfectly willing and able to pay cash. He meets their request by allowing a discount and making it worth their while to pay cash. Once he has named a price though, he makes it a rule never to change it or lower it by those who might hope to beat him down.

Auto tires is one of the new lines he has taken on this spring, and he says

The use of display tables is found to be of great value in developing sales of many lines of merchandise in the J. Y. Smiley & Son, Woodstock, Ont., store. These are shown in this photograph at the left and the splendid arrangement of silent salesmen is also much in evidence. Entrance to the stove department is gained through the door at the back of the main section of the store, shown herewith.

Window display of housefurnishings recently used by J. Y. Smiley & Son, Woodstock, Ont., in bringing these lines to the attention of the customers of the store. Efforts to dress windows which will draw customers to the store are always put forth by this aggressive firm.

that he finds the business encouraging and expects it to develop steadily.

Reaches the Farmers

An advertising stunt that has brought big results, he says, is to circularize the farmers who come to market. Every Saturday special bills listing some special are gotten out, and boys take them over to the market and put one in each farmer's wagon or auto. Mr. Smiley says the business that has developed from the use of these bills has been most satisfactory. Seasonable lines are always featured on the bills.

The firm's newspaper advertising is centered on two days, Tuesdays and Thursdays. This is timed to reach the people Mr. Smiley wants to reach on the days they are likely to be in Woodstock.

The district around Woodstock is a rich farming and dairying territory, and Mr. Smiley says that the farmers are buying as never before quality goods regardless of price, especially goods which will save time and labor or make for better conditions generally in the home. Electric washers is one of these lines, and his sales have been most satisfactory. Paints are another big department, and each year sees an increased volume of business, Mr. Smiley says. He keeps close track of all paint prospects, and each season has the manufacturer whose line he handles mail special literature to them.

What They Want

"There is literature and literature," said Mr. Smiley. "Personally I think there is no doubt that the literature which shows the prospective buyer something is that which pulls the business. Take two paint firms for instance. One gets out perhaps the best reading circular that a high-priced man can arrange. The other gets out something that shows just what can be done with the paints. John Jones, the farmer, to whom it is sent has a table perhaps that he is planning to touch up. He and Mrs. Jones look over the literature. In one circular they find a lot of high-sounding stuff about what So and So's paint will do. In the other they see just the very color or finish they have been looking for for their table. There is no question whatever in my mind about whose paint they will buy."

CARRIES STOCK ON ONE FLOOR

(Continued from page 39.)

portunity either to draw out of him his requirements for future months. In the former implement shed and garage occupied by this firm the machinery and cars were never displayed to advantage, owing to the gloomy interior, while in this great new sunlit store they stand out attractively in all their brilliant paint and varnish and polish. The varnished hardwood floor adds very materially to the showing made. A gang plow with its burnished steel shears, its red paint, and hair-line adornments looks very mediocre in a tumbledown warehouse, with its dirty, black, unswept floors, but it is a thing of beauty when displayed under the conditions presented in the Blyth store. The same holds true with regard to other machinery and with automobiles.

One Department Helps Others

A combination store of this kind has the effect of attracting business by inducing customers who come to trade in one line to make purchases in other departments. For instance a farmer drops in to buy a few pounds of nails. When he enters the store there is presented to his view in place of a congested hardware store, with gloomy exterior and hardly room to turn around, a veritable exhibition display of farm necessities. If he has in view the purchase of a new car, new machinery, harness, a kitchen range, a phonograph, some barn paint, he is a strange individual if he can resist the temptation to take a look around at this inviting display. In fact, even if he does not contemplate the purhase of anything but his nails he has the pleasurable anticipation of looking over this unusual assortment of goods. And so in a great many cases quotations are asked, and the way paved towards making a sale.

Using China Cabinet

There is one very pretty little sales trap all ready for the man who comes in to purchase a car or automobile accessories. The firm had in stock a china cabinet which was not being put to any use, and this they fliled with several lies of automobile gauntlets and working gloves and mitts, all of leather. They are placed in a position where they cannot escape attention, and many sales are made.

Store Arrangement

The frontage of this store, located at a central point on the main street, is 50 feet, and all of this 50 feet is entirely enclosed in plate glass, seven large panes being used. There are two entrances, one of them leading direct to the hardware department, which occupies the entire left side of the store to a depth of 75 feet. The other entrance is wide enough to admit an automobile or piece of machinery, and is equipped with double doors. At the rear of the store a flood of light is allowed to penetrate through six great square windows just under the ceiling. The walls and ceiling are finished with beaver board. The front of the store is composed of pressed brick.

Behind the hardware counters is a lengthy new cabinet for shelf hardware, which has just been installed. It is an oak cabinet, finished in the natural wood, and each of its drawers and compartments is labelled with bright squares of red leatherette, on which is pasted a cut of the article contained in the drawer. The effect is very smart and attractive.

The central portion of the floor is taken up with ranges, washing machines, steel beds, grindstones, kerosene stoves, gas engines, etc., while the entire right hand side of the store is taken up with the display of farm implements, automobiles and harness. Across the rear of the store is the paint department. The automobile accessories are arranged close to the automobiles. Even with the great variety of goods offered for sale there is abundance of room.

Mr. Blyth has been in business in Esterhazy for the past 15 years, and in the last five has doubled the volume of yearly sales. His turnover last year was approximately $150,000. His new building was made necessary as a result of a fire which swept the main street of the town and destroyed his former store.

"Getting prospects is the main thing in this business," said this proprietor. We keep a record of all prospects and aim to close before the other fellow gets there."

Big Stove Trade is Expected

Every One of the Thousands of New Homes Being Erected is a Prospect — Fifty Thousand Soldier Boys Home From Overseas With Brides—Dealer Who Gets An Early Start Will Clean Up the Most Business

"LET Us Help You to Buy the Right Stove." This is the heading of the advertisement used by a hardware dealer this week. He is an early bird, but there is an old and very true saying that the early bird gets the worm. In the stove business as in anything else, there is nothing like getting a good start. The business man who is always a jump or two ahead of people's actual wants, is usually the chap whose store is one of the live centres in any community. He studies very closely the prevailing conditions and cashes in on them. Now is unquestionably a good time to start a fall stove selling campaign, and the sooner it is started the more momentum it will gather and the better the results to be obtained.

The Fuel Situation

Reports that have been appearing recently in regard to the coal situation have caused many people to give a good deal of consideration already to the question of how they are going to keep warm this winter. Many inquiries have been and are being made about stoves and heaters. Another source which promises big results from a sales standpoint is the returned soldiers. There are, it is estimated, at least 50,000 boys who have brought home brides, and a great many of these young married couples are prospects for stoves for their new homes. Speaking of new homes suggests the very extensive market that will be opened by the building programme which is now under way. In the next two months thousands of homes which have been started during the summer will be finished up and occupied, and every one of them will require heating and cooking equipment of some kind.

Go After Business

The plan adopted by some dealers of checking up closely all the new dwellings and finding out about their requirements is one that produces results. Very often hardware men have found that they not only sell stoves but a large amount of other goods as well.

This season the hardware dealer who sells stoves has some splendid talking points which he should emphasize. There is always the point of quality to be told about. People in the last three or four years have had it impressed so forcibly on their minds that price is not the big consideration that they used to think it was, that they are always ready now to listen to points which indicate quality. Quality is the buying basis now rather than price. People now would rather be thoroughly satisfied about what a stove will do rather than how much it costs. If the dealer can satisfy them that they are going to get back in service and comfort and all-round utility many dollars by paying five dollars or even ten more for one stove than another, they are not likely to raise any serious objections.

Don't Buy Every Day

Most people take into consideration the fact that they do not buy a heating stove every day or every year, or every five years. They want a stove that is going to stay on the job for some time and they are willing to pay for the stove that will do this if the dealer can convince them that he has the goods. This is not a particularly hard job for a good stove salesman.

He has a talking point of tremendous value in the construction points of the new stoves which he can explain will not only burn wood and coal, and in some cases gas or oil, but by reason of different principles result in a very large saving in fuel. An appeal of this kind, backed as many dealers back it, by showing the stove actually in operation in their store, where the prospective buyer can feel the heat and see the stove, carries a punch that is unusually convincing and effective.

An Effective Argument

An effective argument to apply to the chap who insists upon basing his purchase on price instead of service and quality, and talks about pre-war prices, is to tell him that by buying now he is going to save money, because not only are raw materials going up rapidly, but the stove manufacturers are having to greatly increase their employees' wages and cannot any longer produce stoves on the basis that the goods you are showing were produced.

Dealers state that in the great majority of cases the final decision in purchasing the stove rests with the housewife. This is only natural as she has to do most of the work with the stove and is vitally interested in it, not only from a heating standpoint, but for its cooking qualities, its appearance, whether it is easily kept clean or not, whether it is easy to handle, and its general convenience.

Many dealers find it is excellent policy to let the women take their time and look into these various features for themselves. The dealer who gets fussy every time a woman wants to take the lifter and see the interior of the stove, or open the oven and see what it is like, is not going to get nearly as far as the salesman who, after drawing her attention to this or that feature, stands quietly back for a minute and lets her investigate for herself. Women like to do this. Aside from actually seeing what the oven looks like or the firebox, they feel that the dealer is not trying to hide anything from them and wants them to see and be satisfied that what he is telling them about the stove is the actual fact. The dealer who lets them investigate and then follows up promptly with a good line of sales talk will make twice the progress he would make by other methods and can very often clinch the sale right there.

Making a Trade

Many dealers have been finding that they can make good money by taking an old stove in a deal for a new one. They get their profit on both the new stove and the old one. One dealer who does this trading extensively stated that he makes almost as much out of many of the old stoves by fixing them up a little as he does out of the new ones. He allows only a small sum for them in the trade and then, by fixing them up a little, can make an excellent profit on the deal, and states that he never has the slightest trouble in disposing of them.

An excellent way to boost stove sales is by holding demonstrations. Opinions vary as to the length of time these should last. Apparently it depends entirely upon the size of the town in which they are to be held. In the smaller towns in the country districts dealers stated to HARDWARE AND METAL that they invariably get the best results by holding only a one-day demonstration and by advertising it thoroughly in advance.

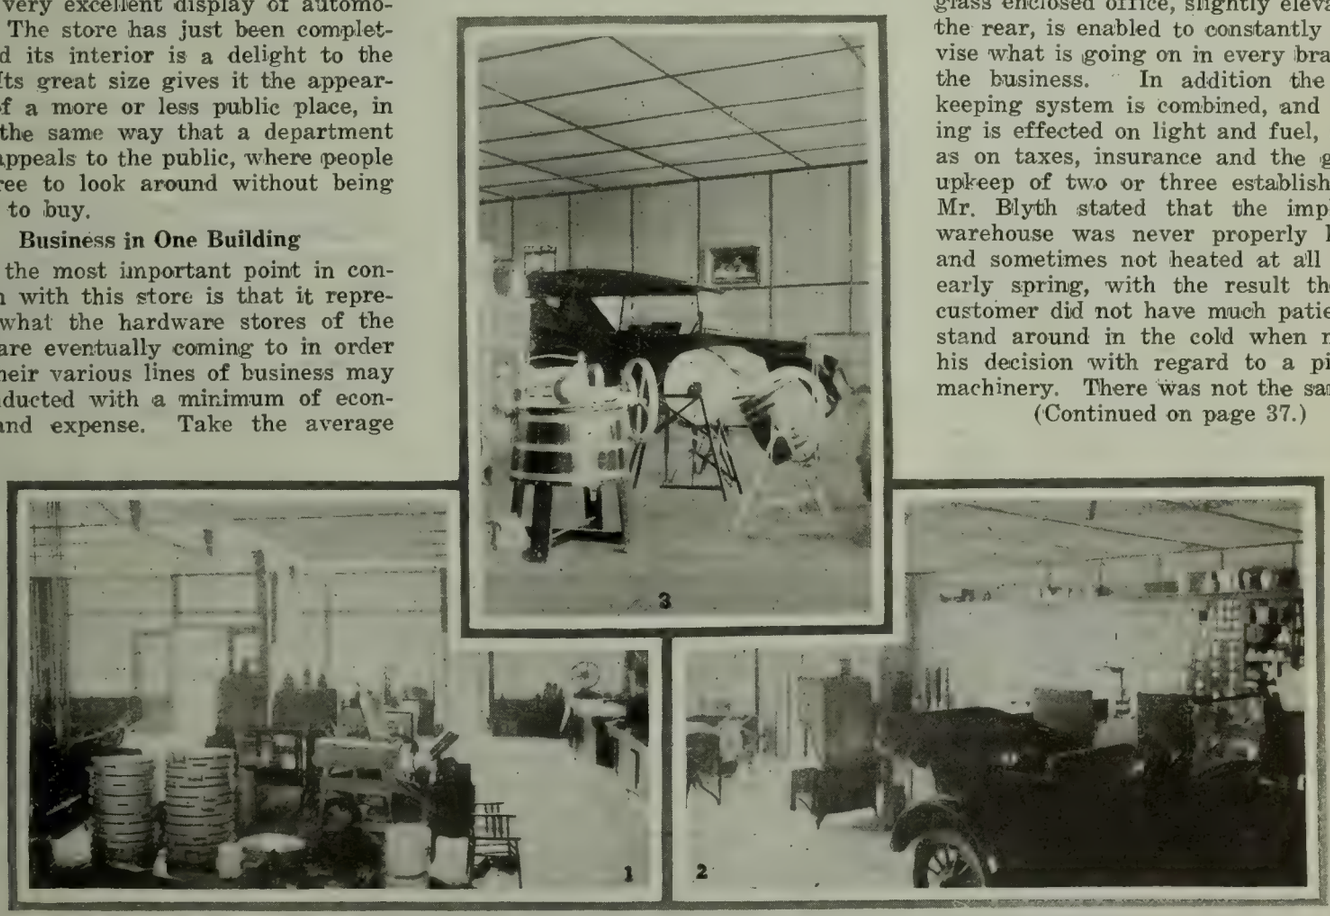
They find that if they give the demonstration proper publicity they will draw people for twenty miles around, and not only make sales but get in touch with a lot of excellent prospects for following up. In large centres demonstrations can be held longer and without losing their "pulling" power. Very often a demonstration can be arranged so that a church organization of women will cooperate and a sale of cooking be held. This affords a chance of showing what the stove will do, and many dealers have taken advantage of a plan of this kind with good results.

Another excellent plan for getting in touch with stove prospects is to have a display at the various fall fairs. This is an inexpensive way of showing the stoves to a maximum number of prospective buyers. Dealers state that there is no other way in which they can come in direct personal touch in so short a time with so many peopjle as by showing at the fairs. Many of them take in not only the home show but all the fairs of any size within a radius of fifteen or twenty miles.

Carries Stock on the Main Floor

Arrangement of New Store of W. H. Blyth & Co., Esterhazy, Sask.—A Fine Model of Modern Merchandising Quarters—Display of Automobiles, Farm Implements, Stoves, etc., Maintained at One Time

THE latest development of the modern hardware store is to be found at Esterhazy, Sask., where W. H. Blyth & Co. have combined on one magnificent hardwood floor, with an area of 3,750 square feet, in one great sunlit store, without pillar or partition, everything they handle, including a complete stock of light and heavy hardware, a great assortment of farm implements and a very excellent display of automobiles. The store has just been completed, and its interior is a delight to the eye. Its great size gives it the appearance of a more or less public place, in much the same way that a department store appeals to the public, where people feel free to look around without being forced to buy.



Business in One Building

But the most important point in connection with this store is that it represents what the hardware stores of the West are eventually coming to in order that their various lines of business may be conducted with a minimum of economy and expense. Take the average hardware merchant in the West to-day. In addition to his regular business which is housed in one building, probably in a central position on the main street, he is the agent for automobiles and farm implements which are maintained in another building, or perhaps two other buildings. The result is that it requires extra clerks to be constantly on duty in the various buildings, although at certain seasons of the year there is scarcely any business done in implements or automobiles.

Advantages of New Arrangement

By combining the various elements of the business on one floor they can be handled by the regular hardware staff, and, moreover, the proprietor from his glass enclosed office, slightly elevated in the rear, is enabled to constantly supervise what is going on in every branch of the business. In addition the bookkeeping system is combined, and a saving is effected on light and fuel, as wel as on taxes, insurance and the general upkeep of two or three establishments. Mr. Blyth stated that the implement warehouse was never properly heated, and sometimes not heated at all in the early spring, with the result that the customer did not have much patience to stand around in the cold when making his decision with regard to a piece of machinery. There was not the same op-

(Continued on page 37.)

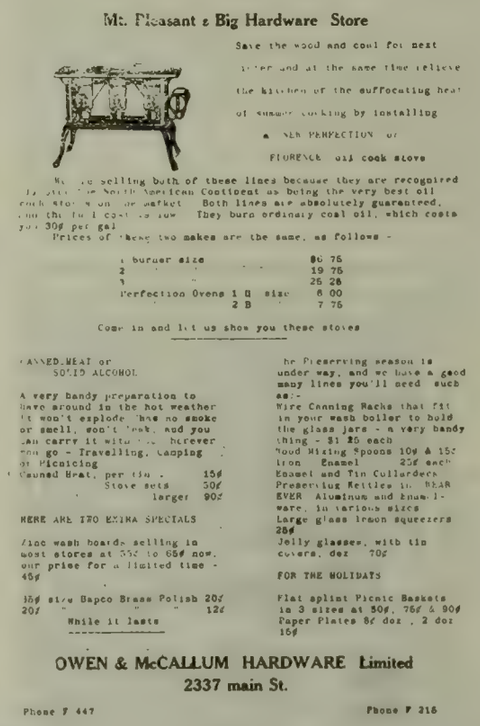
No. 1.—Interior of the combination hardware store, garage and implement warehouse of W. H. Blyth & Co., at Esterhazy, Sask. This picture was taken from the rear of the store, looking toward the front, and shows the fifty-foot glass front of the store, which makes for a sunlit and cheery interior. The hardware department is on the right of the picture, the heavy hardware is grouped in the centre, while the automobiles are on display on the left together with the farm implements, which are in the rear of the building and are not shown in the picture. It will be observed that there are two entrances, one of them through a single door, and the other through double doors which admit an automobile. In the array of goods in the centre it will be noted that a phonograph is on display, and placed ready for an instant demonstration. A telephone has been placed in a handy position for the use of customers. The expanse of floor seen in the picture is constructed of narrow hardwood boards, oiled and varnished. The area of the store is 50 x 75, and there are no partitions.

No. 2.—Another picture of the interior of the store operated at Esterhazy by W. H. Blyth & Co. This picture gives a better impression of the hardware department of the store, which is complete in its modern fixtures and fully stocked. The unusual sight of an automobile offered for sale on the floor of a hardware store is better presented in this picture.

No. 3.—This picture, taken from the hardware department looking toward the opposite side of the store, shows the attractive manner in which the automobile is displayed. Few farmers who come in to buy hardware can resist the temptation to look it over. Immediately to the right of the picture is shown the wheel of a gang plow, which presented a spic and span appearance as it reposed in the sunlight in its coat of red near the door. To the left is shown the china cabinet, which was used as a trap to make sales by filling it full of leather gloves and automobile gauntlets. The interior finish of the building with beaver board is well shown. The picture shown in the background, with others of the same size, was used to relieve the baneness of the walls.. Just beyond the automobile is a brass bed, which has not been set up. A gladstone bag, which the firm stocks, is shown on top of the china cabinet, and there is a display of lap rugs just beyond the grindstone.

Weekly Bulletin Pulls In Business

Vancouver Hardware Merchant Combines With Dry Goods Neighbor in Issuing 3,500 Weekly Bulletins—Results Immediately Develop—Two Classes of Goods to Advertise—Householder Naturally Comes to Hardware Store



"WE have used the big city dailies," said J. A. McCallum, of Owen & McCallum Hardware, Ltd., Vancouver, "and we have found that there is too much waste circulation as far as the merchant is concerned who is really doing a community business. Even the enquiries we receive from remote parts of the city and out of town cannot readily be converted into sales. We also use a weekly that is published right in the community that we serve, but our biggest success has been attained through the use of our own weekly bulletin. We can easily trace by far the greatest proportion of the business attributable to advertising to this sheet. We have no waste circulation with it; we do not share the attention of the reader with any competitor, and it has a direct personal application to the reader that any other newspaper advertising lacks. Our neighbor, the dry goods man, went in with us, about four years ago, in the purchase of a multigraphing machine. We print now every week about thirty-five hundred copies, with our message on one side and his on the other. He folds up half the circulars and we fold the rest and we share the expense of having them distributed. We have learned by experience not to entrust the distribution to boys, but have a careful, honest man deliver them and put them right in the letter boxes or under the doors. It is an actual fact that as soon as each week's circular gets into the hands of the consumers, the phones start to ring, and the women begin to enquire about some of the articles advertised in this way.

Making Comparisons

"Not long ago we ran the same advertisement in the local weekly and in our own circular; it was a special offer and required the return of a cut-out coupon to get the special prize offered. Our sheets were on yellow paper and the newspaper, of course, white. In checking up results, we found one-third more coupons cut from our yellow circulars. I would not imagine that this method of advertising would be the best in a downtown store, the newspapers would be cheaper advertising, but for a community business we find this cheaper and results better."

Two Classes

Mr. McCallum states that in advertising hardware lines, there are just two classes that the offerings can be divided into. Articles in which the appeal lies in a special price or articles which are of timely, seasonable interest. When a special price is advertised, unless there is ample stock to ensure every request being filled, the quantity is advertised,

Mt. Pleasant's Big Hardware Store

Save the wood and coal for next winter and at the same time relieve the kitchen of the suffocating heat of summer cooking by installing a NEW PERFECTION or FLORENCE oil cook stove

We are selling both of these lines because they are recognized by all the North American Continent as being the very best oil cook stoves on the market. Both lines are absolutely guaranteed, and the fuel cost is low. They burn ordinary coal oil, which costs you 30¢ per gal.

Prices of these two makes are the same, as follows -

1 burner size		86 75
2 "		19 75
3 "		25 25
Perfection Ovens	1 B size	6 00
	2 B "	7 75

Come in and let us show you these stoves

CANNED MEAT or SOLID ALCOHOL

A very handy preparation to have around in the hot weather it won't explode has no smoke or smell, won't leak, and you can carry it with you wherever you go - Travelling, Camping or Picnicing

Canned Heat, per tin . 15¢
Stove sets 50¢
" larger 90¢

HERE ARE TWO EXTRA SPECIALS

Zinc wash boards selling in most stores at 55¢ to 65¢ now our price for a limited time - 45¢

15¢ size Bapco Brass Polish 20¢
20¢ " " " 12¢
While it lasts

The Preserving season is under way, and we have a good many lines you'll need such as:-

Wire Canning Racks that fit in your wash boiler to hold the glass jars - a very handy thing - $1.25 each
Wood Mixing Spoons 10¢ & 15¢
Iron Enamel 25¢ each
Enamel and Tin Cullenders
Preserving Kettles in NEAR EVER Aluminum and Enamelware, in various sizes
Large glass lemon squeezers 25¢
Jelly glasses, with tin covers, doz 70¢

FOR THE HOLIDAYS

Flat splint Picnic Baskets in 3 sizes at 50¢, 75¢ & 90¢
Paper Plates 8¢ doz . 2 doz 15¢

and unless the price named is less than the usual price the word bargain or special is not used.

An Oversold Bargain

Recently a special price was named on a quantity of aluminum kettles. Though the number in stock was considerable there were fifty orders left unfilled after the stock of some had been depleted. The names of those disappointed were taken, more supplies ordered, and the customer assured that when another shipment came in they would be supplied also at the same price, which was done.

Carries Crockery

This hardware store also stocks stoneware, such as butter crocks, bean pots, mixing bowls, bakers, etc., and also earthenware teapots and a couple of stock patterns in dinnerware for everyday use. It has been found that the sale of kitchen utensils often suggests teapots, and, as graniteware pots are not wanted, the earthenware pot is sold and leads to other crockery purchases.

Householder Comes to Hardware Store

"It seems to me," said Mr. McCallum, "that the ordinary householder comes to the hardware dealer just naturally for about everything but groceries, clothes and drugs. They come in here every day asking about something or other. The men come in and mention that they propose building a hen house or are going to paint their car, or they're going to make, fix or remodel something else, and as every man isn't a good mechanic, yet likes to tinker away at things himself, he asks our advice. Most of the time the hardware man can give him some helpful suggestions, and incidentally he has a splendid chance to sell him all the materials he's likely to require from chicken wire to washers for a leaky tap."

As HARDWARE AND METAL'S representative was leaving, Mr. McCallum said, "I enjoyed reading that article the other week in HARDWARE AND METAL about the co-operative stores. I've seen the same thing tried out up-country in the mining towns, and invariably they petered out. Partly through mismanagement and largely through jealousy they never could make it go."

Application for an order winding up the Imperial Steel and Wire Co., of Collingwood, was made in Toronto before Justice Kelly this week. The application was registered by a number of judgment creditors, and the town of Collingwood as represented by Mayor J. Robins Arthur. Judgment on the application was reserved.

INSTALLED TELEPHONE DEVICE

In the office of the Miller Hardware Company, at Virden, there is a desk telephone that used to give a lot of trouble before a device was invented which solved the difficulty and which may be of use to other merchants. In this establishment customers were always asking for permission to use the telephone. It would be passed out to them through a wicket, and invariably it would be left there, necessitating a trip around by the door to put it back again.

The invention is simply a foot and a half coiled spring suspended from a hook in the ceiling to which is attached a slender wire which supports the telephone at a height of about eight inches above the desk. By the use of this device the telephone must always be returned to its place, and besides, instead of having to lean over to talk through the telephone on the desk, it is much more convenient to hold it before one at whatever height desired.

Keeping the Stock Turning Over

Richardson & Rae, of Ingersoll, Ont., Find Attractive Store and Window Display Backed by Newspaper Advertising Results in Steadily Increasing Business—Display Tables Good Business-Getters.

Based on an interview by C. E. PARSONS, of Hardware and Metal, with Nelson Richardson. of Richardson & Rae, Ingersoll, Ont.

RICHARDSON & RAE, of Ingersoll, Ont., figure on turning over their stock of enamelware from three to five times each year. They accomplish this by letting the buying public know that they have the goods, and they keep the goods constantly before the public in three ways, by attractive store displays, by well-arranged window displays, and by newspaper displays. As may be seen from the accompanying illustration, the stock of enamelware is kept right up at the front of the store. It is neatly arranged and is kept in perfect condition. In addition to the shelf display shown free use is made of display tables. Each of the plans mentioned above produces business. Their combined effect is to produce a turnover that is most satisfactory because it is found that the goods are not only kept moving but that each season sees a larger amount of goods handled.

Good Business Getters

"We find display tables good business getters always," said Nelson Richardson, of Richardson & Rae, to HARDWARE AND METAL. "They produce real results, and produce them all the time. It does not make any difference whether it is enamelware or any other line that we set out on the table, it moves. People see it and they buy, and that is what we want them to do. Besides, the sales our display tables produce they have a splendid effect in keeping a lot of goods out where people can see them. When folks come into a store they like to see something that interests them. The more you can show them the better they like it. The man who keeps his stock hidden away and makes people ask for it is not going to sell anything like the amount of goods he would if he let people see what he has to offer."

Keep Store Attractive

Richardson & Rae believe in keeping their store and their store windows attractive. The windows are kept shining and they are changed frequently. The firm has had excellent results from its windows, and follows the plan of price-marking each article so that prospective buyers know as soon as they look at the goods how much it is going to cost them. This plan is also followed out in the store. Take the firm's brush display for instance. The brushes are shown on a special table, and each bears a price ticket. So with other articles. There is no question in the mind of the buyer as to whether an article is cheap or dear, the price is there for him to see and the firm finds that this policy is not only appreciated by the public but that it helps sales materially.

Kept Moved Around

Special attention is given to keeping seasonable lines always to the front. The stock is moved about regularly, and the display tables too. Mr. Richardson says he always gets good results by paying a little attention to this. For instance, during the summer he has had good results by keeping summer stoves up at the front where all the women who came in would see them. He finds that people take keen interest in things they see displayed about the store in this way. Once he gets them talking about whatever the article is it is usually a question of only a short time before a sale is closed. Very often if the sale is not closed at the time on such an article as a stove or washing machine, an excellent prospect is obtained, and by a little follow-up work the deal is completed later.

Good Country Trade

Richardson & Rae do a good country trade. Ingersoll is located in the centre of a dairying section that is among the very richest districts of the kind in the

Continued on page 64

A very neat arrangement of tinware, enamelware, and kindred lines is that shown herewith and taken in the store of Richardson & Rae of Ingersoll, Ont. Getting the goods out where people can see them is one of the most important factors in "Keeping the Stock Turning," which this firm are constantly aiming at.

EDITORIAL COMMENT

DEPARTMENT OF TOO MUCH INFORMATION

THE Department of Trade and Commerce at Ottawa, should be, particularly at this juncture, the most important and the most efficient Government department. It should have for its minister an energetic business man. Its leading officials should be of the same type of men who have had some practical experience with business conditions; or, if they have not had that, with enough openmindedness and energy to take an actual, living interest in their work.

A business man or newspaper man going to the Department for information or advice on trade matters should be able to get it promptly and it should be as nearly up to date as possible.

Instead of those desirable conditions, what do we find? The Minister of Trade and Commerce is a fine old gentleman, who was a better politician in his day; but his day is so long past that he has ceased to be bitter or even interested. It is doubtful if more than three or four of the officials of the Department know him by sight, as (since his appointment to an office which, in view of his former political history was generally looked on as equivalent to shelving him), he has only looked in at the Department of Trade and Commerce at rare intervals.

The place is not deserted, however. There are officials there—crowds of them. They are all as busy as bees at something. You will find officials there almost concealed from view by the number of reports and documents by which they are surrounded; and you say to yourself: "I have evidently come to the right shop for information. These men are almost engulfed by it."

That seems to be the trouble. There was a creek in the Klondyke which the Indians called "Too Much Gold." This is the department of Too Much Information. There appears to be so much of it that they never get time to classify it as they go along, but save it all up for the blue book at the end of the year; when, of course, it is not news, but history.

The Department of Trade and Commerce would seem to be designed to be an admirable browsing ground for a trade paper reporter; but that class of visitor is looked on with particular suspicion, as individuals who may have underhanded designs on the visible supply of information in the Department; possibly even to the extent of trying to reduce it by giving some out to the public. So great had this menace become, indeed, that we understand it has been decided that henceforth all information will be given out only in the form of history, through what is humorously called "The Department of Information." This department publishes a weekly newspaper.

Most weekly newspapers are issued the week covered by their date line; that is, they are up-to-date. But the Government newspaper apparently looks on this merely as a concession to the clamor of the mob, which anything so ponderous and dignified as a Government newspaper should properly ignore; so it comes out just when it feels like it, usually a few weeks late. It, also, is history.

There is also a statistical branch connected with the Department, and it compiles much valuable information. More than that, it seems anxious to get it out while it is still news; so that anyone inquiring there personally is apt to secure valuable data. Its reports, of course, are issued like all other Government reports, some considerable time after they have ceased to be of current interest.

The blame for all this should probably be laid, not on individuals, but on the system, and the system will not be changed until some business man is made Minister; some man who will realize that the Department of Trade and Commerce should be a living thing, recording and giving out information from day to day, when it is of use and interest, and not from year to year.

RESTORING THE BALANCE

ONE of the greatest tasks before the civilized and progressive nations of the world now is to restore an economic balance. One of the first steps in doing this apparently is to help the nations of Europe to help themselves. Now that through the combined efforts of the Allies the disturbing factor which for years has menaced the world has been removed, they have still a big task on their hands in getting things running smoothly after the upheaval of the last five years. Canada has a part to play in what is to be done and the rich natural resources of this country may be turned to help the Empire. It is apparent that the call will be for more and ever more

production to meet the needs of a world whose stocks in many instances are completely bare. Canadian firms have set to with a will to do their part and have gone even a step further in a most important direction at the present time, in granting credit to those who temporarily find themselves not only short of stocks, but suffering financially from conditions brought about by others. There will be for a long time to come apparently an unlimited market for Canadian products. This of course is going to have its effects on the home markets. It will almost certainly tend to keep up wages and prices at home. If the past three or four years is any criterion to go by this will mean that the buying capacity of the general public will be greater than ever. Especially will this be the case with the farmers, to whom money is coming in sums they never dreamed of. Hardwaremen have found business exceptionally good and are looking for it to continue so. In spite of high prices people are buying as never before and the chief trouble with many merchants is to get enough goods to keep up with their orders. Many manufacturers are booked ahead and they report that work is being delayed through inability to get help and also in some cases by not being able to get materials promptly. It appears that the strikes which were causing trouble in some centres earlier in the season are now practically all settled and that things are running along pretty smoothly with everything set for a splendid business for some time to come.

WILL THEY STILL SUBMIT?

A GERMAN publication "Die Jahrmarkt" estimates that as a result of the economic collapse caused by the peace terms, 20,000,000 Germans will be unable to support themselves. These people, it believes, will have to go somewhere else to work. The deep hold that the old official policy has upon the nation is shown by the views expressed by "Die Jahrmarkt" regarding the future of these workers. Although they must go somewhere else to work it says they must always work for the upbuilding of their country and must keep in touch with it. The workers are to be kept under control for the benefit of their own country whether they ever return or not. This publication says distinctly that those leaving Germany to help in the process of building it up must be subject to a regulation which will distribute them where they will be of most assistance in "rebuilding our world commerce." They must not be allowed to go where they please, but "their destinations must be disposed of by the State with the usual German efficiency." They will not, says "Die Jahrmarkt," go to countries "under Allied influence for years to come." All these statements smack very much of the old official method of saying that this or that must be done and it was done. It remains, however, to be seen whether the average German citizen will continue blindly to do as he is ordered after seeing where he was led by the militarists.

JOHN BARLEYCORN'S BEQUEST TO THE PAINT TRADE

THE American *Paint and Oil Dealer* of recent date says: "When a man quits drinking, he wants to marry and settle down and have a home of his own. That sells lumber and paint. If he already is married, the first thing that he thinks of, or that his wife thinks of, when he once is on the wagon for good, is getting a home or fixing up his home.

"He isn't satisfied with merely getting the 'fresh paint' sign outside his house—he and the wife and children go prowling around the whole house seeking new places to use, the paint brush.

"Prohibition may be a joy killer to some people, but it certainly does help the paint business.

Do you think this a fanciful factor in the trade outlook?

In 1917, according to the World Almanac for 1919, page 237, the nation's drink bill, at wholesale prices, was $19.95 per capita—or a total of more than $2,000,000,000 for the more than 2,000,000,000 gallons consumed.

As much was spent in the one year of 1917 for the materials with which to "paint the town red" (and as many gallons were used) as would be spent or used in ten years, at the present rate, on the proper materials for properly indulging the desire for painting the town and the home and for "interior decoration."

Where will that $2,000,000,000 a year drink money go now?

The paint and varnish trade will get a big share of it.

And the dealer whose motto the year around is "Every month a good paint month," is going to get his share of this two billion dollars per year.

REGARDING THE RE-SALE PRICE

THE United States Federal Trade Commission in its presentment of the Re-Sale Price Question has touched the heart of the matter when it contends, that "producers of identified goods—indentified by the trade mark or trade practice—should be protected in their intangible property right or good will, created through years of fair dealing and of sustained quality of merchandise," and moreover, that "unrestrained price cutting is not in the public interest and tends eventually to impair if not destroy the production and distribution of articles desirable to the public."

IF YOU are prepared to meet the prices of big out of town firms why not tell the people about it? If you are prepared to quote even better figures than the outsiders you are going to lose business unless you advertise the fact far and wide.

Advertising Helps Sell More Paint

ARNOLD N. SMITH.

Paint Sales of the Smith Hardware Co. at Cornwall, Ont., Show an Increase of Twenty-Five Per Cent. This Season—Owner Tells of Simple Little Device Which Has Increased His Sales of Axes —Credit Sales Handled on Basis Which Calls for Settlement at Definite Date

Based on an interview by C. E. PARSONS with Arnold N. Smith of the Smith Hardware Co., Cornwall, Ont.

BY going after paint business aggressively, the Smith Hardware Co., of Cornwall, Ont., has increased its sales more than twenty-five per cent. this season. Letting people know that it had the goods for sale and pointing out in an interesting manner the real money that paint would save, the satisfactory service it would give, its value as a beautifier and preserver, and the ease with which painting can be done, was the plan on which the firm based its campaign.

Always Advertise

"We have always been appreciative of the good results to be obtained from newspaper advertising," said Arnold N. Smith to HARDWARE AND METAL. "Long ago we discovered it was the quickest and surest means of reaching the people we want to reach not only in the town but for miles around in the country. A large percentage of the farmers in this district have automobiles now, and it is nothing for them to run into town and get what they want and go back. We aim to reach all these people and let them know about our goods by seasonable advertising. We back up our advertisements by window displays which are changed at least once a week. I should say that attractive window displays come perhaps next to advertising in helping boost sales. They bring a lot of people into the store.

Paint Sales Brisk

"Our paint sales this season indicate that the higher grade paints moved the best. People seem to have realized that it pays to buy good goods. We have been noticing this tendency in other lines besides paints. When making a sale of paints we find that it pays frankly to tell the prospective buyer that the article he is buying is first class, fair or cheap. We give our personal guarantee that it is just as represented, and if it does not do all that we say it will we are prepared to make good. We find that standing behind the goods in this way has a big effect in deciding people. They feel that they know us and that if we have confidence in what we tell them that they will have no trouble with the goods. We try to give real service in our paint department in the way of advising people. We find that a great many people who have some painting in mind do not know just what paint to use to give the best results, or how to prepare the work. We always find out what they are planning to do and then tell them all we can about how to get things ready, what paint to use and how many coats to put on, what brushes are the best and so on. They appreciate this and frankly tell us often that if it were not for the help we gave them they would have got the wrong paint or done the work so that the results would not have been satisfactory. A great many women buy paint in small lots to do all kinds of work about the house, touching up woodwork, furniture, and even painting walls."

In Prominent Place

The paint section in the Smith hardware store, as will be seen from the illustration, occupies a prominent place and is in a good light. This is an important consideration as people often have dififculty in selecting shades in a dark section of a store. Mr. Smith is planning to enlarge his paint department and place it up at the front of the store on the right of the entrance. He believes that this will increase sales, besides giving him a larger department and a chance to make a better display. While paint sales are greatest during the spring, Mr. Smith finds that it is becoming more and more an all year line with the firm.

Auto Accessories

Mr. Smith has been handling auto accessories but one of his troubles, he states, is that his store is too small for him to carry the stock from which he could expect to get the best results. However, he states that he is doing a steadily increasing trade in this line and that it has been most satisfactory in every way.

The same, he says, applies to bicycles, although here also he has the difficulty that the store space is limited and he can not put in the stock he would like to, to go after the business aggressively.

Were Satisfactory

This season Mr. Smith stocked as a new line of high priced refrigerators. "We had wonderful success with them," he stated. "The line we handled was high priced, but the goods were fully worth the money asked and we could stand behind them and guarantee satisfaction. One of the troubles with the line was that it needs more advertising. We try to handle only advertised lines. In my opinion there is no doubt whatever that the more an article is advertised the better the sales. To my mind a merchant is foolish to try and sell lines that are not widely advertised."

Keep Goods Displayed

As will be seen from the illustration, Mr. Smith believes in keeping his stock out where people can see it. This, he says, is one of the best ways of keeping merchandise turning over. Any number of people come into a store and see things they need, and buy right there. If the goods are not out where they can see them they are likely to forget all about it until they get home or see it in some other store and buy it there. In all the window displays prices are plainly shown, and also in the goods which are advertised. This is part of the firm's policy, and Mr. Smith regards it as an essential to good merchandising to let people know exactly how much an article is going to cost them.

Helps Sell Axes

In connection with his store display Mr. Smith has a simple little display stand for axes which he says has helped him sell a large number. As may be seen from the illustration, it is very simply designed and easily constructed, consisting of twenty-four compartments, each large enough to hold an axe. Two axe heads fitted with handles are shown in the top section, so that prospective buyers can get an idea of the size of handle required, and also how the axe head looks after the handle it fitted. The little display stand can be placed at any conspicuous spot in the store, and it has the added advantage that very often,

View of the store interior of the Smith Hardware Co., of Cornwall, Ont. Paint sales with this firm have shown a tremendous increase due to the aggressive advertising campaign which has been carried on all season. The use of silent salesmen, ax racks, and kindred selling helps is strongly advocated by this firm who tell of their experiences with these in the accompanying article.

when there is a rush of customers, a farmer or some other party wanting an axe can come in, look over the stock and make his selection, and simply bring it to the clerk and have it wrapped up. This saves the staff a great deal of time and also the trouble of answering a lot of questions. The prospect "sells" himself.

Silent Salesmen

Mr. Smith says that his silent salesmen containing cutlery, tools and other lines have paid for themselves a good many times over in sales. Besides keeping the stock in good shape, they display it, and, located as they are right up in front of the store, they have a distinct value in making an attractive interior and creating a favorable impression regarding the store in the minds of all those coming in.

As a general rule Mr. Smith does his business as nearly as possible on a cash basis. If sales are not made on that basis there is a definite understanding as to the time settlement is to be made. Mr. Smith states that the farmers are good customers, and that he has no trouble in his collections with them.

Steel Prices Should Not Advance

General Advancing Movement Would be Deplorable—No Objection to Slight Advances and Declines in Individual Products if Necessary to More Harmonious Price Structure

IT would be deplorable if the steel market should engage in a general advancing movement. There can be no objection to slight advances and declines in individual products if they are necessary to make the general price structure more harmonious, for that would tend towards stability, but it should be a matter of give and take. Plates, for instance, could come down to equalize for some advances that might be desirable. Before the war plates sold at slightly less than structural shapes, while now they are $4 a ton above shapes on the basis of the "recognized" price, a price that is recognized more in the breach than in the observance. In view of manufacturing costs, wire nails might properly advance, but the worst iniquity in nails is the card, and it ought to be revised. It was formulated 23 years ago, when the steel industry was in the worst condition it ever experienced, and cost relations bore no semblance to those of to-day.

An advance in the average price of steel products would undoubtedly prove injurious to the best interests of the steel trade in the long run, and not in one respect particularly, but in many. It would encourage demand for wage advances, when the industry is already paying very high wages, and it would encourage the organizers, who have sought more or less vainly for a talking point. The organizer prospers when he has a concrete point. Organization thrives when it has a strike as its goal and sentiment in favor of a strike can only be fostered when an easily-understood grievance can be put in the minds of the men.

A general advance would be unpopular especially at this time when the people feel that they are being imposed upon by the sellers of nearly all commodities. There is no danger of an uprising of the proletariat in the United States, but the bourgeoisie are not without a voice.

It would be a confession on the part of steel producers that they have no confidence in the actual consumptive demand for steel, an admission that the requirements of the people are not sufficient to make a market, and that buyers have to be scared into buying.

It would be noticed that the steel makers do not agree with the view so commonly entertained that the United States is booked for several years of uninterrupted activity and prosperity, for whatever goes up must come down, and advances over the present price level could not be maintained for a period of years.

It would be an admission by the steel makers that they are no more than opportunists, that the only reason for advancing prices at any time is the ability to do so. No one can glance at the earnings reports of steel companies without realizing that with full operation the mills would have large profits. If, on the other hand, price advances were to be defended on the ground of costs being high through operations being light that would be an assertion that the law of supply and demand should be reversed, that prices should be high when demand is light and low when it is heavy.

It would be encouragement to everyone to adopt or persist in the view unfortunately so common, that less effort now can secure greater reward than before the war. That is impossible. We can consume no more than we produce. All cannot consume more unless there is more production, otherwise some can better their position only at the expense of others.

It would be a pity indeed if the steel trade should prove so reactionary. It

(Continued on page 47.)

EVENTS IN THE TRADE

Business Changes

Eganville, Ont.—James S. Campbell has purchased the hardware business of Wm. W. Watson.

Amherstburg, Ont.—W. H. Jones, hardware, has sold out to Earl Jones and Roy Taylor, firm to be known as Jones & Taylor.

New Firms

Monty Freres, hardware, Granby, Que., has been dissolved and Arthur Monty registered.

Annex Hardware & Electrics has been registered at Montreal by Patrick F. and Neil Doody.

Edward Mackness, of Sarnia, Ont., has purchased the tinsmithing, heating and plumbing business of T. Dodds & Sons, at Watford, Ont.

Obituaries

The death occurred very suddenly, from heart trouble, at the home of his father, of Edmund F. Bradley, Toronto manager of the Erie City Iron Works. Mr. Bradley was 39 years old, and for some time was with the Canada Foundry Co., later going with the Robb Engineering Co., of Amherst, Nova Scotia.

Personals

J. T. Ling, sales manager, Chicago Flexible Shaft Co., Chicago, Ill., was a Toronto visitor at HARDWARE AND METAL'S offices during the week.

F. H. Scholey, for some time with the plumbing firm of F. H. Lepper & Co., Calgary, has taken a position as traveller with Metals Ltd., of Calgary. Mr. Scholey was with Cotter Bros., of Winnipeg, before going to Calgary.

R. L. Duncan, of Toronto, who for twelve years has been with Pilkington Bros., in Montreal, Regina and Toronto, has been chosen to fill the vacancy created by the death of John C. Towers, and will represent the Consolidated Plate Glass Co., of Canada, Ltd., in Eastern Ontario and in the Niagara peninsula.

Trade Notes

The Lindsay Hardware Co., of Vulcan, Alta., has moved into new and larger premises.

The National Sheet Metal Co., of Montreal, has been dissolved and Hyman Rosenberg registered.

Bonsall & Baker, hand cleaner, has been registered at Montreal by T. L. Bonsall and Clinton C. Baker.

Work is being rushed on the new factory of the Royal Broom Co. at Ingersoll, Ont.

Sayers Bros.' sash and door factory has been registered at Cowansville, Que., by John and Frederick Sayers.

The annual picnic of the employees of the Canadian Shovel and Tool Co., of Hamilton, Ont., held at Wabasso Park, was a most successful outing. More than 150 attended.

The Dominion Wire Insulating Co., of Toronto, may locate in Guelph as a result of negotiations now being carried on with the council.

The Imperial Steel & Wire Co. shareholders have decided to rebuild the plant which was destroyed by fire at Collingwood. The new plant, it is stated, will cost more than $500,000.

The annual picnic of the employees of the Tallman Brass and Metal Co., Hamilton, Ont., was held at Grimsby Beach. There was a large turnout and the program was thoroughly enjoyed.

The Carr Fastener Co., of Boston, manufacturers of automobile fasteners, have decided to locate a Canadian plant at Hamilton, Ont., and work will commence shortly on a factory to cost $100,000.

The Pedlar People, Ltd., of Oshawa, Ont., manufacturers of sheet metal goods, are negotiating with the council for a site on which to erect a plant which will have double the capacity of the present buildings.

J. A. Aitcheson, who, as reported in a previous issue of HARDWARE AND METAL, purchased the hardware business of Robert McVittie, at Southampton, Ont., took over the store this week. Mr. Aitcheson has been in business for the past twelve years at Orangeville, Ont. Mr. McVittie is remaining with him for the summer.

Montreal News

R. H. Reid, Consumers' Cordage Co., is away on his vacation this week.

J. T. Ling, Chicago Flexible Shaft Co., Chicago, was in Montreal this week.

G. W. Carter, representing the Eagle Lock Co., Terryville, Conn., made Montreal a point of call this week.

R. J. H. Douglas, of the cutlery department, Caverhill, Learmont and Co., is away to Willard, Maine, for his holidays.

George Caverhill, of Caverhill, Learmont and Co., is spending some time at his summer home, Pointe-au-Pic, Quebec.

S. Ivison, of the Wallworth Manufacturing Co., Boston, was in Montreal this week.

J. H. Meikle, manager of the Ottawa office of Caverhill-Learmont and Co., Montreal, has returned to Ottawa from his vacation.

George Henderson, president Brandram-Henderson, Ltd., is motoring to Boston this week. Mr. Henderson will return via Halifax and will make part of the trip by auto.

Winnipeg News

L. M. Archibald, of the Dart Union Co., Ltd., spent a few days in the city soliciting business.

Mr. Hughes, representing Peck, Stone & Wilcox, spent a few days in the city on business this week.

Earl H. Decatur, of Decatur, Bull & Co., Montreal, was in the city during the week calling on the jobbing trade.

C. R. Akers, of the Koken Barbers' Supply Co., St. Louis, spent a few days in the city this week in the interest of his firm.

W. G. Barron, secretary-treasurer of the Schultz Manufacturing Co., Toronto, was in the city during the week, calling on the jobbers.

Wm. G. Graham, formerly credit manager for the McClary Manufacturing Co. of this city, has now taken over the management of the credit department of the Merrick-Anderson Co., Ltd.

R. A. Whittaker, formerly of the Miller, Morse Hardware Co., Winnipeg, has joined the staff of Morrison, Blackwood & Co., Moose Jaw. He will be in charge of the sales department.

Incorporations

National Conduit Co., Ltd., capital $100,000, head office Toronto, plans to manufacture and deal in conduits.

American Auto Trimming Co., Ltd., head office Walkerville, Ont., capital $500,000, plans to manufacture and deal in autos and accessories.

Canadian Draperies, Ltd., head office Toronto, capital $40,000, plans to manufacture and deal in wall papers, leather goods and small wares.

Chatham Cement Tile and Block Co., Ltd., capital $40,000, head office Chatham, Ont., plans to manufacture and deal in cement products.

The W. C. Hunt Manufacturing Co., Ltd., capital $40,000, head office Toronto, plans to manufacture and deal in hardware and in machines and machine supplies.

Dominion Tractors, Ltd., capital $500,000, head office Windsor, Ont., plans to carry on a general business in farm tractors.

Toronto Cement Products Co., Ltd., capital $20,000, head office Toronto, plans to manufacture and deal in sewer pipes, cement, lime, etc.

The Aero Manufacturing Co., Ltd., capital $75,000, head office Sherbrooke, Que., plans to manufacture and deal in rope, cord and twine.

Canadian Steering Wheel Co., Ltd., capital $150,000, head office Toronto, plans to manufacture and deal in automobile accessories.

John C. Towers is Victim of Pneumonia

John Cuthbert Towers, aged 47, Ontario traveller for the Consolidated Plate Glass Co., of Canada, Ltd., Toronto, died at his home in Toronto after an illness of ten days with pneumonia. He had just started on his vacation and went swimming, catching a cold from which pneumonia developed rapidly. Mr. Towers had been with the Consolidated Plate Glass Co. for twelve years, and prior to that was with the Hobbs Manufacturing Co., of London and Toronto. Before that he was with Pilkington Bros., of Montreal. He is survived by three sons, one of whom, Douglas, returned recently after spending over four years overseas.

WESTERN NEWS

K. R. Hunter, manager of the Nelson Hardware Co., Nelson, B.C., is at present visiting in Ontario. He is expected back about the first week in August.

W. H. JONES IS RETIRING

For the second time in 18 years the hardware firm of Jones & Taylor is again established at Amherstburg, Ont. In 1901, W. H. Jones and his brother-in-law, the late Lewis Taylor, opened a hardware store in the Hadley block, which, after the death of Mr. Taylor, was continued by Mr. Jones. Owing to Mr. Jones' failing health he has disposed of his interests to his son Earl, who has been managing the store for some time, and his nephew, Roy Taylor, son of the late Lewis Taylor, and again the old firm name is restored on the sign.

Ex-Mayor Geo. Taylor Dies at New Liskeard

After an illness extending over many months, the death occured at his home in New Liskeard, Ont., on Tuesday, of George Taylor, founder of the George Taylor Hardware, Limited. He was seventy years old and came to Canada when a boy from Scotland. For a time he resided in Winnipeg, and then moved to London, Ont., where he engaged in the hardware business. He took an active interest in civic affairs and served both as alderman and then as Mayor of the city. About twenty years ago he settled in the Temiskaming district, being one of the pioneer merchants of that section. In addition to establishing the chain of hardware stores which bears his name he took an active interest in mining matters and for a time was president of the Hudson Bay Mining Company. He maintained his interest in public affairs at all times and in New Liskeard was honored by being elected Mayor of the town. Besides his wife he is survived by five sons and four daughters. The sons, with the exception of Mr. Justice Taylor of the Saskatchewan Bench, are engaged in the hardware business in Northern Ontario.

PRESENTED WITH ELECTRIC LAMP

Prior to his departure for Aylmer, Ont., where, as stated in a previous issue of HARDWARE AND METAL, he has purchased a hardware business, C. B. Brown was the guest of honor at a reception held in the Baptist Church at Ridgetown, Ont., and was presented with an electric reading lamp and an address expressing regret at his departure. Mr. Brown has been manager of the hardware business of W. H. Goodhue at Ridgetown for the past two years.

HEAD OFFICE IS MOVED TO ORILLIA

The head office of Carriage Factories, Ltd., has been moved to Orillia, Ont. About a year and a half ago the office was opened at Toronto, but it has been found more convenient to have the headquarters at Orillia. The staff is now settled in the Tudhope Carriage building.

Carriage Factories, Ltd., comprises the Tudhope Carriage Co., Orillia; Henry Carriage and Harness Co., Ltd., Montreal; Munro & McIntosh Carriage Co., Ltd., Alexandria, and the Canada Carriage Co., Ltd., Brockville. The factory at Brockville was burned and has not been operating for some time.

W. H. Tudhope was elected president of the company a short time ago, and R. C. Dunbar, who has returned from Toronto, is now manager.

BARRETT COMPANY SELLS FLOOR COVERING DEPARTMENT

The Barrett Co., of New York, it is announced, has disposed of its Congoleum department, which has been handling the floor covering end of its business since 1913. A new company has been formed, in which the Barrett Co. holds an issue of $1,000,000, 8 per cent. second preferred stock, in addition to which a cash consideration was paid for the Barrett Co.'s ownership of the property.

STEEL PRICES SHOULD NOT ADVANCE

Continued from Page 45

is the time for progress in business methods. The best example of the old method of advancing prices and of the results, is the "soda water rise" of 1895, which had its inception in the Leishman-Gates engagement but was taken up by the whole trade. In about six months Bessemer pig iron at Pittsburgh advanced 75 per cent., billets advanced 65 per cent., and plates advanced 60 per cent. Prices were put up simply because producers were able to put them up, and buyers bought, for a time, because they were scared. It was at the middle of the great industrial depression of 1893 to 1898. When the bubble burst, prices dropped to a lower level than ever. The Illinois Steel Company declared its first dividend and Mr. Leishman resigned. The steel trade of to-day wants no reactionary policy smacking of such performances.—"The American Metal Market."

Takes Optimistic View of Future; Labor Situation in Chicago Improved

"CONDITIONS as I have found them in Winnipeg and in my flying visit to the East are, I should say, very good," stated J. T. Ling, sales manager of the Chicago Flexible Shaft Co., Chicago, Ill., to HARDWARE AND METAL in commenting on the feeling of jobbers upon whom he has called. "The amount of business I have secured is very satisfactory and the outlook I should say encouraging."

Commenting on conditions surrounding the manufacture of their products, Mr. Ling stated that they had had no very serious difficulty either with labor or in securing materials. "Strikes have occurred in some industries which had tied us up sometimes for material for a short period," Mr. Ling stated, "but altogether we have done very well. The labor situation is very good. Our men are working 44 hours on a five-day week, and whereas there has been some falling off in production we hope eventually that it will work out to the best advantage of all.

"We find," Mr. Ling continued, "that our men, with prohibition in effect, now spend their Saturdays with their families at the parks or by the water; on Sunday they rest, and Monday morning we have a complete staff ready to do a full week's work. In the olden days of King Booze we found that on Monday morning the turnout for work was usually pretty small. It was really Tuesday before things got going in full swing, and the departments short on Monday exercised an influence on the output of other departments later in the week. I believe that in time we will find that the short day has been an improvement. In a plant such as ours, which employs very largely automatic machinery, any reduction of time must influence the output. However, labor has been well absorbed by the institution of shorter hours, and no unemployment to speak of now exists."

Mr. Ling included Montreal, Toronto and Hamilton on his Eastern trip, leaving Toronto Thursday for Hamilton, from which point he will return to Chicago.

CANADA SHOULD CULTIVATE TRADE WITH NEWFOUNDLAND

An entertaining description of the trade and resources of Newfoundland was given by Charles O'Neil Conroy, K.C., before the Kiwanis Club, Montreal.

Mr. Conroy quoted figures to show the increase in trade enjoyed by the island dominion within the last decade, and went on to say that an opportunity awaited Canada to develop her exports to the sister colony. Ten years ago the value of Newfoundland's import trade was placed at eleven and a half million dollars annually, whereas last year the figures had risen to twenty-six million dollars. Export had increased from ten million dollars ten years ago to thirty million dollars to-day. During the war exports from Canada and the United States had greatly increased on account of the difficulty of getting supplies from Great Britain, eleven millions' worth of goods having been supplied by the Dominion and twelve millions' worth by the United States. Speaking of the resources of the colony, Mr. Conroy said that as yet the mineral wealth of the country remained undeveloped, while agriculture had hardly been touched beyond the production of a limited quantity of foodstuffs, which was insufficient to support the local population. The principal industries were cod, herring, seal and lobster fisheries and iron and copper mining. Coal and petroleum had been found on the island, but their workings had not been developed.

In a manufacturing way the country produced cordage, tobacco products, boots and shoes, biscuits, candy and wooden barrels.

An interesting project referred to by Mr. Conroy was the proposed erection of a dam across the Straits of Belle Isle, which would have the effect of stopping the flow of Arctic ice into the Gulf, and would thereby diminish the extreme cold to which Eastern Quebec was subjected.

Future luncheons of the Kiwanis Club will be held at the Queen's Hotel at 12.30 instead of one o'clock until the end of September, when the old time will be reverted to.

MONTREAL BUILDING FIGURES SHOW BIG INCREASE

Montreal, Aug. 7.—(Special).—A report given out by the Administrative Commission shows that construction during July in Montreal was greater than at any time since the beginning of the war. The figures for last month were as follows: 140 new buildings at a cost of $1,093,520; 131 buildings repaired, at a cost of $391,479, a total of 371 buildings constructed or altered at a total cost of $1,484,999.

In July, 1915, and until the signing of the armistice, the outlay in construction within the city was never more than $432,490; but since last January business in the construction line has steadily increased.

Used by Firm at Victoria, B. C., to Introduce Sporting Goods Dept.

The float shown above was designed for a holiday parade by E. G. Prior & Co., Limited, of Victoria, B. C., who just at that time were opening a new sporting goods department. It not only drew the attention of the public to this section of the store but was awarded first prize in the competition.

OIL STOVES BIG SELLERS

All over Western Canada the oil stove is coming to be one of the biggest sellers in the hardware business. Difficulty in securing fuel, such as wood and coal, is one of the contributing reasons for their popularity, but the extreme heat of the prairies is perhaps the most important cause of this development. The three-burner type appears to be greatly in demand.

Merchants Turn Now To Even Up Old Score

In the drought-stricken districts of Southern Saskatchewan and Southern Alberta many merchants have been heard to remark recently that the farmers are beginning to receive their full merited punishment for sending large amounts of money to the mail order houses instead of paying cash to the local stores. If they had spent their cash at home the merchants would be in a better position to carry them, they say. Not having had this patronage, however, and being forced to meet their accounts with the wholesalers, a great number of merchants in this district are hanging out the sign, "Cash business only." In the case of old customers who have been loyal to them there is a general inclination to extend a line of credit until such time as they are in a better position to pay, but the mail order farmer is being turned down flat everywhere. Without cash he is placed between the devil and the deep sea. He can neither secure credit from the catalogue houses nor from his home merchants.

Dealers Cannot Get Enough Baseball Goods

Complaint is made by many hardware merchants visited in Western Canada in recent weeks by a representative of HARDWARE AND METAL that they are unable to secure enough baseball goods to supply the demand that is everywhere felt this year. Baseball was never so popular in the West, and baseball tournaments are the leading features at all celebrations and sport days. The keenest rivalry develops between towns, and the popularity of the sport is attested by the large purses hung up at the various tournaments. Recently the town of Morse, Sask., put up $2,500 for the winners of a series of games to run over three successive days.

Embargo on Hides May Mean Scarcity of Belting and Lace Leather

If American Government Retaliates and Refuses to Allow Leather to be Exported to Canada, Harness Makers May be Affected Also

IT is too early yet to ascertain the effects the embargo placed on hide exports will have on the trade but dealers are looking for higher prices and a possible scarcity as far as lace leather and belting are concerned. Prices of these commodities, as stated in previous issues of HARDWARE AND METAL, have been climbing steadily as a result of the advances made in hides. There has not been any serious shortage yet, but if the American Government should retaliate and place an embargo on exports of hides to Canada considerable difficulty might be experienced. In a case of this kind harness makers would be affected also.

The embargo on hides was placed by the Minister of Trade and Commerce, owing to the abnormal situation of the hide and leather markets, which vitally affects the interests of both consumers and producers of boots and shoes in Canada. The Government has called a conference of the various interests concerned to consider and advise as to the best course to be pursued.

In the meantime the exportation from Canada of raw hides, skins and leather for the manufacture of boots and shoes shall be prohibited, except under license from the Canadian Trade Commission. The main features of the situation are as follows:

Hides Advanced in Price

(1) A great advance in prices of hides, followed by a consequential advance in the cost of leather and boots and shoes made therefrom. In June, 1918, heavy upper leather sold from 46 to 48 cents, based upon hides costing from 24 to 26 cents. On July 1, 1919, similar leather sold at 84 to 86 cents, based on hides at 60 cents. That is the price of leather has advanced about 82 per cent., while in this same period the price of hides has advanced 140 per cent.

(2) These prices are greatly in excess of English prices owing to the fact that English buyers purchased heavily in foreign markets before the advance in price caused by the stringency thus created. There is an embargo on the export of hides from the United Kingdom, and British producers of boots and shoes are thus enabled to manufacture at prices which inure to the advantage alike of British consumers and of the export trade of Great Britain.

Shortage of Leather Possible

(3) Under these conditions the boot and shoe industry of Canada is faced with a lack of supply of leather for the productive outout for export purposes, and with necessity of producing even that supply at a cost which will be reflected heavily in the cost to the consumer in Canada. In the meantime Canadian hides and leather are being exported in large quantities. The main problem is how to secure the necessary supply of leather at reasonable cost, first to meet the demands of Canadian consumption, and secondly to enable the industry to participate in the export markets of the world.

MONTREAL STORES WILL CLOSE EARLY

With the exception of barber shops, Montreal stores will close early on four nights of the week, Monday, Tuesday, Wednesday and Thursday. This is the action passed this week on the new Early Closing By-law by the city council.

Exceptions are made in the case of some stores. Among these are tailoring stores, millineries, needlework shops, merchant tailors. On the understanding that employees will not be retained after 7 o'clock these may remain open until 9 p.m. on Monday nights. Cigar stores, news stands, flower and fruit stores, pastry shops, drug stores, and aerated water shops are exempt from operation of the by-law. A penalty of $40 is provided for offenders.

FAVORING CANADIAN GOODS MORE

Newfoundlanders are beginning to favor Canadian-made goods more than ever before. This is the opinion of John R. Anderson, manufacturers' representative, Montreal. Mr. Anderson has been over to the Island and stated that conditions there, as well as in the Maritimes, are very satisfactory from a business standpoint. St. John's, of course, is the centre of activity in Newfoundland and there is a good spirit abroad there in a business way.

KEEPS STORE LOCATION ADVERTISED

A dealer in Moose Jaw, who conducts an extensive business in lighting plants, has devised a simple but striking sign that hangs at right angles above his door. It reads:

Electricity for the Farm

At night this sign is illuminated, and while the store is located on a side street, the unusual sign cannot fail to attract the attention of those passing on the main thoroughfare. A general stock of electric goods is carried.

Minimum Wage Scale for Women

Saskatchewan Minimum Wage Board Sets $15 Weekly as the Minimum Wage for Experienced Clerks—48-Hour Week Also Set

THE first pronouncement of the Saskatchewan Minimum Wage Board recently appointed by the Provincial Government has been made, and it affects female employees in shops, stores and other mercantile institutions in the Province. The minimum wage for experienced females employed in the institutions mentioned will be $15 a week. The minimum for beginners is $9.50 per week, with an increase every three months until one year of service has been completed, when the employee is deemed to be experienced and will be entitled to the $15 scale. The board also set the hours of employment for women and girls in this class of work providing for a maximum of 48 hours per week. The $15 minimum for experienced female labor in the mercantile classification is considerably higher in Saskatchewan than is in effect in the other three Western Provinces. In Manitoba the minimum for experienced female labor in stores and shops is $12, in British Columbia, $12.75, and in Alberta, $9.

The minimum for beginners is $9.50, according to the new ruling; for the first three months, $10.50; for the second 3 months, $11.50; for the third 3 months, $12.50, and $13.50 for the remainder of the first year's service. Out of the 659 adult women and girls employed in this class of work in Saskatchewan, 341 are being paid wages ranging from $6 to $15 per week.

In connection with the hours of employment, provision was made for an extension of the number of hours of employment under special circumstances when permits may be issued for additional hours not to exceed 36 days during the year. Power to issue such permits was delegated to T. M. Molloy, Commissioner of Labor for Saskatchewan.

The orders will not come into effect until the board has completed its work in connection with all classes of female labor, after which the orders will be published in two issues of the Saskatchewan Gazette and will become effective under the provisions of the act 30 days after the first publication.

The decisions of the board respecting the minimum wages and the hours of employment were not unanimous. The members of the board are W. F. Dunn, barrister, Moose Jaw; J. F. Cairns, departmental store, manager, Saskatoon; Harry Perry, Labor Alderman, Regina; Mrs. Robertson, Saskatoon, and Mrs. Bothwell, Regina.

It Pays to Patronize the Home Town

Price Ticket on Everything —Individual Responsibility Necessary to Building Up of Community Life—Keep Money Circulating at Home—Prosperous Towns an Advantage

By E. M. TROWERN, Secretary, Dominion Executive Council, The Retail Merchants' Association of Canada, Ottawa.

THE great pivot upon which the affairs of the world swing is individual responsibility. Millions upon millions of tons of literature are being spread throughout the world in all languages every year, calling attention to the wrongs of society as a whole, but in the final analysis these wrongs can never be entirely righted until every individual in every community takes an individual responsibility upon himself or herself to see that they are righted. Pure, unadulterated selfishness is at the root of all the trouble. Strange as it may seem, no person can do a selfish thing or commit an unfair act without having to pay the price themselves, or, in other words, "there is a price ticket on everything."

How It Works Out

Take, for instance, a group of persons who are employed in a manufacturing plant, or in any other institution, who conceive the idea that if they bought certain lines of staple goods in bulk at wholesale prices and divided them up among themselves that they would save money and thereby benefit themselves, or, in other words, they would be adding to their earning power. If the plant or institution in which they were working was located in a prosperous town or village, their action would affect the legitimate retail merchants, who were endeavoring to serve them in the town, and the result would be that the retail merchants who formerly handled the lines which were purchased by these persons at wholesale prices would cease handling those lines, and, in order to pay their rent and their running expenses, they would have to increase the cost of the other lines which they carried and which these employees required. What benefit, therefore, would be gained by transactions of that character? If you want to do your fellow citizens, the retail merchants, an injustice by interfering with their trade for the purpose of endeavoring to benefit yourself for selfish purposes, you have to pay the price in the end, either in money or in loss of service. This rule applies in every walk of life and you cannot evade it.

Why Retailers Locate

The more retail stores we have in the community the better the community will be served. Competition is the most sacred weapon in the world and it should never be interfered with. Retail merchants open stores in various locations, because they believe that they can do business in those locations, or, in other words, they take the individual responsibility and, consequently, the risk. Is this not as it should be? Would any sane person suggest that the Government should decide as to where and when stores should be opened, as was attempted in Germany? We think not.

The basic foundation upon which every community is built is the action and decision of the individual. They locate where they themselves decide is best for them, and around them others associate, and in this way our community life is built up.

We, therefore, repeat again that the great pivot upon which the affairs of the world swing is individual responsibility. Each individual in every community is there because, in their opinion, it suits them best, otherwise they would leave and go to some other place.

Circulate Money Freely

To build a healthy and a prosperous community, as well as a contented community, money must circulate freely. It can only circulate according to the desires of each individual. If the stores were full of goods and no one wanted to purchase them because a large number of persons sent their money out of town, the stores would soon close and be "out at the knees." If those who sent their money out of town to mail order houses owned property in town, or were employed by the town in any capacity, their property would soon depreciate in value, and, as we stated before, they would be "paying the price" for their selfishness, which would again prove that "there is a price ticket on everything." You cannot do a mean trick to anyone without having to pay the price, and this is just as true of every city, town or village.

Keep It At Home

Twenty-five men sat at a table and it was discovered that they all owed one another ten dollars apiece. The first man handed his neighbor ten dollars and it was passed around, thus paying debts amounting to two hundred and fifty dollars, and the first man received it back again. Let us suppose that money was short in that town, and the first man sent the ten dollar bill away to a mail order house, how long do you think those debts would be outstanding? The more that money is kept circulating in the home town the better chance everyone has to float his or her services, or their merchandise, and they both mean the same thing in the end. Money is only accumulated industry, and everyone can get some if they only work for it, and the chief thing is to see that it does not get cornered by one or two huge monopolies, who can then control labor.

Prosperous Towns an Advantage

If Canada had five hundred thousand prosperous towns she would be immensely bettter off han if she had only half a dozen large cities. There are no slum sections in the towns. To their credit it can be said that the townspeople look after their poor. No man, woman or child need starve while the townspeople have bread. They know one another better than do the people of large cities, as they are nearer to each other. It has been stated that Canada to-day could accommodate itself to ten million farmers and then have room for many more. Does that not mean much for the towns? The first question that a prospective purchaser of a farm asks is, "How near is it to a town?" Is that not a proper question to ask? The town is the heart blood of the community; it is the bright, social spot in the life of every farming district; it is the one thing that binds the boys and girls to the old home. Kill your towns by sending your money away to mail order houses, and you are thrusting the knife into the very heart of Canada. Build up your towns by keeping your money in local circulation and you are building up production and helping your manufacturing industries and making the people more contented and happy, and by spending your money in the home town you are creating better stores, a greater variety of stocks, better service to the community, and you are securing lower prices through having local competition.

Buy in your home town and be a booster for it.

Cabinet Display Makes For Speedy Service

McPherson Bros., hardware merchants of Medicine Hat. Alta., who have had good success in attracting business by window displays, have adopted the system of placing in a wall cabinet behind the counter just inside the door at the front left of the store, a very complete stock of the articles on display in the window. They are therefore able to give speedy service to all who step inside to make further inquiries. The windows are changed every week, and in dressing them the firm has adopted the policy of featuring one line of articles at a time. The greatest pains are taken to create an alluring display which will catch and captivate the eye. In June there was a very marked response to a display of fishing tackle; later, as the hot weather came along, vacuum bottles were featured, and this was followed by auto accessories.

Do You Know Any of These Three Chaps?

HE occupied a fairly large place in the community. He was a manufacturer in a good way, and what he had to say about conditions generally carried some weight. In fact what HE SAID had quite a bit to do with what the community believed.

On this particular day this HE SAID individual stood on the corner just before parting company with the bank manager.

Of course the banker wanted to know his ideas about credits and the outlook in general. It was not possible to hear all that HE SAID, but such words as strikes, no output, hard winter, failures, high costs, were easy to hear. In fact, a person would not need to be an eavesdropper at all to get a whole earfull of real honest-to-goodness blue-ruin talk.

The banker went his way and HE SAID went his. Just as the banker was about to enter his office he met the man who used to attend to the furnaces in winter. Instead of saying, "Good morning, Joe," he stopped and asked Joe how things were going with him. "Fine," replied Joe as a starter. "Working every day at bigger pay than I ever hoped to get. My boy got back from France three months ago and he's working in the same shop. If you want to know how we're doing just take a glance at my savings account. It's right in your own bank here," and Joe was off with a smile.

And quite unconsciously Joe, the former furnace man, had put the axe into the burdock bush that HE SAID had planted in the mind of the banker.

Now as a matter of fact HE SAID was only a very ordinary individual.

Any croaker who decorates a sugar barrel in the old corner grocery could have handed out just as fine a line of headed-for-the-bow-wows talk. It does not require brains—it does not require courage, nor vision, nor executive capacity. Simply a wagging tongue and a bit of an audience—the rest is easy.

Nothing more was needed than that the tongue should wag and the audience not ask any pertinent questions that would confuse the wagger.

HE SAID lives in a good many Canadian centres. He is telling that coal is going to be very high this winter; that there will be an awful lot of people out looking for work; that building is almost at a standstill; that costs are high; that there is industrial unrest; that buying is from hand-to-mouth, and that our money is at a stiff discount in the United States markets.

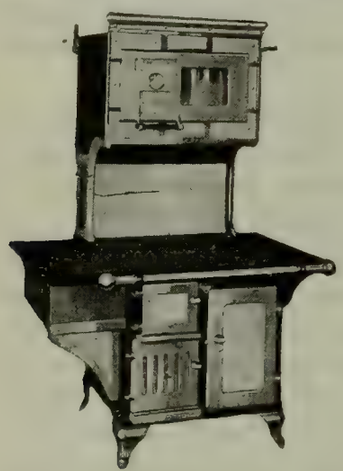
Unfortunately there is no legal way of dealing with HE SAID. Certain animals can be muzzled during the hot days of August, but there is no muzzle for HE SAID. He is at liberty to go his way, throwing out doubt here and fear somewhere else.

The antidote lies in Joe, the former furnace man—Joe, the apostle of good news—Joe, the chap who knows enough to stay everlastingly at the harvest while the cutting is good.

If Joe gets along to boot HE SAID out of his job, he will buttonhole the banker and say that in spite of strikes, reported crop shortage, high costs, and all these things, retail buying is heavy and payments good—that the world is short of scores of lines that must be grown or manufactured—that many big buildings must be gone on with very shortly—that failures of responsible firms are almost unknown—that Bolshevism has got a black eye—that the costs of the rest of the world are just as high or higher than ours.

Yes, Joe, the former furnace man, would have given the banker a real vision. He would have jumped into his mental horizon and shoved it back a couple of miles. The chances are that Joe would put more blue sky and sunshine into the banker's ideas than could have been hatched under any other circumstances.

Now, this is not visionary. HE SAID, Joe and the banker are real people, and they have been discussing real Canadian conditions.



They represent three conditions and classes in Canadian business. Sift them out and see where you fit in.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

CABINET RANGE

The James Stewart Manufacturing Co., Ltd., of Woodstock, Ont., is manufacturing a four-hole cabinet range, which, it is stated, is especially adapted for service in town and city homes. The range, it is claimed, combines maximum utility and efficiency. It is stated that

Stewart Cabinet Range

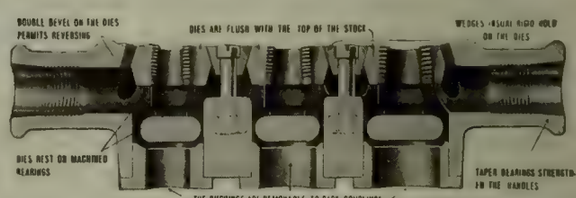
it is compact yet commodious, with visible oven requiring no opening of oven doors or stooping in order that the contents of the oven may be seen. It is stated also, that no black leading is necessary, that the range has an unobstructed polished cooking top. The appearance and finish of the range throughout, it is stated, makes it most attractive and, it is claimed, makes a splendid kitchen heater when so required.

"COMFORT" IRON

The "Comfort" iron manufactured by the Hamilton Gas Mantle Co., Hamilton, Ont., has, it is stated, eighteen and a half square inches of heating surface. It is claimed it will save from $12 to $15 a year on ironing expenses. The "Comfort" uses gasoline, which, it is stated, is vaporized, mixed with air and converted into a gas perfectly adapted for ironing. Only 7 per cent. of the heat is gas, the rest comes from air mixture. It is claimed that the iron is ready for work in 30 seconds, is simple in design, compact and handy. It is stated that it is handsomely finished, being heavily nickeled and highly polished and will do ironing easily, quickly and thoroughly.

TRIO-DIE STOCK

The Trio-Die stock, manufactured by the Greenfield Tap & Die Corporation, of Greenfield. Mass., contains, it is stated, dies and bushings for three sizes of pipe, all mounted in a single stock. This tool, it is claimed, is always ready to thread any one of its three sizes without any change, or adjustment of any kind. An important feature of the trio-die stocks, it is stated, is that they are fitted with Little Giant pipe dies. These dies are made with a double bevel, a patented feature which, it is stated, permits the dies being reversed. This makes it possible, it is stated, to thread pipe projecting only a short distance from a wall, or to cut threads right up to a shoulder. By reversing the dies, the throat or chamfer is turned out.



Adjustment of the dies is possible, as they are of the two-piece type, and can be set, it is stated, to cut either exact or undersize by means of the set screws at each end of the die halves.

That this tool was designed with the user constantly in mind is evidenced, it is stated, by the choice of sizes included in the various models, there being one model with three sizes, which are of extreme usefulness to the plumber, and another with three sizes which are used continually by the electrician.

The complete tool, it is stated, is surprisingly light in weight and can easily be carried in a kit bag by simply removing the handles.

When assembled ready for use, the whole tool, it is claimed, is stiff and

Above: The Trio-Die Stock
To Right: Sectional View

solid, as the taper bearings into which the handles screw not only reinforce the joint, but also insure a joint which will not become loose with use.

The bushing guides used in this stock are so arranged that it is practically impossible, it is stated, to start anything but a straight, true thread, and these guides being removable, make possible the threading of nipples.

The dies, it is stated, are made of the best grade of carbon steel, while the frame of the stock is a malleable casting, practically unbreakable.

The dies are held in place by the three-angle principle. The dies bottom on a ground surface, and are held absolutely rigid against beveled side locating surfaces by wedges having bevels of the same angle as the side bevels on the die. Extremely accurate adjustments are possible, it is claimed, as all the surfaces of the stock against which the dies rest or locate are machined and ground.

There May Be Some Ideas Here For You

From time to time there are occasions in every town when the merchants are called upon to put a decorated float in a celebration parade. Some of the ideas carried out by S. K. Gryde, a hardware merchant at Leader, Sask., on the occasion of the annual sports day this year, may prove of value to other members of the trade. The two outstanding features were, first, a very large man dressed up as a negro mammy, who employed himself throughout the parade in tossing flapjacks from the top of a new perfection oil stove, second a power washer operated by a small gas engine, with an arrangement attached to the weather whereby it would revolve two 7-foot wheels, one on each side of the float. These wheels covered with red, white and blue material presented a pretty and animated sight as they whirled in the sunlight. A refrigerator and other household goods made up the balance of the exhibit, which was gaily ornamented with flags. Canvas signs on all sides of the float advertised the business of the merchant. An advertising novelty in the form of cotton caps with visors, and bearing the firm's name, was distributed from the float as it proceeded on its way. A negro baby occupied a position beside the driver.

AVERAGE OVERHEAD EXPENSES

Do you know what your overhead expense averages per day? Do you know what percentage of profit your business averages also? If you are thoroughly informed as to these two facts, you can tell, with a few minutes' figuring, how much business you must do each day to pay your expenses before you have any profit for promotion, expansion, or for the paying of possible dividends.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

MARKET revisions are again numerous this week with advances perhaps predominating. One of the most important revisions noted, however, is that on rope, which shows a decline all the way around. Pure manila, British manila and New Zealand hemp are all down 2c per pound, with sisal rope and sisal lath yarn down 2½c. The change in sisal products is due to weakness which has been developing in the fibre markets the past two or three weeks and manila grades have receded very largely in sympathy.

The strength apparent in the leather situation is revealed again this week in an advance in the prices ruling on lace leather. New quotations rule at figures 25c per pound in advance of former levels.

A reaction has taken place in linseed oil this week, following declines which have been named in flaxseed. The seed market is extremely sensitive and varies considerably from day to day. Levels very much lower are not looked for immediately and the crop report, to be issued Friday by the United States Department of Agriculture, will undoubtedly have a bearing on quotations on seed. Quotations on linseed oil to-day are 8c per gallon below last week's level.

Turpentine continues to soar and new record prices have been established not only in the South, but locally. Stocks are being depleted rapidly and some jobbers refuse to sell more than five gallons to any one customer. Prices during the week show an advance of 26c per gallon and all tendencies at present point to continued high figures.

Ingot tin shows a further advance of from 1c to 2c per pound this week with the undertone to the market firm. For the first time in some weeks copper shows no revision, the market holding at unchanged levels.

Higher prices on tin have contributed largely to an advance which has been made in solder during the week. New quotations are at levels ranging from ½c to 3c per pound.

Mouse traps are up 25 per cent.; steel squares 15 per cent. and sweat pads about 7½ per cent. Saw vises and chest handles are lower. Washing machines show an increase of about 7½ per cent., due, it is said, very largely to high prices ruling on all kinds of lumber.

MONTREAL MARKETS

MONTREAL, Aug. 7—Outstanding price changes of the week are several and apply to standard lines for the most part. Several lines of valves have been advanced through a change of discounts, particulars of which will be found elsewhere. Sad irons advanced 5% for the asbestos make. Sweat pads are higher to the extent of 7½%. Tools of Millers Falls make are up. Jack screws recorded some stiff increases this week. Alarm clocks also advanced for several well-known makes, while two numbers of sash pulleys are quoted higher. Graphite is advanced from 47½% to 50c per pound. Washing machines are higher through a change of discount and various chisel handles are selling 10% higher. Iron and brass machine screws with round and flat heads are up. All lines of padlocks are now on the higher price basis. Stoves and ranges are very firm and advances will probably be made in the not distant future. Pig tin is up.

A decline of importance is made in the price of rope. Two cents has been clipped from the price of Manila, both pure and British, while sisal is now 25c, showing a decline of 2½c.

Jobbers are well pleased with business conditions.

Sweat Pads, Smooth Irons, Valves Higher

Montreal.

PADS, IRONS, VALVES.—An advance of about 7½ per cent. has been made for the American Pad and Textile Co.'s sweat pads. This will affect all lines.

Asbestos smoothing irons are also up. The increase amounts to 5 per cent.

Changes in the nature of an advance have been made in the price of various valves. Standard globe, angle and check are advanced from a discount of 32½ per cent. to 22½ per cent.; gate and straightway from 32½ per cent. to 25 per cent.; Jenkins pattern from 25 per cent. to 17½ per cent.; Jenkins genuine from 10 per cent. to 5 per cent.; angle and check from 10 per cent. to 5 per cent.; gate from 12 per cent. to 7½ per cent.

Alarm Clocks Higher; Jack Screws, Pulleys

Montreal.

CLOCKS, SCREWS, PULLEYS.—Advances are announced for alarm clocks. New prices on Big and Baby Bens are $3.20 each; America, $1.40; Lookout, $1.75; Ironclad, $2.27; Sleepmaster, $1.84. In some cases this is 10 per cent., some 5 per cent.

Jack screws are marked up, too. Some of the prices on these are as follows: 1¼ in., per doz., $33.60; 1½, $46.50; 1¾, $68; 2, $90; 2¼, $132; and 2½, $160.

Sash pulleys, No. 9, are advanced

from 59c to 65c per dozen, and No. 12 from 62½c to 69c.

Chisel Handles Up ; Various Tools, Too

Montreal.

HANDLES, TOOLS.—Advances of approximately 10 per cent. are effective for chisel handles. This applies to ferruled and socket patterns. Various tools of Millers Falls pattern are also advanced, the approximate change making prices 10 per cent. higher.

Washing Machines Higher; Screws, Too

Montreal.

WASHING MACHINES, MACHINE SCREWS.—Prices have been advanced on washing machines through a change of the discounts. The former discounts of 30 and 10 per cent. are superseded by new ones of 30 and 5 per cent.

Round and flat head machine screws are now on the basis of 37½ and 10 per cent. The new discount for brass of the same class is 30 per cent.

Oils Unchanged; Gasoline a Seller

Montreal.

OILS, GASOLINE.—A steady movement of oil continues, quite a demand existing for coal oil. The basis is unchanged, with prices ranging from 21-24c per gallon, according to grade. Gasoline is a seller, too, and the standard grade still is quoted at 33c.

Manila Rope Down 2c; Lathyarn, Sisal, 2½c

Montreal.

ROPE AND CORDAGE.—It was suggested last week in HARDWARE AND METAL that declines might be forthcoming on some lines of rope. A decline of two cents is now effective for manila, pure being quoted at 32c per pound, base; British or Beaver at 28c. Sisal is quoted at 25c, a decline of 2½c per pound. Lathyarn is also 25c per pound, base, this being a reduction of 2½c. There is not a great deal of business, but quiet is looked for at this season of the year.

Stoves May Go Up; Wares Move Well

Montreal.

STOVES AND WARES.—Movement of stoves and ranges has been fair. There are also quite a number on order for fall delivery. The tendencies, as far as prices go, are firm, and one maker predicts that costs will require a revision to be made in the selling prices. Labor costs have steadily become greater.

Various wares have been selling fairly well and the movement is seasonably satisfactory.

Many Nails Moved; Are on Firm Basis

Montreal.

NAILS AND WIRE.—Jobbers report that wire nails have moved freely of late and that there is no complaint in the volume of business. The basis is held at $4.75 per keg for both standard wire and cut nails.

Wire products have been quite firm and while moving in a limited way, the sales have been seasonable. At $5 basis for No. 9, smooth steel, the business coming to hand is promptly filled.

Splendid Movement Of All Bars; Firm

Montreal.

STEEL AND IRON.—There has been quite a movement of merchant bar iron and of steel. The summer trade has met the expectations of the trade and prices, while unchanged, are ruling with a firmness of tone that will very probably continue.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond toe steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Tendencies Firmer On Various Sheets

Montreal.

SHEETS AND PLATES. — While there is not a heavy movement of sheets and plates, there has been quite a little business. In view of the stronger tendencies applying outside local markets are somewhat firmer and prices may be moved upward ere long. It is felt by many in the trade that the present quotations are rock bottom.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 60	$6 25
12 gauge	5 55	6 20
14 gauge	5 60	6 35
16 gauge	5 70	6 50
18-20 gauge	6 25	6 35

26 gauge	....	8 50
22 and 24 gauge	7 70	8 35

BRIEFS FROM THE WEEK'S MARKETS

Soldering coppers show another advance this week, the latest quotations being 3½ cents a pound higher than former figures.

* * * *

Turpentine is still soaring and with the market very strong an increase of 26 cents is already registered.

* * * *

Higher prices for lumber and raw materials have affected washing machines and new discounts are in effect which increase quotations.

* * * *

Steel squares show a sharp advance, the new quotations being fifteen per cent. higher.

* * * *

Declines in sisal fibre prices have resulted in lower quotations on rope and sisal lath yarn.

* * * *

Although no figures have yet been given out an advance in window glass will be made shortly.

* * * *

Mouse traps and rat traps have been revised upwards, the new prices showing an advance of 25 per cent.

* * * *

Higher prices are again shown on solder and the figures are from ½ to 3 cents a pound above former quotations.

Advances in hides and leather are reflected in new and higher quotations for lace leather.

* * * *

Prices of chest handles at Winnipeg show a drop of five per cent.

* * * *

Linseed oil is slightly easier but indications are that this is merely temporary.

* * * *

Winnipeg quotations on saw vises show a slight reduction.

* * * *

Further advances are shown this week in the price of tin. New and higher prices have been issued for slotting on stove rods.

* * * *

Barb wire prices at Winnipeg have been increased again.

* * * *

With a brisk demand from all parts of the country nail prices are holding firm.

* * * *

For the first time in some weeks prices on copper show no change.

20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Some Easier Tone In Old Materials

Montreal.

OLD MATERIALS.—Quite a change has been manifest during the past week or two on old materials. This has come from an accumulation of supplies, as the manufacturers are not buying heaviiy, and also is due to the fact that small dealers have been buying extensively and now want to sell. No reductions have been made, but the undertone is easier.

Dealers' Buying Prices—		
Pipe scrap, ton	....	12 00
Stove plate, ton	....	15 00
No. 2 busheling	7 00	8 00
Old rubbers, boots and shoes	0 07	0 08

Heavy copper	0 20½	0 22
Wrought iron, No. 1, per gr. ton	....	15 00

Solder Advanced Both Bar and Spool

Montreal.

SOLDER, LEAD PRODUCTS.—Advances are in effect for solder. These approximate 1½c per lb. and increases are also made for wire solder. The immediate reason is the higher prices obtaining for tin. There is a fairly good demand. There has been no change in the price of lead products, although it should be noted that a 10 per cent. discount applies on lead pipe from the prices quoted below.

Lead pipe	....	0 12½
Lead waste	....	0 13½
Note.—Lead pipe is subject to a discount of 10%.

Do., broken lots	....	0 16

Tin is Higher; Antimony Stronger

Montreal.

INGOT METALS.—The price changes of the week are those of an advance for tin and a firming of antimony price, locally. For the most part the trading is quiet.

COPPER.—As stated last week there seems to have been a resting of price change and no advances are recorded. The basis here remains at 27-28c per pound.

TIN.—While there is a somewhat dull market, the London price has again advanced. In sympathy with this the local quotations are advanced to 60-62c per pound.

LEAD.—Prices have been held on the higher basis recently reached, but there is little trading. Locally there is no change. Price 7¾c per pound.

ANTIMONY.—While the outside markets are quieter, prices have firmed a little locally to 11c per pound.

ALUMINUM.—What small trading has been done is on the basis of 35c per pound.

PIG IRON.—Prices have been firming in the States and buying is reported active. The local price may be moved upward, but it still is holding at $48 per ton.

TORONTO MARKETS

TORONTO, Aug. 7—Lower prices have been named this week on rope, pure Manila, British Manila and New Zealand hemp declining 2c per pound and sisal 2½c per pound. Advances have been recorded in steel squares, which move up about 15%, and mouse and rat traps which are 25% higher than formerly. Washing machines have undergone a revision upward and an advance of about 10% is shown in a line of brass valves. Sweat pads, soldering coppers and ingot tin are higher and a new charge for slotting stove rods is announced, providing for an advance on this type. The strength in the tin market is responsible for a further advance of 3c per pound in solder prices.

Higher Prices on Washing Machines

Toronto.

WASHING MACHINES. — Higher prices which have had to be paid for the various kinds of lumber entering into the construction of washing machines are given as one of the big factors contributing to the advance reported this week in price of washing machines. A new discount has been named of 30 and 5 per cent., which replaces a former discount of 30 and 10 per cent. There is no change noted in the list prices which is shown in the current market quotations.

25 *Per Cent. Jump in Mouse, Rat Traps*

Toronto.

MOUSE, RAT TRAPS.—A sharp advance has occurred this week of 25 per cent. in the prices which are being named on mouse and hat traps.

Valves Reach Higher Levels

Toronto.

VALVES.—A further advance has been recorded this week in some quarters on Jenkins Bros.' globe, check, angle and gate valves which go up a further 10 per cent. These are now being quoted to the trade at net list.

Sweat Pads Show an Advance

Toronto.

SWEAT PADS.—Higher prices are again the order of the day on sweat pads, and quotations which are now in effect are for the B. B. 10 inch, $9.00 per dozen, and B. B. 11 inch, $9.60 per dozen. The quotations which are now prevailing on the red edge yellow 10 in. are $9.50; 11 inch, $10.20, and 12 inch, $10.80 per dozen. The higher price of the various materials entering into the manufacture of these, along with increased production costs, are given as reasons for this change.

Soldering Coppers Go Up Another 3½c

Toronto.

SOLDERING COPPERS.—A further advance of 3½c per pound has been made in price on soldering coppers this week. This follows on the heels of an advance of 2c made last week and quotations which are now being named to the trade are 17½c per pound base. There is no change in the extras.

15 *Per Cent. Increase in Steel Squares*

Toronto.

STEEL SQUARES.—The market on steel squares shows a sharp advance this week in prices which are being issued to the trade. The new quotations which are now being made provide for an advance of 15 per cent. over former prices.

Slotting on Stove Rods Higher

Toronto.

STOVE RODS.—New prices have been issued this week on flat head stove rods with shaved heads. The difference really applies on the slotted, the discounts which are now prevailing being for the three-sixteenth inch, not slotted, 40 per cent., and for the slotted, 30 per cent. The discounts previously ruling on these lines were 40 per cent. and 35 per cent. respectively. On one-quarter inch, five-sixteenth inch and three-eighth inch, not slotted, the price per pound remains at 9½c, which represents no change, but the extra for slotting is now 50c per 100 rods extra, replacing a former charge of 25c.

Lace Leather Moves Up Again

Toronto.

LACE LEATHER.—An advance has been named in lace leather this week, following the continued strength of the leather markets. In sides the price has increased to $2.00 per pound, and in cut laces, the price is $2.40 per pound.

Declines Shown in Rope This Week

Toronto.

ROPE.—Declines which have been predicted in HARDWARE AND METAL the past couple of weeks have materialized this week. Pure manila, British manilla and New Zealand hemp have each dropped 2c per pound with sisal rope and lath yarn down 2½c per pound. These changes are due largely to the easier tone in sisal fibre, manila grades easing away in sympathy. Quotations now being named to the trade on rope are: pure manila, 32c per pound base; British manila, 28c; New Zealand hemp, 28c; sisal, 25c; sisal lath yarn, 25 per pound base.

Stoves Promise Activity; Wares Too

Toronto

STOVES, WARES.—Manufacturers look to a very active demand during the present month on stoves. There has been a fair amount of booking business come to hand and it is understood that the manufacturers are urging their customers to take delivery of supplies early. This would indicate that there is a possibility of a shortage later on and that an advance may take place seems quite within the realm of possibility.

Activity is also apparent in all lines of wares with the undertone to the market reported very strong. It is rumored in some quarters that higher prices are possible towards the end of this month, but in the meantime there is nothing definite on this score. Some factors are strongly of the opinion that there will be no change at that time unless something very sensational in the market develops in the meantime.

Oils and Gasoline Moving Freely

Toronto

OILS, GASOLINE.—Asked as to how business was this week, one refiner replied that there was altogether too much. This seems to be the feeling in regard to all lines of motor lubricating oils, greases and gasoline. Business has been exceptionally heavy and with the threshing season pretty nearly in full swing, the demand from that source has developed quickly. As far as can be learned orders are being taken care of promptly and there is no indication of any shortage whatever. Gasoline is being quoted at 32c per gallon, which is an unchanged figure.

There is nothing new in the situation on coal oil to report, prices remaining at 20½c to 23½c, according to grade. Sales continue to represent considerable proportions.

Nails Hold Firm; Wire is Steady

Toronto.

NAILS, WIRE.—The undertone of the market on nails is decidedly strong but there has been no indication of any advance in price. The demand at the present time is only fair, and whereas there is improvement shown it is not sufficient to warrant any advance. That at least is the opinion of some factors in the trade. Quotations which are ruling to-day are $4.70 per 100 pounds base for the wire nails, and $4.75 for the cut nails.

Smooth steel wire is quoted at $5.00 per hundred pounds, which is an unchanged figure.

Iron and Steel Bars Holding Steadily

Toronto.

IRON AND STEEL BARS.—Steadiness marks the position of iron and steel bars with the undertone to the market tending towards firmness. No price revisions are noted in quotations given below and no immediate change is looked for. The figures being quoted to the trade range as follows:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Situation in Wrought Pipe and Tubes Same

Toronto.

WROUGHT PIPE, BOILER TUBES.—There has been no change of a startling or even a particularly interesting nature this week in the situation on wrought pipe. Business is considered very good and prospects for a continued firm market. Prices appear in current market quotations at unchanged figures.

Seamless steel tubes seem about due for an increase, although the new prices are not announced yet, but it is understood the warehouses are calling in quotations that were made some days ago, and which have not been closed with. The increase will probably be about 2½ per cent., and the only good reason for it seems to be that there is a great demand for tubes just at this time, and many of the mills are booked well into the future. Quotations range as follows:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	....
1½ inch	28 00	....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Higher Figures Again Named on Solder

Toronto

LEAD AND ZINC PRODUCTS.—Higher prices are again in evidence on solder this week with quotations ranging from ½c to 3c per pound above last week's figures. The prices now in effect are for the guaranteed 35½c to 38c per pound; strictly 34½c to 37c; commercial, 32½c to 35c; wiping, 31½c to 34c; wire, 35½c to 41c. The strength of the tin market is largely responsible for this move upward.

A firm undertone prevails in manufactured lead products with business active. Prices remain unchanged at figures shown herewith:

Lead pipe, list, per lb.		$0 12½
Lead waste pipe, list, per lb.		0 13½
Do., over 8 inches, list, per lb.		0 14½
Above subject to discount of 10%.		
Lead traps and bends		15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 12	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 35½	$0 38
Solder, strictly, lb.	0 34½	0 37
Solder, commercial, lb.	0 32½	0 35
Solder, wiping, lb.	0 31½	0 34
Solder, wire, lb.	0 35½	0 41
Zinc sheets, per lb.		0 17

Market on Sheets Maintains Strength

Toronto

SHEETS, PLATES.—Strength marks the position of sheets this week locally. Sheets have gone up at the mills in some places, although there has been no increase at the warehouses. Advice received by HARDWARE AND METAL on the sheet situation this week states: "We believe that all of the mills are entirely sold up for third quarter delivery, and we know of no manufacturer as yet quoting jobbers for shipment throughout the fourth quarter." The same advice goes on to state that "Further advances in prices both upon sheets and tin plates may be expected within the next few days."

There seems to be a difference of opinion in the market regarding the plate situation. Advices from very reliable sources continue to refer to plate as the weak spot in the steel situation, while others point to the fact that operations are gradually approaching some 70 per cent. capacity at many of the mills. One dealer to-day was willing to stake his reputation on the fact that a higher schedule for plate would be announced inside of a month. This hardly seems likely, as there is a very large plate capacity in the steel centres now, and it can take on a lot more business before coming to the point where capacity will be in sight. Quotations here range as follows:

14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Corrugated Sheets Show Activity

Toronto.

CORRUGATED SHEETS. — Manufacturers seem satisfied that the volume of business coming to hand on corrugated sheets represents a very satisfactory total and look for a continuation of at least the present quantity of orders with an increase possible. Quotations remain at unchanged figures this week as follows:

Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Scrap Market Shows Some Strength

Toronto.

OLD MATERIALS.—The scrap metal market continues strong and is still marked by a real and acute scarcity in some lines, particularly heavy melting steel. There does not seem to be much of this material to dispose of, and there is also a scarcity of machinery scrap, the demand for this latter being brisk, with the offerings correspondingly poor. There is some speculation as to whether much of these "wanted" metals are being held back for still greater increases. It would appear that there should be more of this material in the country. It may be that labor is not available to bring it out, or that the price is not tempting enough, but the fact is that it is not making its appearance. Prices show no change from figures herewith:

Dealers' Buying Prices—	
Tea lead	0 03½
Heavy lead pipe	0 05¼
Pipe scrap	6 00
Stove plate, per ton	13 00
No. 2 busheling	11 00
Yellow brass	0 09
Red brass	0 16¾
Light brass	0 07
Scrap zinc	0 06
Heavy copper	0 18
Wrought iron, No. 1, per gr. ton	14 00
No. 1 machinery cast, per net ton	18 00
Heavy melting steel	13 50
Old rubbers, boots and shoes	0 07
Overseas, lumbermen's rubber boots	0 04½
Bicycle tires	0 02½
Automobile tires	0 03¾

Tin Makes a Further Advance

Toronto.

INGOT METALS. — The market shows no change apart from an advance of 2c per lb. on tin this week. The other metals seem to have steadied down somewhat, but are holding quite firm at recent advances.

COPPER.—For the first time in some few weeks, there is an unchanged market on copper, quotations being held at 27c per lb. The market is quiet, with some fair sales reported.

TIN.—A further advance has been made in this metal this week, prices ranging from 61c to 62c per lb. The shipping strike in England is holding back deliveries, and if continued may result in a temporary shortage.

SPELTER.—No change from quotations of last week is shown in the figures named to the trade on spelter of 10c to 11½c per lb.

LEAD.—Prices on lead remain steady and unchanged at 7c to 8c per lb. A very nice volume of trade is reported and outlook is considered very satisfactory.

ANTIMONY.—Trade is quick and active and undertone to the market firm. There is no change from the 10c to 11c quotations shown last week.

ALUMINUM.—Sales are attaining greater volume and outlook is fairly promising. Prices hold at around 35c per lb.

LONDON MARKETS

LONDON, Ont., Aug. 7—Prices show a decided tendency in many lines to advance and among the changes to higher levels this week are apple parers, calf meal, sad irons, Moore's pushless picture hangers, combination padlocks, washing machines and alabastine. Prices of nails are holding firmly. A decline of two cents is shown in Manila rope prices and of 2½ cents in sisal. Turpentine has moved to the highest prices on record. Business in general has been very good and the building activity that got under way locally during the spring and early summer is steadily increasing. A brisk demand for many lines of goods is the result.

Two-Cent Decline is Shown in Rope

London, Ont.

ROPE. — New and slightly lower prices are now effective as follows: pure manila, 32c per lb. base; British manila, 28c per lb. base; New Zealand hemp, 28c per lb. base. Sisal quotations show a drop of 2½c, the price being, on sisal, rope, 25c per lb. base, sisal lath yarn, 25c per lb. base.

Calf Meal Higher; Fly Oil Unchanged

London, Ont.

CALF MEAL, FLY OIL. — Royal Purple calf meal has advanced, the new prices being: 25 lb. bags, $5.15 per 100 lbs.; 50 lb. bags, $5.10 per 100 lbs.; 100 lb. bags, $5 per 100 lbs.

There is a brisk demand for fly oil or fly killer. No change in prices has been made, the quotations being: Dr. Williams, ½ gal. tins, $8 doz.; 1 gal. tins, $12.

ADVANCE IN EXTRAS FOR SEAMLESS TUBES

The American Brass Co. report an advance in extras for seamless tubes effective August 1, 1919, and until revised as follows:

All seamless tubes, of gauges thinner than No. 16 stubs (.065 in.), also all sizes smaller than ⅝ in. dia. of any gauge, extras for size and gauge, 50 per cent. advance over those shown in the American Brass Co.'s price lists and catalogs.

Schedules of extras applying to iron pipe sizes and condenser tubes remain unchanged.

Advance Shown in Hudson Apple Parers

London, Ont.

APPLE PARERS.—New and higher prices are now being quoted on Hudson apple parers. The new quotation is $14 per doz.

Little Star apple parers have also advanced, and are now quoted at $10.50 per doz.

Sad Irons Show Revision Upwards

London, Ont.

SAD IRONS.—New prices on sad irons show an advance, quotations being on the following basis: No. 60, Dover, $2.25 per set; No. 70, Asbestos, $2.85.

Pushless Hangers Register an Advance

London, Ont.

PUSHLESS PICTURE HANGERS.—Higher prices have been named on Moore's Pushless picture hangers, the new figures being for Nos. 24, 25, 27, 28, $1.10 doz. pkgs.

Higher Prices For Combination Padlocks

London, Ont.

COMBINATION PADLOCKS.—Higher quotations have been made on combination padlocks, the prices being as follows: B steel, 95c each; B, brass, $1.25 each; D, brass, $1.15 each; E, brass, $1.45 each; B B, brass, $1.50 each.

Higher Prices For Washing Machines

London, Ont.

WASHING MACHINES. — Higher prices for lumber and other increased production costs in connection with the manufacture of washers have resulted in new and higher prices being named. The new discount is 30 and 5 per cent. off list.

Advances Made in Prices of Alabastine

London, Ont.

ALABASTINE.—A new and higher list of prices is now in effect on Alabastine, the quotations showing an advance of $1 in the list. The new list is $15 per 100 lbs., and subject to a discount of 40 per cent. in 1 to 9 case lots and 45 per cent. in 10 case lots; for 2½ lb. pkgs. add 50c per case net.

No Changes Shown in Price of Nails

London, Ont.

NAILS.—There is a brisk and steady demand for nails. Prices are firm and show no changes from the following: wire, $4.70 base per 100 lbs.; cut, $4.75.

White Lead in Oil is Holding Steady

London, Ont.

WHITE LEAD IN OIL—White lead in oil shows no change. There is a fair volume of business being handled. Quotations are on the following basis: pure, tons. $16.35 per 100 lbs.; less tons, $16.70.

Corn Huskers Higher And in Good Demand

London, Ont.

CORN HUSKERS.—Higher quotations are shown for corn huskers. A brisk demand for huskers is noted. The new prices are: No. 678, $3.50 doz.; No. 2000, $1.15; No. 3000, $2.20; No. P. $1.60.

Big Advance Shown in Price of Turpentine

London, Ont.

TURPENTINE.—Prices on turpentine have been moving steadily upward and new high records were reached when the following figures were established this week: 1 bbl. lots, $2.20 per Imp. gal.; 2 to 4 bbls., $2.19; 5 gal., $2.30.

Linseed Oil Prices Show a Decline

London, Ont.

LINSEED OIL.—With a fairly good volume of business offering linseed oil prices show a decline. Quotations are as follows:

Linseed Oil—	Raw.	Boiled.
1 to 2 barrels, gal.	$3 22	$3 25
3 to 5 barrels, gal.	3 21	3 24
6 to 9 barrels, gal.	3 19	3 22

Less barrels, add 10 cents gallon.

WINNIPEG MARKETS

WINNIPEG, Aug. 7—Price changes during the week again show numerous items of interest to the hardware trade, the majority being slight reductions, although there are advances in a limited number of lines. Among the lines affected are the following: Barb wire, turpentine, door buttons, thumb latches, barn door latches, hat and coat hooks, gate hinges and latches, harness hooks, clamps, sad irons, chest handles and grindstone fixtures.

Business for the past week is again very heavy in all lines and jobbers are compelled to work overtime to cope with the rush as the threshing season will soon be on, and the fact that it will be much earlier than former years will no doubt result in a shortage of certain lines at the beginning of the season. Good sales are also reported in all lines of builders' hardware following the resumption of building.

Barb Wire Prices Again Increased

Winnipeg.

BARB WIRE.—Barb wire prices show a further revision during the week, moving up 15c per spool, due to increased prices at the mills. To-day's prices are as follows:

Barb wire—	Hd. of Lakes	Wpg. Spool
Lyman	$4 45	$4 85
Glidden	4 30	4 65
Baker	4 20	4 55

Cast Door Buttons Are Slightly Lower

Winnipeg.

CAST DOOR BUTTONS.—Prices have been revised during the week on cast door buttons, which show a decline over former quotations of approximately 10 per cent. To-day's ruling prices are as follows: 1½ in., 80c; 1¾ in., 95c; 2 in., $1.10; 2¼ in., $1.60; 2½ in., $1.65 gross.

Lower Prices Named On Thumb Latches

Winnipeg.

THUMB LATCHES.—Both cast and steel thumb latches have been reduced to lower levels during the week, based on new factory quotations and are now selling at the following figures: Cast thumb latches No. 1, $1.25; No. 2, $1.40; No. 3, $1.45; No. 4, $1.65 per dozen; in cartons, No. 1, $1.90; No. 2, $2; No. 3, $2.10; No. 4, $2.40 per dozen. Steel thumb latches, No. 2, $2.05; No. 3, $2.90; No. 4, $4.30. New prices are now effective on barn door latches, showing a slight reduction on former quotations. To-day's selling prices on the revised lines are as follows: No. 5, $2.65; No. 8, $3; No. 9, $4.30 per dozen.

Hat and Coat Hooks, Gate Hinges Are Lower

Winnipeg.

HAT AND COAT HOOKS, GATE HINGES.—New prices have just been issued on a couple of lines of hat and coat hooks, showing a reduction of 5 to 10 per cent. on former prices, to-day's prices being as follows: Hat and coat hooks, No. 2, $4.45; No. 21, $5.35 per gross. Gate hinges and latches show a slight reduction in price based on new factory costs just to hand, new prices being approximately 5 per cent. below former quotations. To-day's ruling prices are given below:

Gate latches only —No.10, $2.60; No. 60, $2.60; No. 65, $2.60 dozen.

Gate Hinges only—No. 10, $3.80; No. 60, $3.80; No. 65, $3.55 dozen.

Gate Hinges and Latches, complete—No. 10, $6.40; No. 60, $6.40; No. 65, $6.15 dozen.

Harness Hooks Are Revised Downward

Winnipeg.

HARNESS HOOKS.—Harness hooks show a slight drop in price this week, new basis being 2½ per cent. below old figures, making to-day's selling as given herewith: No. 16, $2.40; No. 166 x 6 in., $1.85; No. 18, $6.10; No. 19, $12.40.

Advance Made in Mrs. Potts' Irons

Winnipeg.

MRS. POTTS' IRONS.—Prices on Mrs. Potts' irons have been revised to slightly higher levels this week following a further factory increase. New prices now ruling are given as follows: Mrs. Potts' sad irons, No. 50, $2.35 per set; No. 55, $2.25; iron handles, $1.45 per dozen.

Five Per Cent. Drop in Chest Handles

Winnipeg.

CHEST HANDLES.—Chest handle prices have also been revised during the week and show a drop of approximately 5 per cent. below former figures, making to-day's prices as follows: No. 1205 x 3½ in., $2.45; 4 in., $3.20; No. 1, $1.90; No. 2, $2.55 per dozen.

Grindstone Fixtures Revised Upward

Winnipeg.

GRINDSTONE FIXTURES.—Based on the latest factory quotations, new prices on grindstone fixtures show an increase of from 5 to 10 per cent., due to increased manufacturing costs, which makes to-day's selling prices as follows: Grindstone fixtures, No. 1, $8.30; No. 2, $8.60 per dozen. Extra handles, $2 per dozen; extra shafts, $3.60 per dozen;

extra washers, 60c per dozen; extra nuts, 60c per dozen.

Carpenters' Clamps and Quilting Clamps Lower

Winnipeg.

CARPENTERS' CLAMPS.—Quilting frame clamps and carpenters' clamps show a general revision in this week's prices, based on new factory quotations, new prices being from 2½ to 5 per cent. below former figures on these lines, making to-day's jobbing price as follows: Quilting frame clamps No. 1, $8.25; No. 2, $10.75; No. 3, $12.20; No. 4, $13.65 per gross. Carpenters' clamps No. 13, $5.65; No. 14, $6.95; No. 15, $7.90; No. 16, $9.05; No. 17, $9.90; No. 18, $11.15; No. 19, $16.25; No. 20, $17.25 per dozen.

Turpentine Prices Are Still Soaring

Winnipeg.

TURPENTINE. — Turpentine prices still continue to advance, and a further 20c per gallon increase is reported during the week, due to heavy export demands. Lower prices are not looked for generally for some time. Sales in this commodity are limited on the local market, due to the price, most orders being for small quantities. To-day's prices are given as follows: Barrel lots, $2.20 gal.; ½ barrel lots, $2.23; 5-gal. lots, $2.25; 1-gal. lots, $2.25, plus the usual extras for containers.

Slight Reduction is Made in Saw Vises

Winnipeg.

SAW VISES.—New prices have been announced during the week on saw vises showing a slight reduction on former quotations of from 2½ to 5 per cent., making the present market prices as given herewith: No. 80, $9.20; No. 81, $14.95; No. 105, $15.80 per dozen.

Linseed Oil is Holding Firmly

Winnipeg.

LINSEED OIL.—Linseed oil prices show no change during the week, holding firm at former quotations, with only a very limited demand on the local market. To-day's ruling prices are confirmed as follows: Raw linseed oil, $3.10 gal.; boiled, $3.13 gallon in single barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., August 7.—Despite the fact that now is the middle of the midsummer period, almost invariably a very dull one in the steel market, trade conditions are visibly improving. The volume of buying keeps up, if indeed it does not increase, and prices show a stiffening tendency. In this they reflect the heavy bookings all the mills have done. Shipping orders in July, including new orders and specifications against contracts, made a total tonnage fully double the shipments in the month. The only undesirable feature of the market situation is that the buying is poorly distributed among the products. There is too much buying of some products, more than the mills can take are of, and too little in others. Thus the lap weld departments of the pipe mills are sold up to the end of the year and are making five-month delivery promises, while the plate mills are operating at less than half capacity and the rail mills are doing practically nothing except by way of producing rails for export.

Steel mill operations are now estimated at fully 75 per cent. of capacity, based on ingots produced, or perhaps a trifle more. The output for July as a whole will probably show somewhat over 70 per cent., against 67 per cent. in June, and 54 per cent. in May, the month of lowest production.

Steel Price Advances

While members of the steel trade do not disagree with each other as radically, and certainly not as vociferously, as members of the United States Senate, there are very marked divergencies of opinion as to price policies. Some producers are committed to making every price advance that seems feasible, in other words, doing everything "they can get away with," while others regard it as much wiser, and likely to prove much more advantageous in the long run, to hold prices precisely where they are. More than a month ago the United States Steel Corporation, without making any formal or official statement, allowed it to become distinctly known that it was opposed to any steel price advances, this year at least, and that is still very positively the Steel Corporation attitude. It is not alone in this position, there being at least one or two large independent producers that share the view. Just why some independents are so anxious to advance prices is not made altogether clear. They can hardly believe that the steel market is capable of advancing indefinitely from the present level, and present prices are certainly highly profitable to any mill that has full operation. Prices cannot be advanced in any line where there is not full operation. Those who believe in holding to present prices contend that the period of market activity will be prolonged thereby, that price advances will bring the end sooner, and they also contend that an advancing steel market is almost certain to result eventually in higher wages. Mills might have to pay higher wages before they had completed orders taken at the old prices. Rather satirically they suggest that if mills know this, as they should, they had better advance wages at once and then they would have a good talking point—which they have not now—for advancing prices.

The advance in wire products noted a week ago, as made by several producers, is now practically general, in this way, that the majority of independents have advanced their prices while the other independents as well as the American Steel & Wire Company (Steel Corporation) are practically out of the market since they are booking business only from regular customers, and then in quite restricted fashion. This makes the market quotable at spreads, 3.00c to 3.10c on plain wire and $3.25 to $3.50 on nails.

Pipe mills have not advanced prices generally, following the example of the Wheeling Steel and Iron Company, which advanced butt weld 2½ points and lap weld 5 points on July 10, but it is reported that a number of mills are taking business at premium prices, i.e., their regular quotation is the open market but for the delivery that the buyer wants there is a higher price.

Several of the independent sheet mills have advanced prices $2 a ton on black sheets and $4 a ton on galvanized, and in some quarters it is predicted that eventually all the independent mills will be on the advanced basis. The leading interest has made no advances and shows no sign of doing so, but when importuned by automobile interests to cover them for the first half of 1920 it has made some sales at $5 a ton advance. Apparently it proposed this advance in the first place in order to discourage the automobile trade from buying for so late a delivery.

For all the important steel products there is as much demand as 30 days ago except in some cases where mills are filled with contracts already, and then they are getting good specifications, while in some lines there is heavier demand. Lettings of fabricated steel contracts are making a heavier tonnage almost every week, and are now running at approximately the capacity of the fabricating shops. There is increased demand for merchant steel bars from nearly all customers, and the cold drawing shops are particularly good buyers. They are running full on sizes of 3-in. and less, but at low rates on the large sizes. Forging billets are now moving in a moderate way, mills having sold several hundred tons in the past fortnight, and they state they are obtaining the full March 21 price, which is $51, Pittsburgh, or $12.50 over the regular price of rolling billets.

The pig iron market is strong in foundry grades, but Bessemer and basic are a trifle unsteady. The condition is natural as foundries are running fairly well and want their particular demands, while for Bessemer and basic there is never so much demand in the open market unless the mills are operating very nearly at capacity. There are many large steel interests that make enough iron themselves for ordinary requirements but when they are particularly rushed they have to buy some merchant iron to fill in.

Getting Away from the Counter to Sell Paint

How One Dealer Had His Eyes Opened to the Wider Fields For Business in the Territory Around His Store—Reaching Out After More Trade Usually Means Getting It

"I DON'T believe you could get Jimmy Byron to say a word about himself and his successful paint selling career if you were to go direct and ask him about it. Jimmy's modesty is the reason for that. His success is due to an unusual mixture of initiative, enterprise, careful planning and aggressivness, tempered with a quiet modesty that does not permit any personal eulogies. But when it comes to talking paint—well, that's another reason for this story.

"I happen to know the inside story, and with Jimmy's permission I am going to turn it outside on this page. You could never coax Jimmy to do it. And while I am at it—Jimmy Byron isn't his real name, another result of his modesty."

* * * *

About six years ago a red-headed Irish lad came into Joe Patterson's hardware and paint store looking for a job.

"Nothing doing," was Joe's succinct and impatient answer.

"Didn't ask ye to be doin' nothin'; I want to be doin' somethin'," was the quick Irish retort.

"Get to ——, get out of here!" shouted Patterson with a move to shove the boy out of the stoor.

The boy neither flinched nor moved. "Didn't come in to git out," he shot back. "I kin work and I'm goin' to work here."

As busy and as quick-tempered as Joe Patterson was at the time, he could not overlook the earnest persistence of the boy who stood before him. It was a new quality in a boy. A boy that would stick for a job like that would stick to any job he obtained.

"What can you do?" shot Joe at the lad.

"What you got to do?" was the retort.

"You're hired," was Joe's only defence against such insistence.

"Can you drive a horse?" asked Joe, casting about to find the boy's ability.

"Where's the horse, and th' harness? I've been drivin' horses ever since I was knee-high to a fetlock."

And Joe Patterson discovered in Jimmy Byron something new in the way of a delivery boy, that was not only agreeable and profitable but that was pleasing to his trade as well.

Jimmy solved the delivery question for Joe more efficiently than he had ever had it done before.

But Jimmy's ambition extended beyond currying a horse and delivering parcels efficiently.

Full of Business

Four months following the above conversation and agreement, Jimmy surprised Joe by asking if he would allow him to carry an order pack and take orders while he was making deliveries.

"You stick to your horse and your delivering," answered Joe impatiently.

"I'll stick just so long, Mister Patterson, and then I'll be after carryin' an order pack for somebody else," answered Jimmy.

Joe knew the lad well enough to recognize that he must either encourage his ambition in some way or lose an exceptionally bright and careful boy.

"What are you going to sell?" asked Joe.

"Everything," answered Jimmy, "but I'm goin' to start mostly with paint. You see, it's like this, Mister Patterson, people's after askin' me a lot of questions about paints when I'm deliverin' goods. I haint never known much about them but I'm learnin' and th' more I'm learnin' the more I'm after tellin' them. Now it's when people's in this sort of questionin' notion that it's a good time for sellin' them things. I've been takin' the notion that if I'd take an order pad with me I could sell them paints while this notion's on them. Perhaps after I'm gone they'll get over the notion and forget to be buyin'. Again, Mister Patterson, there's a lot of people that I can talk paint to better in their own homes than you can in your own store. I can sell it to them. It's an idea, Mister Patterson, from me; is it a go from you? Of course, it's extra work for me, but it's extra business for you and if it's worth anything t' you, I'd be askin' you to let me have a commission on all the sales."

Joe Patterson had learned to lay aside his temper when dealing with earnest, plodding, planning Jimmy Byron.

"Jimmy," said he, "I'll try anything once. It's never been done before around these parts. Don't know as I ever had any boy show such an interest in his work, either. You can go to it and if you make good there's a job inside for you."

"Don't want any job inside," was Jimmy's reply; "if

British Brush Manufacturers Are Asking For Protection

Want Importations Restricted to the 1913 Basis—High Wages in England and Shortage of Supplies Hits Home Manufacturers

CONTENDING that importations of brushes in large numbers by England has seriously injured the home industry, the British Brush Manufacturers' Association has filed the following complaint and request:

"Early in 1918, when the importation of brushes was prohibited, the Italian Government asked permission to export brushes to England on the ground that a large portion of Italian territory was in enemy occupation, and it was essential that every possible outlet should be available for such manufactures as it was still possible to keep going in Italy.

Special Concession

In these circumstances our Government made a special concession that Italy might send in brushes up to the total in dozens which she had sent in 1916, with the result that Japan immediately claimed as an ally to stand on the same footing as Italy, and both these countries were allowed to send brushes into England to the extent of our 1916 imports from them.

Got No Redress

"A deputation of the interim reconstruction committee of the brush trade, composed both of employers and employed, had an interview on May 15 last, with the Consultative Committee of the Board of Trade on the subject, but the sole result has been that not only are brushes from Italy and Japan still allowed to come into this country, but the Board of Trade on June 5 actually published an announcement permitting all other countries to send in brushes up to the total number imported in 1916.

Alleged Injustice

"It will be seen that a gross injustice is being inflicted on the brush trade in this country without the least reason or compensation. The original concession given to Italy was on the ground that a portion of her territory was occupied by the enemy. This has ceased to be the case for the past seven or eight months, but the concession made at the beginning of 1918 is still being continued without the slightest consideration to the injuries it is inflicting and will inflict on the brush trade in this country.

"It is obvious that this concession was of a temporary nature, the grounds on which it was given have disappeared, and it should be cancelled at once, and thereby Japan and other countries will also cease to have any claim to send their manufactured brushes here. It should be further noted that the year chosen as the basis up to which imports are allowed was the worst possible from the point of view of the English brush trade. In 1916 large numbers of English brush makers had joined His Majesty's forces, and the remainder was very largely employed on Government contracts, with the result that manufacturers were unable to produce the brushes necessary for the civil requirements of the country.

"It will be noted from the figures given below the enormous extent by which imports increased in 1916, as compared with 1913, in the case of the United States, Japan, and the Netherlands (in the last named a considerable quantity of the brushes imported being probably of German manufacture.) It is claimed by the brush trade that if imports are to be admitted at all, the limit should be up to 1913 importations and not those of 1916.

"It may further be pointed out that in all the countries in question except the United States, wages are very much lower than they are in this country, and the United States have the special advantage that the brush trade in this country is severely handicapped at the present time by a shortage of timber supplies of all kinds, while the trade in the United States is so well supplied that the handle makers there are in a position to offer finished handles to this country at considerably lower prices than these handles can be produced here."

Imports

	Dozen	
	1913	1916
Italy	62,863	64,688
United States	26,693	352,772
Netherlands	28,806	134,567
Japan	289,259	1,591,561

GETTING AWAY FROM COUNTER TO SELL PAINT

(Continued from page 60.)

I make good I'll be askin' you to be buyin' another horse."

"What's the idea?" was Joe's surprised inquiry.

"Leave it to me when the proper time comes," exclaimed Jimmy, as he dodged into the store for the coveted order pad and a bunch of paint color cards.

At the end of the third month after this arrangement had been made it needed no violent demonstration to show that Jimmy had made good on his experiment. His commissions on his sales of paints as well as other goods more than equalled his regular wages.

Joe Patterson was shrewd enough to recognize that it was up to him to place his newly-found treasure in a place where he could make more money both for himself and the store.

Jimmy's commission was direct evidence of initiative and aggressiveness. The paint department was showing increased business as a result of the interest that was being promoted by Jimmy's work. These results were both direct and indirect as a great deal of business came for which Jimmy could not be allowed a commission, although he was responsible for starting it.

It was plainly up to Joe to make the first move in Jimmy's next forward step.

"What was your idea in wanting another horse, instead of an inside job?" Joe asked him shortly after he had noted the size of Jimmy's commission.

"It's me idea to break away from all counters and go git the business instead of waitin' for it to be comin' to you," answered Jimmy. "You're knowin' now, Mister Patterson, that me takin' an order pad on the delivery wagon brought business that might have slipped away to the other fellow or not come to nobody at all."

"Now, Mister Patterson, with a horse all to meself I can go to the people we don't deliver goods to at all. I'm goin' to be a retail commercial traveller around this here burg. That's all them mail order catalogues's anyway. And me gettin' to know these people personally and talkin' to them about their own affairs and our store and goods seems to me I can be beatin' the mail order catalogue and increasin' the business of this here store."

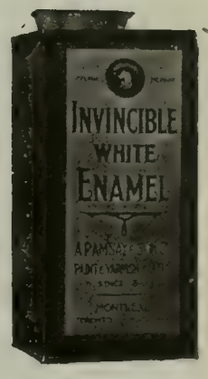
Joe Patterson pondered this idea with seriousness that showed the importance he attached to Jimmy's scheme.

"What's more, Mister Patterson, if you'll look around and think it over you'll note that we just reach th' farmers around this town so far out and no farther. The others go to Marionville, Sprucedale or Daleville. They might as well be comin' here as goin' there for their goods. By me visitin' them with a horse and rig I'm goin' to start them this way.

"What I'm figurin' out, Mister Patterson, is that the average paint man and clerk hates like sin to git from behind his counter to go out for business. He's bothered with the idea that he'll be losin' dignity or oversteppin' ethics or some other fool notion. He only has a little circle around him that comes his way, anyway. My idea, Mister Patterson, is to use that horse to make our circle bigger."

Needless to say, Jimmy obtained his horse and rig which in a year or two was substituted for a runabout that enabled him to still further widen his circle.

Not only was the business of the paint department doubled but Joe Patterson's store throughout received a revival of business that very shortly earned a partnership for Jimmy.



But as said at the beginning, if you ask the junior partner of the firm of **Patterson & Byron** to relate the story, it is difficult to get the young man to consent to any suggestion of his having been unique in combatting mail order business or increasing a business where it had become an almost established idea that there was no possibility for extension.

THE BELGIAN PLATE AND WINDOW GLASS INDUSTRIES

Inasmuch as the Belgian plate glass and window glass industries are two of the most important industries of this consular district, and as great quantities of glass were exported from Belgium to the United States and other countries before the war, it should be of interest to American manufacturers and importers to learn of the further development made in these two industries since the last reports from this office. (See Commerce Reports for April 12 and May 12, 1919).

The following information has been obtained from one of the principal Belgian window glass manufacturers dealing with the Belgian plate glass and window glass industries, and the facts given by him can be relied upon as far as can be judged. The situation is improving slowly, but there are many difficulties yet, the principal of which are said to be the labor troubles. A serious attempt is now being made by the manufacturers and workmen to come together and make an agreement as to salary, number of hours of work, etc., which will be fair to both sides, and when this agreement is made the majority of the factories will commence operations at once.

Plate Glass Industry

According to statistics, the average monthly production of plate glass in Belgium in 1914 was about 150,000 square meters (1,614,600 square feet). It was expected that there would be three factories in operation about the end of May but not at full capacity. The three together probably will produce 40,000 square meters (430,560 square feet) to 50,000 square meters (538,200 square feet). It is impossible to know exactly what will be the cost price, but it is generally thought that it will be about three times as much as it was before the war.

Formerly there existed a syndicate of all the plate-glass factories of Belgium, France, Germany, Austria, Holland, Spain, and Italy, and the sale of the output of all these factories was made through the central offices of this syndicate established at Brussels. This syndicate also determined the amount of plate glass to be produced in each factory. This organization has now been dissolved and is in liquidation. There is a question of forming another syndicate of plate-glass manufacturers to take the place of the old one—and if this is done the new syndicate will probably include only the Belgian factories. It is not yet known what system will be adopted for the regulation of the amount of the production and the establishment of the selling prices, and all these matters are now being studied by those interested.

Window Glass Industry

The Belgian window-glass factories did not, in general, suffer very much from the German ocupation, and would have been able to operate very quickly after the armistice if there had not arisen very great difficulties in transportation, which brought about a shortage of food and raw materials.

The last of February and in March two factories started up—one of which uses the old process of glass blowing by hand, and the other produces by means of machines. The other Belgian factories are very anxious to begin operating but they have had to deal with very great difficulties in regard to labor. The workmen demand not only very high wages but also certain new conditions under which they are to work—and it has been very difficult to come to an agreement. If an arrangement is made this will mean the lighting up of nine to ten more ovens, with a monthly production of 12,000,000 to 13,000,000 square feet.

According to the last statistics, the average monthly production of the Belgian window-glass factories for the first seven months of 1914 was 20,000,000 to 25,000,000 square feet. The two factories which are in operation at present are producing together about 2,000,000 square feet per month. The present cost price of the glass, compared with the price in 1914, is about four times as much. It seems likely, however, that it will be lower later on.

KEEPING THE STOCK TURNING OVER

Continued from page 41

province. The farmers get good money for their products, and they get it regularly, also continually. Within a radius of ten miles of Ingersoll there are hundreds of as fine homes as can be found on any countryside in the Dominion. These people are good buyers, know what they want, and do not mind paying for it. Their trade is well worth going after, and Richardson & Rae go after it by keeping an attractive stock, an attractive store and windows, and by regular advertising.

Right Up-to-Date

These people are up-to-date, and know all about the latest goods. Mr. Richardson says they are especially interested in anything that will help them save time or make their work easier, or their homes more comfortable. Hand power washers for instance find a ready sale, and the firm does a steady trade in these. They find that the sale of one machine sooner or later means the sale of another, or perhaps more, as one satisfied customer tells her neighbors or friends about the results she has.

There has been a lot of building going on in Ingersoll this season, and Richardson & Rae have turned over a lot of builders' hardware. They keep a good stock of all lines required by those erecting dwellings or other buildings, and keep in close touch with all work that is being carried out.

Favor Cash Business

Mr. Richardson stated that as a general rule he favors doing business on a cash basis, although he says this is not aways possible. By obtaining cash he does away with a lot of bookkeeping, expense of following up and collecting, and has the money he needs to put back in his business.

Discussing mail order competition he stated that it is keen in his district. This might be expected as money is so plentiful there and the mail order firms are out to get their share if they can. However, their hardware firm finds no difficulty in meeting this competition and securing the trade if given a chance to quote.

CARPENTER-MORTON SALESMEN CONVENE

The annual convention of the travelling salesmen representing Carpenter-Morton Co., Boston, Mass., manufacturers of varnish and paint specialties, opened at the Boston City Club, August 5, for a three days' session. Sixty-one travelling men, representing all of the States and Canada, were in attendance.

The convention was presided over by M. Elton Vose, vice-president and sales manager for the company. During the session on Wednesday addresses were given by Geo. C. Morton, treasurer and general manager, and by H. K. Stroud, and Edward B. Brown, of Stroud & Brown, Inc., New York city.

On Thursday afternoon the men were guests of the company at an outing held at Wardhurst Club, Lynnfield, Mass., making the trip in automobiles. Games and sports were enjoyed, followed by a banquet.

MORNING EXERCISES FOR THE TIRED BUSINESS MAN

Stand in the middle of room, raise arms slowly overhead, take deep breath and say "Damn the Government!" lowering arms in attitude of despair. Ten times.

Extend body flat downward on floor, cover eyes with hands, kick heels, think of the railroads and weep till dry.

Kneel, wring hands, meditate upon the labor unions and groan 150 times.

Assume sitting position, hands on hips, sway gently to and fro and concentrate on the Department of Trade and Commerce until a generous frothing at the mouth sets in. Till exhausted.

Collapse on floor. Grovel vigorously, think of the income tax and gnash teeth as in anger. Ad lib.

Note. — Observe this simple regimen every morning before breakfast and you will reach the office with most of the cares and troubles of the day already out of your system.—Adapted from Commerce and Finance.

WANTED

HARDWARE CLERK WANTED—SALARY $24 per week. State age and experience. Apply to F. Y. W. Brathwaite, Blind River.

Varnish Mistakes

MISTAKES in varnish buying are pretty costly for the user, because such errors are usually not discovered until some time after the finishing is done, and then it is too late to rectify.

Berry Brothers' Varnishes, Enamels and Stains have been standard for sixty years. They always satisfy the most critical consumer.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, August 7.—Features of the week are those of an advance for linseed oil of 5c per gallon and of 15c to 28c per gallon for turpentine. The oil movement is a light one and not a great deal of turpentine is moving. Prices are likely to go higher on the latter owing to the difficulty of securing the same from the South. Paint business is very satisfactory and the outlook for a business this fall quite equal to the average season is good.

Five-cent Advance Made on Linseed Oil

Montreal.

LINSEED OIL.—An advance of 5c per gallon was made this week and the basis still is nominal. While the demand is not heavy there is some oil going forward. Dealers, as a rule, order what they need for immediate sales, but not more. The outlook is still pointing to a maintenance of high prices and declines are not anticipated. The receipts of seed are very limited and the basis on July flax has been hovering around the $6.25 mark this week.

Raw—	Imp. Gal.
1 to 4 barrels	$3 05
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$3 07½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Stiff Advance on Turpentine To $2.10

Montreal.

TURPENTINE.—Advices in HARDWARE AND METAL last week stated that: "Turpentine up, too, may reach $2." This forecast was made on definite information and the price has gone to $2.10 since then. Short supplies are responsible and there is unlikely to be much relief. The overseas market is taking much of the Southern supply and there is nothing to do but pay the price if one wants supplies. The demand is limited.

Turpentine—	Imp. Gal.
1 to 4 barrels	$2 10
Small lots	....

(Packages extra.)

Putty is Holding; Advance Imminent

Montreal.

PUTTY.—No putty advance has been effected yet, but as one manufacturer put it, "an advance is imminent." The trade has been deferring action owing to the rather limited trade which is passing. Making up the product on present oil costs suggests an early increase in the price, and this is expected to come. In the meantime the following prices are still in effect:

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil In Strong Market

Montreal.

WHITE LEAD IN OIL. — A very strong undertone is marking the local market. Advances are spoken of in paint circles and the tone of pig lead in outside and local markets strengthens the forecast made last week that there will be early increases. The movement at this time is a light one, and this has been one reason for deferring changes. The price on standard lead is $15.50 per 100 pounds on 5-ton lots; $16 on 1-ton lots, and $16.35 on smaller quantities.

Mixed Paint Trade Has Been Active

Montreal.

PAINTS AND SPECIALTIES.—August is not considered an active selling month for paints and specialties, but there has been quite a large movement—fully as large as looked for, and for some lines, better. The undertone is firm on all products and dealers will apparently have a good business this fall, judging by the orders and reports received.

TORONTO

TORONTO, August 7.—Turpentine is just 26 cents higher to-day than it was a week ago, quotations to-day being made at $2.20 and $2.21 per imperial gallon. At that the retailers' prices are below those of importers, who are basing their quotations on what it would cost them to-day in the Southern markets. The market is very strong, and further advances are expected at any time. Linseed oil has eased off a little but the reaction is regarded as only temporary and is not expected to result in any material reduction owing to general conditions. Linseed oil quotations range from $3.22 to $3.27 for raw and from $3.25 to $3.30 for boiled. Rosin is showing great strength, and prices have been steadily climbing. Shellac prices are very firm and show a tendency to advance as supplies are reported somewhat scarce. An advance will be made very shortly in window glass. While no change has as yet taken place in white lead in oil an advance is expected at any time.

New High Records Set By Turpentine

Toronto.

TURPENTINE.—New high records have been reached by turpentine this week and there is no telling where prices are going to. The market is very strong, and with stocks reduced during the week at Southern points from 11,000 barrels to 8,000, and overseas orders pouring in, there seems every indication that advances will again be made. Stocks in Canada generally are reported very low, so much so that at some points jobbers are refusing to sell more than five gallons to any one person. To-day's quotations are on a basis of $2.20 to $2.21 per imperial gallon. The rate of exchange against Canada is a factor in boosting the price as the rate is now no less than ten cents per imperial gallon on turpentine. The rosin market is showing great strength and while stocks are at present ample to meet all demands prices are very firm. One large importer stated to HARDWARE AND METAL that there will be no more cheap turpentine or rosin this year. The quotations are as follows:

Turpentine—	Imp. gal.	
1 barrel (barrel included)	$2 20	$2 21
2 to 5 barrels (barrel included)	2 19	2 20
5 gallon lots	2 30	2 31

Linseed Oil Is A Little Easier

Toronto.

LINSEED OIL.—While linseed oil at present is slightly easier there is nothing to indicate that the market is settled. On the contrary the market is very sensitive and responds quickly to the various reports regarding crop conditions. The American Government's official report is due out to-morrow, and while the July estimates placed the crop of flaxseed at 13,500,000 bushels there seems every indication that this will be reduced

Let us Show You

how it pans out.

Our offer to you of the B-H Agency is a golden opportunity for the improvement of your business. From the day you accept this Agency you will observe a steady increase in the business coming your way. Just as a miner judges a "placer" stream by the amount of gold it leaves in the bottom of his pan, so you should judge the value of a Paint Agency by the amount of profit it leaves in your hands. If the Paint line you now represent does not seem to be "panning out" right, consider seriously a change to B-H—the value of which line you can safely estimate by the manner in which it has "panned out" for others.

We can tell you of merchant after merchant, who has found his business "made over" by the linking-up of his store to our splendid proposition.

Not only are the B-H Products of a quality calculated to attract the best trade of your community—but allied with that quality feature is a most remarkable degree of co-operation. We look upon our relationship with our Agents as a partnership arrangement—and we do all in our power to aid them in getting the maximum of gold out of the stream of business which the B-H proposition sets flowing their way.

If we are not represented in your locality, write us for particulars of our attractive agency proposition.

It is certain to pan out well for you

"Save the surface and you save all" *Paint & Varnish*

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG.
MEDICINE HAT CALGARY EDMONTON VANCOUVER

by unfavorable weather and drought. The Canadian crop estimate of 6,500,000 bushels is also considered high. Flaxseed for October deliveries advanced 7c at Winnipeg yesterday. This advance has not yet affected the linseed oil market. A very fair volume of business is being handled according to crushers. Quotations are as follows:

Linseed Oil—		Raw	
1 to 2 barrels, gal.	$3 22	$3 27
3 to 5 barrels, gal.	3 21	3 26
10 barrels and over	3 19	3 24
		Boiled	
1 to 2 barrels, gal.	3 25	3 30
3 to 5 barrels, gal.	3 24	3 29
10 barrels and over	3 22	3 27

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Prepared Paints Still Selling Well

Toronto

PREPARED PAINTS.—Manufacturers are still very busy handling repeat orders for prepared paints. The recent price advances have not in any way seriously affected the volume of sales, and orders have been coming in steadily. It is not expected that there will be any changes in price for some time.

White Lead in Oil Is in Brisk Demand

Toronto.

WHITE LEAD IN OIL.—Great activity prevails in white lead in oil owing to the probabilities that an advance in price will be made shortly. Up to the present quotations remain unchanged and are as follows: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Advance Expected in Window Glass Shortly

Toronto.

WINDOW GLASS, PUTTY.—Window glass prices will be advanced very shortly. The figures, it is stated, are now being worked out. Reports from the American factories indicate that the output will not likely be sufficient to take care of the volume of business that has developed and that glass may be scarce. As far as Canadian business is concerned orders are coming in steadily and increased activity is expected from now on as a result of natural conditions in the building trade. Putty prices are holding steadily, the quotations being as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 50

PLATE GLASS PRICE LIST REVISED

The executive committee of the National Association of Glass Distributors, at a recent meeting, approved suggestions that had been made for revisions in the present plate glass price list, and appointed a committee consisting of H. A. Wheeler, of the Standard Plate Glass Co.; R. W. Tucker, Building Supplies Corporation, Norfolk, Va.; and C. W. Condie, of the Condie-Bray Glass Co., of St. Louis, to arrange for publication of the new list. The changes which will be made will affect only sizes under 5 sq. ft., and will enable the jobber to quote one discount from the entire list instead of two discounts, as they are now doing. It is expected that the new list will be ready for distribution early in August.

EMPHASIZING A BARGAIN

A sign on a display of tools in the general store of Dixon Bros., Maple Creek, Sask., reads as follows:

65 Cents

"It's really not much of a price, but a great deal of a bargain."

SAYS MORE PAINT IS NEEDED

The Standard, St. John, N.B., discussing the need for more painting in the city, says:

"Some people have been arguing that now the war is over and the Prince of Wales coming, St. John should get busy and give itself a coat of paint, which on the whole it needs rather badly. A St. John manufacturer, who was in Toronto recently, met a former resident of this city, and about the first thing the exile did was to comment upon St. John's need of a coat of paint to cover up its shabbiness. H. L. McGowan said recently that there was little prospect of St. John being decorated with much paint in honor of the visit of the Prince. He added that the difficulty was that there was practically no paint oil in the city, and little prospects of getting any immediately. It was almost impossible to order supplies, and the price was prohibitive.

"A local dealer is said to be responsible for the story that the shortage is due to the fact that the Germans have bought up all the available supplies of paint oil. As it is only a few days since Great Britain has lifted the blockade it is difficult to see how the Germans could make sufficient purchases to affect the market, unless somebody has been trading with the enemy while it was still a serious offence to do so. It is probable that this story does not hold water."

IMPROVED ROADS IN CHINA

The use of motor cars has been made possible in Foochow, China, by the enterprise of the provincial officials, who have spent recently $280,000 in improving the roads, which has enhanced the value of land and caused the construction of modern buildings.

The suggestion has been made by prominent men in China that it would pay a combination of motor car companies to finance loans to the different provinces to be used only in road construction. The market for motor cars is strictly limited by the lack of good roads, and as the Chinese have shown a decided desire for motor cars whenever their use is possible, it seems probable that some co-operative plan would produce good results.

PUBLIC SERVICE OF RAILWAYS OF CANADA

The railways of Canada carried 50,737,294 passengers and 127,543,687 tons of freight in 1918, according to statistics compiled by the Department of Railways and Canals.

ELECTRIC RAILWAY EARNINGS

The gross earnings of electric railways in Canada during the fiscal year ended December 30, 1918, were $24,299,889.69, and their operating expenses $17,535,974.63. The rate of operating expenses to gross earnings was 72.16, as stated in the annual report of the Department of Railways and Canals.

JAPS UNSCRUPULOUS ABOUT STEALING TRADE MARKS

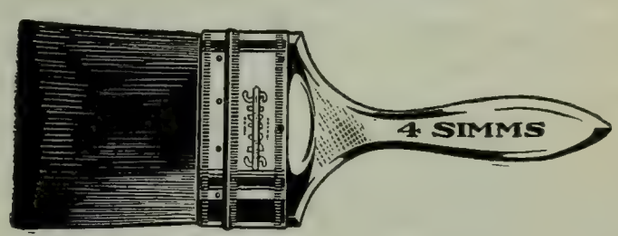
That the Japanese are using any and every means to extend their markets is shown by reports regarding razors, which are being offered to the trade in India. The razor is attractive in appearance and is also neatly made, finished, and cased. The quality of the steel, however, is poor and the blade is not calculated to cut well after using a short time. The blade is of full size and ground nearly full hollow, and bears the trade-mark of one of Sheffield's oldest and best-known cutlery firms, although it is marked "Made in Japan" on the reverse. The blade also appears to have been nickel-plated. At any rate all of it with which the grindstone has not been in contact, such as the back and the tang, has a nickel coating and looks very well. The vulcanite scales are pressed in a pretty design, having the words "Made in Japan," on a shield. A novel feature of the razor is that the blade locks on, being closed into the scales, and is not liable to open without the application of some little pressure. Whether this feature is the result of accident or design seems to be an open question, seeing that there is no mechanism to secure it. The end of the blade and the inset of celluloid between the ends of the scales are merely left rough, and this condition seems to effect the objects. An arrangement whereby a razor can be closed and kept closed when not wanted for use is an undoubted advantage, and the majority of the experts who have examined the specimen incline to the opinion it has been devised with that object in view. Merchants in India are offering the razor to the retailers at $5 per doz., so that the makers probably would not get more for it than about $2.50 per doz.

Canadian Products, Ltd., capital $10,000, head office Walkerville, Ont., plans to manufacture and deal in autos, auto trucks, tractors, farm machinery and implements.

Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.

TRADE SIMMS SET IN RUBBER MARK



This Set-in-Rubber is our own patented process. You can find no other Brushes anywhere so good. The bristles are set in forever — they are absolutely guaranteed **never** to come out.

Each Brush is a perfect tool for the painter—doing everything that a good paint brush should do—and then a little more.

Made in every shape and style by skilled workmen for use in skilled work.

Don't let your stock run low. Order a new supply **now.**

ASBESTOS PROTECTED METAL CO.—Corrugated Siding and Roofing.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

THE "CANNON OILER"

FORCES THE OIL ANYWHERE

Name Copyrighted.

Are you "On the Fence"?

TRADE PENBERTHY MARK

"The All-Quality Line"

HARDWARE MERCHANTS!

Let Us Have a Trial Order for

COMPODISK BRASS VALVES

"The Valve with the outside bonnet construction."

Registered and approved for 175 lbs. steam pressure.

A FAIR OFFER

In order that you may see just what you are getting for your money, we will send to any live wire hardware dealer in Canada on request a sample Compodisk Globe Valve for examination of quality and price. If you do not wish to pay for sample, return it and we will send you stamps to cover return charges. It doesn't cost you a cent to see the finest valve on the market.

We make this offer

because we want every dealer in the country to buy Penberthy Valves and we feel confident that when you have seen the sample and compared the price with what you are now paying for other makes, that you will always specify "Penberthy."

IF YOU SELL VALVES SEND FOR THAT SAMPLE TO-DAY!

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, are a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

WINNIPEG ∴ CALGARY

THE BIG MARKET
IS AT HAND

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge

The Eden dominates its market

Because its construction is time tested.

Because it has twenty-five inimitable and exclusive features.

Because it is nationally advertised.

Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Teach Them to

KYANIZE

Fall Housecleaning

In the fall cleaning there are many chances to *Kyanize*. Point out the need for Kyanize Enamels for refurbishing the shabby chairs, the bookshelf, etc. Enamel in the pantry and the bathroom to begin the winter clean. Floors, doors and hardwood trim need Kyanize Varnishes. Kyanize beautifies the home and makes the automobile a 1919 model. Reap the fall harvest.

Diamond "A" Ready-Mixed Paint is a fifty-fifty make up—50% lead and 50% zinc. Every can is guaranteed pure white lead and oxide of zinc (except shades not containing lead and zinc), pure coloring material, pure linseed oil, pure turpentine dryer. Sold subject to chemical analysis.

We will supply a strong line of advertising, for store and window dressing, for both Kyanize Varnishes and Diamond "A" Paint.

Advertising that's right will be sent to consumers in your district.

DON'T SPOIL YOUR LAWN MOWER "REP" JUST TOWARDS THE END OF THE SEASON

"EMPRESS" LAWNMOWER

If you are out of stock of the model and size lawn mower your customer wants in the Taylor-Forbes line, don't let him go away, and don't sell him something that is not going to give satisfaction.

Write or telephone us and we will arrange to make a double quick delivery.

Remember, there will be more lawn-mowers sold again next season and you want to begin that business with the good-will of prospective customers standing solidly for you.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

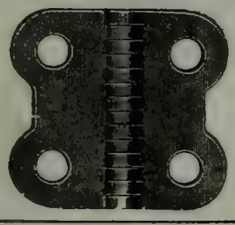
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TURPENTINE

in steel drums containing 46 gallons, NO LEAKAGE.

ORDER THROUGH YOUR WHOLESALER, OR WRITE US DIRECT



E. FIELDING & SON 9 Front Street E. **TORONTO**

Awnings Tents Flags Tarpaulins

We were optimistic for good business this year but trade has exceeded our expectations. Our many customers are participating in this good business by carrying our lines for immediate delivery. The season is on. Sort up your stock to be ready. Catalogue on request.

J. J. TURNER & SONS, LIMITED, PETERBOROUGH, ONTARIO

CHASE TROUBLE WITH CHASE BELT COUPLERS

Thousands of concerns are doing it. These concerns are too busy to be bothered with belt troubles—so they stick to belt couplers which couple belts right.
The Chase can be put on quickest, taken up easiest and sold with the most profit and satisfaction to all concerned.
Adaptable for every known make of traction belt and Guaranteed in a way that leaves no doubt where we stand should a customer ever have cause for complaint.

Send for Belt Coupler Booklet and Trade-prices.

"Houk" and "House" Wire Wheels

In the Van of Automotive Progress

Motorists everywhere are acclaiming the Wire Wheel, because of its superior lightness, strength, economy, facility and beauty. And, of course, "Houk" and "House" possess those exclusive features which have popularized the Wire Wheel idea.

LIGHTNESS—Requiring less motor power to propel, thus conserving gasoline.

STRENGTH—Since a weight of 3200 pounds can be borne by each spoke—and with "Houk" and "House" triple lacing there are scores of spokes—these Wire Wheels cannot collapse nor break.

ECONOMY—"Houk" and "House" Wire Wheels accomplish a tire-saving of from 25% to 40%. Throwing off the friction tire heat, instead of holding it as does the wooden felloe, they prolong tire life. Again, their many spokes distribute the car's weight evenly over the tire, eliminating the concentrated sledge-pounding inflicted by each of the twelve wooden spokes.

FACILITY—Extremely simple of adjustment. Merely unscrew hub cap, remove wheel, tire and all, and put on spare with tire already inflated. Replace the cap, which tightens as the wheel turns. Four or five minutes' work completes the whole operation. "Houk" and "House" Wire Wheels are exclusive in this respect.

BEAUTY—For that final note of grace and elegance that all true car-lovers desire, "Houk" and "House" Wire Wheels provide the requisite touch.

Being made by the Ajax Wire Wheel Corporation of America, the largest Wire Wheel makers in the world, parts and replacements or repairs for "Houk" and "House" Wire Wheels, although seldom necessary, can always be readily obtained. All the popular cars are being "Houk" or "House" equipped.

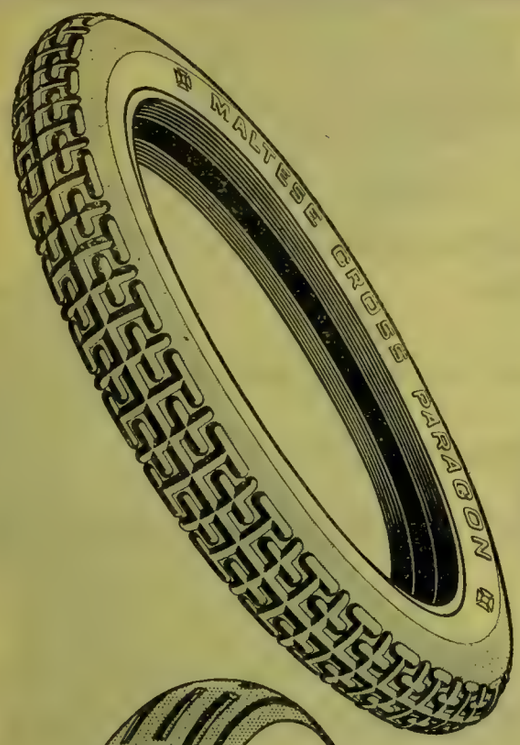
In North Star Dry Cells Your Customer Gets What He Pays For: ---Service!

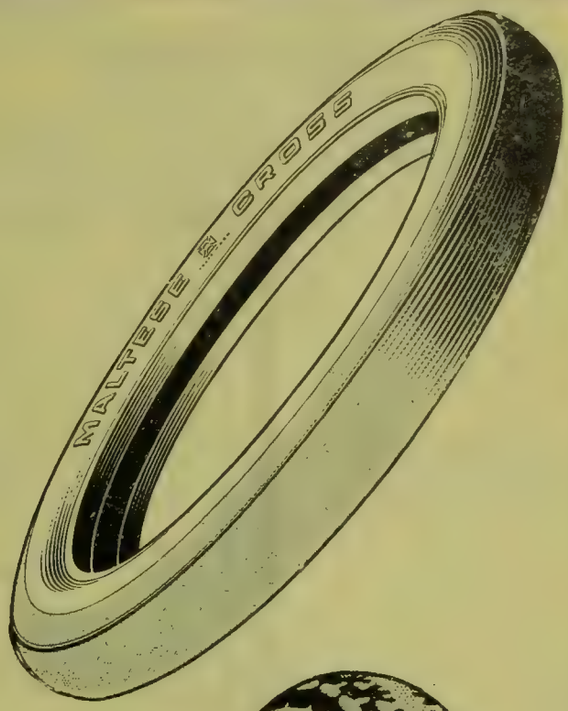
The element required in an ignition battery is length of life—service—it must do the work required or it must be cast aside to be replaced by a satisfactory—an **efficient** battery.

In North Star Dry Cells your customer gets a thoroughly efficient battery in every sense of the word.

He will always come back to you, because in selling North Stars, your customer always gets what he pays for—**service.**



The Western Battery for Western Need.



Order through your Jobber.

CROWN CYCLE & MOTOR CO.

319 Craig St. West, MONTREAL

LARGEST WHOLESALE MAIL ORDER HOUSE IN CANADA

Every Sale Brings—Repeat Sale—Profits

Show any customer how it works—right in your store—and the sale is made.

Then he becomes a steady customer of yours—for Patch-&-Heat units to use with this vulcanizer.

Dealers sold more than a million Shaler 5-Minute Vulcanizers last year—and over 11,557,000 Patch-&-Heat Units. This is repeat business—repeat profits —that comes to you **without effort.**

Every motorist should carry a Shaler 5-Minute Vulcanizer in his car for emergency use.

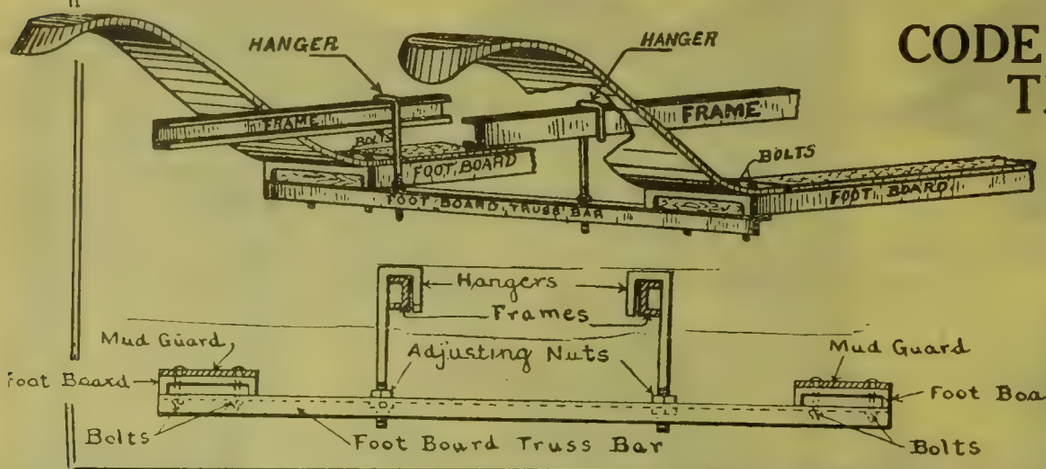
On the road—in the garage—or anywhere, it repairs tube punctures, cuts, etc., in 5 minutes—makes the tube as good as new, without delay—without trouble or annoyance.

Uses the combination Patch-&-Heat Units which include—the rubber patch —and the solid chemical fuel that burns without flame or blaze.

Our Big Advertising Campaign Makes It Easy to Sell

Just as you are now reading this ad, so Motorists read the dominant, attention-compelling Full Page Advertisements that are running throughout the entire season in Saturday Evening Post, Leslie's Weekly, Literary Digest, Colliers, Popular Mechanics, and other national magazines—all motorists' publications, and a large number of farm journals.

Get These Quick-Repeat Sales Profits



Order from your jobber now or write for full description and discount sheet if you are not familiar with this popular accessory.

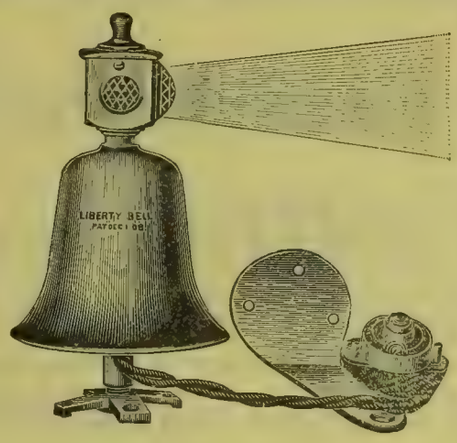
VERY little verbal argument is necessary to effect a sale in the case of

"SPHINX"

England's Most Durable Plug

Interest is at once created in the attractive green metal box with the ingenious sealing band permitting the lid to be opened and the identification card to be perused. The sterling merits of the plug enclosed are vouched for by the Guarantee, unequivocal and without time limit, printed plainly on the box.

It is easy to sell Sphinx Plugs—and profitable. I shall be pleased to quote and to send you literature on request.



Sole Agent for Dominion: Wm. T. Evans, 1684 St. Urbain St., Montreal

Manufacturers: Sphinx Mfg. Co., Birmingham, England

'SPHINX'

England's most Durable Plug

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS

BUT DOES NOT OFFEND

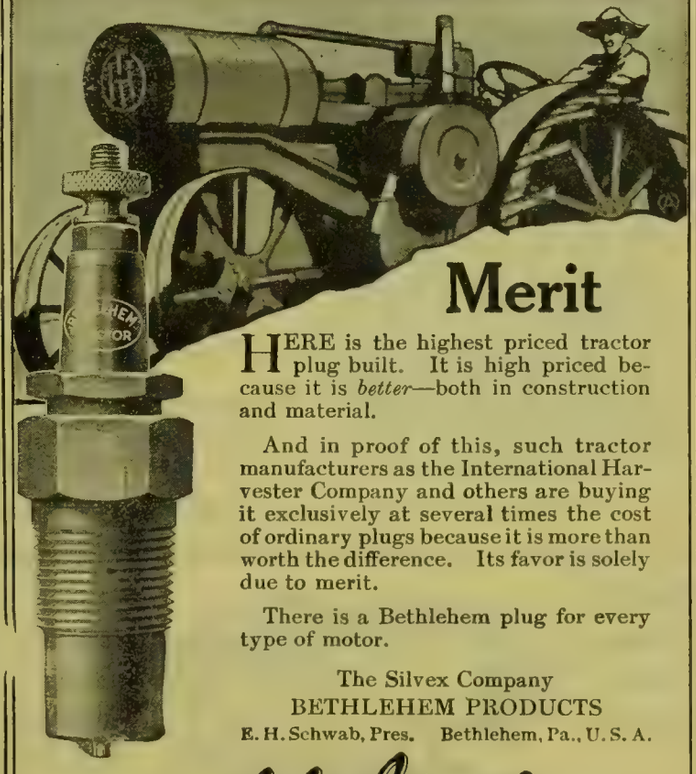
This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"

DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY



This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

THE BUNYAN MFG. CO.

9805 MADISON AVE. - CLEVELAND, OHIO

Merit

HERE is the highest priced tractor plug built. It is high priced because it is *better*—both in construction and material.

And in proof of this, such tractor manufacturers as the International Harvester Company and others are buying it exclusively at several times the cost of ordinary plugs because it is more than worth the difference. Its favor is solely due to merit.

There is a Bethlehem plug for every type of motor.

ANNUAL FALL DIRECTORY *and* SALES NUMBER

HARDWARE and METAL

ON or about the 23rd of August, in every year for the past 31 years, the hardware trade of Canada has received the Annual Fall Directory and Sales Number of HARDWARE AND METAL. This number is looked upon as a most essential part of the early fall stock in every wholesale hardware buyer's office, and in over 90% of the retail hardware stores from coast to coast. The issue is a real buyer's guide and directory number. Owing to its size and the great amount of practical and valuable information in the editorial and advertising pages, the number is read, re-read, and consulted many times during the fall and winter months. A cord is inserted in the upper left-hand corner, in order that hardware buyers can hang up their copy close beside their desk. The Canadian hardware trade in all its branches naturally expects to find in this number advertisements from manufacturers and wholesalers who desire to do business with the hardware trade.

One manufacturer of planes, etc., received a large order from his ad. in one of our fall numbers, exactly eleven months after the number was issued. This indicated the long life of an advertisement in a number of this kind.

Reservations made to date for the "Fall Number" make it quite apparent that this year's number—the first since the close of the war—will eclipse all previous records, and that it will be necessary to close all forms earlier than in previous years.

If you have not arranged for space in this number, drop us a line and we will gladly send complete details regarding circulation rates, etc.

The Secret of the Strikes

Most Canadians are asking "What is the cause of the 'Great Unrest' "? Is it the fault of labor—or of capital?—or is it the result of German propaganda? Do you know of the real reason for the labor disturbances in Canada, and elsewhere? Are YOU thoroughly familiar with the ins-and-outs of the plans which threaten a world-wide "tie-up?" This is something that should be understood by every Canadian. And every Canadian should read "The Secret of the Strikes," by Lieut.-Colonel J. B. Maclean in the August issue of MacLean's Magazine. It is brimful of startling and authoritative information regarding this great problem. Read it carefully. It starts on page 33, August MacLean's.

"The Lecturer At Large"

Stephen Leacock is one of the continent's greatest humorists. "The Lecturer at Large" is one of the best humorous sketches that he has written. It is made up of what he terms "a few painful reminiscences of the platform" in the course of his lecturing up and down Canada. Get your family around you and read the sketch aloud—it's a rare treat.

Other Big Features

"A Party in the Making." By J. K. Munro. Illustrated by William Casey. An article on the political situation, giving a great deal of inside information with reference to recent developments at Ottawa.

"Solving the Problem of the Arctic." By Vilhjalmur Stefansson. The fifth instalment of his story of the five years' explorations that he conducted for the Dominion of Canada.

"The Unspoiled Country." By Harold C. Lowrey. A descriptive article of a part of Canada which is little known to Canadians generally, Temagami.

"Petite Simunde." By Arthur Beverley Baxter. Illustrated by E. J. Dinsmore. A charming romance of the war. The author will be remembered favorably for his "Mr. Craighouse of New York, Satirist."

"The Seven Blue Doves." By W. A. Fraser. Illustrated by Charles L. Wrenn. The fifth of the Bulldog Carney series and in some respects the best. It is a mystery story.

"His Majesty's Well-Beloved." By Baroness Orczy. Illustrated by C. F. Peters. The second instalment of this splendid romantic novel of the colorful era of Charles II.

The Month's Vital Question

Turn to page 34, August MACLEAN'S, and you will find timely and interesting information regarding the High Cost of Living—a problem of large proportions.

The Review of Reviews

Here are a few of the articles chosen as the best published during the past month in all magazines:—Britain Winning Supremacy of the Air; Has Japan Two Governments?; Kaiser Employed Famous Beauties; The New Triple Alliance; Mammoth Animals in Alberta.

Over 70,000 Canadian Families Buy

HAVE YOU FIGURED IT OUT IN THIS WAY?

A salesman running to and from a cash office or register fifty times in a day requires, in the average, say, fifteen seconds each way. Detention at office for change making, thirty seconds, or sixty seconds for change of each sale, making thus fifty minutes lost time for each salesman. Had you our Cash Carriers, this time, needlessly consumed, could be devoted to further the sale of goods, or to the performance of other duties highly necessary at busy periods when the services of your selling staff is most valuable.

Do not forget to write for that circular which explains all.

LUFKIN SPRING JOINT WOOD RULES

Made in Canada

THE LINE YOU SHOULD CARRY
EXCELLENT ASSORTMENT

ASK YOUR JOBBER
PROMPT SERVICE

Flexible, tough sections, with brass-plated joints smooth-working yet firm and hold the rules up properly to their work.

FOLDING END HOOK ATTACHMENT

This is an improved and exclusive feature supplied on any of LUFKIN Spring Joint Rules at a fraction of additional cost. Just the thing for taking measurements out of arm's reach. Handy for any work.

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

This Iron and Toaster "Coast-to-Coast" Consumer Campaign is for *your* benefit

Thirty leading papers with a combined circulation of more than a million copies is now carrying the message of these Highest Grade Irons and Toasters into Canadian homes.

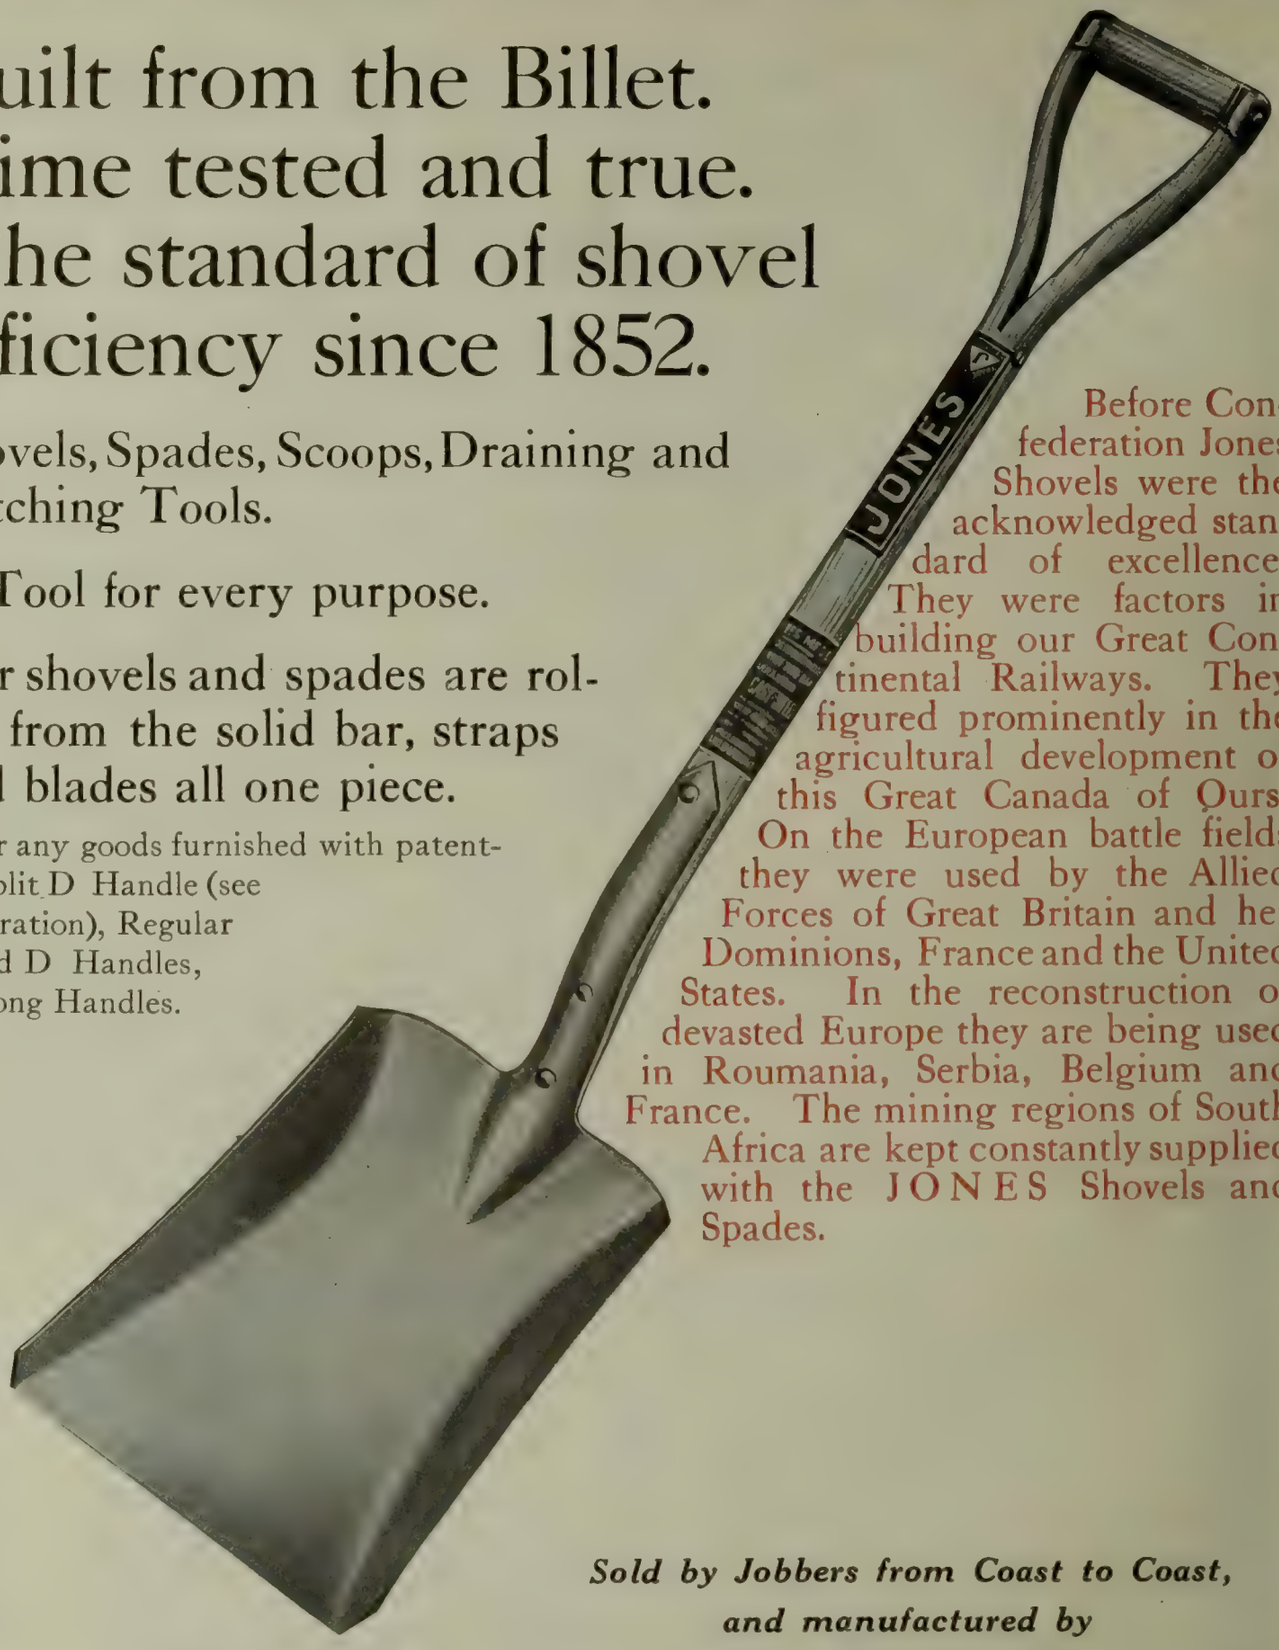
Here is your opportunity to get your share of the business which this National advertising will create.

You make a nice profit on each sale—the goods are made in Canada and cannot be matched for mechanical excellence, beautiful finish and quality of materials. No finer or more reliable Heating Appliances were ever placed on the Canadian market.

Northern Electric Company

LIMITED

Montreal	Ottawa	London	Regina	Edmonton
Halifax	Toronto	Winnipeg	Calgary	Vancouver



Built from the Billet. Time tested and true. The standard of shovel efficiency since 1852.

Shovels, Spades, Scoops, Draining and Ditching Tools.

A Tool for every purpose.

Our shovels and spades are rolled from the solid bar, straps and blades all one piece.

All or any goods furnished with patented Split D Handle (see illustration), Regular Wood D Handles, or Long Handles.

Before Confederation Jones Shovels were the acknowledged standard of excellence. They were factors in building our Great Continental Railways. They figured prominently in the agricultural development of this Great Canada of Ours. On the European battle fields they were used by the Allied Forces of Great Britain and her Dominions, France and the United States. In the reconstruction of devasted Europe they are being used in Roumania, Serbia, Belgium and France. The mining regions of South Africa are kept constantly supplied with the JONES Shovels and Spades.

Sold by Jobbers from Coast to Coast, and manufactured by

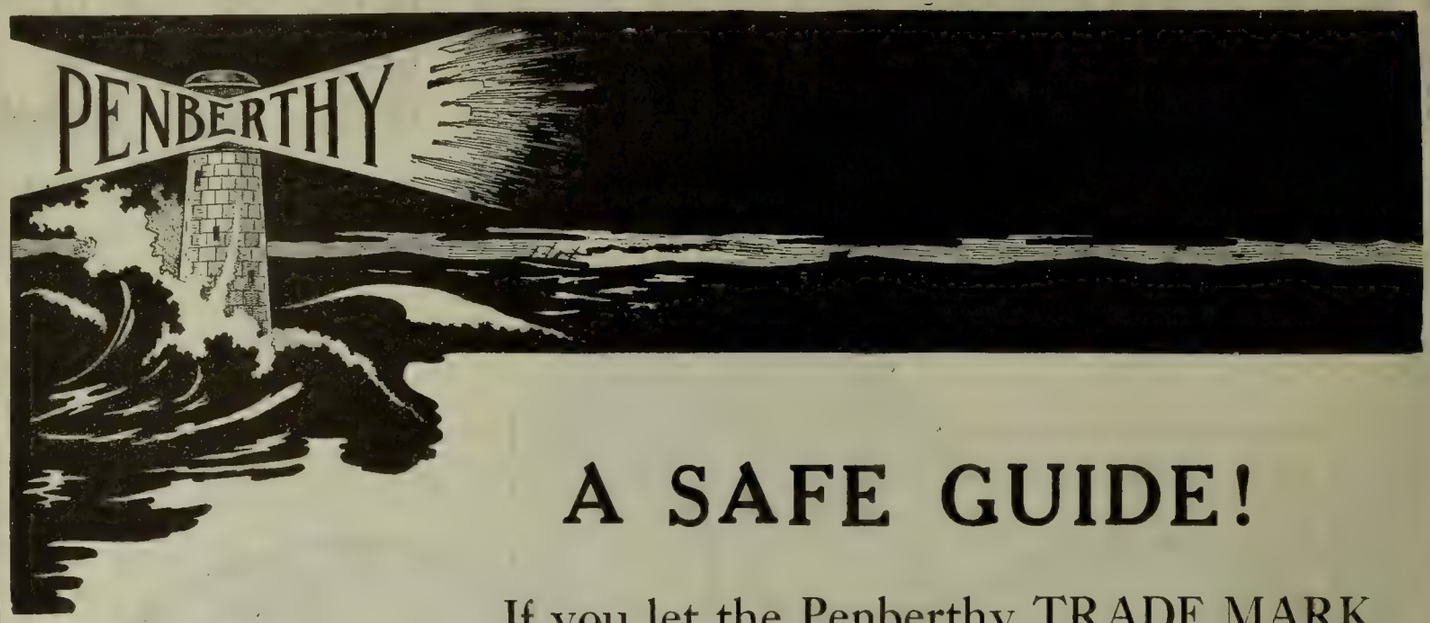
A Few Reasons Why It Pays to Sell the Penn Razor

GOOD PROFITS—The Penn Razor is merchandized in a way that insures a satisfactory profit to you on every sale.

ADVERTISING—The Penn Razor is backed by a substantial advertizing campaign in publications whose influence you are sure to feel.

THE PREMIUM PLAN—Every retail sale of Penn merchandise brings a substantial reward to the person making the sale.



A SELLING PLAN THAT BRINGS RESULTS—Our 30-day free trial offer is the most successful means ever devised of putting a Razor into the consumer's hands and clinching a sale. And you are thoroughly protected on it.

$5 to $10

A SAFE GUIDE!

If you let the Penberthy TRADE MARK guide you in your valve buying, you will have clear sailing every day in the year.

All Penberthy Valves have the outside bonnet construction.

WHAT THAT MEANS TO THE USER.

When the bonnet of a Penberthy Valve is screwed down tight there is no danger of spreading or enlarging the bonnet end of the valve body which may cause a loose fitting, and consequently an unsafe bonnet because the Penberthy bonnet fastens to the body by outside threads. It's a union connection, so to speak, and is the safest, strongest and most efficient improvement ever made in valve construction.

ON YOUR NEXT ORDER FOR VALVES

tell your jobber you want "Penberthy." In design, quality, workmanship and finish the line is far superior to any other type on the market, and the prices are reasonable.

A Satisfied Customer will always come back.

Penberthy Injector Co., Limited

TRADE MARK

A Mark to Remember

Whenever you see the Diamond Trade Mark around the letters "W & B" stamped on the tool you are using, you should have the confidence that you are working with the best that can be made.

For sixty-five years we have known that "W & B" Twist Drills and Reamers, Wrenches and Hammers were the best that could be made. Our idea is

"Make it better than anybody else can make it, put your name on it, and stand by it."

You should benefit from our policy, and the best way is to remember the "W & B" trade mark. We put it there and stand by it. Once you know it, you will always know what it means.

BARCALO

"S" WRENCH

Durability

Wrenches, like Friends, may come and go but the *good wrench,* like the *true friend,* ever holds a high place in the esteem of the mechanic.

The *durability* of the *Barcalo "S" Wrench* is its assurance of a *permanent place* in every *Mechanic's Tool Kit.* It can be so surely relied upon to *"carry on"* long after other wrenches have been assigned to the scrap-heap. It performs an uncommon service for the machinist, mechanic and garage man by working in tight places so hard to get at.

Yes—it does more and *lasts longer* than other wrenches.

Made in 6, 8, 10, 12 and 14" sizes and backed by *our unusual guarantee* of replacing without question any unsatisfactory wrench.

Write us for catalogue, prices and details of our splendid proposition, whereby you make greater profits.

Barcalo Manufacturing Company, Buffalo, New York

WINNIPEG—D. PHILIP

Which Separator Did John Johnson Buy?

Suppose you were Farmer John Johnson and you wanted to buy a separator. You asked several separator manufacturers to send you a ten-word telegram stating in the most convincing way, why their separator was the one you should buy. Sharples would only need **five** words: "Skims clean at any speed," and you would not have to ask for anything further.

No other separator manufacturer could put into five words or **fifty** words, as convincing an argument as "Skims clean at any speed." They would tell you about the durability of their separator, that it was well known, that it cost less and everything else **but** the **one** big reason why you need a separator—to get **all** the butterfat out of your milk. Sharples also has the exclusive advantage of no discs in the bowl; knee-low tank; once a month oiling system; durable construction and besides, it is the pioneer North American Separator.

AND FOR THE SAME REASONS DEALERS SHOULD

look closely into the matter of their Separator Contract. Will the separator you are now handling stand the telegram tests? If you are fortunate enough to be a Sharples Dealer, you have the answer. If not, you are going against the tide. Hundreds of thousands of times each month the words "Sharples Skims Clean at Any Speed" are being put into the minds of American dairymen through Sharples National Advertising. Why not put this **positive** selling force at work in your territory for you? Write nearest branch.

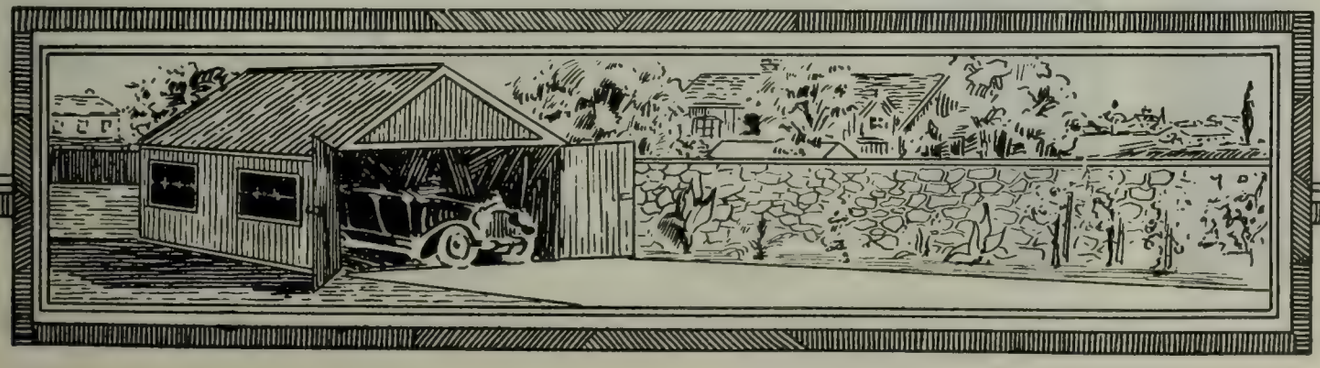
National Garage Sets



The No. 805 Garage Door Set opens at a push and closes at a pull—both light ones. Saves space because doors are hung inside and fold against the inner wall. Adjustable for settling walls or swelling floor. The price is right, and satisfied customers continually bring more sales.

Set No. 805 includes—No. 29 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair 4 x 4 inch Jap. No. 505 T.P. Butts; 1 only No. 820 Chain Bolt; 1 only, No. 830 Foot Bolt; 1 only No. 5 Pull; 1 only 4½-inch No. 30 Safety Hasp. All bolts and screws packed in the "Unusual National Way," Japan finished.

If you are not already handling National Goods there is much in store for you. As a business man you are willing to hear a proposition that claims to benefit you. Send us a postcard to-day that we may show you conclusively that handling National Products will bring profits and business to you.

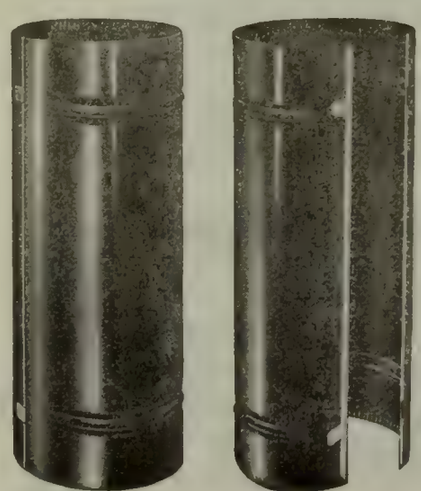
National Mfg. Co., Sterling, Ill.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.



The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

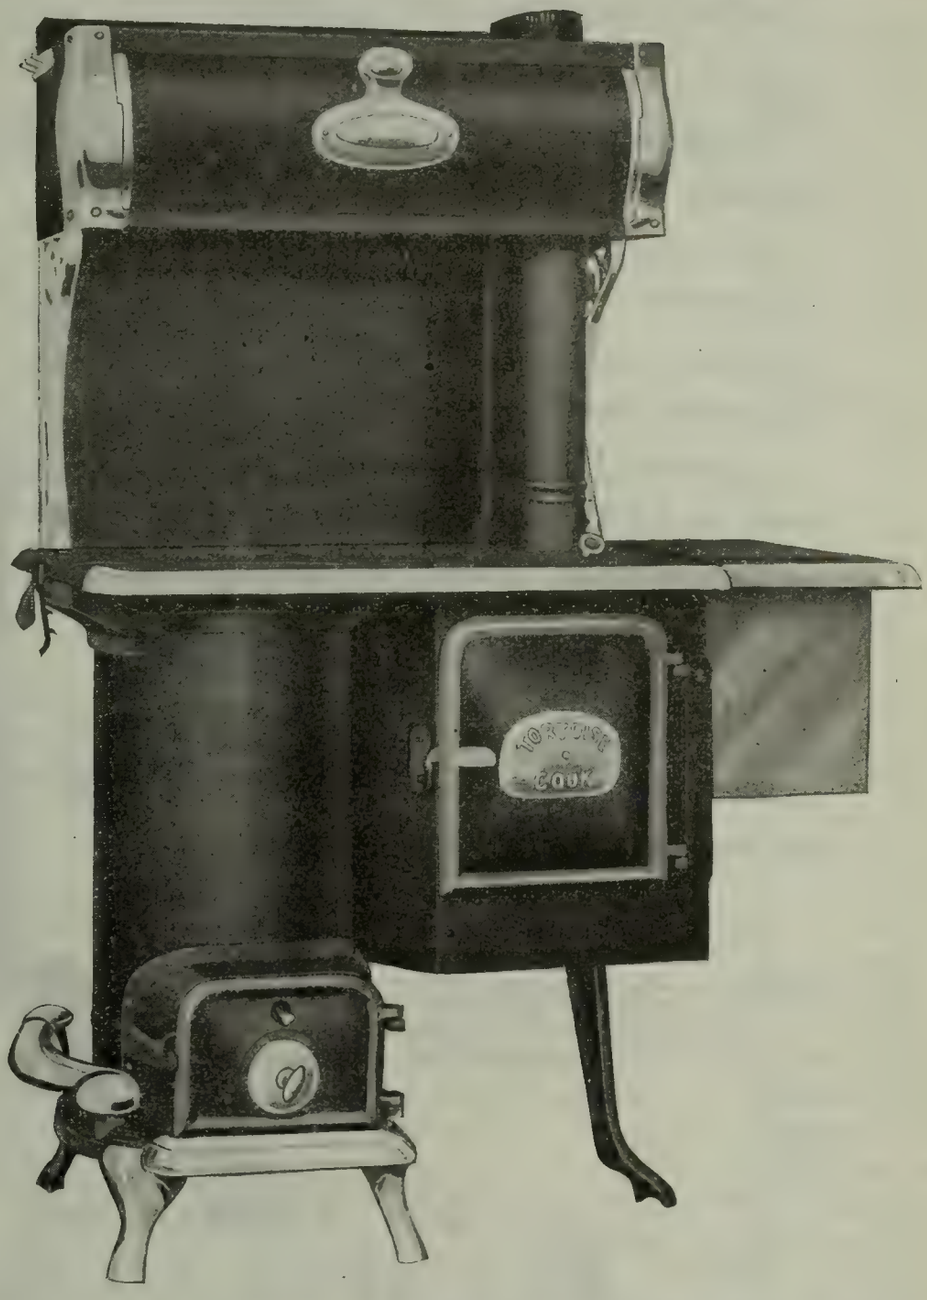
Findlay's Tortoise Cook---A Combination Cooking and Heating Stove With All the Conveniences of a Modern Range



SOMETHING NEW *PRACTICAL* *ECONOMICAL* *SERVICEABLE*

The Tortoise is a wonderful water heater; ample capacity for a 30 or 40-gal. boiler.

The oven on the No. 4-26 measures 12 in. wide, 11 in. high and 18 in. deep. The oven on the No. 4-24 measures 10½ in. wide, 11 in. high and 18 in. deep.

Two stoves in one; as good a heater as the most expensive base burner, as perfect a baking and cooking stove as the highest priced range. This stove is not a freak nor an experiment, but a sensible, practical Combination Heating and Cooking Stove.

The Tortoise Cook has an ample sized top with four cooking holes; made with or without grates. The bodies are made of polished steel and brick lined. The reservoir on this stove is made of copper or galvanized iron, as desired, capacity—5 Imperial Gallons.

This stove will be on exhibit along with our other lines at the Toronto and Ottawa Fairs.

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

THERE ARE MATCHES
and E-D-D-Y'S MATCHES
WHICH DO YOU SELL ?

There's just as much difference between Matches as between people.
Some you can always rely upon.
Others are never dependable.
Eddy's Matches are like old friends.
They'll never go back on you (Never **come** back on the dealer either.)
70,000,000 of them go out daily to lend a hand in keeping things going throughout the land.
Quick turnover is the ideal of every merchant.
You need never worry about Eddy's Matches. Known from Coast to Coast, they sell themselves. Better send in your order to-day.

THE PAIL THAT PROTECTS

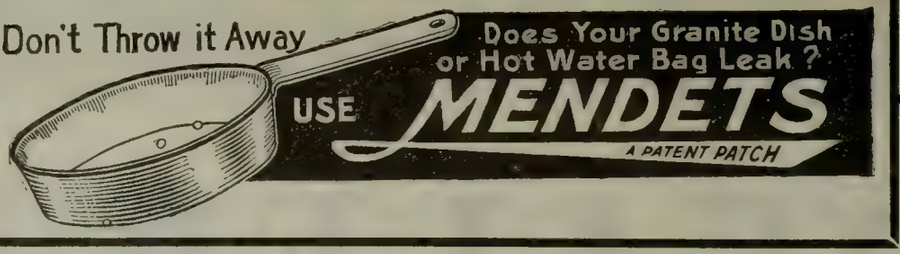
If you're looking for REAL fire protection, no need to go further.
The EDDY FIRE PAIL is what you want.
Made of our justly famous Indurated Fibreware, it's moulded in one piece. No hoops nor wires.
No leaking nor shrinking.
Always ready. Always right.
Made by

The E. B. Eddy Co., Limited - Hull, Canada

DEALERS!

You are cordially invited to visit us when attending the Exhibition. Our booth in the Transportation Building will be open from 9 a.m. to 10 p.m. Make it your headquarters while at the Fair. See the cross-sections of the famous

Maltese Cross Tires



Maltese Cross Inner Tubes

Take special notice of the thickness and elasticity of our tubes. This means longer life and fewer leaks. You will see how satisfactory Maltese Cross Tires are, and will realize the value of selling them in preference to any other.

Gutta Percha & Rubber, Limited

Head Offices and Factory, Toronto

4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

The Signal of Distinction
An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS

BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

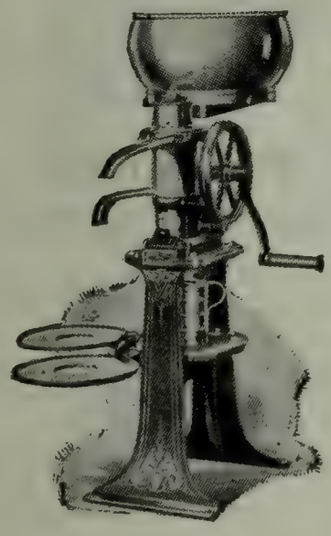
"LIBERTY BELL"

DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.



A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

Conditions Favor Man. Convention

R.M.A. Gathering at Brandon Opens Under Most Auspicious Conditions—Financial Statement Shows Satisfactory Position—Some Interesting Addresses Were Given

BRANDON, Man., Aug. 13—Special correspondence—A three day programme, filled to the utmost time limit with practical addresses, discussions and entertainment, featured the fifth annual convention of the Manitoba Board of the Retail Merchants' Association of Canada, which opened at Brandon, on Wednesday, August 13. With a bounteous crop in all parts of the Province, in marked contrast to other portions of the West, the merchants were in a position to seek recreation for a brief period, and large numbers of them rolled into Brandon in their cars over roads that were in excellent condition. With an organizer constantly in the field, the Manitoba association, which only found its birth in 1913, embraces the merchants in most Manitoba towns.

A series of inspiring addresses were given by two retail merchants from the Western United States, Messrs. Robert C. Line, of Columbus, Montana, and F. P. Mann, of Devil's Lake, N.D. The latter conducts a $300,000 business in a town of 1,500. On Wednesday evening he gave an address on "Increasing your business through community co-operation," and the following evening took as his subject, "Looking ahead in the retail business."

Other speakers on the programme were as follows:

Messrs. Edwin Loftus, K.C., prominent Winnipeg barrister, Lecturer for the Manitoba Law school; A. W. Gibb, C. A., Assistant Inspector of Taxation for the Dominion Government; F. C. Middleton, Secretary of the Community organization of the Social Service Council of Manitoba; Wm. Iverach, of Isabella, Man.; W. J. Keyes, Manager of the Advertising Department of the Kelvin Technical High School; J. A. Banfield, President of the

Manitoba R.M.A. President Denies Charge of Retail Profiteering

BRANDON, Man., Aug. 13 (Special)—Strong denial of published statements of Government officials accusing the retail merchants of profiteering, features the presidential address of George Markle, head of the Manitoba Board of the Retail Merchants' Association to-day, before the Fifth Annual Convention of that body.

Mr. Markle flatly denied that retail merchants, as a body, were getting an unfair margin of profit and said that retail merchants as a whole had not profiteered. He showed that comparatively recent Government investigations had proven that no unfair margin of profit was secured by the retailers. Following this, Mr. Markle warmly endorsed the creation of the new Board of Commerce to regulate trading and prevent practices inimical to sound business.

He attributed high prices of everything to the past five years of world-wide destruction and lack of production, and held that the Governmental economic machinery for war conditions, such as embargoes and restrictions, should not be discarded until conditions arising out of the war had largely disappeared.

Merchants, he says, by helping the farmers along the same lines as during the war, by helping with the crops and lessening labor shortage problems, could aid in reducing the cost of living, because they would then be aiding in production.

The revolutionary movement among a certain element in the country, he said, had added to the cost of living, causing destruction of large quantities of foodstuffs. One element tending to that destruction was the lack of cold storage facilities at country points. Proper storage in smaller towns, he held, would be of great benefit in preserving food from destruction and would reduce the cost of living by ensuring a stable continuity of supplies of food commodities. This could be furthered by the municipalities taking steps toward establishing cold storage plants or it could be done upon a co-operative plan.

Dominion Board of the Retail Merchants' Association, and Dr. J. A. MacLean, President of the University of Manitoba.

The convention was opened at 2 o'clock Wednesday afternoon by President Geo. W. Markle, following which addresses of welcome were given by Mayor McDiarmid, Howard Rankin, president of the Board of Trade; F. W. Hobson, president of the Kiwanis Club, and E. Bolton, president of the Brandon branch of the Retail Merchants' Association.

The financial report for the year ending March 31 was presented by J. H. Curle, secretary as follows:

RECEIPTS

Cash on hand and in bank April 1st, 1918.		$ 504.88
Membership Fees—City..	$4,686.87	
Do., Country	3,809.79	
	$8,496.66

		8,315.82
Cash on hand and in bank March 31, 1919		1,209.52
		$9,525.34

The afternoon session was closed by brief reports from Messrs. Horace Chevrier, C. F. Rannard, and W. T. Devlin, who were delegates to the Dominion Convention, and an address by J. A. Banfield, president of the Dominion Board. The addresses of the United States merchants occupied the evening session.

On Thursday morning C. F. Rannard explained the operation and progress of the Mutual Fire Insurance Company, and William Iverach of Isabella, Man., delivered an address on Provincial taxation.

On Thursday afternoon the two United States speakers were heard again followed by a detailed address by W. A. Gibb, C. A., assistant inspector of Dominion taxation on "How to make out an income tax return."

Features of the Friday programme were delivered by W. J. Keyes, on "Practical Advertising," and by Edwin Loftus, K.C., on "Commercial law as related to the retailer." This was followed by the election of Provincial officers, and a motor drive to places of interest in the city.

The crowning event of the gathering was the banquet on Friday evening given by the local retailers and associated clubs, and at which special addresses were given by Dr. J. A. McLean, president of the University of Manitoba, and the convention speakers. The convention took place in the City Hall. Owing to the strike and to the fact that the Brandon fair had just been concluded it was deemed unwise to conduct a proposed merchandise display in the City Hall. The window dressing competition was also called off.

The City Hall, Brandon, Man., where the Manitoba Retail Merchants' Association is being held.

Half-a-Million Business in 5,000 Town

One of the most impressive addresses given this week at the Brandon convention of the Manitoba Retail Merchannts' Association was that of Fred P. Mann, president of the North Dakota Retail Merchants' Association, and the proprietor of the Mann Departmental Store at Devil's Lake, North Dakota, which last year did a business of half a million dollars in a town of 5,500 population. He described in detail the methods that have won such remarkable success.

When we opened our new store eleven years ago, he said, and equipped it with the finest fixtures that our section had ever seen, there were those in the community who said, "Too bad about Mann's. Here they build up a nice business in a country town and then they put up a store that's too fine. All the farmers will be uncomfortable among the mahogany and glass showcases; and they'll be afraid to track mud in on the nice green carpets. Too bad, too bad. Now they'll lose all their trade."

But we disappointed the folks. Within two years we had to buy the store next door to accommodate one of our six departments. Now we own a big lot that adjoins us at the rear—the war intervened to stop our building another addition there. As it is, we are crowded to the point of discomfort and are continually readjusting our shelves and counters to take better advantage of our limited space.

In 1918 we did a business a little over $500,000 in our town of 5,500 people. That would mean sales of almost $100 for each inhabitant, if our customers were confined to our city; it would mean $33 an inhabitant for the 15,000 people of our county, which extends 30 miles to the north-west of us. Actually, however, some of our customers come from a distance of 90 miles north and west, and 50 miles south and east. We are mighty proud that we are able to pull business out of the trade territory of larger cities around us.

We have the people of our territory with us, too. Every day, almost, we encounter something or other which shows us that a big proportion of our country neighbors think of our store as almost synonymous with shopping in Devils Lake.

The big reason that we have steadily built up our store in the face of local competition, and the even stronger mail-order competition which is putting so many country merchants in the business-death-rate reports, is that we use aggressive sales and business-getting methods. We are not content to sit by and take what comes our way. We go after prospects and customers in an intensive way that the mail-order house, several hundred miles away, with all its carefully thought-out methods, cannot equal. We are using many of the mail-order houses' methods, and are beating them at their own game.

Getting a Serviceable Mailing List

Our mailing list we get from a number of sources. The tax list in our county is classified by townships. We use it just that way. If the roads are in bad shape in the north-east corner of the county, we know the farmers there cannot get to town; so we save our postage rather than ask them to come. Automobile owners are also listed by the county assessor. We know that an automobile owner 25 miles away, in a township not reached by a railroad, is a good prospect when his next-door neighbor, who drives only a horse and buggy, would not be.

The telephone directory gives us somewhere near a complete list of householders, although it fails to indicate the value of the names. School teachers are good prospects; their names we get from the superintendent of schools. The men who have returned from national service form one of our new and high-grade lists.

We watch the personal columns of all the newspapers in our territory, both for new names and for list corrections. We arrange with any manufacturers or wholesalers who mail our lists to pass on to us all returned envelopes.

Continuing, Mr. Mann outlined the store's methods of advertising and of handling customers.

Some Hints on Advertising.

In regard to advertising, he said: "A lot depends on appearance. We do not rely entirely on the printer to display our copy to the best typographical advantage. That is where a lot of money is wasted, we feel, by many merchants. The printer of a country paper is not likely to be an expert on advertising display.

copy, and make him see that it is necessary that he become a real live advertising merchant. I urge these matters upon you forcibly because I have tried them out and I am thoroughly convinced that newspaper advertising is the greatest asset that the country merchant can have. There is no method today that will so promote a man's business as good advertising. You simply cannot do without it and be alive to your possibilities.

"You as merchants must have proper merchandising methods, for how do you think it looks to a credit customer when a merchant gives 10 per cent. off for cash? Mr. Credit Customer takes his bill at the end of the month, compares it with the mail order catalogue, and of course, if the merchant can afford to give 10 per cent. off for cash the credit bill looks like highway robbery in comparison with the mail order prices.

"As an illustration of the vast mail order business, let me tell you what a friend of mine who is now in the mail order business told me only a few days ago. He is supplying state institutions and hotels with coffee. He told me of various orders he had taken that should have gone to the local merchants. He also told me of one grocery salesman whose commissions in one month amounted to $1,330. So you can imagine the amount of groceries he must have sold to net himself that commission. This gentleman gave it as his best judgment that 65 per cent. of the coffee used in the State of North Dakota is sold by mail order houses and by solicitors for outside concerns. You are no doubt up against the same conditions here.

"The merchant must seek methods and eas of improving their advertising. Here an ad. which we used at our Devils Lake for our silk sale which we hold an- to show you that this advertis- our sales checked for the le and they showed $1,100 epartment alone with a l departments for that the sales in the dry wed $1,300 and the en- this sale we not only space, but we likewise nal letters to our cus- displayed our silks up and down the centre of the store, allowing them to be draped over where they could be examined by the women, and placed a price tag on each lot of silk. Thus we tied up our local advertising and our display of goods, which led directly up to the sale of the article. This is a very important fact for every merchant to remember, that his advertising and his displays and his sales manship must all make one connected link.

"As an illustration that the manufacturers and jobbers are taking up with the idea which I am placing before you, I want to cite the case of Stone-Ordean-Wells in our country, who discontinued the publication of their house organ, 'Ginger,' which was costing them $25,000 annually, and they are spending this money in advertising helps for the local retailer. Many other wholesalers are following in the footsteps of Stone-Ordean-Wells, and it is only a question of a very short time until every manufacturer and jobber will be spending a great deal of money to complete the sale of their goods and place them in the hands of the customer.

"Bradstreet and Dun tell us that in the United States 84 per cent. of all business failures in 1918 were non-advertisers, and that 86 per cent. of all business failures were from lack of knowledge of how to conduct the business.

"Can you gentlemen imagine what will happen to the mail order business if all the jobbers and manufacturers, and the traveling salesmen and all the retail merchants in Manitoba co-operate together to conduct their business along modern advertising lines?"

In conclusion, Mr. Mann said: "You know where you stand on this proposition in the Province of Manitoba. There is just one way that you can vindicate yourself, and that is to get out and raise the standard of merchandising so high in this province that the mail order houses cannot go us one better, and in fact, cannot compete with the local retail merchant."

The convention was still in progress at the time of going to press. A full report, however, will appear in next week's issue.

n reading the submissions filed on be-
f of the said railway companies, the
anadian Manufacturers' Association, the Boards of Trade of Toronto and Montreal, Dominion Canners, Ltd., and others, and upon the report and recommendation of the Chief Traffic Officer of the Board, it is ordered:

1. That within the territory covered by the order of the Board No. 3258, dated July 6th, 1907, as amended, in what is known as the International Rates Case, and in conformity with the relevant provisions thereof, also with the station groupings of the respective companies as shown in their tariffs between points west of Toronto on the one hand and points east of Toronto on the other, joint tariffs of class rates be compiled to apply between stations on the Canadian Pacific and Grand Trunk Railways, the Canadian Pacific and Canadian National Railways, and the Grand Trunk and Canadian National Railways, respectively, on the basis of the so-called schedule "A" scale, with the addition of the following figures to be incorporated in the rates themselves:

Class	1	2	3	4	5	6	7	8	9	10
Cents per 100 lbs..	8	7	6	4	2½	2½	2½	2½	2½	2½

the rates so compiled to include the service of transfer from the one company to the other; subject, however, to a minimum joint charge of 100 pounds at the first-class rate, but not less than 75 cents.

2. That the joint class freight tariffs carrying out the requirements of this order be published and filed, so as to become effective not later than October 1st, 1919.

3. That the following be made the points of interchanfe of interline freight traffic between the said companies under the terms of this order:

Lennoxville, Montreal, Ottawa, Brockville, Peterborough, Toronto, London, Mount Forest, Orillia, North Bay, Actonvale, Ste. Rosalie, Renfrew, Kingston, Milton, Guelph, Woodstock, Tillsonburg, Inglewood and Essa (Utopia).

(Sgd.) H. L. DRAYTON,
Chief Commissioner,
Board of Railway Commissioners for Canada

Suspects He is Display

If Any Hardware Dealer in Canada Has More Goods Shown i lantyne, of Brantford, Ont., Wants to Know Who It is Boost Sales is to Let People See Your S

ALEX. BALLANTYNE, proprietor of Ballantyne's Hardware, Brantford, Ont., suspects that he is entitled to the championship of Canada when it comes to display. He does not claim the title directly, but in his own words: "If there is another hardware store in Canada where more stock is displayed in the same space, I want to know where it is."

It appears that there may be considerable truth in Mr. Ballantyne's claim. It is difficult to imagine how he can display any more goods. Every direction you turn in the store a display of some kind meets you, in fact very often there are displays within displays. For instance, Mr. Ballantyne has utilized every pillar in the store, and there are a number of them, to build display shelves around. There will be a pyramid of three or four shelves, on each of which are set out enamelware, aluminum goods or some other line. Not satisfied with this, Mr. Ballantyne has hooks screwed into the edges of the shelves, and from these hang other goods, and the way he has them arranged they do not either spoil the shelf displays or prevent them from being seen.

Another Display Plan

Another display plan that is not often all. Besides a number of display tables seen in stores is to make display stands out of the radiators. The radiators are built up about two feet above the flooring, and the tops make stands, on which quite a lot of goods can be displayed.

There are so many displays in the store that it is hard to enumerate them of various sizes and shapes there are counter displays, display stands, silent salesmen, wall display cabinets, wall displays, racks for fly screens, racks for screen doors, racks for forks and garden tools, floor displays of seasonable lines, brush displays, and last but by no means least, two large and well-arranged display windows.

Can't Get Too Much

"You simply cannot get too much display," said Mr. Ballantyne to HARDWARE AND METAL. "We not only try to keep our stock out where people can see it, but we keep it moved around continually. Our display tables a shifted and changed, seasonable lines kept on display in conspicuous our windows are dressed There is no better wa turning over than to in this way. Time that people who com something that they forgotten if they h of our tables or

things. We want them to feel that they are under no obligation of any kind to buy if they use the store, and that we are glad to see them. The young people are as welcome as the old. We always keep in mind that the boys and girls of to-day are the men and women who will be doing the buying to-morrow. Our country trade is steadily growing. There are some sections in the townships where every farmer and his family trades at our store. They appreciate the spirit in which we meet them and one tells another.

Service Appreciated

"They know that we are always ready to be of service to them. If a farmer is planning to paint the barn or his wife is planning to touch up some of the furniture, they know that if they come in and ask us we will be only too glad, not only to tell them all about the best paint and the best brushes to use, but give them directions for preparing the work, number of coats to put on, finishing it, and so on. Help of this kind is always appreciated, and because they have found out that by using our paints and following the directions they get satisfactory results, they not only come back when they have another painting job, but they tell their friends, in fact very often they bring their friends in with them and tell us they want the same kind of paint we sold them. This is perhaps one reason why our paint sales are steadily growing every year."

Right Up At Front

Paints and varnishes are one of Mr. Ballantyne's big sellers. He has his paint department right up at the front of the store. It is kept clean and attractive and makes a fine showing. Frequently he gives up both windows for display in this line, one being filled with brushes and the other with paints, stains and varnishes.

"I think," he said, "we have no better sales producer than our windows. We find that we no sooner put in a window display than the people start to come in and ask for whatever we are showing. A good display will retain its 'pulling' power for about a week. We find that it is best to change them after they have been in that long. We nearly always put price cards on every article shown, and I think there is no doubt whatever about the value of doing this. There are many people who, were it not for the price card, would have the idea that

A rack display of shovels, rakes and forks such as is shown above, enables Alex. Ballyntyne of Brantford, Ont., to greatly increase his sales. It enables him also to carry a stock that is ample to meet all requirements and keep it constantly displayed.

Keeping lots of goods out where people can see them is the most effective way of keeping them moving, says Alex. Ballantyne of Brantford. These silent salesmen and counter displays have paid well, he states.

the article shown was much higher in price than it is. There are others who need an article, but if they see it in a window without a price card do not care to walk into a store and ask how much it is for fear they may be forced into buying, if the price is more than they think they should pay.

Shows All Stock

"I aim to show all my stock. I have no larger stocks than many other hardware firms, but people think I have because they see so much when they come in the store. By keeping everything out where it can be seen and by changing it around in the store often, people get the impression that we have a big stock and that everything they see is new. There is something about this that appeals to many people. They like to think that they are buying at a store where new goods are constantly coming in and where all the latest lines are to be seen. They talk about the store and the stock and they like it."

Floor Displays Good

Mr. Ballantyne attributes to his floor displays and window displays the fact that he is selling twice as many oil stoves as formerly. He keeps these lines in conspicuous places and gets many inquiries. In all cases where he knows the party or knows that it is all right to do so, he allows the stoves to be taken home and tried.

"People to whom we have sold stoves are among our best boosters," said Mr. Ballantyne. "I have known women take home a stove on trial and then in the course of a week or two send down two or three friends for stoves. It pays to have friends of this kind, and the best way to get them is to handle goods that do all that you guarantee and perhaps even a little more.

Mostly for Cash

"We watch our credit business very closely. No one is allowed to come in and secure credit indiscriminately. If any credit is granted we set the terms, and there is an understanding as to when the amount is to be paid. I would say that two-thirds of our business is straight cash. I would like to have the whole thing on a strictly cash basis. There are of course some cases where accommodation is necessary, especially in a factory city, where firms have a stated time for paying their bills, but there is usually no need to worry over accounts of this kind. We take no chances on the others."

Advice to Clerks

Mr. Ballantyne has some ideas of his own about clerks.

"I always advise clerks," he said, "not to stay in one place too long and not to marry too soon. The boys who come to my store to learn the business are advised to stay three years. I think that in that time I can give them enough training for them to hold a job in some large establishment. I always advise them to connect with some really large and good firm where they can learn the business thoroughly. There are many advantages for a young man in getting associated with a big institution. There are always openings for smart young fellows that they would never get by staying in a small town or city, to say nothing of the opportunities for getting business experience they could never get with a small concern. I think the right kind of a boss will always advise his clerks along this line, and not only advise them but give them a letter or use his personal influence to put them in touch with the bigger firms."

EDMONTON STORES TO CLOSE WEDNESDAY NOON

A campaign to decide whether the closing day for stores should be Saturday or Wednesday was staged recently in Edmonton. The campaign was strenuously urged and a good deal of feeling was stirred up by the contending parties. However, the advocates of Wednesday closing won out by a sizable margin. The vote stood 2,432 in favor of the Wednesday half holiday, as opposed to 2,150 who favored the Saturday.

As a result of this decision the council will frame a by-law for Wednesday closing and this means that all stores will have to be closed, no exemptions can be allowed, otherwise it is certain that proceedings will be taken to quash the by-law.

The retail clerks have made a determined fight and are yet undefeated; they will continue the campaign and will not rest satisfied until they have reestablished the Saturday holiday.

H. Lendon, hardware dealer, Leamington, Ont., and Mrs. Lendon have left for the West and plan to spend some weeks touring there.

This paint department right up at the front of the store not only makes an attractive showing, but is arranged so that quick service can be given. The stock is kept clean and in good shape, and the paint department is one of the best paying sections in the store.

Cartage Rates Are Increased

Three Big Railways Put New Schedule Into Effect on September 4th in Ontario and Quebec—Higher Wages for Employees and Shorter Working Hours Are Given as the Reason

ADVANCES in cartage rates in Ontario and Quebec which will affect a number of lines of hardware goods are announced by the three largest railways, the Canadian Pacific, Grand Trunk and Canadian National. The new rates will go into effect on September 4. Just what action the other railways will take is not yet known, but it is generally expected that they will also advance their cartage prices.

The railways give as their reason for revising the rates that the shorter hours demanded by employees and the higher wages they are now being paid make it imperative that cartage prices be increased unless business is to be carried on at a loss.

Affects Hardware

The hardware line on which advances will be made are as follows: conductor pipes, garden utensils, iron farm gates, woodenware, eavetroughing, stove pipes and elbows, lamp chimneys.

Advances which indirectly may affect hardware dealers are made in broom stock, and dry hides.

It is stated that even at the increased prices the cartage rates in Canada will be much lower than are in effect at American points.

As the cartage companies do not come under the jurisdiction of the Railway Board or any other bodies at Ottawa, no protests can be made by merchants or manufacturers. If they do not like to deal with the cartage companies they are at liberty to make any arrangements they wish for deliveries of goods.

The New Tariffs

The new tariffs provide for the following increases: On carload lots from 4½c per 100 pounds to 5c, and on less than carload lots from 6c to 7c per 100 pounds.

On "smalls," 300 pounds and under, the charge is raised from 25c to 30c per 100, and over 300 pounds from 35c to 40c, a straight increase of 5c per 100 pounds.

		Carloads	Less Carloads	SMALLS Minimum charge in cents for any one consignment	
		Cents per 100 lbs.		300 lbs. and under	Over 300 lbs.
Montreal	Que.				
Atwater	"				
Hochelaga	"	5	7	30	40
Mile End	"				
St. Henry	"				
Toronto	Ont.				
Don	"				
North Toronto	"	4	6	30	40
Parkdale	"				
West Toronto	"				
Guelph	Ont.				
Ottawa	"				
St. Hyacinthe	Que.	4	5	30	40
Three Rivers	"

Glencoe	"				
St Thomas	"	3½	4	25	35
Thamesville	"				
Tilbury	"				
Hamilton	Ont.	3½	5	30	40
London	"	3½	4	30	40
Windsor	"	3½	5½	35	50

A cartage service is maintained at the points shown in the above table and cartage charges are to be collected in addition to the freight charges the railways state. These cartage charges will be based on the actual weight subject to the minimum provided in the Canadian Freight Classification.

The details are shown in the table of rates reproduced. The rates to Bothwell, Chatham, Glencoe, St. Thomas, Thamesville and Tilbury on all shipments, to Hamilton, London and Windsor in carloads, and to London in less than carloads are the only ones that do not show an advance.

The cartage charges shown in the table herewith will not apply on:

(1) Freight carried under Canadian Freight Classification classified lower than fifth class.

(2) Freight carried under other classifications which may classify therein 5th class or higher, but which is lower than 5th class in Canadian Freight Classification.

(3) Freight weighing 2,000 pounds or over, per piece or package.

(4) Freight in bulk, carloads, classifying 5th class or higher.

(5) Freight for private house delivery.

Acid in carboys or demijohns, agricultural implements, ash sifters, baby carriages, baskets, baths, boats, bone black (in bags) brooms (straight shipments), churns, cream separators, doors, windows, door and window sashes and frames, including skylights and ventilators, metal or wooden empty packages and containers, new or old, except when K D flat, whether loose, nested or jacketed, in crates or boxes or otherwise; excelsior, furnaces and parts thereof; furniture, sewing machines, including clothes lockers, metal or wooden; glass in packages exceeding five feet in height or length; joiner's work, loose lumber and ladders, lamp black in bags, loose leather, machines and machinery of all kinds, portable buildings, scrap paper and scrap rubber in bags or uncompressed bales, safes and vault doors, screen doors and window screens, stoves and parts thereof, trunks, globes, glass and electric bulbs; iron and steel products exceeding twenty-five feet in length; trunks, empty or full; vehicles, automobiles, bicycles, motorcycles and parts thereof, including tires; washing machines.

W. R. Herbert, general manager of the Prairie Division of the British-American Paint Co., is in Regina making arrangements for opening a retail store. He announces also that in the spring the firm will erect a warehouse to cost $25,000.

EDITORIAL COMMENT

HEAVY DEMANDS FOR GOODS

ACCORDING to Frank Vanderlip, whose articles on the business situation overseas in *The Financial Post* have aroused widespread interest, Europe is never likely to be a low priced competitor in the world markets again. He points out that prices have risen there just as they have here and that it will be a long time, a very long time, before most of the countries will, from a manufacturing standpoint, be able to compete at all. This is due not only to a shortage of raw materials, but points out that Europe will be a big buyer for some time and that any surpluses of goods that the factories of America may have will find a ready market as rapidly as proper credit arrangements can be made by the purchasers. This is interesting to all retailers, especially hardwaremen, when it is considered that there is nothing in sight which indicates any slackening of the home demands. Many dealers now cannot get enough goods to meet the demands of their trade shortages, which fortunately so far are not serious, are reported in many lines. Business has been good, from the hardwareman's standpoint, about as good as he could wish. With money plentiful and the farmers getting their returns from a bountiful harvest, and the country generally on a sound basis, retailers have every reason to be optimistic over the prospects. Many hardwaremen state that they could have sold more goods if they had had them to sell, but they were uncertain about what was going to happen and did not buy heavily. Their fears were not justified and they lost money by not being able to supply all the goods for which there was a demand. With European countries wanting goods, skilled helpers scarce in many factories and the outlook for home business good, retailers should consider their buying very carefully, always keeping in mind that the merchant who has the stock is in a position to give the best service to his customers and make the most money.

DON'T FORGET THE FAIRS

HARDWAREMEN have frequently found that one of the most simple and inexpensive, and at the same time effective ways of cultivating business with farmers is to attend the rural fairs. These fairs will be commencing shortly and will continue at one point and another for many weeks. In most counties there will be a number of them. Some hardware firms make a point of showing at every fair within a radius of fifteen miles, some go to every fair in the county, others only go to one or two fairs in their own town or immediate vicinity. Their efforts invariably result in them getting acquainted with buyers in a wider territory. This means not only more immediate business, but also prospective business and first-class advertising for the store. The farmer these days can afford the best and he is going to have it and the dealer should lose no opportunity to display and talk quality goods and get into that close "personal" contact that means so much in establishing cordial business relations. Hardware dealers who have attended the county fairs and helped the shows along by an exhibit often state that there is no other way in which they can meet at first hand so many prospective buyers. Another fact that dealers should keep in mind is that in these days the automobile has cut down distances amazingly and that farmers and their wives and families think absolutely nothing of motoring forty or fifty miles to some country fair that has a more than local reputation because of the splendid horses, cattle or other exhibits to be seen there. One dealer stated to HARDWARE AND METAL that at a fair last year he sold right at his show stand for spot cash an electric vacuum cleaner to a man who had motored in sixty miles and never thought of buying a cleaner until he saw the demonstration and thought he would surprise his wife by taking her home something that would save her time and hard work. Other dealers have frequently sold stoves, washing machines and other goods directly as a result of showing them at the fairs. As stated above it costs little to arrange a display at the country fairs and merchants declare that it pays well.

PROVING A BOOMERANG

MANY of the organizations which in the past few months have been the most insistent in their demands for shorter hours and higher wages are beginning to realize that it is quite possible for a man to demand something which he supposes will be a benefit to himself when in fact the net

Where Do People Look First? What Do They Remen

When you pick up your morning paper, where do you look first? To the right-hand corner, of course. You know instinctively that you will find the big story of the day there. Newspapermen know how to display their important wares. Have you ever thought of applying this knowledge to your store displays?

IT was only recently that I, like everyone else, was a salesman; for being a salesman is simply trying to interest somebody in something. It may be soaps, it may be silks, or your services—or salvation, if you are trying to get someone to take it, you are essentially a salesman.

I am the "News Editor" of a daily paper, and among my duties is that of placing the news stories on the front page so as to arouse the interest of anyone picking up the paper, or merely glancing at it on the news-stands.

In the United States there are some 2,500 daily papers. Their news editors must be great salesmen, for they help to sell more than 75,000,000 copies of their "wares" daily. At any rate, they have learned one thing which, so far as I know, other salesmen have not discovered.

They have learned where people look!

They know on just what spot on the front page of the paper your eyes will rest first, because they know this, you will find that the first thing you see when you glance at a paper, is the biggest story the editor has to offer you. And you will see it, first, because he has placed it where your eyes inevitably go —on the right-hand side of the first page.

But—while editors understand and profit by this almost universal habit of looking to the right, I have yet to find a retail salesman, or a window decorator, who knew anything about it.

I once asked an eminent eye specialist to explain the phenomenon, he had never heard of it.

Interested, he made some tests, and confirmed my theory. He suggested that it might be due to right handedness; but as I, myself, am left handed, I discarded his theory. It might, we agreed, be due to the fact that American traffic keeps to the right, and so trains Americans to look that way. Tests on the continent, where the left-hand traffic rules are in vogue, would confirm or disprove this theory.

Not one decorator in a thousand places the "piece de resistance" of his display anywhere but in the centre of his window. That, he says, is the logical location for his best offering. But the news editor has found that the right-hand side of his front page show "window" is best, the left-hand second best, the centre a poor third.

I recently chance to te theory.

In the ce my front p have an imp story, head black, and tw umns wide. next day in c sation with a ness man I tioned the story, which had some to do with our war preparations.

He hadn't read it! Yet he assur he had glanced over the headli the paper. Further questioning re that he had gathered the news i. right and left-hand outside colum missed the two column headlines tween.

A few days later, I put the theo applied to store windows, to a pr test.

I was walking along the street I recalled my conversation with th ness man. I stopped and tried to what I had seen in idle glances store windows during my walk. I went back and looked over t dows.

In every case but one the thing had impressed themselves on my were articles that had been in the hand section of the window. In t exception, a particularly striking card placed in the left-hand corn caught my eye.

Later, walking down the same with a friend, I began talking ab stores we passed, and he, as I had unconsciously let his eyes rove o windows.

EDITORIAL COMMENT

HEAVY DEMANDS FOR GOODS

ACCORDING to Frank Vanderlip, whose articles on the business situation overseas in *The Financial Post* have aroused widespread interest, Europe is never likely to be a low priced competitor in the world markets again. He points out that prices have risen there just as they have here and that it will be a long time, a very long time, before most of the countries will, from a manufacturing standpoint, be able to compete at all. This is due not only to a shortage of raw materials, but points out that Europe will be a big buyer for some time and that any surpluses of goods that the factories of America may have will find a ready market as rapidly as proper credit arrangements can be made by the purchasers. This is interesting to all retailers, especially hardwaremen, when it is considered that there is nothing in sight which indicates any slackening of the home demands. Many dealers now cannot get enough goods to meet the demands of their trade shortages, which fortunately so far are not serious, are reported in many lines. Business has been good, from the hardwareman's standpoint, about as good as he could wish. With money plentiful and the farmers getting their returns from a bountiful harvest, and the country generally on a sound basis, retailers have every reason to be optimistic over the prospects. Many hardwaremen state that they could have sold more goods if they had had them to sell, but they were uncertain about what was going to happen and did not buy heavily. Their fears were not justified and they lost money by not being able to supply all the goods for which there was a demand. With European countries wanting goods, skilled helpers scarce in many factories and the outlook for home business good, retailers should consider their buying very carefully, always keeping in mind that the merchant who has the stock is in a position to give the best service to his customers and make the most money.

DON'T FORGET THE FAIRS

HARDWAREMEN have frequently found that one of the most simple and inexpensive, and at the same time effective ways of cultivating business with farmers is to attend the rural fairs. These fairs will be commencing shortly and will continue at one point and another for many weeks. In most counties there will be a number of them. Some hardware firms make a point of showing at every fair within a radius of fifteen miles, some go to every fair in the county, others only go to one or two fairs in their own town or immediate vicinity. Their efforts invariably result in them getting acquainted with buyers in a wider territory. This means not only more immediate business, but also prospective business and first-class advertising for the store. The farmer these days can afford the best and he is going to have it and the dealer should lose no opportunity to display and talk quality goods and get into that close "personal" contact that means so much in establishing cordial business relations. Hardware dealers who have attended the county fairs and helped the shows along by an exhibit often state that there is no other way in which they can meet at first hand so many prospective buyers. Another fact that dealers should keep in mind is that in these days the automobile has cut down distances amazingly and that farmers and their wives and families think absolutely nothing of motoring forty or fifty miles to some country fair that has a more than local reputation because of the splendid horses, cattle or other exhibits to be seen there. One dealer stated to HARDWARE AND METAL that at a fair last year he sold right at his show stand for spot cash an electric vacuum cleaner to a man who had motored in sixty miles and never thought of buying a cleaner until he saw the demonstration and thought he would surprise his wife by taking her home something that would save her time and hard work. Other dealers have frequently sold stoves, washing machines and other goods directly as a result of showing them at the fairs. As stated above it costs little to arrange a display at the country fairs and merchants declare that it pays well.

PROVING A BOOMERANG

MANY of the organizations which in the past few months have been the most insistent in their demands for shorter hours and higher wages are beginning to realize that it is quite possible for a man to demand something which he supposes will be a benefit to himself when in fact the net

fuel oil and hope to become independent of coal. Oil burning systems are being installed very rapidly in many districts, especially in some of the large plants in New England. The use of oil for heating homes, in stoves, furnaces and for hot water systems is also receiving a great deal of attention and those in close good. Until the hardware dealers took hold of the touch with the situation predict that there will be an enormous lot of oil sold for this purpose during the coming months. The manufacturers of oil heaters are also expecting a big business. All this means opportunity for the hardware dealers. Last winter, owing to the unusually mild weather that prevailed, sales in these goods were lower than usual, but with the country facing a shortage of coal, there will almost certainly be an increased demand this winter for oil-burning equipment of all kinds.

THE PASSING OF ANDREW CARNEGIE

IN the death of Andrew Carnegie, the world loses a figure that has been of outstanding interest for many years. He will be remembered in the years to come not so much because of his connection with the steel business, nor because he made a fortune that runs into the hundreds of millions but because of his work for young men. In his youth Mr. Carnegie was so poor that he was deprived of the advantages of good reading, and one of the first things he did upon gaining great wealth was to lay plans by which everyone who desired could improve themselves by reading. His gifts in the shape of libraries were not confined to the United States. There are many of them in Canada and in other countries. Just how many millions he gave for this work is not known but it was his earnest desire that all young men should have the opportunities for good reading that he longed for so earnestly when he was a youth and was denied. Mr. Carnegie also gave large sums for the establishment of parks and he was always a generous supporter of educational projects. It is estimated that he gave away in various projects $350,000,000. Just how much he was worth is not known but when he sold out to the Steel Corporation he received $500,000,000 in bonds. Mr. Carnegie laid his success to the fact that he was able to pick men more clever than himself to work for him and he frequently declared that if it came to a choice of losing his money or his partners he would rather lose the money. To young men his advice always was: "Start poor, lean on nobody, assume responsibility and always be ambitious."

Where Do People Look First? What Do They Remen

When you pick up your morning paper, where do you look first? To the right-hand corner, of course. You know instinctively that you will find the big story of the day there. Newspapermen know how to display their important wares. Have you ever thought of applying this knowledge to your store displays?

IT was only recently that I, like everyone else, was a salesman; for being a salesman is simply trying to interest somebody in something. It may be soaps, it may be silks, or your services—or salvation, if you are trying to get someone to take it, you are essentially a salesman.

I am the "News Editor" of a daily paper, and among my duties is that of placing the news stories on the front page so as to arouse the interest of anyone picking up the paper, or merely glancing at it on the news-stands.

In the United States there are some 2,500 daily papers. Their news editors must be great salesmen, for they help to sell more than 75,000,000 copies of their "wares" daily. At any rate, they have learned one thing which, so far as I know, other salesmen have not discovered.

They have learned where people look!

They know on just what spot on the front page of the paper your eyes will rest first, because they know this, you will find that the first thing you see when you glance at a paper, is the biggest story the editor has to offer you. And you will see it, first, because he has placed it where your eyes inevitably go —on the right-hand side of the first page.

But—while editors understand and profit by this almost universal habit of looking to the right, I have yet to find a retail salesman, or a window decorator, who knew anything about it.

I once asked an eminent eye specialist to explain the phenomenon, he had never heard of it.

Interested, he made some tests, and confirmed my theory. He suggested that it might be due to right handedness; but as I, myself, am left handed, I discarded his theory. It might, we agreed, be due to the fact that American traffic keeps to the right, and so trains Americans to look that way. Tests on the continent, where the left-hand traffic rules are in vogue, would confirm or disprove this theory.

Not one decorator in a thousand places the "piece de resistance" of his display anywhere but in the centre of his window. That, he says, is the logical location for his best offering. But the news editor has found that the right-hand side of his front page show "window" is best, the left-hand second best, the centre a poor third.

I recently chance to te theory.

Right to Set Resale Price Again Vindicated

Cudahy Company Upheld in Their Contention That They Have a Right to Refuse to Sell Dealers Who Will Not Maintain the Set Price

A DECISION has been rendered by the United States Circuit Court of Appeals reversing the decision of the Federal District Court at Baltimore in the price maintenance case of Frey & Son, Inc., against the Cudahy Packing Company, charged with unlawful trade practices. In his opinion, handed down July 16, Circuit Judge Woods says in part:

"There was so little real conflict in the testimony on the vital issue that, except on the measure of damages, the case might well have been tried without prejudice on the following as an agreed statement of facts: The defendant manufactured and sold Old Dutch Cleanser and developed a large trade in that article by extensive advertisements in newspapers and magazines and by circulars and solicitors. Considering the maintenance of a fixed price necessary to an adequate profit, defendant adopted the following means of promoting sales and maintaining the wholesale price: It sold only to jobbers and wholesalers, who were expected to sell only to retailers. Soliciting agents were sent to retail merchants and orders taken from them at the list price to be transmitted to any jobber that the retailer named of the jobbers to whom the defendant was selling. These jobbers selected by the defendant, though called distributing agents, were purchasers to whom defendant sold at a fixed deduction or discount from the list price. This discount was intended as the jobber's profit. By circulars and personal interviews jobbers were insistently exhorted to maintain the fixed prices in their own interest and that of the defendant. The jobbers knew they were expected to maintain the prices fixed by the defendant and that they were liable to be cut off if they refused. There was occasional underselling by dealers and perhaps occasional disregard by the defendant of isolated acts of underselling. But the plan of the defendant was generally acquiesced in by jobbers, and its request or demands that the prices be maintained were generally complied with. There was no formal written or oral agreement with jobbers for the maintenance of prices.

"The plaintiff was a jobber on defendant's list of distributing agents who had a considerable trade in Old Dutch Cleanser. Believing that by the elimination of certain expenses usually incident to the wholesale business, it could afford to sell Old Dutch Cleanser at less than the price enjoined by defendant, plaintiff reduced the price below that fixed by the defendant. For that reason the defendant refused to sell plaintiff at its usual discount from the list price, thus cutting off its business by making it impossible for it to compete with other jobbers at a profit.

"The vital question is whether defendant's method of business coupled with the acquiescence of its customers therein by observing its requests or demands to maintain prices was such cooperation between seller and purchasers as amounted to a combination in restraint of trade within the rule laid down in Dr. Miles Medical Company v. Park & Sons Company, 220 U. S. 373, and other following cases. We are obliged to hold that the question has been clearly answered in the negative by the Supreme Court in United States of America v. Colgate & Company, decided June 2, 1919. The court expressly held that the announcement in advance that customers were expected to charge a price fixed by the seller, and that the penalty for refusal to maintain prices would be refusal to sell to the offending customer, observance of the request to maintain prices by customers generally, and the actual enforcement of the penalty by refusal to sell to such customers as failed to maintain the price did not constitute a violation of the trust statute. Nothing more was done by the defendant and its customers in this case.

"Since the defendant, under the Colgate case, merely exercise the right reserved by the Clayton Act to dealers of 'selecting their own customers in bona fide transactions and not in restraint of trade,' the plaintiff cannot recover under its charge of unlawful discrimination in price."

Discourtesy to Child Costs Customer

A Merchant Loses a Good Customer Through Failure to Give a Child the Attention of an Elder—Children Often the Representative of the House—A Customer's Viewpoint

THE child customer is one whom the retailer often feels he could easily get along without. Its purchases are very likely to be small, and he invariably takes a good deal of time in making a choice, two things which often tend to exasperate a busy dealer. Oftentimes, however, the child is a messenger from home, and in such a case, their order may be a substantial one.

Good Policy to Please the Child

No matter what the extent of the trouble he gives or the smallness of the order, it does not pay to overlook the child.

Recently the writer was discussing this question with a dealer, when a woman who had overheard part of the conversation, remarked, "There is a good deal in what you have said. I myself have transferred my account solely through a mistake of this kind.

The Customer's Story

"A few weeks ago I needed some articles from the store, and needed them at once, as I was just starting some baking. Finding it impossible to go myself I gave my little four-year-old girl a note containing a list of my wants and asked her to hurry. Nearly forty-five minutes passed, and becoming alarmed over her prolonged absence, I, at considerable inconvenience to myself, hurried over to the store to inquire what had happened.

"I found my little girl still standing there. Several other people had come in after my child's arrival, and had been waited upon, but she was too timid to assert herself, and as a result the dealer let her wait while he attended adult and more forward child customers. I decided that a man who would treat a child so, was not the person I cared to deal with, and I have never ordered anything there since, and certainly have no intention of going back."

The writer discovered that the woman who had spoken had been a permanent customer of the dealer to whom he had been speaking, and that her account was one he regarded himself as being fortunate in securing.

NATIONAL INDUSTRIAL CONFERENCE

(Continued from page 44)

cratic management can be applied, consideration of the labor features of the Treaty of Peace, and consideration of any other proposals which may be introduced bearing on the relations of employers and employees. It is expected that the conference will last at least a week. It is expected that 150 delegates will attend.

SEASON IS UNLIMITED NOW

In the old days there was a certain amount of reason for regarding the bicycle selling season as being over about July 1. At that time considerable changes were being made in the models and styles of bicycles each year, and it was therefore only natural that a rider who had not purchased by July 1 would prefer to wait until next spring and get the latest model. Now that the bicycles have become standardized this reason no longer applies.

EVENTS IN THE TRADE

Business Changes

New Hamburg, Ont.—H. L. Albrecht has purchased the hardware business of J. R. Feick.

Shelburne, Ont.—J. J. Metcalfe has sold his hardware business to W. S. Smith, of Chesley, Ont.

New Firms

The Lambert Hardware Co. has been registered at Montreal by Herman Robitaille and Francois A. Robitaille.

Economic S. P. Q. R. Reg., hardware, has been registered at St. Lambert Annex, Quebec, by Alfred F. Stratton.

C. M. Carruthers and Don F. Bolster are opening a new hardware, sporting goods and auto accessories store in the Darke Block at Regina under the name of the Capital Hardware and Sporting Goods Company.

Personals

J. H. Ashdown, of the J. H. Ashdown Hardware Co., Limited, Winnipeg, has been chosen to represent the wholesalers of the West at the National Industrial conference, Ottawa, commencing Sept. 11th.

J. Nichol, manager of the Massey-Harris branch at Saskatoon, has been elected president of the Saskatoon branch of the Canadian Manufacturers' Association, and A. I. Turnbull, of the Fairbanks-Morse Co., secretary.

C. W. Wiggs, Capt. Canadian Army Pay Corps, Quebec, after almost five years' service in France and England, has re-entered commercial life. At the first meeting of the directors of the Mechanics Supply Co., Ltd., since his return, he was elected a director. Owing to the retirement of Secretary-Treasurer W. C. Teakle, who recently resigned to take a position with the Herman Young Co., this joint office has been filled by the appointment of W. R. Wilkinson as secretary and C. W. Wiggs as treasurer.

Montreal News

Edward Goodwill, manager of The Thos. Davidson Mfg. Co., Ltd., is away on his holidays.

Archie T. Black, manager of the Martin-Senour Co., Ltd., Montreal, is away on his vacation to Port Kent, New York.

Arnold N. Smith, of the Smith Hardware Company, Cornwall, was a recent visitor to Montreal, where he called on the jobbing trade.

F. H. Smith, advertising department Brandram-Henderson Ltd., Montreal, has returned from a holiday spent in the Laurentians.

E. F. Hubbert, purchasing agent Brandram-Henderson, Ltd., returned this week to Montreal from a trip to Medicine Hat, Winnipeg, and other western points.

H. G. MacPherson, representative for Taylor Instrument Companies, Rochester, N.Y., was calling on the Montreal trade during the week.

W. H. Crocker, late with the firm of Frothingham and Workman, Ltd., wholesale hardware, has gone to Truro, N.S., where, with his brother, he is entering the hardware business.

W. S. McLennan, general sales manager Brandram-Henderson, Ltd., leaves this week for Algonquin Park, where he will spend his vacation in his usual strenuous style, with the aid of a trusty guide.

Edouard Leclerc, for several years with J. L. J. A. Surveyor, Ltee., Montreal, with his brother, Ludger, has entered the retail hardware business under the name, Leclerc and Frere, 427 Church Ave., Verdun.

George Leclaire, Montreal, was arrested this week because he carried nine brass faucets, said to be the property of Cohen & Sons, Prince Street. His method of carrying them inside his shirt made the detective arresting him suspicious.

In the serious fire, attended by fatal results, at Dominion Park, Montreal, on Sunday afternoon last, Alfred Gravel, a former employee of the Sherwin-Williams Company, lost his life. Young Gravel is said to have made many friends with the above company.

Winnipeg News

Mr. Burnett, of the Andrews Wire Works, Watford, Ont., spent a few days in the city on his return trip from the West.

Mr. Jones, vice-president of the Newton Line Co., is in the city, calling on the Winnipeg jobbers in the interests of his firm.

Mr. Coulson, of the Dominion Iron & Steel Co., spent a couple of days in the city before leaving for the West, and expects to spend some time in the city on the return trip.

L. M. Cochrane, formerly sales manager for Winnipeg and district of the Northern Electric Company, together with H. C. Stephenson, also formerly of that company, have formed the firm of Cochrane, Stephenson & Co., Ltd., with offices at 602 Avenue Block, Winnipeg. The firm will deal exclusively with the jobbing trade in the handling of automotive equipment and electrical material. Both of the members of the new firm are well known among the trade of Western Canada.

Trade Notes

The Atlas Tool and Die Co. has been registered at Montreal.

The Automobile Accessories Co. has been registered at Montreal.

The Excelsior Steel and Wire Co. has been registered at Montreal by Louis A. Martin.

The Canada Steel and Wire Co. has been registered at Montreal by Louis A. Martin.

Robinson and Vinet, Montreal, have been appointed joint liquidators of Graphite Products Ltd., Montreal.

Thibedeau and Frere, bicycles, accessories, etc., has been registered at Montreal by L. P. and G. Thibedeau.

Keys & Co., hardware and plumbing, 592 Bloor St. W., Toronto, are making extensive alterations and additions to their store.

The A. C. Gilbert, Menzies Co., Ltd., 439 King Street W., Toronto, are now manufacturing in Canada to take care of their export trade to England.

Having sold the premises formerly used by them as a tinshop, Turnbull & Cutcliffe of Brantford, Ont., are moving this branch of their business to a new location.

Incorporations

Orillia Tractors Ltd., capital $300,000, head office Orillia, Ont., plans to manufacture and deal in tractors and motor vehicles.

Blatchford Calf Meal Company, of Canada, Ltd., capital $75,000, head office Toronto, plans to manufacture and deal in cattle and poultry foods.

Prince Edward County Oil Company, Ltd., capital $60,000, head office Wellington, Ont., plans to manufacture and deal in oils and greases.

Ross Can Co., Ltd., capital $500,000, head office Bowmanville, Ont., plans to manufacture and deal in cans and containers of all kinds.

Excelsior Electric Dairy Machinery Ltd., capital $100,000, head office Toronto, plans to manufacture and deal in electric dairy and special machinery, tools, dies, etc.

CHANGING FIRM NAME

The firm name of Leeks & Potts Ltd., Hamilton, Ont., art glass workers, bevellers and mirror makers, is being changed to Ontario Plate Glass Limited. Among the other lines the firm handles are art bevel door lights, screens, windows and transoms for store fronts, glazed in lead, white metal, copper, and nickel silver, figure memorial and stained windows, distorting mirrors, art domes and shades. The firm also imports sheet, fancy and plate glass and deals in tinted glass of all kinds, prismatic glass, rolled pattern glass, bent glass, fine glass for cabinets, bent plates for store fronts, opalite for window and counter slabs and in painters' supplies. It also resilvers old mirrors and makes special designs for special work.

CHATHAM FIRMS MERGE

Negotiations have been completed at Chatham, Ont., by which the Gray-Dort Co., Limited, absorbs the entire plant of the Gray-Campbell Co. The entire facilities of both firms will be devoted to the manufacture of automobiles. The Gray-Campbell Co. has been engaged since 1853 in the manufacture of carriages, cutters, fanning mills, scales and kitchen cabinets.

HAVE INCREASED STAFF

Frothingham and Workman, Ltd., Montreal, have been re-assigning territory in their eastern division. J. A. Belanger will represent them in the Beauce District of Quebec, while Walter Amy will cover New Brunswick and the Gaspe coast. F. W. Campbell will be representative for Prince Edward Island and Nova Scotia provinces. W. H. Crocker has covered the territory now assigned to Messrs. Amy and Campbell and there is thus an increase of travelling staff for this territory. Mr. Crocker resigned recently and is opening in business on his own account at Truro, N.S., with his brother. Mr. Belanger replaces J. T. Jacques, resigned.

SHOULD I MARK UP MY STOCK?

"Why should I not mark up my old stock in keeping with present market quotations," said a hardware merchant in an Alberta town? All the wholesale houses do it, why should not I? A short time ago I wanted some dairy thermometers. A wholesale hardware house at Edmonton used to quote me 90 cents a dozen on them. I wrote to this firm but they were unable to supply me. Then I wrote to a firm in the East, and what do you suppose they sent me? A dozen thermometers stamped 'Made in Germany.' They had had these instruments in stock for five years and they billed them to me at just one dollar apiece, or $12 a dozen. This is an increase of a little over 1,200 per cent advance over the old prices. Should I mark up my old stock, well I guess yes."

THE NEW BOARD OF COMMERCE

The new Board of Commerce appointed by the Government to investigate all matters dealing with the trade, and who will have power to institute actions against any industry or persons believed

JUDGE ROBSON

Of Winnipeg, who has been selected by the Dominion Government as Chairman of the newly constituted Board of Commerce.

to be taking undue advantage of the public, has been practically decided upon.

The members so far decided upon are Judge Robson of Winnipeg, and W. F. O'Connor, who gained such notice some time back by his activities in the Cost of Living Department.

The third member of the board, who will be the appointee of the Retail Merchants' Association, will probably be J. A. Beaudry of Montreal.

EXCLUSIVE ALBERTA ASSOCIATION

James Kellas, secretary of the Retail Merchants' Association in Medicine Hat, is authority for the statement that an exclusive retail merchants' association for Alberta is about to be formed with temporary headquarters at Medicine Hat. Hitherto the Alberta section has been operated from Saskatoon by the Saskatoon Provincial Board. Special efforts will be made to assist the Alberta merchants in handling their income tax problems, and also in establishing better accounting methods.

HARDWARE NEEDED IN HOLLAND

There is a demand for the following articles at the present time in Holland:

In the machinery line there is needed machines for coal mining, food preservation, (such as drying apparatus for potatoes and other vegetables), machinery for textile industries and for sugar-refining plants, and also locomotives. Standard electrical goods are also in demand. There is need of lighting installations, telephone material, accumulators and benzine motors to run small dynamos.

Hardware, Chemical and Pharmaceutical Articles

There is great need of hardware, including builders' hardware, hinges, rivets, bolts, wood screws, metal screws, door closers, galvanized iron and brass wire, varnished or galvanized wire fences, windlasses and metal cables, pulleys, chains and tools such as nippers, screw drivers, augers, bits and braces and sets of tools. Also shovels and pitchforks for manure.

Other articles needed are portable forges, metal sieves for use in paper manufacturing, kitchen stoves and ventilator hoods, printers' type and bicycle accessories such as acetylene lanterns and tools.

In chemical lines there is need of industrial chemical products, silicate of potash, sodium sulphate, ammonium carbonate, acetic acid, salts of chromium, permanganate of potash, sal ammoniac and sal. soda.

ENGLISH ANTIMONY TO ARRIVE SOON

Supplies of English antimony are soon to be available, it is stated. These have been scarce of late and practically unobtainable in the Canadian market. Since there is much use made of them here when they are available, users will be interested to learn that supplies are likely to arrive here early in September. The price basis will be such as to permit of sales being made on a competitive basis with the prices prevailing for Chinese grades.

CATALOGUES and BOOKLETS

JONES & SHIPMAN LIMITED, B.C.

Jones and Shipman Limited, of Leicester, England, have issued a catalogue of engineers' tools and drop-forged tool holders. These include tool holders for both English and American lathes, boring bars and holders, knurling tools, drills and countersinks, high grade steel sleeves, steel sockets, lathe sockets, steel drifts, hardened steel mandrels, scroll geared self-centering chucks, safety pattern lathe carriers, heavy duty carriers, emery wheel dressers and cylindrical gauges. The catalogue is profusely illustrated. Readers of HARDWARE AND METAL may obtain copies of the catalogue upon request.

London Retailers' Fourth Picnic

Annual Outing Held at Port Stanley Proved a Record-Breaker — Crowd of 650 Went Down to the Lakeside in Special Electric Limited Train — Big Program of Sports Took Three Hours to Run Off

IDEAL weather, a record attendance, sports that took three hours to run off, and a general program that was full of "pep" from start to finish, made the fourth annual picnic of the retail hardware dealers of London, Ont., the best of all. Right from the time the picnickers left in the special seven-coach, limited, electric train provided for them, until the last tired kiddie arrived home late at night there was not a dull moment. On arriving at Port Stanley the party went up on Fraser Heights and the sports were started. Throughout the events a fine musical program was rendered by the First Hussars band.

Keenly Contested

The sports had been specially arranged with the idea of not only providing something of interest for every contestant, but amusement for the big crowd. The events were keenly contested and kept the spectators on their toes every second. All the children drew prizes and a special feature, a "candy scramble" for the little tots, proved a source of great amusement.

One of the big events of the day was the tug-of-war. The employers tried their hardest to pull the employees over the line, but both attempts proved unsuccessful.

The bowling contest also provided considerable excitement, as eight hardware stores had entered teams. The trophy was won this year by the team from the Purdom Hardware Co. It has to be captured for three years in succession before it becomes the property of any team.

650 Sit Down to Supper

Following the games supper was served and 650 people were seated at the tables and had as much enjoyment as if they had all been one big family.

The winners in the races and sports held during the afternoon were:

Boys' race, 11 to 14 years—Cecil Kemp, Basil Wilson and C. Barber.

Girls' race, 11 to 14 years — Marion Stark, Bernice Martin and Thelma Heatherley.

Boys' race, 7 to 10 years—E. Barber, C. Horne and N. Austin.

Girls' race, 7 to 10 years—Evelyn Gatecliffe, Helen Prince and Elsie Forsythe.

100 yards dash, hardware clerks only —Fred Hammett, Bob Pearce and H. Weld.

Centipede race—Team composed of Messrs. A. W. Brownlee, Wilfred Dunn, E Blinkhorn, A. Brown, Geo. Brownlee, H. Best, L. Best and John Kilpatrick.

Relay race, ladies over 15 — Ethel Smith, Daisy Johnston and Gertrude Parker.

Group of London, Ont., hardware men and travellers, photographed at their annual outing held at Port Stanley, Ont. Good weather favored the day, resulting in a good turnout and the carrying out of the program which had been arranged.

The various executives upon whom fell the arduous task of seeing that everything necessary was done to insure a good outing for those attending the London, Ont., Retail Hardwaremen's picnic at Port Stanley, Ont. Looks as though they enjoyed their work at that.

London hardware drivers' race—W. J. Allen, G. Blinkhorn and W. Heatherley.

Married ladies' race — Mrs. Talbot, Mrs. Manning and Mrs. Pollard.

Lucky race for men (time-set race) —W. W. Baker, Granton.

Ladies employed in hardware stores only — Miss Brownlee, Margaret O'Dell and Gertrude Parker.

Backward race for men—Fred Hammett, Ed. Malone and W. J. Allen.

Hardware men's wives' race — Mrs. Talbot, Mrs. McIntyre and Mrs. Sinclair.

Parcel-wrapping contest—J. Kilpatrick.

Kicking the balloon race, ladies — Myrna McDonald, Lillia Kingsboro and Marjory Forsythe.

Fat men's race—Wilfred Hodgins, Fred Floyd and O. Reed.

100-yard dash, hardware men, married—R. Pearce, W. Jeffrey and H. Crummer.

Lubbers going aloft race, rope climbing contest—L. Best and Donald Menzies.

Proprietors' race — A. Brownlee, J. Brownlee and J. Steele.

Three-legged race—E. Craig and M. Bissell; E. Blinkhorn and J. Gray.

Elopement race—W. Allen and Miss Talbot, R. Pearce and partner, H. Crummer and Miss Waterman.

Committeemen's race — C. J. Wideman, A. McIntyre and H. Agnew.

Hardware men's consolation race—B. Scott, K. Nickle and C. McKerlie.

Hardware ladies' consolation race — Miss Chapman, Miss Edward and Miss Amets.

Swimming race—Messrs. Allen, Agnew and May.

The committee in charge of the arrangements was warmly congratulated upon the success of the outing. The committee comprised T. H. Purdom, Jr., Tom Jones, J. A. Brownlee, Albert Brownlee, W. A. O'Dell, Mr. Chown, Mr. McIntyre, Geo. Steer, H. Crummer, J. Steele, W. J. Kilpatrick, R. Kilpatrick, C. W. Summers, Will Summers, Mark Brown, H. Abel, C. Craig.

Judges and starters: A. H. Purdom, Thos. Purdom, J. A. Brownlee, Albert Brownlee, Jack Rose (Hobbs), E. M. Russell (Howden's), N. R. Howden, T. G. Dockstader (Howden's), Mr. Wideman (Richards-Wilcox), Thos. Jones (Cowan's), J. A. Page, Mr. Chown, J. Steele, F. Floyd (Cowan's), F. Forsythe (Sheet Metal Co.), Mr. McMurtry (Shurley and Dietrich), Chas. McGuire (Imperial Oil), H. Agnew (Simms Brushes), W. D. Love (Page Fence Co.), Mr. McIntyre, C. W. Summers, Chas. J. Craig (Howden's), Geo. Steer (Purdom's), H. Crummer (Cowan's).

SAYS BETTER GLASS MOVEMENT

W. R. Hobbs, manager of the Consolidated Plate Glass Co., of Canada, Ltd., Montreal, says that there is a noticeable improvement in the movement of glass, particularly window glass. Mr. Hobbs takes this as an index of the activity in house building in various parts of the country, and he considers it a very welcome sign.

Asked as to the tendencies, Mr. Hobbs told HARDWARE AND METAL that the markets were firmly held on both plate and window glass. Reports were conflicting of late, he continued, regarding the developments of the glass industry in Belgium. It was not probable, however, that the make of glass there could be extremely large this year, and possibly production costs would be very much greater than before the war.

A NEW KIND OF ALUMINUM

A new invention called conducting aluminum M.277, which is said to be creating a profound impression, has been made by Dr. Georges Giulini, the most famous expert in the aluminum trade. This new metal is produced by putting the ordinary aluminum through a special patented process, by which it acquires the same mechanical qualities and capacities as bronze, copper and brass without changing its specific weight.

It is said that the price of the new metal can be kept within very low limits, so that, even at the pre-war prices of other metals, it will be able, by reason of its smaller specific weight, to compete with copper and brass very favorably. The fact that the new metal is a conductor will make it especially in demand in the electrical trade. The inventor anticipates for it also a good market among the builders of motor cars, aeroplanes, ships, and railway carriages. Leading men, to whom the invention is already known, are said to be much impressed with its possibilities.

Church Seats

W. L. Allen & Co., Cobourg, Ont.—Please give us the names of firms manufacturing church seats.

The following are manufacturers in Ontario and Quebec: The Canadian Office and School Furniture Co., Ltd., Preston, Ont.; The Globe Furniture Co., Ltd., Waterloo, Ont.; King Bros. Co., Chesley, Ont.; Paquet and Godbout, St. Hyacinthe, Que.; The Valley City Seating Co., Ltd., Dundas, Ont.; W. F. Vilas, Cowansville, Que.—Ed.

Show Cages for Canary Birds

Chown Hardware Co., London, Ont.—Kindly advise us who are the makers of show cages for canary birds.

We would refer you to the following firms: E. T. Wright & Co., Ltd., Hamilton, Ont.; Andrew B. Hendryx Co., New Haven Conn.; O. Lindemann Co., 35 Wooster St., New York City; Osborne Mfg. Co., 675 Hudson Street, New York City.—Ed.

THE CLERKS DEPARTMENT

Carnegie—A Giver Rather Than a Maker of Money

An Intimate Character Study of the Great Steel King Who Gave Away Three Hundred and Fifty Millions

IN the death of Andrew Carnegie, there has passed perhaps the most picturesque and romantic figure which American big business has ever created. One of the greatest of the American wonder men of wealth he will not be remembered as a maker of money so much as a giver of it, according to B. C. Forbes. It is estimated that his benefactions have totalled $350,000,000, and a comparatively short time ago it was estimated that he had less than $30,000,000 left. He believed that it was a disgrace for a man to die rich and lived up to that belief as few men have done—for, relatively speaking, he died poor. Following is Mr. Forbes' vivid picture of the character of the steel king than whom none have held a larger place in America's public eye:

Modern history contains only one character comparable to Carnegie—John D. Rockefeller. Carnegie created "a new era," the era of stupendous philanthropy—no, not exactly a new era, for he had his prototype in the palmy days of Greece and of Rome, when rulers and wealthy nobles distributed largess with equally lavish hand.

No American has been more extolled—and few more execrated. He has been invested with all the virtues of a saint—and condemned as a bloodstained tyrant and slave-driver. To him some have ascribed wisdom, foresight, and ability not less than superhuman; others have portrayed him as a popinjay, the incarnation of smug self-satisfaction, the fortunate creature of circumstances, whose only claim to distinction he himself set down in the epitaph he composed for his tombstone: "Here lies one who knew how to get around him men who were cleverer than himself."

He has been called both a capitalistic socialist and a czar who refused to countenance any man, even the brainiest, as his equal in the realm of business.

Because he has no fixed religious belief, the epithet "atheist" has been hurled at him all through his career, yet he has given donations for 7,000 church organs — "Listening to music, particularly that of the organ, is a form of religious expression to him," declares an intimate.

He has been accused of having quarrelled with and hoodwinked more of his associates than any other man in industrial history. "No man ever made so many men millionaires or shared his profits so lavishly" is the verdict of such men as Schwab and Corey who shared freely of his bounties and bonuses.

"The modern Patron Saint of Scotland" he has been called—yet the people of his native town, carried away by their indignation at his peace views in the early days of the war, splattered his statue with mud and filth.

In face of all this, what is the truth? Is he an enigma? Are there two Carnegies, saint and devil, Jekyll and Hyde?

Before I undertook a close study of Carnegie's life I had imbibed several unfavorable ideas from my elders in Carnegie's native country. They disliked his ostentatious "cantrips." Some resented the name "CARNEGIE" being plastered over buildings he helped to erect—and then left the struggling taxpayers to support. Stories of his arrogance, his impatience of contradiction by even the greatest experts and specialists in any line, his overwhelming self-satisfaction, his atheistic preachments, his never-ceasing slurs upon the royal family—such stories were rife in Highland glens and hamlets and cities.

Balance on Right Side

I want to say, however, that fuller knowledge has modified my preconceived views and removed many misconceptions. I am no hero-worshipper; but in my judgment Carnegie's admirable qualities far outweigh his foibles, many of which were inspired in the early days, not by vanity, but by business motives.

When as a young man he invited the Prince of Wales to ride on a Pennsylvania Railroad engine he had an eye solely to future business favors — and he got them. When he moved in prominent social places in New York, still higher political and diplomatic circles in Washington, and hobnobbed with European royalties, it was with no thought of shining in the society columns of newspapers; it was more for the sake of the "profit" columns in his ledgers.

Later, people of eminence and intellect sought the company of Carnegie less for the sake of his purse than for his personality. He travelled everywhere and saw everything with intelligent eyes. His scanty schooling was supplemented by subsequent study, guided and coached by a tutor. He became a man of genuine education and of wonderful knowledge. The volumes that appeared under his name were not written, as many supposed, by others. He could recite half of Shakespeare and all of Burns and was deeply read in many subjects.

Before his wealth became notable his close British friends included such intelectual giants as Gladstone, Rosebery, Morley, Herbert Spencer, Mathew Arnold and James Bryce.

In such company Carnegie could hold his own. He was a fine story-teller; he was cheerful; he had unbounded faith in the future; he loved life and he loved the world and its inhabitants. He was not immersed completely in steel; the truth is, no steel man ever knew less about steel than Carnegie did—but no man ever knew how to capture bigger orders, how to secure better results from his workmen, or how to pick from the ranks such able partners. After his youthful struggles he, like John D. Rockefeller, took life easier than any of his associates—and has outlived the majority of them.

Carnegie admittedly drove his partners, his superintendents and other aspiring hopefuls like slaves, both for their own financial advantage and his. But he treated the workmen "white" and was warmly regarded by them.

It is not difficult to analyze the causes of Carnegie's quarrels with other giants in the industry. His falling-out with Frick, for example, was inevitable in the nature of the men and the evolving economic conditions.

Carnegie ridiculed kings and monarchs, yet he set up a business monarchy and crowned himself king. His word was as autocratic as that of the ex-Czar of Russia or the Sultan of Turkey. His favorites become courtiers, but none must attempt to seek or force a place on the throne. Able men whom he raised from the ranks and made wealthy by his system of bonuses and profit-sharing, worshipped their maker. His arrogance, his slave-driving, his masterfulness they accepted as a matter of course. Since Carnegie paid the fiddler, it was fitting he should have complete right to call the tune. And they were content to dance to the Carnegie music.

These methods worked all right with subordinates, but equals would not stand his highhandedness.

Fell Out With Frick

Henry C. Frick was already a man of wealth and power when he joined Carnegie. He foresaw the coming evolution in the conduct of big business. He realized the interdependence of industrial, railroad and financial interests. He saw that the day of independent monarchs was passed; he believed in a more democratic form of business administration. Instead of a czar, there must be control by statesmen, by directors. Frick was at home among his equals in brains and power; Carnegie would admit of no equals and would share his sceptre with no one. Frick adapted himself to the new economic order; Carnegie was of the old school — where Carnegie sat that must be the head of the table.

It is not true, however, that Carnegie hoodwinked partner after partner into parting with his stock to him at cruelly low figures. The explanation in most cases was that, when storms of depression broke, his associates lost faith in steel, whereas Andrew Carnegie, from the first time he saw a Bessemer furnace in operation (in England), never once

lost confidence in the metal. He could always peer beyond the darkest clouds and see in steel something of infinite importance to the progress of the world. Never for a moment did he doubt that molten streams of iron could be transformed into streams of gold.

It is no exaggeration to say that no employer ever shared his profits so generously with his co-workers as did Carnegie. But power he would not share.

Consideration for Labor

If I were to attempt to describe Andrew Carnegie in one comprehensive sentence I would say that, as a boy and youth, he worked prodigiously and displayed extraordinary alertness in seizing opportunities; that he glorified his parents and treated his mother with the most beautiful reverence; that through intense study and very extensive travel he became a man of no mean culture; that he early manifested extraordinary skill in financing and pulled off more clever deals than any man of his day; that he treated his workmen with consideration and inspired talent by his generous, adroit system of sharing profits with those who contributed to the attainment of successful results; that in temperament he was strong-willed to the point of arrogance, and distinctly vainglorious, though, at the same time, he had simple habits and democratic ways; finally, that, by his example of prodigal giving, mostly for worthy purposes, he has done much to take the curse from inordinate riches and to force other millionaires to spend large parts of their fortunes for the benefit of humanity, thus, by his own deeds and by his example, furthering incalculably the brotherhood of man.

And now let us rapidly trace the steps by which the immigrant son of a poor weaver rose to be emperor of the world of steel.

Born in Dunfermline in 1835, the son of a handloom weaver, Andrew Carnegie had little schooling and early sought to contribute to the family purse. When ten he saved enough to buy a box of oranges which he peddled profitably to retailers! The introduction of steam-driven looms forced the Carnegie family, consisting of the parents and two sons, Andrew and Tom, to emigrate to America when Andy was twelve. They took up their abode at Barefoot Square, Slabtown, Allegheny, Pa., where relatives had settled. The father got a job in a cotton mill and Andy was taken in as a bobbin boy at $1.20 a week. His mother took in washing and sewed boots for a next-door shoemaker named Phipps, with whose ten-year-old son, Harry, the little immigrant become fast friends.

"The genuine satisfaction I had from that $1.20 outweighs any subsequent pleasure in money-getting," Carnegie declared some years ago.

He worked from darkness in the morning until darkness every evening, with only forty minutes' respite at noon. The thought, however, that he had been "admitted to the family partnership as a contributing member" comforted and sustained him.

A friendly Scotsman next gave him work in his bobbin factory at $1.80 a week, but here his duties included firing the boiler. "The responsibility," he chronicles, "of keeping the water right and of running the engine and the danger of my making a mistake and blowing the whole factory to pieces, caused too great a strain, and I woke and found myself sitting up in bed through the night trying the steam gauges. But I never told them at home that I was having a hard tussle. No, no! Everything must be bright to them."

Next, a former resident of Dunfermline gave little Andy a job as a telegraph messenger in Pittsburgh at $3 a week. Scared lest his ignorance of the city might cause him to lose his place, he drilled himself so industriously that he was soon able to close his eyes and rattle off the name and address of every business house throughout the business section of the city! He went to the office early and secretly practised on the telegraph instruments.

One morning Philadelphia was clamoring to send a "death message," and Andy, in the absence of the operator, took the message over the wire and promptly delivered it before the office opened for business. Instead of being, as he feared, dismissed for his audacity, he was soon promoted to be an operator, "and received the, to me, enormous recompense of $25 per month, $300 a year." He did extra work in copying press messages which brought him $1 additional weekly and also brought him into contact every evening with the morning newspaper reporters.

By the Wire Route

Thomas A. Scott, then the Pittsburgh superintendent of the Pennsylvania Railroad, who often visited the telegraph office to talk to the General Superintendent at Altoona, noted the energetic young operator, and when the railroad put up a wire of its own, Carnegie was installed as clerk and operator at $35 per month.

An accident tied up the road one day when the superintendent was not at hand and Carnegie, on his own initiative, made the wires sizzle with instructions signed "Thomas A. Scott." This was against the rules, but Carnegie had adopted as his motto one he has often quoted since —"Break orders to save owners." Scott made him his private secretary at $50 a month and started Carnegie on his way to fortune.

"Could you find $500 to invest?" Mr. Scott asked him one day. "Yes, sir, I think I can," he replied, although how or where he was to get so huge a sum he had not the faintest notion. Scott explained that an owner of ten shares of Adams Express Company stock had died and that it could be purchased for $50 a share. The Carnegie family savings had gone to purchase a small house in order to save rent. The resourceful mother, "The Oracle," as Andy termed her, solved the problem by taking a steamer next morning for Ohio and mortgaging the home to an uncle, "to give our boy a start."

His first dividend check, "a mysterious golden visitor," set Carnegie thinking. This way, he saw, lay fortune. Soon afterward Woodruff, the inventor, showed the private secretary the model of a sleeping car and he at once became enthusiastic. When offered a share in the venture, Carnegie accepted. Again he had not the necessary funds, but he boldly visited the local banker and asked for a loan.

"Oh, yes, Andy, you are all right," said the banker, and the name "Andrew Carnegie" was for the first time signed to a note—he was subsequently to be one of the world's most persistent borrowers.

Scott aided him at every turn in his financial operations, and when, during the Civil War, Scott was made vice-president of the Pennsylvania, Carnegie was chosen to fill Scott's place as superintendent at Pittsburgh. Both rendered yeoman service to their country in the transportation and telegraph fields during the war.

Carnegie was then 28 and something of a capitalist. The burning of a wooden bridge played havoc with railroad traffic and this set the keen-eyed Scotsman a-thinking.

The First Big Venture

"Why not go into the building of iron bridges?" he asked himself. Forthwith he organized the Keystone Bridge Company, and—wise man—secured J. Edgar Thompson, then president of the Pennsylvania; Col. Scott, vice-president, and other influential railroad men as stockholders. With such influence behind it, the company booked huge orders at such prices that it paid a total of 100 per cent. in dividends in four years. He entered a successful oil venture and several metal enterprises, including the Kloman-Miller-Phipps-Carnegie Company, which owned the Union Iron Mills. Indeed, he became so much of a business man and capitalist that he gave up his railroad office.

Off he went for a nine months' tour in Great Britain, leaving his partners to run the iron mills. Then disaster came. Depression set in, iron prices fell and the Union Iron Mills faced disaster. Miller, the most wealthy of the partners, had to advance money for workmen's wages. In lieu of cash many workmen were given orders for groceries on a village store. Stocks of pig iron had to be pawned. Then, to cap the climax, the puddlers struck. Miller quit. He sold for $73,600 stock which thirty-four years later, when the steel trust was formed, brought millions of dollars.

Carnegie hustled for orders from his railroad friends, and although he knew nothing about steel, he booked more contracts than any other drummer of his day. By effective team-work among the young partners, they managed to pull through.

It is not generally known that Carnegie for a time was a bond broker. In 1872 he was given a commission to place in Europe $6,000,000 of bonds of a Pennsylvania branch road and cleared $150,000. Later he made a second trip and earned $75,000 commission.

The Bessemer Idea

When in England he saw the Bessemer process of making steel. The sight of iron being blown into steel captured his imagination. Henceforth steel was to be his life. Rushing across the Atlantic he organized Carnegie, McCandless & Company with a capital of $700,000, which built a new steel plant which he, wily Scot, named the Edgar Thompson Steel Works. Thus flattered, how could the president of the Pennsylvania refuse his namesake generous rebates?

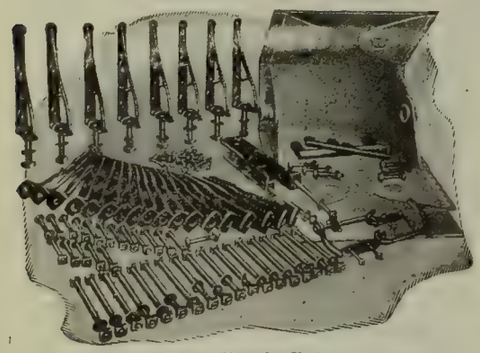
The name "Carnegie" began to be sounded all over the United States and Europe, whither he made frequent and spectacular trips. This was just after the 1873 panic. Protected by a huge tariff on the one hand and aided by rebates on the other, profits were piled up thick and fast. In 1880 steel rails were run up to $85 a ton, the works were run twenty-four hours a day, and the year's profits exceeded $2,000,000.

The following year the company was reorganized as Carnegie Bros. & Company, with $5,000,000 capital, of which Carnegie owned more than half. From then until 1888 the profits averaged $2,000,000 a year, or 40 per cent. Carnegie had rolled up a fortune of $15,000,000.

As partners died or dropped out, Carnegie took over their interest in the concern. Finally, only Carnegie and Henry Phipps—with whom, later, he quarrelled —were left. Competitors, too, including the Homestead and Duquesne Companies, were astutely bought out until Carnegie became undisputed steel king.

Frick's enormous coke properties in the Connellsville district of Pennsylvania were acquired by Carnegie in 1882 and Henry C. Frick for years was Carnegie's most trusted associate. The combination lasted until 1899, when the two parted company.

The Carnegie Steel Company was reorganized with Carnegie in undisputed control. How he surrounded himself with such brilliant practical steel men as Captain "Bill" Jones, Schwab, Corey, Dinkey, and Morrison, and paid them



(Continued on Page 52.)

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

HAY RACK SET

The Allith Prouty Company, of Danville, Illinois, is manufacturing a hay rack and wagon bed malleable iron hardware set which, it is stated, the dealer or wagon-maker will find the final arrangement for convenience. The set, it is stated, includes ten pairs of hay

Hay Rack Set

rack clamps, twenty machine bolts with washers, twenty carriage bolts, eight side board brackets, twenty-four carriage bolts for the brackets, two end gate fastener sets with four carriage bolts for same, two rub irons, and six bolts for same. This equipment, it is claimed, is specially designed hardware for constructing a combination hay rack, grain bed and stock rack, easily, economically and efficiently. The special clamps in this set, it is claimed, will fit all conditions regardless of the thickness or width of timbers, and, it is stated, eliminate mortising and sawing.

STORM PROOF LANTERN

Double mantle lantern No. 2, manufactured by the Hamilton Gas Mantle Co., of Hamilton, Ont., burns gasoline. It is claimed that it is storm and rain proof and that it is automatically cleaned and cannot clog. The amount of light given, it is stated, ranges from 250 to 400 candle power. An advantage claimed for the lantern is that there are no dirty chimneys to wash, no wicks to trim, no smoke or smell, and no dirt. It is stated that in operation it is cheaper than kerosene and more efficient than electricity. It is stated also that it is very simple in construction and operation, is easy to light and extinguish, and can be taken apart in a few seconds.

AUTOMATIC DRILL CHUCK

A new, quick-acting automatic drill chuck has been placed on the market by the Canadian SKF Co., of Toronto and Montreal. It is known as the SKF "Gronkvist" drill chuck, and is made in five sizes, for straight shank drills, having a drill range of 1-32 in. to ¾ in. It will take the standard Morse taper arbors, it is stated, and may, therefore, be used, it is claimed, in practically any drilling machine within the limits indicated above.

The SKF drill chuck affords, it is stated, simpler and quicker methods of increasing drilling production, because it is a chuck for continuous operation, and involves no stopping of the machine to make necessary drill changes. The chuck holds and centres the drill perfectly, it is claimed, even in the hands of an unskilled employee. Its accuracy, it is stated, saves drills from breakage and the efficient grip saves shanks from being damaged. The SKF drill chuck requires no key or wrench. The operator, it is stated, may grip the shell of the chuck with the machine running at full speed, and without the use of any device other than his thumb and forefinger, release one drill and close the chuck on another.

The SKF drill chuck, it is stated, is

Automatic Drill Chuck

constructed along unique, simple and correct engineering lines; it contains no delicate parts, nor complicated mechanism, no screw-operated jaws to wear or lose their gripping power.

From the illustrations it may be seen that the jaws of the chuck are formed by three rollers bearing against the surfaces of a three-lobed internal cam. A coiled spring holds the roller jaws closed. The rollers, it is stated, are free to turn and reseat themselves with every drill release, thereby eliminating, it is claimed, possibility of wear or indentation along single line of contact. The drilling resistance, it is stated, forces these rollers up the cam surfaces, causing them to close upon and grip the drill shank with a power always proportionate to the drilling stress, thereby, it is claimed, precluding slipping of the drill under any conditions.

GRAIN SICKLE

The "Lightning" grain and rice sickle manufactured by Wiebusch & Hilger, Ltd., 106 Lafayette Street, New York, has, it is stated, a tempered steel blade, front polished, back natural oil finish. The handle, it is stated, is of hardwood with through tang and with steel washer riveted at the end of the handle. The sickle, it is stated, is well balanced and has maximum cutting qualities.

TABLE CUTLERY WANTED IN FRANCE

Mr. Phillippe Roy, Commissioner General for Canada in Paris, France, writes that a firm of importers in Paris desires to be brought into communication with Canadian manufacturers of table cutlery, such as knives, forks and spoons, large and small, n aluminium and in ordinary metal. Prices f.o.b. Canada. Cheapness is one of the particular points, but a higher class article can also be quoted. Catalogues, which are requested in duplicate, to be sent direct to Mr. Phillippe Roy, Commissioner General for Canada, 17 and 19 Boulevard des Capucines, Paris, France.

CARNEGIE—A GIVER, RATHER THAN A MAKER OF MONEY

Continued from page 51

enormous bonuses for results achieved; how he threatened competitors by announcing that he would build new plants and even build a new railroad to bring the Pennsylvania to its senses; how he frightened the country's leading money kings, and how he finished up by selling out to the organizers of the steel trust, are too well known to call for recapitulation.

His benefactions have included $60,000,000 for over 2,500 library buildings; $125,000,000 for the Carnegie Corporation of New York; $17,000,000 for colleges; $6,000,000 for church organs; $22,000,000 for the Carnegie Institution of Washington; $16,000,000 for the Carnegie Foundation for the Advancement of Teaching; $13,000,000 for the Carnegie Institute at Pittsburgh; $10,000,000 for the Carnegie Institute of Technology; over $10,000,000 for the Carnegie hero funds; $10,000,000 for the endowment of international peace; $4,000,000 for steel workers' pensions; $2,000,000 for the Church Peace Union, and $1,500,000 for the Hague peace palace.

It is as a giver, not as a maker, of millions that Carnegie will live in history.

Higher Pig Iron; Lead, Tin Lower

Montreal.

INGOT METALS.—The markets are somewhat quiet, and this is to be expected now. Copper has been rather inactive and the position of tin is really erratic. General trade is limited for these lines.

COPPER.—With advancing markets for some time, it would seem that the users have provided for their wants at prices less than those now prevailing. This reflects in a present quiescent condition. The market is a trifle easier at 26-27c per pound.

TIN.—This has been doing some stunts on its own account, in the matter of price change and the market has been more or less unstable. At 60c per pound there has been some trading in a small way.

LEAD.—The tone is easier and prices are marked down half a cent to 7¼c per lb.

ANTIMONY.—Lower prices are quoted on this metal and 10c per pound is the ruling price at Montreal. English antimony is expected to arrive early next month.

ALUMINUM.—This metal presents no new feature and prices are without change at 35c per pound.

PIG IRON.—While there is not a great deal of difficulty in meeting the limited demand, prices have firmed and $50 per ton is being asked. The United States market is a firming one.

Wire Solder Higher; Lead Products Held

Montreal.

LEAD PRODUCTS.—An advance has been made in the price of wire solder, these being from one to one and a quarter cents per lb. The price of regular grades is steady and unchanged, with a fair movement of these products and of lead specialties required by the trade.

TORONTO MARKETS

TORONTO, Aug. 14—Changes this week are generally upward and are largely attributed to higher production costs as a result of meeting increased demands from labor. One manufacturer of mechanics' tools has increased prices 10 per cent. on this account. Shotguns, shears, one line of food choppers and grindstones have followed the upward movement this week. Metal markets remain steady and all lines of iron and steel, sheets, etc., hold without change. Business is considered very good.

Revised Prices on S. B. Shot Guns

Toronto.

S.B. SHOT GUNS.—Single barrel shot guns have been revised this week, the new prices put into effect for the plain style being $11 each, with the ejector type 50c extra at $11.50 each.

Higher Prices Named on Valves

Toronto.

VALVES.—Higher prices have been recorded in Penberthy brass valves this week, due to the rapid advances which have been made in copper during the past few weeks. The discounts now prevailing are as follows:

Compodisk valves, 5 and 2½ per cent.; gate valves, 15 per cent.; regrinding valves, 5 per cent.; swing check valves, net list.

Sharp Advance in Food Choppers

Toronto.

FOOD CHOPPERS.—A sharp advance has been made in Gem Food Choppers this week according to new prices just issued. The present range of quotations which has been named to the trade is for the No. 16, $17.80 per doz.; No. 20, $27; No. 22, $34.50; No. 24, $46.90.

Revisions in Many Mechanics' Tools

Toronto

MECHANICS' TOOLS—New prices issued this week provide for an advance of 10 per cent. in all lines of P.S.&W. mechanics 'tools, manufactured at the Southington Works. The manufacturers intimate this move is necessary to meet the increased wages of labor whose demands have just been met.

Higher Prices Named on Shears

Toronto.

SHEARS.—Higher prices have been named on Hinisch shears during the week, the list advancing 10 per cent., resulting in a net advance approximating 7½ per cent. Labor costs are considered largely responsible.

Grindstones Show Advance of 50c

Toronto.

GRINDSTONES.—An advance of 50c per 100 lbs. has been made in prices issued this week on grindstones. The present figures are for the 40 to 200 lb. stones, $3.50 per 100 lbs., and less than 40 lbs., $4.25 per 100 lbs.

Rope Prices Hold Unchanged

Toronto.

CORDAGE.—Business is only considered fair by the manufacturers and the outlook does not seem to be for any great volume of trade during the next two or three months. No further revision from declines recorded last week is shown and whereas at many primary points the condition of the market seems rather unsettled no further declines seem immediately apparent. Quotations which are now ruling to the trade are: Pure manila, 32c per lb. base; Beaver manila, 28c; New Zealand hemp, 28c; sisal, 25c; sisal lath yarn, 25c per lb. base.

Stoves Move Well; Wares Are Active

Toronto

STOVES, WARES.—Already there is a fair amount of activity shown in the movement of stoves, which would seem to indicate the start of a busy season. In some quarters complaints are heard re deliveries already, and if this continues it looks as though the trade may experience difficulty in having requirements supplied. Prices are very firm and tending toward higher levels.

Activity is noticeable in all lines of wares and the outlook seems to be that this will continue. The market is firm without any change noted. The 10 per cent. extra discount which has been in effect on 3 doz. lots of nickel-plated tea and coffee pots and tea kettles has been withdrawn.

Steady Tone To Nails; Wire Firm

Toronto.

NAILS AND WIRE.—There has been no revision made in quotations which have been ruling on nails for some time past, though firmness marks the position of the market. Prices ruling are for the wire nails, $4.70 per 100 lbs., and cut, $4.75 per 100 lbs. base.

Smooth steel wire base remains at $5 per 100 lbs., an unchanged figure; other grades rule without change at usual extras. There is a very good demand apparent for baling wire and kindred lines.

Heavy Sales of Oils, Gasoline Noted

Toronto

OILS, GASOLINE.—Heavy sales continue to mark the progress of all lines of lubricating oils and greases with the market ruling at unchanged levels.

Coal oil shows no revision this week with the demand maintained at a high level. Quotations range from 20½c to 23½c per gal., according to grade. Gasoline is in much the same position, quotations being firm at 32c per gal. with activity noted.

Steady Tone Shown in Iron and Steel Bars

Toronto.

IRON AND STEEL.—There is nothing new in the situation on bars. A very good demand is shown, which is being taken care of from ample stocks. Quotations hold steady with firmness revealing itself in the markets.

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Wrought Pipe Very Firm; Tubes Hold

Toronto.

WROUGHT PIPE, BOILER TUBES.—A firm market is shown on wrought pipe and there seems to be some indication that revision to higher levels may be brought about in the near future. There is no change shown in prices given in current market quotations.

Boiler tubes are assuming greater activity and whereas this is not yet resulting in a heavy volume of trade, it is to be noted that improvement is showing. Quotations show no change, the following being the figures prevailing:

	Per 100 feet	
BOILER TUBES—	Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Market on Lead Products, Solder Firm

Toronto.

LEAD AND ZINC PRODUCTS.—The market shows no revision from quotations which were adopted last week, the metal markets remaining fairly steady. There is a good volume of business coming to hand and outlook is considered satisfactory. Range of prices follows:

Lead pipe, list, per lb.		$0 12½
Lead waste pipe, list, per lb.		0 13½
Do., over 8 inches, list, per lb.		0 14½
Above subject to discount of 10%.		
Lead traps and bends		15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 12	0 13

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb.	$0 35½	$0 38
Solder, strictly, lb.	0 34½	0 37
Solder, commercial, lb.	0 32½	0 35
Solder, wiping, lb.	0 31½	0 34
Solder, wire, lb.	0 35½	0 41
Zinc sheets, per lb.	....	0 17

Firm Undertone to Sheet Market

Toronto.

SHEETS, PLATES. — There is no change recorded as yet in sheets, though the undertone to the market is undoubtedly strong. There is a very good volume of business coming to hand and the general tone to trade shows decided improvement. Quotations being made to the trade range as follows:

14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 60	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Falling Off in Old Material Trade

Toronto.

OLD MATERIALS.—There is a falling off in the volume of business being done, owing to strikes and threatened strikes in the various steel and iron industries. Buyers are withholding purchases until labor unrest is a little more settled. This has not resulted in any change in market prices, which range around the following levels:

Dealers' Buying Prices—		
Tea lead	....	0 03½
Heavy lead pipe	....	0 05¼
Pipe scrap	....	6 00
Stove plate, per ton	....	13 00
No. 2 busheling	....	11 00
Yellow brass	....	0 09
Red brass	....	0 16¾
Light brass	....	0 07
Scrap zinc	....	0 06
Heavy copper	....	0 18
Wrought iron, No. 1, per gr. ton	....	14 00
No. 1 machinery cast, per net ton	....	18 00
Heavy melting steel	....	13 50
Old rubbers, boots and shoes	....	0 07
Overseas, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 02½
Automobile tires	....	0 03¾

Satisfactory Trade in Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — There is no change recorded in the situation on corrugated sheets this week. The volume of trade is good and the outlook seems to be for steadily increasing business. Quotations range at the following figures:

Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Metal Markets Halt; Tone Steady

Toronto.

INGOT METALS.—The markets generally have called a temporary halt, and there is no single market change recorded during the week. Trade is influenced adversely to some extent by labor unrest.

COPPER.—The tone to the market is quiet with no quotable change shown in the price of 27c per lb. generally effective. Supplies are ample to meet demands.

TIN.—There has been a fair amount of tin got through in spite of dock strikes in the Old Country, and no shortage of stocks is noted. Prices remain unchanged at 61c to 62c per lb.

SPELTER—Little of interest is shown in this metal. The demand is only considered fair and the market ruling around 10c to 10½c per lb.

LEAD.—A very fair volume of trade is reported and fairly stable conditions prevail. Prices remain around 7c to 8c per lb., representing unchanged quotations.

ANTIMONY. — The market holds firm at 10c to 11c per lb. Trade is good and supplies coming along in ample volume.

ALUMINUM.—Prices show no change from the 35c per lb. level. Trade is showing slight improvement.

LONDON MARKETS

LONDON, Ont., Aug. 14—Prices are all very firm and many lines of goods are difficult to obtain in any quantity. Business all through this section continues unusually brisk with a heavy demand for builders' hardware and household goods. The farmers are large buyers and the demand from the territory around London has been steady and heavy. Indications point to a continuance of building activity that will mean, it is expected, a demand throughout the season. Some large projects are under way and more are planned. Collections are good. Indications point to a brisk demand for ranges and cook stoves and extra good sales of carpenters' tools and hand saws.

New Prices For Rope Are Now Effective

London, Ont.

ROPE.—There is a very fair demand for rope. The new prices are now in effect, the quotations being as follows:

Pure manila, 32c lb. base; British manila, 28c; New Zealand hemp, 28c; sisal, 25c.

Higher Quotations For Mop Wringers on Pail

London, Ont.

MOP WRINGERS ON PAIL.—Higher prices for mop wringers on pail have been named, the figures being as follows: Domestic, $29 per doz.; Standard, $33 per doz.; Janitor, $40 per doz.

All Lines of Yankee Tools Are Advanced

London, Ont.

YANKEE TOOLS.—Advances which approximate 10 per cent. have been made on all lines of Yankee tools. The quotations on some of the best sellers are:

Ratchet Screw Drivers—No. 11 x 2 in., $7.30 dozen; 3 in., $9.05; 4 in., $9.65; 5 in., $10.60; 6 in., $11.95; 8 in., $13.50. No. 12, $10.50 dozen. No. 15 x 3 in., $8.45 dozen; 4 in., $8.85; 5 in., $9.25.

Spiral Screw Drivers—No. 20 x 1, $21.55 dozen; No. 20 x 2, $25.05 dozen; No. 30, $33.70 dozen; No. 31, $45.25 dozen; No. 130, $38.50 dozen; No. 131, $52.00 dozen.

Yankee Automatic Drills—No. 40, $32.75 dozen; No. 41, $29.25; No. 42, $23.10; No. 43, $14.65; No. 44, $35.15.

Yankee Hand and Breast Drills—No. 1430, $3.35 each; No. 1445, $6.00; No. 1455, $6.95.

Cast Iron Dampers Revised Upwards

London, Ont.

CAST STOVE PIPE DAMPERS.—Higher quotations on these goods are in effect, the quotations being for 6 in., $1.25 per doz.; for 7 in., $1.60 per doz.

Ten Per Cent. Jump Made in Pump Leathers

London, Ont.

PUMP LEATHERS. — An advance which will figure out to about 10 per cent. has been made in pump leathers, the new figures being as follows:

Valve or Plunger—No. 1, $1.10 dozen; No. 2, $1.45; No. 3, $1.65; No. 4, $2.05.

Cup Leathers—No. 1, $1.50 dozen; No. 2, $2.05; No. 3, $2.60; No. 4, $3.05.

Carpenters' Squares Increase in Price

London, Ont.

CARPENTERS' SQUARES.—An advance is shown in these goods and the new quotations are:

No. 14, $24.25 dozen; No. 3, $27.00; No. 10, $8.50; No. 501R, $30.00; No. 1004, $30.00; No. 5000, $36.00.

Lawn Mower Prices Will Hold Unchanged

London, Ont.

LAWN MOWERS. — No change in spring booking is shown in prices for Taylor-Forbes lawn mowers, the quotations for Daisy, Star, Woodyatt and Empress being 35 per cent. of list.

Advance is Shown in Welding Compound

London, Ont.

WELDING COMPOUND. — Welding compound has been revised upwards and the new prices are: Climax, 12c per lb.; Borazette, 12c, and Cherry Heat, 12c.

Plaster Paris is Revised Upwards

London, Ont.

PLASTER PARIS.—Higher prices for plaster paris are effective, the quotations being, $4 per bbl. in bbl. lots and 3c per lb. in small lots.

Brisk Demand For Fly Oil For Cattle

London, Ont.

FLY OIL.—There has been, owing to the prevalence of insect pests, a brisk demand for fly oil for cattle. Quotations are: Dr. Williams, half gal. tins, $8 per doz.; 1 gal. tins, $12 per doz.

Cattle Chains and Lanterns Sell Well

London, Ont.

LANTERNS, CATTLE CHAINS.—Lanterns are selling well, the prices for tin well lanterns, long or short pattern, being $12.50 per doz.

Cattle chains are quoted at 20 per cent. off list.

Glass and Putty Are Moving Well

London, Ont.

GLASS, PUTTY. — Glass is moving well for the fall trade, prices being as follows: single diamond, 25 per cent.; double diamond, 25 per cent.; cut light, 10 per cent.

There is a good demand also for putty. Quotations are unchanged, the figures being: Standard, 100 lb. drums, $6.80 per 100 lbs.; 25 lb. drums, $7.05; Pure, 100 lb. drums, $9.30; 25 lb. drums, $9.55.

Nails Are Firm; Axes Now Selling

London, Ont.

NAILS, AXES. — Nails are selling well. Prices are firm, the quotations being: wire, $4.70 base, and cut, $4.75.

Handled Axes—Cherokee, $20.50 dozen; Eagle, $17.50 dozen; True Set, $23.00 dozen.

Axe Heads—Keystone, $13.25 dozen; Cherokee, $15.50; Hand-made, $15.50; Black Diamond, $16.00; True Set, $16.00.

Prices Are Firm For White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—Prices are firm but no changes are recorded from the following: Pure, in tons, $16.35 per 100 lbs.; less tons, $16.70.

Linseed Oil Prices Holding Unchanged

London, Ont.

LINSEED OIL.—With a very fair demand for linseed oil prices are holding without change, the quotations being:

	Raw.	Boiled.
1 to 2 barrels, gal.	$3 22	$3 25
3 to 5 barrels, gal.	3 21	3 24
6 to 9 barrels, gal.	3 19	3 22

Less barrels, add 10 cents gallon.

Turpentine is Showing Strength

London, Ont.

TURPENTINE. — The quotations on turpentine show a decline, but the market is quite strong. The quotations are: bbl. lots, $2.40 Imp. gal.; 2 to 4 bbl. lots, $2.39; 5 gal. lots, $2.50.

Rosin Prices Are Advancing Steadily

London, Ont.

RESIN.—Prices of resin are steadily advancing and the new quotations are: casks, 11½c per lb., and 14c per lb. in small lots.

WINNIPEG MARKETS

WINNIPEG, Aug. 14—Price changes for the week show very few alterations over former quotations. The markets in general are firm and advances rather than declines are to be expected on future purchases. Among the lines affected during the week appears soldering coppers, hog rings, hog ringers and tongs and fire backs.

Business is still very brisk in all the seasonable lines, such as harvest tools, scoops, stove pipe, elbows, stoves, stove boards, lanterns, etc., while good sales are also recorded on builders' hardware lines.

Advance Shown in Soldering Coppers

Winnipeg.

SOLDERING COPPERS. — Soldering coppers show a further revision during the week, new prices being figured on 37½c base, making to-day's net prices on the carious sizes as follows: soldering coppers, ¾ lb., 44½c lb.; 1 lb., 43½c lb.; 1½ lb., 40½c lb.; 2 lb., 39½c; 2½ lb., 38½c; 3 lb., 37½c.

Reduction Made in Fire Backs

Winnipeg.

FIRE BACKS.—Diamond and Sovereign fire backs have been reduced to lower levels during the week, following further factory reductions, and are now selling at the following figures: Diamond fire backs, $11.50 doz.; Sovereign, $11.50.

Five Per Cent. Drop Made in Hog Rings

Winnipeg.

HOG RINGS, TONGS.—Reductions are recorded on hog rings, hog ringers and tongs during the week, based on new price lists issued by manufacturers and show a drop approximately 5 per cent. below former quotations. To-day's selling prices are as follows: hog rings, No. 1, 72c; No. 2, 72c; No. 3, 72c; hog ringers, No. 1, $1.70 doz.; hog tongs, No. 4, $4.30 dozen.

Black and Galvanized Sheets Holding Firmly

Winnipeg.

BLACK, GALVANIZED SHEETS.—Prices on black and galvanized sheets still hold firm on the local market, with a good demand reported, and although reports from some American producers hint at advances, no immediate change is looked for. To-day's ruling prices are given as follows:

Galvanized Sheets—10¾ oz., $9.40 per 100 lbs.; 28 ga., $9; 26 ga., $8.70; 24 ga., $8.55; 22 ga., $8.55; 20 ga., $8.40; 18 ga., $8.40; 16 ga., $8.25.
Black Sheets—28 ga., $8 per 100 lbs.; 26 ga., $7.90; 14 ga., $7.85; 22 ga., $7.85; 20 ga., $7.80; 18 ga., $7.80; 16 ga., $7.25; 14 ga., $7.25; 12 ga., $7.10; 10 ga., $7.05.

Rope Prices Are Expected to Decline

Winnipeg.

ROPE.—Rope prices still continue unchanged on the local market. However, heavy stocks of raw material are no doubt responsible for a weaker tone and lower prices are expected within the week, which will no doubt average from 2 to 2½c per lb. below to-day's prices, which are confirmed as follows: pure manila rope, 35¼c per lb. base; sisal, 28¼c; British manila, 31¼c; African hemp, 31¼c; lath yarn, 28¼c.

Barb Wire Prices Are Showing Strength

Winnipeg.

BARB WIRE.—Prices on barb wire are reported very firm in all quarters, and reports from American manufacturers show advances in this product of 10c per spool, following the recent advance of $5 per ton on wire products. No immediate change, however, is anticipated in the local market as it is not likely that Canadian manufacturers will follow the American advances. Prices now ruling are given as follows, f.o.b. Winnipeg: Lyman, $4.85 spool; Glidden, $4.65; Baker, $4.55.

Wrought Iron Pipe Shows No Changes

Winnipeg.

WROUGHT PIPE.—Prices on wrought iron pipe still hold firm on the local market, and no change in price is looked for in the immediate future, although advances are reported from some American mills. To-day's ruling prices are given as follows:

WROUGHT IRON PIPE.

	Black	Galvd.
	Per 100 ft.	
¼ in.	$4.91	$ 7.20
⅜ in.	5.00	7.34
½ in.	6.66	8.37
¾ in.	8.83	10.71
1 in.	12.33	15.75
1¼ in.	16.65	21.29
1½ in.	19.94	25.43
2 in.	26.82	34.25
2½ in.	43.07	54.77
3 in.	56.40	71.70
3½ in.	73.86	.....
4 in.	87.25	.....
4½ in.	100.26	.....
5 in.	116.82	.....
6 in.	151.52	.....

Turpentine Soars To New High Levels

Winnipeg.

TURPENTINE. — Turpentine prices continue to soar and this week have again advanced 35c per gal., reaching the highest prices ever recorded on the local market. This is due to the shortage of turpentine output, which this year is reported to be only half of the average pre-war outturn, while orders are pouring in from Europe. Some of the largest producers of turpentine have, it is said, already sold their entire output for the balance of the year. To-day's prices are given as follows: barrel lots, $2.70 gal.; ½ barrel lots, $2.73; 5 gal. lots. $2.75; 1 gal. lots, $2.75 gal., plus the usual extras for containers.

No Changes Made in Price of Linseed Oil

Winnipeg.

LINSEED OIL.—Linseed oil prices show no change during the week, holding firm at former prices, which are given as follows: raw linseed oil, $3.10 gal.; boiled linseed oil, $3.13 gal., with a fairly good demand reported.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Aug. 14.—The volume of orders flowing to the steel mills keeps up very well, easily exceeding the current production, but an element of uncertainty has been injected into the situation, in that some of the buying may be prompted by fear that mills will have difficulty in making deliveries later in the year, either through their having too much business or through there being strikes. The steel producers think it highly improbable that the efforts of the American Federation of Labor, in the direction of having a general strike in the steel industry, will lead to anything, but in this matter it is not a question of what the producers think, but of what the buyers have in their minds. Strikes as affecting steel production, moreover, are not all in the future by way of probabilities or improbabilities, for the strikes of railroad shopmen have curtailed pig iron and steel production materially in the past ten days, considerable parts of the South Works and Gary Works in the Chicago district having been thrown idle through lack of transportation facilities, as well as practically the entire Newburgh works, Cleveland. The three plants mentioned are all controlled by the Steel Corporation. On the whole, steel mill labor itself appear sto be contented and to realize that it is well treated. The Steel Corporation in particular asserts that its men are well satisfied with their treatment, and the Steel Corporation takes great pains to ascertain the exact facts in this matter. Two incidents may be mentioned. The Leechburg and Vandergrift works, near Pittsburgh, of the corporation's sheet and tin plate subsidiary, employ about 2,000 men, and recently a mass meeting of these men gave an enthusiastic viva voce vote to a set of resolutions to the effect that they intended to keep at work "under present conditions" and that "we resent any interference by any union, outsiders, or paid agitators." Another incident is that at two independent tin plate plants the men asked the management to give them, not the Amalgamated Association, the union scale, but the open shop scale of the Steel Corporation's tin plate plants.

Steel Prices

The whole country has been much wrought up lately over the high cost of living and deep interest is taken in the efforts being made by all branches of the Government to bring it down by all methods available, including the punishment of profiteers. All price advances must prove very unpopular. Hitherto there have been divided counsels in the steel trade as to the propriety of advancing prices at this time, with the Steel Corporation and some of the independents positively opposed to there being any advances. In view of the state of popular feeling it is likely that the minority, which has been talking higher prices, will change its attitude.

In the pig iron market several price advances have been announced. Alabama furnaces state that they are back to the March 21 price of $26.75 on No. 2 foundry iron, which would put them in an impossible position as to sales in much of their territory when various northern furnaces, with much smaller freights, are still at $26.75, furnace. Chicago district furnaces are reported to have advanced their prices $2 a ton, and two Cleveland furnace interests report having made an advance of 50 cents. The Pittsburgh market is merely firm at the old price. The price advances are probably simply "on paper," the furnaces making them being sold up for a time. If 55 per cent. of the merchant furnace capacity of the country can advance prices without any of the idle 45 per cent. coming into blast then there is something possible that has never occurred before in the history of the industry. Usually the market is rather wobbly as idle furnaces come into blast, because

matter of exports for some time to come, and general comparisons may therefore

The Brush Department

An Occasional "Special" in Brushes Will Help Speed Up Turnover in This Department

Some Dealers Prefer One Day Sale—Others Who Wish to Reach Farming Population Find Two Day "Special" on Friday and Saturday Produces the Best Results

ONE way to speed up the turnover in brushes is to offer a "special." Some dealers make a special of this kind for one day only, others get the best results by spreading it over two days, always choosing the last two days in the week when a farming population has to be reached.

There are always a lot of people who will be keenly interested in a sale of this kind, and with a little well-timed advertising it can be made to produce good results. A list such as is shown in the accompanying illustration will be read carefully and checked up closely by scores of householders who will be only too glad to supply their wants at reasonable prices.

J. G. TWEDDLE

The Store with a Stock. See our Automobile Tires.

PHONE 127w

There are occasions when dealers sometimes find that a little price concession is appreciated. It is not always on brushes that this is tried out, but here is one merchant who devoted a good-sized ad. (just twice the size of the reproduction) to pointing out "Brush Specials." J. G. Tweddle is located at Fergus, Ont.

Always Give Prices

It is, according to dealers who have tried the plan, essential if the best results are to be obtained, that prices be given, and given in good plain figures. People can figure out for themselves in most cases how much they are going to save by buying at the prices quoted, but they want to know exactly how much they are going to pay and they will come into the store with that price fixed in their minds.

If the advertising matter is backed up by a window display and a little care taken in arrangements, and price of each article shown, the sale should reach its maximum of success.

Emphasize Value

One or two cards placed in the window emphasizing the big value and the money to be saved by making purchases at the "special" prices, will also help. In the accompanying advertisement it will be noted how the dealer has emphasized effectively in his copy the saving. The list of offerings is an attractive one and the effect on the reader's mind is favorably stimulated by the phrases: "The up-to-date hardware store," and "The Store with a Stock."

WINDOW GLASS SITUATION IMPROVING

During the past week the Johnston Brokerage Co. issued the following letter, answering inquiries received relative to the present situation. It is as follows:

"Very little has been said about the movement of glass recently, but through our office there has been most unusual activity during July. This is by far the most active month in 1919, and by August 1, 60 per cent. of the glass we had in our warehouses at the close of the first operating period will have been sold, and as our factories closed with about 600,000 boxes you can well understand what this means. The starting up of factories to operate the second period will be most welcome, as the orders that we have in our office for assignment will make a splendid showing for every factory whose product we sell, and from all indications the glass manufactured during the second operating period will be absorbed about as rapidly as it is produced as there is no question of the demand being equal to the output, and as prices are more likely to advance than to decline, the trade over the country has been pretty generally anticipating their wants for the balance of this year.

"We have booked some very substantial contracts and have others in process that we are confident will become actual shipping orders within the next thirty days, and we believe you will be serving your own interests best by placing your orders early. This will insure your service and perhaps better quality, and in every way will place you in position to take care of the business that is bound to come to you very soon if you are not already experiencing it.

"This is not a trade letter, written solely to induce buying, but it is our real view of the market, and in answering personal letters from our buying friends we unhesitatingly advocate filling up their warehouses to normal. The orders we have for the factories to start off will take from 25 to 30 per cent. of the glass that they will make for the operating period, and it might be of some interest as comparison to state that this percentage represents our total sales of glass during the fourteen weeks from February 8 to May 24, so that if we have from one-fourth to one-third of the season's production contracted it shows most surprising strength.

"The building movement is under full sway, but it is somewhat retarded now by labor troubles, which we presume will be soon adjusted."

PRATT AND LAMBERT DIVISIONAL SALES MEETINGS

At the semi-annual divisional sales meetings of Pratt & Lambert, Inc., held in Chicago ,Buffalo and New York, reports were presented which showed record sales. The firm is planning a larger and more comprehensive advertising campaign for the fall. At the meeting in Chicago the "Peanalers" were guests at a dinner at the South Shore Country Club, Wm. H. Andrews acting as toast master.

A feature of the Buffalo meeting, in which the Canadian sales force joined, was a dinner at the country club, where Brig.-Gen. Atterbury, vice-president of the Pennsylvania Railroad, addressed the diners, touching briefly upon his work as director general of transportation of the American Expeditionary Forces in France.

Speaking particularly of the business outlook for the varnish industry President McNulty stated that post-war building operations had already resulted in greater sales, and that other agencies, such as the "Save the Surface," and "Build Now" campaigns could only prove beneficial to all concerned.

"CLEAN SWEEP" BROOMS

ESTABLISHED SINCE 1856

Customers find that Boeckh's CLEAN SWEEP BROOMS sweep easier and better than the old style Corn Broom. They do not raise the dust and are specially adapted for sweeping carpets, rugs, mattings, etc. The patent "Screw Lock" handle can be adjusted to suit the height of the operator.

BOECKH'S HOUSEHOLD BRUSHES

assure the dealer of a fair margin of profit. Backed by consistent advertising, a policy of co-operation, and dealer aids, Boeckh's Brushes are easy to sell, creating many satisfied customers. Your enquiries are solicited and will receive prompt attention.

THE BOECKH COMPANY, LTD.
TORONTO, CANADA

UNIMECO WROUGHT WASHERS

We manufacture a wide range of **wrought washers** of every description. Round and square in plain and galvanized.

"Unimeco" washers possess superior quality and unusual finish.

We can also supply you with **Annealed Rivet Burrs** of the same high quality. The "Unimeco" line is a profitable one for you to handle. Write us for information and prices. We ship promptly.

DON'T KNOCK YOUR COMPETITOR

Continued from page 60

general. Knocking of that sort butts two ways. It butts the fellow that knocks and also destroys confidence in the trade in general.

"Nor did it stop there with me," continued Jim; "you know that we've been pretty well worried in these parts over the mail order business. What I used to do to Harry wasn't a patch on what I handed out to the mail order houses. The way that farmer took me up about knocking Harry Parkes set me thinking that all my hullabaloo might be just so much more advertising for the mail order catalogue as well.

Was Helping Them

"Naturally I set to looking about myself and trying to see the thing from another angle. I found that instead of hindering them I was just handing them out so much free advertising. Nearly everybody has just that much natural curiosity that will cause them to look for the reason of any commotion. A dog-fight gets more attention than a pretty girl while it lasts. My farmer customer just showed a typical human tendency.

"But mark you, that doesn't mean that I quit putting up a fight against the mail order business. Not by a darn sight! I had to change my method of fighting that was all. Instead of wasting energy in advertising them as I had been, I decided to leave them strictly alone and boost my own business. I found that the time I wasted in pouring out imaginary troubles could be better spent in getting the business that was right at my own door. I was letting these fellows take it right from under my nose while I sat and hollered and the more I hollered the more they took.

Got Together Again

"It was kind of funny too, how it all worked out. It so happened that Harry Parkes and I sat together at a social affair one evening, and after we got the cigars going we started talking business. Harry mentioned the mail order houses and I told him about my alteration of manoeuvres regarding them. One thing led to another and I mentioned the farmer incident. Before the evening was over I found out more about Harry Parkes than if I had stood off a year with the old knocking idea. I also found out that there were a whole lot of things I thought I knew about Harry that could be forgotten.

"To-day Harry and I are fighting the mail-order business tooth and nail. But we're not doing it with our tongues. We're spending our time going after the business much the same as they do. You'll notice that the mail order house never wastes time, money or energy knocking the smaller fellows. They just settle down to sawing wood. We're taking a page out of their book and following suit.

"So far as that is concerned, both Harry and I tend to our own knitting. Whenever we can give each other a boost we do so. But the big thing about the paint business is, that by leaving out the knockers it promotes greater confidence in paint and its uses. I've stopped promoting suspicion about my competitor and the trade in general and I'm finding that we're both doing bigger and better business.

"Mischief always starts when you commence tampering with another chap's affairs. The fellow that attends to his own business hasn't got to carry his own worry and the other fellow's worries as well. Besides, he's got more time to straighten out his own troubles and get somewhere else beyond where he is. If I happen to get some of the other fellow's business by good straight legitimate means that's my affair and his lookout, so long as I don't put a deliberate stumbling block in his way. Boosting my own affairs and leaving him strictly alone I find gets me ahead. Knocking, I found, left him ahead and me behind."

PRACTICAL POINTERS FOR PAINT SELLERS

PRACTICAL POINTERS FOR PAINT SELLERS

HARDWARE dealers and their employees are frequently asked questions by buyers, house owners, farmers, women and others that require some practical knowledge to answer. By being in a position to give this information, and give it quickly and accurately, the dealer will not only render real service to the buyer, but lay the foundation for future business, because the satisfied customer, next time he or she has some work in mind, will come again for information and also for the paints or varnishes to work with.

From time to time practical pointers for paint sellers will appear in HARDWARE AND METAL under the above heading. It might be a good idea for dealers and others to keep these for reference and also so that they may be shown to new employees.

Paint Selling Cannot be Done on a "Self-Serve" Basis

IT would be a highly dangerous thing to arrange paints and varnishes on a table, put a price tag on them and tell customers to take their choice and leave their money at the wicket.

Probably no other line of goods requires more personal contact and confidence between buyer and seller than paints and varnishes.

Ninety per cent. of the public who buy paints and varnishes expect as part of the sale that the seller shall advise him or her what to do, how to do it, and what not to do with their purchase.

The clerk's treatment of the customer is then a very highly important part of successful paint selling.

The seller's attitude towards the buyer should be wholly that of one who is an intelligent human being with whom business should be done to mutual advantage.

In reality this obligation is much more on the side of the seller than the buyer. He should feel obliged to enlighten the buyer in every way possible with all the technical knowledge in his possession. He should not let a buyer go away until he felt that that buyer possessed every phase of knowledge essential to the successful accomplishment of the purpose he has in mind with his purchase.

This obligation makes it necessary that this service on the part of the seller shall be intelligent and helpful since these are necessary to obtain and maintain confidence, and the complete satisfaction of the customer.

To accomplish this purpose it is necessary that the seller should have at his command a general knowledge of the raw materials which enter into the manufacture of paints and varnishes. He should also know to some extent why they are used.

Following this he should be able to explain the outcome of the use of certain paints and varnishes as against the outcome of the use of others for certain purposes and under certain conditions.

The necessary qualifications and conditions of the surface in order that a paint and varnish may be properly used and applied should be explained to the customer so that he will not get into trouble.

Upon the seller rests a great deal of responsibility towards the buyer and towards himself in building up a successful paint and varnish business.

In this form of selling there exists a vast opportunity for salesmanship which may be defined as competent service and which will build up confidence and better business.

It is our purpose in this column, to give from time to time in a general way, information of a technical and practical nature that will enable the seller to render this sort of service to the buyer.

For a starter we shall define both paint and varnish in a general way, after which we shall go a little more into detail in succeeding issues.

(Continued on page 68)

Varnish Advice

Now that most buyers realize so thoroughly the necessity and economy of careful discrimination in varnish buying, they appreciate more than ever reliable advice as to what finishes to select for their finishing operations.

The dealer has many opportunities of posting his customers along this line and earning their permanent good will.

Liquid Granite FLOOR VARNISH Luxeberry WHITE ENAMEL

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, August 14.—Turpentine has drawn to itself the great interest of the week. Its upward trend has been continuing steadily and the only quotation available this week is that of $2.50, with this price applying to 5-gallon lots, there being, it is said, no stock available in barrels. Naturally the movement is small at these high prices, and jobbers, in any case, are not anxious to sell. Linseed oil has rested and is without change of price. Few are quoting at all. Shellacs have advanced to the extent of 50 and 75 cents per gallon. Putty and white lead are continuing very firm and are quite active. Pure linseed oil putty is particularly strong.

Mixed paints and kindred lines are reported as moving well for this time of the year and the manufacturers are well pleased with conditions.

Linseed Oil Held Without Change

Montreal.

LINSEED OIL.—Scarcity of oil still prevails but there is a more settled condition than for a little while past in the price basis. Few jobbers are naming any price whatever, and the quoted prices of last week still obtain here. Demand is seasonable, which means that the sales are in limited, rather than in large quantities.

Raw—	Imp. Gal.
1 to 4 barrels	$3 05
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$3 07½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Turpentine in Small Lots at $2.50

Montreal.

TURPENTINE.—There is an unprecedented advance in the turpentine price basis here and little stock is to be had. The likelihood of an improvement coming soon is remote, and higher prices will perhaps prevail ere there is a lowering. There was a decline a few days ago in the Savannah market, but the bareness of stocks there and at all points makes low price suggestions seem absurd. The only quotation here this week is that of $2.50, and this is for 5-gallon quantities, packages charged extra.

Turpentine—	Imp. Gal.
1 to 4 barrels	....
Small lots (Packages extra).	2 50

Putty is Firm; Very Good Sale

Montreal

PUTTY.—The sale of putty has been remarkably good with some of the jobbers, and much larger than usual for August. Prices are very firmly maintained, but, owing to the advance of the season and the resting of oil prices somewhat, changes in the way of an advance may be somewhat deferred. All jobbers refer to the situation as a decidedly strong one.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil Has Active Spurt

Montreal.

WHITE LEAD IN OIL.—There has been a great deal of activity in white lead in oil, and the sales have totaled large. Even from outside some report inquiries. The undertone is quite as firm as ever and there is unlikely to be any easing in the basis. For standard grades the prices are: Five ton lots, per 100 pounds, $15.50; ton lots, $16, and for smaller lots than tons, $16.35.

August Movement is Heavy For Paints

Montreal.

PAINTS AND SPECIALTIES. — Several manufacturers have reported a decidedly active condition. This comes, apparently, from continued painting activity in various parts of the country for the Western jobbers are sending orders in steadily and urge prompt shipment. The movement for August is away beyond expectations, it is stated. Price tendencies are naturally very firm.

Shellac is Higher; Rosin Up; Glass Firm

Montreal.

SHELLAC, ROSIN, GLASS.—An advance of 75c per gallon for white shellac and of 50c for orange is made this week. This brings the price, in barrels, to $7 per gallon for white and to $6.25 for orange, with an increase of 25c per gallon for ones. Rosin is scarce and high, the present basis being $23.50 per barrel for "G." Supplies are very small. Glass is moving quite actively and there is a firm undertone, though no advances are suggested for the immediate present here.

TORONTO

TORONTO, August 14. — After soaring to $2.50, turpentine has reacted very slightly, and to-day's quotations range $2.40. The market is a very firm one and supplies are very scarce as a result of shipments being delayed. The linseed oil situation shows little change, prices holding at from $3.20 to $3.27 for raw and $3.22½ to $3.30 for boiled. A good volume of business is being handled. A further advance is expected in the prices of shellac.

Turpentine Market Remains Very Firm

Toronto.

TURPENTINE—Strikes all through the South of railwaymen and a strike in Chicago which involves 200,000 railroaders have resultd in shipments of turpentine for local dealers being held up indefinitely and as a result supplies are getting very low. Prices soared during the week to $2.50 per imperial gal. but at present are slightly easier the quotations being around $2.45. This is a reflection of the prices in the South where owing to the Germans having been unable yet to make satisfactory credit arrangements, shipments which were destined for overseas are held up. This is believed, however, to be only temporary and a very firm market is looked for. The quotations are:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$2 40
2 to 5 barrels (barrel included)	2 39
5 gallon lots	2 50

No Changes Shown in Prices of Linseed Oil

Toronto.

LINSEED OIL.—Linseed oil prices are holding firmly with the market a strong one. Prices of October seed to-day advanced five cents, but this did not affect oil prices. Crushers are finding it difficult to maintain their supplies of seed, having not only trouble in getting sufficient quantities of seed but also slow deliveries. One crusher stated to HARDWARE AND METAL that he looks for a strong and firm market for the next two months. The crop report issued by

YOUR OPPORTUNITY

There is nothing to prevent the B-H agent from doing *the* paint trade in any locality. On the other hand, when we ask a merchant to throw in his lot with us, we do not sit idly by and expect him to do all the "hustling for trade." Great though our line is in quality, favorably known though it is to householders everywhere, still we believe no product can to-day maintain leadership without constant and aggressive advertising.

So—advertising is bracketed with quality in our proposition to you—and by every form of publicity approved by merchandising experts, we aid our agents in making known to their customers the facts about B-H products which account for their Dominion-wide popularity and prestige. Write us for particulars.

Save the surface and
you save all" *Paint & Varnish*

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

the United States Government estimates the yield at 10,000,000 bushels. This is 3,000,000 below what was expected. The Canadian crop will also be short. In the meantime the great bulk of the seed from the Argentine continues to move overseas. The general outlook is for no relief from the situation until the new crop comes in. Quotations are as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$3 20	$3 27
3 to 5 barrels, gal.	3 19	3 26
10 barrels and over	3 17	3 24
	Boiled	
1 to 2 barrels, gal.	3 22½	3 30
3 to 5 barrels, gal.	3 21½	3 29
10 barrels and over	3 19½	3 27

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Shellac Prices Expected to Rise

Toronto.

SHELLAC.—An advance in the quotations on shellac is expected at any time. Supplies are scarce and there is a steady demand. The figures given by various firms at the present time show a wide range, and many of them will only sell in small quantities. The present quotations are shown in the current market.

Demand Continues For Prepared Paints

Toronto.

PREPARED PAINTS.—Business continues active in prepared paints and a steady volume of repeat orders is coming in. Prices show no change and manufacturers expect that the present quotations will hold for some time.

White Lead in Oil Remains Unchanged

Toronto

WHITE LEAD IN OIL.—Business in white lead in oil continues active. Prices are holding unchanged, the quotations being: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $1670.

Window Glass Firm; Putty Prices Steady

Toronto

WINDOW GLASS, PUTTY. — Increased activity in the window glass trade is apparent and indications point to a steadily larger volume of business. The new quotations are not yet in effect. Stocks, it is stated, are sufficient to take care of all immediate business. Putty prices are holding firm as follows:

Standard Putty —	5 ton	1 ton	Less
Bulk, in barrels	$ 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 80
Do., 25 lb. iron	6 45	6 70	7 05
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 70

PRACTICAL POINTERS FOR PAINT SELLERS

(Continued from page 64)

Paint is a mixture of pigments and liquid vehicles intended for application (ordinarily by means of a brush) to surfaces for purposes of preservation and decoration. The simplest form of paint consists of a single pigment in linseed oil, containing also a small percentage of volatile "thinner," such as turpentine, with the necessary dryer.

The higher grades of house paints, however, usually contain several pigments. The whites, for example, may contain two types of white lead, zinc oxide and a percentage of inert pigment, and the shade and tints, in addition one or several colored pigments.

The Great Essentials

The object of the manufacturer is to obtain the greatest possible spreading rate, the highest effective hiding power of opacity, together with the maximum permanence of color and durability of coating, and to secure all these qualities at a cost which will insure economy to the consumer.

What is Varnish?

Varnish is a broad term covering many varieties and classes of products; but in a general way it may be described as a solution or fluid, usually transparent or translucent, though occasionally opaque, which, when spread upon a surface in a thin film, dries by the evaporation of its volatile constituents by the oxidation of other constituents, or partly by evaporation and partly by oxidation, to a continuous protective coating, which may be either highly lustrous or practically devoid of lustre.

The transparent and translucent forms are clearly differentiated, but some of the opaque forms are distinguished from paint only by their compositions, the varnish in such cases containing resins or gum resins as an essential constituent. The types of varnish commonly sold by dealers are essentially solutions of gums or resins, in drying oils with drying salts and volatile thinners; such solution being accomplished by the aid of heat in a complicated series of processes.

THESE ARE ACTUAL FACTS

"We are as busy in our factory as in the month of June. Our men have had to work until 10 p.m. to overtake orders and still we are behind on deliveries. Our branches are calling for goods and we cannot supply them fast enough. Business is exceedingly heavy and we do not know where it comes from."

This, in part, is the trend of a conversation HARDWARE AND METAL had this week with a leading paint manufacturer. And this activity was not confined to the prepared paint departments, or in fact to any one department. "We are just as busy in our lead corroding works and in our putty plant. We have orders in hand for lead that will run us well into October. Urgent enquiries have even come in from the United States for supplies, and when we could not make a definite quotation we were asked to say when delivery could be made and at what prices."

Here is a little indication of what splendid business is being done by paint manufacturers. It is the best argument with which to combat any dull times talk that may emanate from the usual disgruntled element known sometimes as whiners. It proves that the manufacturer who has been talking good times, thinking good times and practising what he has been preaching, has no complaint to make. This, surely, is a time of progress, an era of big trade expansion. Talk, think and feel thus, and prosperity will prevail. It cannot be otherwise if we will it so, here in Canada.

MAY BE SHORTAGE OF SHELLAC

Another advance has been made in the price of shellacs. The increases made in recent months have been occasioned through decreasing supplies, and it is beginning to look, now, as though there may be a real bare market in Canada.

"There is practically no white shellac to be had at all," said a large manufacturer to HARDWARE AND METAL this week. "What there is is ruling very high. Orange shellac is still to be had but it, too, is getting short in supply and there will not be any improvement we expect."

Iit was pointed out that liquid wood fillers are extensively used as a substitute for some work. This answers very well for many purposes where shellacs are used and there will be no alternative but to use it more and more if the shellac situation does not improve materially, and soon.

ROSINS ARE HIGH AND SCARCE

There is no relief from the upward tendencies prevailing for rosins. Supplies are even scarce in Montreal, and there is little prospect of much improvement at this time. The present basis for "G" grade is ruling, nominally, around $23.50 per barrel. Whether there will be any stay in the upward price movement is uncertain, but at the moment this is a remote possibility.

BRANCH MANAGERS CONVENE AT FERGUS, ONT

All the branch managers of Beatty Bros., Limited, manufacturers of barn equipment, churns, washers, etc., gathered together at the head office in Fergus, Ont., from August 4 to August 7. Sales plans for next business year, which starts on September 1, were discussed, and plans were made to extend the firm's service during the coming year.

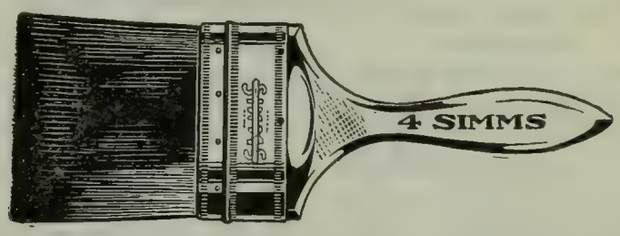
Beatty Bros., Limited now have branch offices from the Atlantic to the Pacific, running from St. John, N.B., to Vancouver, B.C.

After the convention at head office was finished all the branch managers paid a visit to the factories in London, Ont.

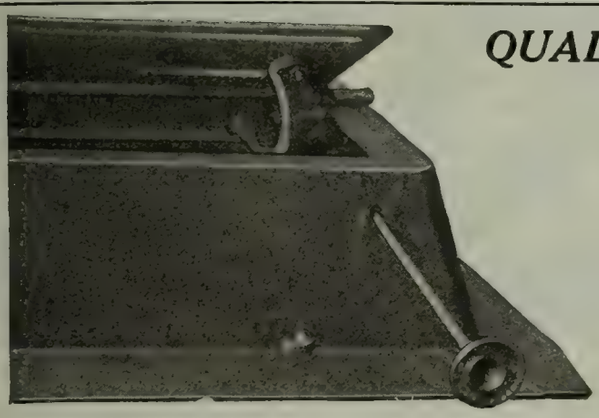
Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.

TRADE SIMMS SET IN RUBBER MARK



This Set-in-Rubber is our own patented process. You can find no other Brushes anywhere so good. The bristles are set in forever — they are absolutely guaranteed **never** to come out.



Each Brush is a perfect tool for the painter—doing everything that a good paint brush should do—and then a little more.

Made in every shape and style by skilled workmen for use in skilled work.

Don't let your stock run low. Order a new supply **now.**

QUALITY

"Save the surface and you save all" *Paint & Varnish*

SURFACE PROTECTION

makes paint and varnish an absolute essential. All surfaces whether wood, metal, plaster, concrete or brick deteriorate from the outside. All surfaces coated with

MAPLE LEAF PAINTS and VARNISHES

are assured of maximum surface protection.

Maple Leaf Products are **High Grade.**

Place your paint department on a solid and sure basis by selling them. The public recognize the economy of buying only the best for protection. In selling the best you are rendering a larger service to your community in conservation.

A stock of Maple Leaf Paints and Varnishes means better service to your customers.

Let us send you our proposition.

Stephen House Paint Especially Adapted for Service in Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

The MANITOBA STEEL & IRON COMPANY.

WINNIPEG, MANITOBA LIMITED

THE BIG MARKET

—*IS AT HAND*—

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

THE EDEN DOMINATES ITS MARKET

Because its construction is time tested.
Because it has twenty-five inimitable and exclusive features.
Because it is nationally advertised.
Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

COLE'S HEATERS

Have Ideal Selling Features

12E, 15E and 18E

HOT BLAST HEATERS

Cole's Original Heaters give cleanliness and an absolute uniformity of heat day and night. The hot draft blast discharges a blast of air heated to 600 degrees over the surface of the coal. This blast of heated air oxidizes the gas as it is distilled from the upper surface of the fuel, and it is thrown into the stove with sufficient force to create a flame to burn the mixture, whether running full force or shut down to lowest point. These stoves are absolutely air-tight. The heavy castings surrounding the fire are cased in with a straight steel jacket. This gives an all-steel radiating surface, which makes the stove a powerful heater and a perfect floor warmer.

Nos. 12E, 15E, 18E, 118 and 184 have 20 gauge velvet blue polished bodies with 18 gauge double seamed, water-tight steel bottoms. Nos. 206 and 247 have 16 and 14 gauge bodies, boiler plate riveted bottoms..

All-steel radiating surface; no joints at the firebelt; patented draft connections; compound hinge; hot blast draft; smokeproof feed door; will burn soft coal, slack, siftings, hard coal, coke, wood and cobs.

Nickel plated steel top rim, urn, screw cap and foot rail, other trimmings plain.

The Secret of the Strikes

Most Canadians are asking "What is the cause of the 'Great Unrest' "? Is it the fault of labor—or of capital?—or is it the result of German propaganda? Do you know of the real reason for the labor disturbances in Canada, and elsewhere? Are YOU thoroughly familiar with the ins-and-outs of the plans which threaten a world-wide "tie-up?" This is something that should be understood by every Canadian. And every Canadian should read "The Secret of the Strikes," by Lieut.-Colonel J. B. Maclean in the August issue of MacLean's Magazine. It is brimful of startling and authoritative information regarding this great problem. Read it carefully. It starts on page 33, August MacLean's.

"The Lecturer At Large"

Stephen Leacock is one of the continent's greatest humorists. "The Lecturer at Large" is one of the best humorous sketches that he has written. It is made up of what he terms "a few painful reminiscences of the platform" in the course of his lecturing up and down Canada. Get your family around you and read the sketch aloud—it's a rare treat.

Other Big Features

"A Party in the Making." By J. K. Munro. Illustrated by William Casey. An article on the political situation, giving a great deal of inside information with reference to recent developments at Ottawa.

"Solving the Problem of the Arctic." By Vilhjalmur Stefansson. The fifth instalment of his story of the five years' explorations that he conducted for the Dominion of Canada.

"The Unspoiled Country." By Harold C. Lowrey. A descriptive article of a part of Canada which is little known to Canadians generally, Temagami.

"Petite Simunde." By Arthur Beverley Baxter. Illustrated by E. J. Dinsmore. A charming romance of the war. The author will be remembered favorably for his "Mr. Craighouse of New York, Satirist."

"The Seven Blue Doves." By W. A. Fraser. Illustrated by Charles L. Wrenn. The fifth of the Bulldog Carney series and in some respects the best. It is a mystery story.

"His Majesty's Well-Beloved." By Baroness Orczy. Illustrated by C. F. Peters. The second instalment of this splendid romantic novel of the colorful era of Charles II.

The Month's Vital Question

Turn to page 34, August MACLEAN'S, and you will find timely and interesting information regarding the High Cost of Living—a problem of large proportions.

The Review of Reviews

Here are a few of the articles chosen as the best published during the past month in all magazines:—Britain Winning Supremacy of the Air; Has Japan Two Governments?; Kaiser Employed Famous Beauties; The New Triple Alliance; Mammoth Animals in Alberta.

Over 70,000 Canadian Families Buy

MYERS GIANT TANK PUMPS

For filling thresher tanks and many other uses. Have many late features, are easy to operate and throw an abundance of water with least pumping labor. Compactness and strength for size and weight insure uniform and dependable service.

This is Tank Pump Time — Be sure and sell the MYERS this year. Ask your jobber or write us.

F. E. MYERS & BRO.
Ashland, Ohio.

NOVA SCOTIA STEEL & COAL CO., Limited

NEW GLASGOW, N.S.

Manufacturers of

FERRONA PIG IRON

and SIEMENS-MARTIN

OPEN HEARTH STEEL

London Bar Iron

Has a reputation in the Canadian market, thoroughly established for the last eighteen years.
Compares in quality with the best imported brands, but is considerably lower in price.
Copy of tests made by Strength of Materials Laboratory (University of Toronto), March 27th, 1918, prove our claims as to quality.

	9-16 Sq.	$\frac{7}{8}$ Rd.	1 Sq.	$1\frac{3}{8}$x$\frac{1}{2}$
Elastic Limit, per sq. in..	39.000	33.300	33.000	35.300
Ultimate Strength	54.600	54.300	52.000	50.000
Elongation in 8 in.	25%	27%	29%	26%
Reduction	47%	49%	50%	50%

Sales Agents: Manitoba, Bissett & Webb, Ltd., Winnipeg; British Columbia, McPherson & Teetzell, Vancouver.

Cow and Calf Weaner

Impresses Every Stock Owner

KANT-SUK

A humane and efficient device. The hinge construction permits grazing—cow and calf together—yet prevents sucking. Easily applied. Sells the year round.

Imperial Bit & Snap Company, Racine, Wis.

Salesmen Wanted

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper, because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

Henry Rogers, Sons & Co., Ltd.
Estab'd 113 Years
WOLVERHAMPTON, ENGLAND

Trade with Gt. Britain

Extract from the "Times," London, May 2nd, of cable sent to Ottawa by Canadian Mission:

"Canadian manufacturers should realize the advantage of having representatives in England, they should not overlook the British market, where a great variety of commodities is needed, and the market is favorably open and worthy of individual effort."

The Opportunity Now Before You.

An influential British firm is prepared to represent up-to-date manufacturers of Kitchen Utensils and Household Woodenware, etc., on commission basis or would purchase for own account. Space is available at the **British Trade Exhibition.** Enterprising manufacturers should not delay in communicating with Sidney S. Freeman, c/o Messrs. Snows, Ltd., 17 Battery Place, New York City.

It's Economy to Use King Cutter Razor Paste

Tell your customers how—at the cost of a few cents—they may save dollars. **King Cutter Razor Paste** used regularly increases the efficiency of any razor. **Write us for a display stand to put on your counter.**

PEERLESS PERFECTION POULTRY FENCING

The first cost of a good fence is but little more than a cheap or poor one—no more work and lots more satisfaction. **A REAL FENCE—NOT NETTING**

Strongly made and closely spaced—making it a complete barrier against large animals as well as small poultry. Top and bottom wires No. 9—intermediates No. 13 wire—made by the Open Hearth process which time and other tests have proven to be the best. Ask about our farm and ornamental fencing. Write today for catalog. Do it now. It is sent free on request.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TURPENTINE

in steel drums containing 46 gallons, NO LEAKAGE.
ORDER THROUGH YOUR WHOLESALER, OR WRITE US DIRECT
E. FIELDING & SON 9 Front Street E. **TORONTO**

STRONG'S IRONCLAD

is a good name to remember when ordering Gauge Glasses.
Because Strong's are made of carefully selected glass of great strength and heat resisting quality.
They are absolutely safe, will withstand the highest steam pressures and outlast other glasses many times over.
We make them in all sizes and in lengths of 1" to 72" in any fraction of an inch.
All the regular sizes have Fused Ends.
Your customers will buy them and repeat.
That's what makes them profitable. Ask your jobber.
Strong Machinery & Supply Co., 21 Walker St., New York City

STOCK OUR LINE AND YOU CAN MEET ALL REQUIREMENTS

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

Standards of accuracy

Starrett Tools

are made according to the standard set by Noah Webster in 1828, when he defined accuracy—

"In exact or careful conformation to a standard of requirement, the result of care or pains; free from error, failure or defect."

Two generations of machinists have applied that definition to tools that bear the Starrett name—and found it fitted.

Every Starrett Tool is warranted free from error, failure or defect.

Catalog No. 21MA gives details of the 2100 tools that comprise the Starrett line.

The L. S. Starrett Company

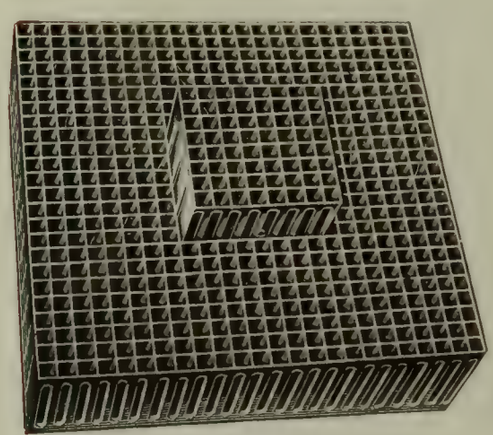
McKINNON RADIATORS

Really Cellular



It is easy to break an ordinary radiator beyond repair, a condition that entails wholesale waste, because scraping an ordinary radiator entails scraping the expensive tanks and other accessory parts.

The McKinnon Radiator solves this big waste problem—Its core is made up of individual cells, which can be fitted into any radiator frame work—

This is very valuable information for the auto owners and garage men—We supply new cores that will fit ANY RADIATOR SHELL.

Corrosion is also one of the evil influences of water on the radiator—We overcome this by carefully tinning the inside and outside of McKinnon Radiators. The sides are straight downward, and corrugated so that the water is constantly in agitated action carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water pockets are also constructed to permit of an outward strain many times before a burst will take place—

Vibration has no terrors for the McKinnon Radiator—because it is a solid unit not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry.

BUILT by our knowledge of paint ingredients and our steadfast adherence to the correct formulae, no matter how high-priced or how difficult to obtain those ingredients may be.

Strengthened by our advertising which has for years been telling the public of our methods of ensuring them complete satisfaction in the use of any brand that bears our label.

Secured by the co-operation of a chain of dealers chosen by us for their ability to worthily represent so remarkable a line of Paints and Varnishes.

These form the foundation of B-H prestige—a prestige which reflects itself on every hardware store that becomes known as "B-H Headquarters."

If we are not represented in your locality write us for particulars of our attractive agency proposition. It will place you under no obligation.

"Save the surface and you save all" Paint & Varnish

A LINE IT PAYS TO PUSH

Merchandise must have merit or it cannot be successfully advertised. The success of O-Cedar Products has its root in a very definite superiority—the advertising we do merely tells the people of that superiority and so induces them to try it—the real sale of these products comes from the repeat orders which invariably follow a trial.

"As good as gold" is gold's best recommendation — "As Good as O-Cedar" is the selling-talk of those few who attempt to sell a substitute for our products and in saying that they admit there is but one O-Cedar Polish.

Attempting to sell inferior substitutes is unprofitable; it overlooks the most vital feature of successful merchandising — satisfied customers.

O-Cedar Polish

The backing we give to merchants who sell our products is such as to prove our own sincere confidence in the goods we make. We advertise them freely—we supply dealers with window trims, advertising plates and counter displays. On top of that, we allow a fair margin and we endeavor to have prices maintained.

All this makes the O-Cedar line a profitable one to handle—a line it pays to push.

These Products sell readily because of their reputation — and their reputation is based on real merit and satisfaction.

Are you giving them that attention which they deserve? Are you featuring them in a way that will secure for your store all the profit that can be made out of their sale?

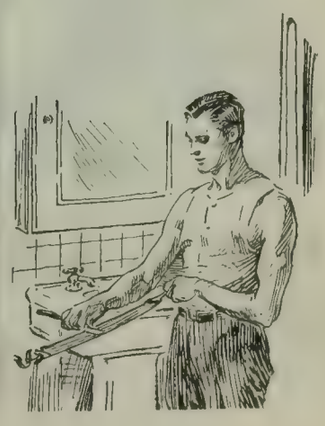
Genco RAZORS

Reg U S Pat Off.

"Must Make Good or We Will"

What Sells Razors?

SEEING razors is what sells them. Men see GENCO Razors in our advertising. They learn that our type of razor is the one every barber uses. A display of our razors on your counter stops them.



It's amazing how many men like to take a real razor in hand and see how sharp it is.

The broad back of a GENCO, its concave-ground blade and that slight bevel backing its edge set the blade against the strop at just the right angle. That perfect shaving edge can be renewed with as few strokes as a barber makes. Anybody can strop a GENCO razor.

Tell customers that; tell them also that "GENCO Razors must make good or we will," and note how many razors you sell to men who came in to buy other things bringing comparatively small profits.

The handsome GENCO Display Cabinet, shown above, is sent Free with your first order of GENCO Razors.

PLYMOUTH ROPE

This picture illustrates what may be easily accomplished in the way of Plymouth Rope window displays. Simple arrangement of the rope itself, together with the Dealer Helps which are free for the asking, will attract attention and stimulate your rope sales.

The following letter accompanied the picture which we reproduce:

"I thought that you would be interested in this because it is Plymouth Rope and the various knots, hitches, and ties were copied from the series of illustrations which you ran in Plymouth Products recently. These various knots were tied and fixed during spare time, but they have been very interesting and attracted considerable attention. Several gentlemen were looking at them and one said that they must have been tied by a sailor, but he didn't know that the work was done by a 'land lubber' who has only seen the ocean a few times during a short visit of two weeks to Boston and vicinity some twelve years ago.

"We are still selling Plymouth Rope because we find it more satisfactory than any other and also we are still selling it by the foot, because that is the only way for a retail merchant to sell it."

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

Eight Reasons Why the VICTOR is America's Most Popular Game Trap

1 THE Oneida Community has long since passed the experimental stage in trap design. With seventy years' experience behind them, these manufacturers possess the "Know How" so necessary to successful game trap design. They have trap manufacturing and animal catching experience—seventy years of it.

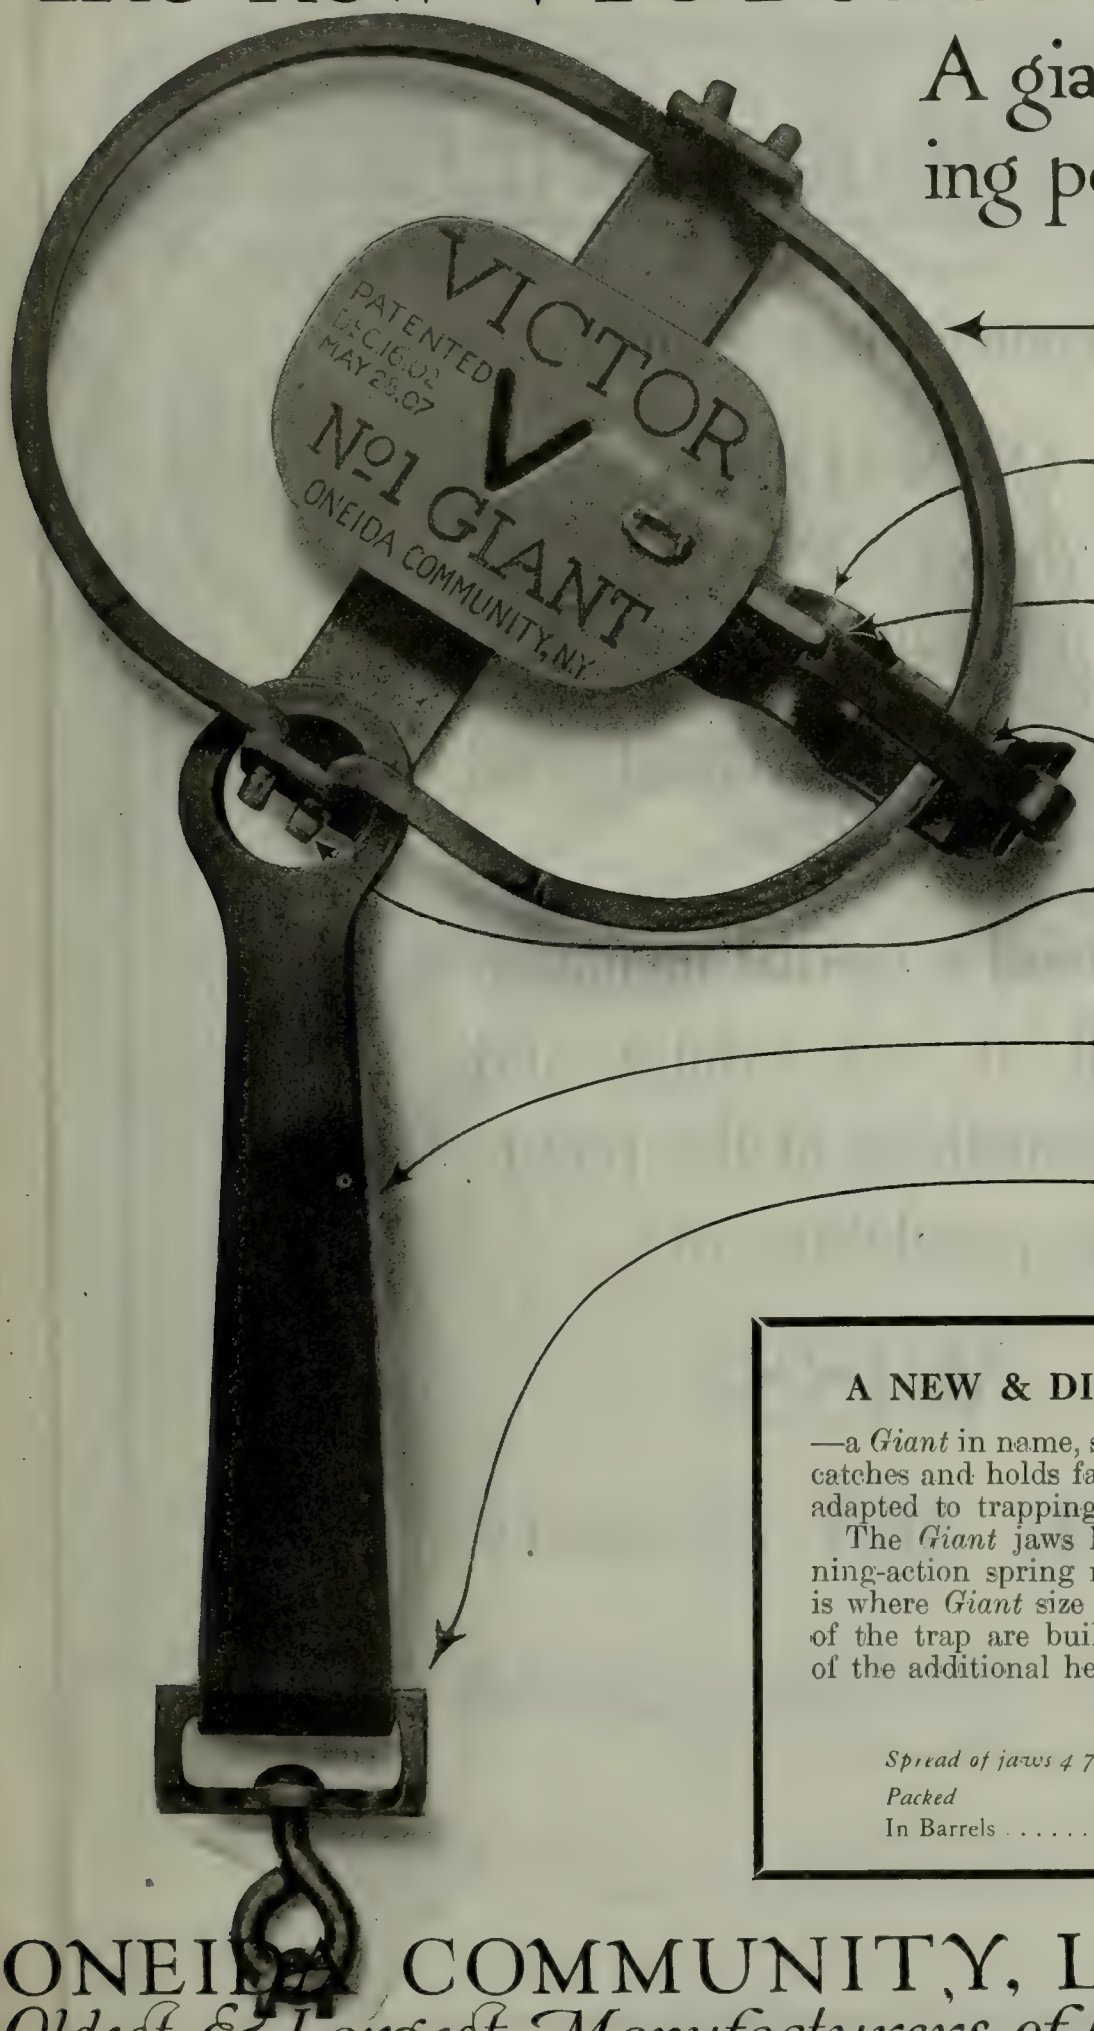
2 For years these manufacturers have persistently worked to put game traps on an attractive basis for both jobber and retailer. Today Victor Traps stand at the head of the list in rapid turnover and consumer satisfaction. And these two factors mean *greater profits* all around.

3 The latest innovation in Victor Traps is the Victor No. 1 Giant—a giant in jaw-height, strength and durability. Unlike ordinary traps of this design, every part of the new Giant is built *in proportion* to the wider jaws. This new trap immediately sets a new standard in trap construction. It possesses all of the regular Victor features plus a heavier chain, improved swivel, faster spring, heavier pan and wider dog.

4 The spring of every Victor Trap has seventy years' experience of scientific spring making built into it. It is the result of nearly three-fourths of a century's research and development conducted in the factories of the oldest game trap manufacturers in the world. Remember—the Victor has passed the experimental stage.

5 Examine the patented "Humped Cross" of the Victor Trap. Note that there are no troughs or partly enclosed spaces to collect drifting dirt, sand or sticks when the trap is set in water. *Freeze-proof*—with nothing to interfere with quick and certain trap action.

6 Examine the pan of the Victor. It is made of thick metal securely riveted so that it cannot come off when attacked by rust at the rivet head.



7 Note that the jaws of all the smaller size Victor Traps are made of specially rolled beveled steel—the greatest trap improvement of recent years. The Victor Trap was equipped with these jaws *years* before other manufacturers embodied this improvement in their traps. Victor *always leads* in improvements.

8 Year in and year out the Oneida Community maintains a corps of professional trappers who trap in every section of the country, and whose recommendations on trap designs are closely followed at the factory. They are "Trappers making traps for trappers"—a distinctive phase in itself and one which is largely responsible for the fact that *trappers insist upon Victors.*

Get behind the Victor Trap---the standard by which all other traps are compared.

The new VICTOR No 1 GIANT

A giant in jaw-height, holding power and durability

Wide-spreading jaws that catch away up on the animal's leg.

—

Patented Humped Cross—no chance for freezing or accumulations of mud, dirt, etc.

—

Direct Pan Fastening—does not tighten when rutsy.

—

Wide, strong Dog—easily engaged with notch in Pan Shank.

—

Patent Extension on Jaw Lug. Jaw can't spring out when setting Trap.

—

Lively, high-rising Spring—made of finest steel, scientifically tempered and tested.

—

New type, smooth-acting Swivel.

A NEW & DIFFERENT VICTOR TRAP

—a *Giant* in name, size and strength. A modern trap that catches and holds far up on the animal's leg. Especially adapted to trapping skunks, muskrats and mink.

The *Giant* jaws have great holding power—the lightning-action spring rising high on the jaws. Right here is where *Giant* size counts, as the spring and other parts of the trap are built proportionately larger to take care of the additional height of jaws.

Starrett Hack Saws

Cut faster!—repeated tests have proven the soundness of the Starrett system of designing different blades for different classes of work. It's the number of strokes to the cut that determines the comparative efficiency of blades—the number of cuts to the hour. And it is the ability of the Starrett blade not to only complete the cut with the minimum number of strokes, but to deliver a greater number of cuts during the life of the saw, that has made its reputation.

Help your customers get the most out of a box of Starrett blades by giving them a Starrett Hack Saw Chart MA. Sent free upon request.

Wilt Twist Drill Co. of Canada, Limited - Walkerville, Ontario

London Office : Wilt Twist Drill Agency, Moorgate Hall, Finsbury Pavement, London E.C. 2, England

MR. DEALER Last Winter trade was very poor in Horse Blankets and Robes with the result much stock was carried over.

Orders for Fall, 1919, delivery were scarce and some of those who ordered have since cancelled.

BUT LISTEN Our import order for Jute Cloth was placed last October with Scotch Mills to ensure delivery. The goods have arrived and are being manufactured for Fall trade. We bought our usual quantities and believe we were wise as a cold Winter usually follows a warm Summer.

CONSEQUENTLY Horse Blankets, Robes and Rugs will be in demand and those having the stock will harvest the trade.

5/7—Horse Blankets and Robes are known from Atlantic to Pacific by thousands of satisfied customers. Metal signs advertising the goods and dealers can be supplied when they can be used to advantage in blacksmiths shops, hotel yards and other places.

GET YOUR ORDERS IN EARLY

We also manufacture Tarpaulins, Waterproof Horse Covers, Case Bags, Tents, Flags, Awnings and other goods. Catalogue on application.

J. J. TURNER & SONS, LIMITED, PETERBOROUGH, ONT.

Sir: – Why can't you sell farm wagons to the farmers as well as furnaces, stoves, binder-twine, etc.?

Farmers clubs do not buy wagons.

WOODSTOCK WAGONS

Established 25 Years.

A Demand?

We have therefore had considerable experience in farm wagons. There is a steady, growing demand for Woodstock wagons because the care in the selection of materials, careful factory inspection and supervision, produces a line of wagons which have become favorably known everywhere.

Woodstock wagons, built under Government inspection, have been supplied for military use and met the hard condition of the Army Transport service just as efficiently as Woodstock farm wagons meet trying agricultural use.

The Buster Brown is a favorite with the Kiddies and they make every parent a prospect.

The Buster Brown has roller, or plain bearing wheels, or supplied with runners interchangeable with the wheels. The only wagon with oil holes in the wheels.

Write for folders, and let us show you the profits in Woodstock Wagons.

Great Instruments for Work Well Done

Butterfield

Butterfield Tools hold an enviable place in the mechanical world. The quality is unsurpassed; based, as it is, on superior design and faultless execution. All mechanics know and like Butterfield Tools. They know them because they are present in every first class plant; they are part of daily life in the mechanical field. They are liked because experience has proven them trustworthy and reliable, qualities that always command respect. Many mechanics have a friendly feeling for Butterfields based on the recollection of some tough proposition in the shop that was solved by a Butterfield Tool.

This likeableness has a direct bearing on the dealer's volume of business. Purchasers follow Butterfields; Butterfield customers become customers of the dealer that handles these peerless tools. Write us; there's a lot of profit for the dealer who handles and appreciates Butterfields. And we will show you that they sell.

Butterfield & Co., Inc.

Rock Island, Quebec

NUMBER THREE

IN the year 1853, Cyrus W. Field believed that by means of a cable people could talk across an ocean three thousand miles wide. For thirteen years he concentrated on perfecting his means of communication. He made fifty voyages across the Atlantic. Many of his cables broke in mid-ocean. In August, 1866, the first message was successfully transmitted from New York to England. This grand achievement was the result of a man with an idea concentrating on one thing. The story is one of the noblest records of American enterprise.

The secret of Cyrus W. Field's success was

CONCENTRATION

No man ever achieved a worth while victory by accident. Fine achievments are always the result of exhaustive experiments, hard work and concentration. One of the greatest men who ever lived, whose influence has lasted for centuries, took this for his motto: "This one thing I do."

Victor Hack Saws have achieved their position of dominance because we make nothing but hack saws. For many years we have concentrated all our energies and resources on perfecting this one tool. As a result, the Victor Hack Saw Blade is recognized by good mechanics and foremost technicians in all parts of the world as the most efficient hack saw for every metal-cutting purpose.

RELIABLE
TRADE MARK

Canadian Products

ESTABLISHED LEADERSHIP

In quality no competitive line of batteries approaches the high standard of the now famous Reliable Line.

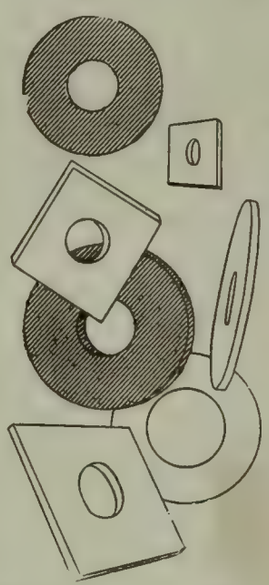
In novelty, utility and thorough reliability, Reliable products easily stand first.

Early this year when lessened prices of various raw materials made practical a price reduction, Reliable Flashlight cases were the first to be reduced.

On May 2nd when conditions made a further reduction possible, Reliable products were again the first to be offered at reduced prices.

First-to-last manufacturing in a Canadian manned and financed plant makes possible Reliable quality at Reliable prices.

Reliable leadership is securely established because it is built on the bed rock of high quality products, backed by carefully planned consistent advertising that covers Canada from coast to coast.



The shorter days are here—line up your stock now for heavy fall business. Ask for Reliable selling helps with your order.

Auto-Wheel Coaster Waggon

A Popular Ready Seller

The consumer public has cordially accepted the products of the Canadian Buffalo Sled Co., the demand is growing daily; an ever increasing army of satisfied customers—both children and parents — are advertising for us.

The Auto-Wheel Coaster has steel axles, roller bearings, and an artillery type of wheel—mitred, self-supporting spokes. A fifth wheel is provided for front bolsters to turn on. Auto-Wheel Coasters come beautifully packed each in a corrugated box, insuring fresh, clean delivery. Directions for setting up are in each box.

Other profitable lines for the progressive dealer are our galloping feature Hobby Horses, Fleetwing Racers, Convertible Wagons, Snow Shovels, Baby Sleighs, Children's Sleds and Lawn Swings.

READY MADE CUSTOMERS

Practically every woman who enters your store is a ready-made customer for Ioco Liquid Gloss and Household Lubricant. In every home there's a daily use for one or both of these evident necessities.

Ioco Liquid Gloss cleans and polishes finished surfaces of all kinds—restores the original lustre to furniture, pianos, hardwood floors, automobiles and carriage bodies.

Household Lubricant—non-gumming and non-corrosive—is used for sewing machines, phonographs, typewriters, electric fans, bicycles, etc., wherever a light lubricating oil is needed. Used on bright metal surfaces, Household Lubricant prevents rust and tarnishing.

Stock these staples that bring repeat orders. Their quality is well-known—their uses are many and varied—they are backed by the well-known guarantee of our name.

Write us to-day for our attractive dealer proposition.

WHO SELLS

THE STEWART HANDY WORKER

The Big 6-in-1 Tool

Here is a fast seller with a record of past performances back of it which distinguishes it as the most reliable general-utility tool on the market.

No guesswork about what it has done or what it can do, but a common-sense combination of SIX STRONG, ACCURATELY-DESIGNED, USEFUL TOOLS.

Each tool as strong and well-built as the rest. Each tool satisfies the most rigid tests put upon it by the machinist, the repair man, the plumber, garage man or farmer.

THAT IS WHY IT HAS BEEN MAKING GOOD FOR MANY YEARS

It fills a popular need for a strong, adequate, general-utility tool.

And it makes a smashing success on the farm, in the garage, the machine shop, the home workshop, or any other place on the face of the map where tools are used.

No kicks or come-backs on the Stewart Handy Worker. Each one you sell stays put.

A real, live-wire proposition, and we give you lots of help in pushing over the sales, too, and furnish descriptive folders for mailing to your trade; electrotype cuts for display advertising in local papers, etc.

The Handy Worker retails in Canada at $27.00, with a big margin for yourself.

Immediate shipments from stock, or you can order through your jobber. Sold in any quantity.

Chicago Flexible Shaft Company

12th and Central Avenue

CHICAGO, U.S.A.

A big, huskey anvil, useful in a thousand ways. Note the handy cutting-hardie, for cutting all kinds of metal.

Pipe-vise for coupling, threading, or uncoupling pipe up to 1½" diameter. A powerful general purpose vise, too, with jaw opening to 4½".

Grinding outfit complete. Grinds anything all the way from a pocket-knife to the blade of a scythe.

Practical drill press, with two speeds. Drills all size holes in anything.

THE GILLETTE SAFETY RAZOR CO.

OF CANADA, LIMITED

MONTREAL, CANADA

The Is

A Thousand Years of

Twenty-five years ago King C. Gillette was working in a small top room in Boston, with a file and some brass, fashioning his original safety razor.

From this beginning the Gillette Safety Razor has grown in twenty-five years into one of the industrial marvels of the age—and from the crude razor devised by King Gillette has sprung the most perfect shaving instrument in the world.

In 1902 Mr. Gillette left his small room on Atlantic Avenue in Boston. More space was needed. In 1904 another change was made, and again in 1905. Then, in 1906, another building was added to the Gillette Company's plant, and in the same year the Canadian branch was established. In 1907 still more space had to be taken, and again in 1909. This year a magnificent nine-storey structure of reinforced concrete is being completed—one of the most up-to-date buildings in the world. And the expansion still goes on.

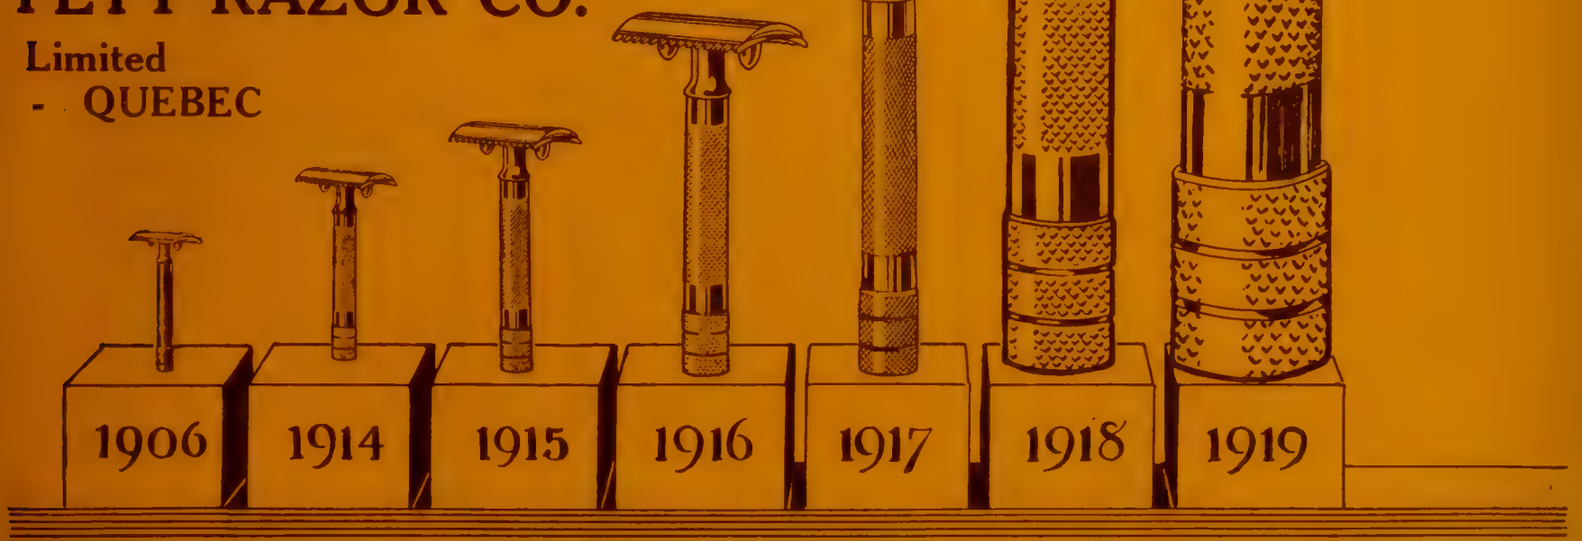
Gillette Safety Razor
YOUR Best Seller

Progress in the Space of Twenty-Five

The history of the Canadian branch is much the same. From a very small beginning, it has grown within thirteen years into one of the foremost Canadian institutions; an immense organization occupying a building of its own which gives them some 48,000 feet of floor space.



The sales figures of the Canadian branch from 1914 onwards are indicated by the sizes of the razors drawn below. The increases are enormous—year after year they have doubled themselves; and those for the first six months of 1919 show plainly that this year's figures will more than double those of 1918.

There are to-day more than 10,000,000 users of the razor—all of them boosters for the Gillette shave. The growth of the Gillette Safety Razor Company is natural—the razor is established with the public; it sells itself; for the Gillette dealers there are good profits; for the Gillette purchasers there is a life-time's shaving comfort.

BUILDERS' HARDWARE

TALBOT DESIGN, DEEP BEVEL TRIM No. 5

The die work on our sets is clean and sharp, producing an attractive and substantial appearance.

The locks in our sets are strong and well made. This is more particularly true of the cylinder sets; the locks in these are strong and durable in every particular. While the latch bolt works easily and smooth, strong coil springs keep all parts in position. The finishing of the trimmings is carefully done. None excel ours in this regard.

International Malleable Iron Co., Limited

Guelph, Ontario, Canada

Never were good babbitts needed more than to-day

The world race for commercial supremacy is on. In fact it will become a real commercial world war as certain disturbing undercurrents are quieted and people come back to normal.

It's a question of who will produce goods the best and at the lowest price. In short it's a question of who will lower their overhead sufficiently to meet all competition.

Labor cannot be sacrificed, quality must be maintained, so look to the efficiency of your plant. Are you losing power from the use of inefficient bearings, from belt troubles, from bad factory arrangement?

Hoyt Metals—

"Frost King," "Nickel Genuine," "Trojan"

Note to manufacturers :

We are experts on bearings. We can solve your bearing problems with **Hoyt Metals—"Frost King," "Nickel Genuine," Trojan."**

CARBORUNDUM PRODUCTS

SHARPEN THE TOOLS OF THE WORLD

CARBORUNDUM is universally used. Its fast, clean cutting is appreciated on the farm, in the household and in the shops by an ever-growing army of satisfied users.

The range of Carborundum fits every need and enlists people of every trade and occupation, besides housekeepers, in the ranks of your customers.

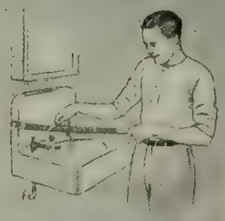
There are:—
Knife Sharpeners for the household, wood or staghorn mounted; Carborundum Sharpening Stone in round or oblong shape for carpenters and mechanics; Carborundum Razor Hones and Strops that put razors in finest shape. The Carborundum Niagara Grinder, in four sizes for home or shop, is rightly designed, strong, durable, and equipped with a fast cutting Carborundum Wheel.

A complete stock of Carborundum Lines always in stock ready for prompt shipment. Share the good profits and ever-growing sales; write for new catalogue.

Norman Macdonald

62 Temperance St. Toronto

The Carborundum Bench Stone is just as necessary to the manual training student's kit as a saw or hammer.



Carborundum gives the Carpenter's and Mechanic's Tools a better edge in less time.

A Carborundum Niagara Grinder for shop, home or farm.

The Carborundum Scythe Stone gives just the edge the Scythe should have.

For every man the Carborundum Razor Strop

Every Knife a Sharp Knife in the home that has a Carborundum Knife Sharpener.

CARBORUNDUM NIAGARA GRINDERS

JUST TO REMIND YOU THAT YOU CAN SELL THEM

To the Carpenter

For grinding his chisels, plane, bits, gouges, etc. The No. 3 Niagara just suits him. It's big enough for bench work, small enough to pack in his tool kit.

To the Garage Man

For grinding parts, tools and fittings—for a dozen and one jobs about the shop. He will want the big No. 4, or, if he has power, the No. 28 Grinder Head.

To the Farmer

For grinding his scythes, grass hooks, mower sections, feed chopping knives—for edging spades and general farm tools, for grinding household knives, etc., the Niagara No. 14 is the machine for him.

To the Householder

For grinding household knives and tools —a little No. 1 machine.

The business is waiting for you—go after it with Carborundum Niagara Grinders. Carborundum displays and advertising will help you.

THE CARBORUNDUM COMPANY

NIAGARA FALLS, N. Y.

GALT

A Sales Field

Galt Robes offer just the designs which appeal to your customer at prices to suit every class of motor owner. Galt Robes are made in cotton, wool union cloth, plush, Astrachan, imitation buffalo and goat. There are plain, striped, checked, plaids and floral designs. sizes 48 x 72 and 54 x 72. Weights from 2½ to 8 pounds. They can be interlined with rubber if desired, at extra cost. Write for samples.

The increased number of motor cars in use in 1918, as compared with 1917, has been stated as 100,000. The indications for 1919 show a more decided increase. The figures dealing in motor cars can be practically translated into terms of prospects for automobile rugs since every motor owner is a rug prospect. This embraces a remarkable field, and a very profitable one for the dealer. The benefit to him depends very largely on his wisdom

Please bear in mind that the Galt Robe Company deals directly with you. The profits left in hand in the distribution through the usual channels of trade we share with you, and with your customer. This is a real benefit to you and a potent factor in your dealings with the customer.

The Galt Robe

Galt,

ROBES

Still Growing

of selection. Galt Rugs offer a desirable choice of "Quality" motor rugs in pleasing new patterns. They cannot be equalled within their price range. Galt Rugs are sold direct from factory to dealer—the profits saved to you.

Sometimes you have at least a minute to spare; let us suggest that, watch in hand, you stand by your store door and count the passing motor cars during one minute. Every car is a prospect for several rugs. When you have figured this out, write us for the newest folder on rugs, illustrated in natural colors.

Galt Rugs are builders of prestige. When you have sold Galt Rugs you have made friends for yourself and your store. In these days every business man realizes the value of permanent satisfaction. Galt Rugs ensure satisfied customers that "boost" your business all the time. Write for samples.

SECTIONAL VIEW
Showing how fruit is canned

SECTIONAL VIEW

Consider Your Customer

Every person appreciates consideration of their comfort.

There is no more trying time in all the year to the Canadian housewife than **Preserving and Canning Time.**

All the drudgery can be **omitted.**

The "PEERLESS" is the ideal assistant at this time of worry. It does away with the steam and odor in kitchen and house. No worries about stirring and sticking. No more spoiled batches of expensive fruits because it "Burns at the Bottom," no more "Boiling Over," no more frayed tempers, scalded hands.

Tell Your Customer Friends About the "PEERLESS."

Women simply **insist** on having the "PEERLESS" after seeing it work.

The "PEERLESS" is a profitable all-the-year-'round seller.

It cooks a whole dinner on one flame or range-hole—fish, vegetables, meat, puddings—**all at one time.**

And Absolutely No Odors or Tastes Can Mingle.

Just as useful in winter as in summer.

SEND FOR OUR PROPOSITION TO-DAY. IT'S A MONEY-MAKER.

"STERLING"

The above word indicates value. Good value in a Hack Saw Blade means a saving of dollars and cents to the consumer. A poor Hack Saw Blade is expensive at any price.

Even a competitor will acknowledge that "STERLING" Hack Saw Blades are good. Users of the "STERLING" Blades say they are most excellent.

This high degree of excellence and efficiency has been obtained through the careful study and workmanship of men devoting their entire time and effort to produce as satisfactory a Hack Saw Blade for the consumer as is possible by any process of manufacture.

Added to above, the steel used in "STERLING" Blades is the best rolled by any mill in the world.

"STERLING" HACK SAWS

DEALERS:—Sterling Blades satisfy the most particular mechanics. It will pay you to stock them. Ask for catalog and quotations.

7. Made in enough styles to suit a varied demand.
8. Burns either gas or coal economically.

AN ALL-YEAR ROUND RANGE. FOR ALL-YEAR ROUND TRADE

IF you're going into the business of selling ranges at all you might just as well go in right. It doesn't cost any more, and a range that's got something behind it ought to be a good deal easier to sell.

The Banner Combination Range has many advantages that readily recommend it to the shrewd dollar-wise housewife. The Banner is a range that once sold stays sold, and keeps on making a friend of the owner and new business for the dealer.

We don't need to remind you that a range is one of the most important things you have to sell; and that on its ability to make good depends the nature of your future relations with the person who buys it. We stand behind the Banner Range foursquare and behind the dealer who sells it.

Write to us for particulars regarding our exclusive proposition to dealers. It will only cost you a three-cent stamp and we'll gladly allow you for that if you don't consider later that it has been well spent.

A coupon is attached for your convenience.

COUPON

Kindly send me without obligation full particulars of your exclusive agency plan for dealers.

A MARK OF MERIT

McClary's

"THAT store sells McClary's."

Is your store identified that way?

The dealer handling McClary's lines is readily recognized as a safe and sane businessman.

The consumers know McClary's products.

They know what the name McClary's has stood for, for over seventy years—reliability and dependability.

They know that only the best material and finest workmanship have gone, are going and always will go into McClary's many lines.

They know that McClary's fine principles and fair dealings have placed them first among the makers of cooking and heating appliances under the British flag.

Keep well stocked with McClary's products. Keep them on display. They will be a mark of merit to your business.

Order through our nearest branch. Keep in touch through our booklets and catalogues.

SCALES

The Better Line

For more than **Half a Century** we have been making and putting on the market the largest and most complete line of the highest grade and most accurate weighing machines obtainable.

The **Imperial Standard** and **Champion Jewel** Scales of our manufacture are known and used from Coast to Coast, and are sold by all the leading jobbing houses throughout the Dominion. The unbounded success with which they have met in these many years is due entirely to their superior working qualities, their durable construction and neatness in design.

The modern method of manufacture, the employment of none but skilled mechanics and the use of only the highest grade materials enables us to state without hesitancy that our line of Scales are not only unsurpassed, but **Unequalled.**

We make Scales of capacities ranging from ¼ ounce to 150 tons.

Unlimited styles and designs.

Letter Scales.

Parcel Scales.

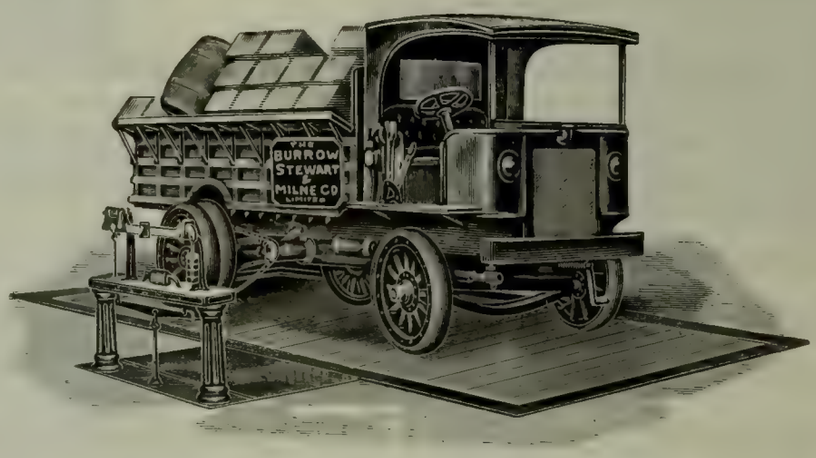
Chemists' Scales.

Counter Scales.

Platform Scales.

Warehouse Scales.

Abattoir Scales.



Express Office and Railway Depot Scales.

Grain Elevator Hopper and Dump Scales.

Wagon Scales.

Stock Scales.

Railway Track Scales.

Our line of Scales are used by all Railways operating in the Dominion, by most Express and other transportation companies, by the leading abattoirs and packing houses, by a large percentage of the municipalities, the leading Creameries and Cheese Factories, Western Canada Grain Elevator Companies, Farmers, Coal Dealers, Manufacturers of all kinds, Merchants of all kinds and by thousands of housewives.

We have recently equipped the Post Offices throughout the Dominion of Canada with Parcel Post Scales.

WE MAKE THEM

We call your attention particularly to the fact that every Scale which we offer for sale and every Scale that bears our name is **Our** manufacture.

We do not only assemble—we do not buy our castings from others and depend upon their goodness to supply the proper materials—we do not buy any parts entering into the manufacture of our line—**we make them** and by so doing we know absolutely the grades of material used, the class of workmanship and all things which we should know to be able to offer you our line of Scales as the **best** and under the fullest guarantee.

No orders too large for our capacity. None too small for our most careful attention. Write us for prices and compare them with others.

$18.40 for $5.00

"Yours to hand enclosing $18.40 from Mr. ————. This makes the third collection you have sent me this month."

—Extract from a letter from a member of Ontario Retail Hardware Association.

That's What They All Say!

See These Letters

"Through your Sales Bureau I have been able to turn over several hundred dollars' worth of slow sellers and stickers."

"I found the interchange of ideas and experience at our recent convention of great help. The Association with its service plan is on the right track and deserves every support."

"I am in receipt of yours of the 25th inst., enclosing retail price lists and must congratulate you on the great help they are for the retail dealer in making his retail prices, saving much labor. I had a most enjoyable time at the convention and received considerable benefit. I wish you every success."

"Please mail me a new set of price lists as mine are used up, and I can hardly do without them. I always appreciate your net cost sheets."

"I am enclosing you a list of material for your exchange sheets. With the results I received from previous issues, I believe I will be able to dispose of these very quickly."

"Yours of the 12th to hand, enclosing $11.00 from ———. I considered this dead, but your collection letters did the work."

"I must congratulate you on the recent convention. I got more good ideas than if I had personally visited three hundred retail stores. I would also advise you that I sold practically all the goods I offered on the Sales Bureau forms."

How It's Done

The Association provides a Collection System that collects from "Slow Pays" and "Dead Beats." It provides a Price Book Service that keeps you up-to-date on cost and selling relations, and is worth many times the membership fee; a Sales Exchange Bureau, which disposes promptly of slow selling lines for members. There is an Annual Convention that brings before you a gold mine of useful information from the experience and research of other keen minds in your line.

FOR $5.00

you become a member with full benefit of the Collection System, the Price Book Service, the Sales Exchange and all the progressive ideas you can carry away from the Annual Convention. Send $5 right now to

W. F. Macpherson, Secretary, Prescott, Ontario

The Ontario Retail Hardware Association

By Special Arrangement this fee will give you Membership to December 31, 1920.

Clare Bros. & Co., Limited

What is it worth to you as a furnace dealer to be able to guarantee a "clean" heating system?

You know and every one knows the great objection to warm air heating systems.

People think they are dirty.

Dust comes up the registers, and settles on everything in the house. Gas also escapes.

The older the furnace grows the worse this nuisance becomes.

—The Hecla Furnace is absolutely proof against this trouble.

—The Hecla cannot leak gas and dust.

No matter how long the Hecla is in use its joints cannot spread. A leak cannot occur.

We guarantee it absolutely.

This is no theoretical claim.

Thousands of Hecla Furnaces installed in Canadian homes from coast to coast—some of them over twenty years ago—prove that the Hecla is a "clean" furnace.

Those installations are the real living advertisements for the Hecla.

The success of the Hecla in a business way is due to its wonderful success as a heating proposition.

Hecla---a strong business-getter

The Hecla is the only "clean" furnace—guaranteed "clean"—proven "clean" in years of service.

What a business getter that feature is to live furnace men!

Link it up with the Hecla coal-saving feature —the steel-ribbed firepot—and with the big moist air feature, the circular water pan.

Link it up with the "free plan" service we give our customers.

Link it up with our advertising, keeping the Hecla story before the people—making it easier to get business.

Is it any wonder that the Hecla is so strong a contender on the Furnace field?

Write for our dealer proposition. See what you can do with a furnace like the Hecla.

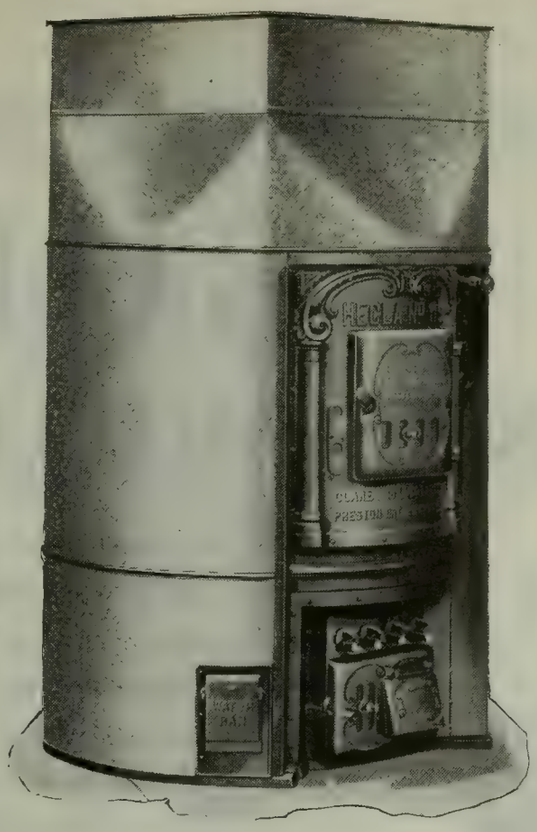
HECLA
Mellow Air
Furnace

Note, we do not say "better for the money."

The Hecla Pipeless is a **better** heating system for many types of homes than more expensive systems — will give a more even distribution of heat.

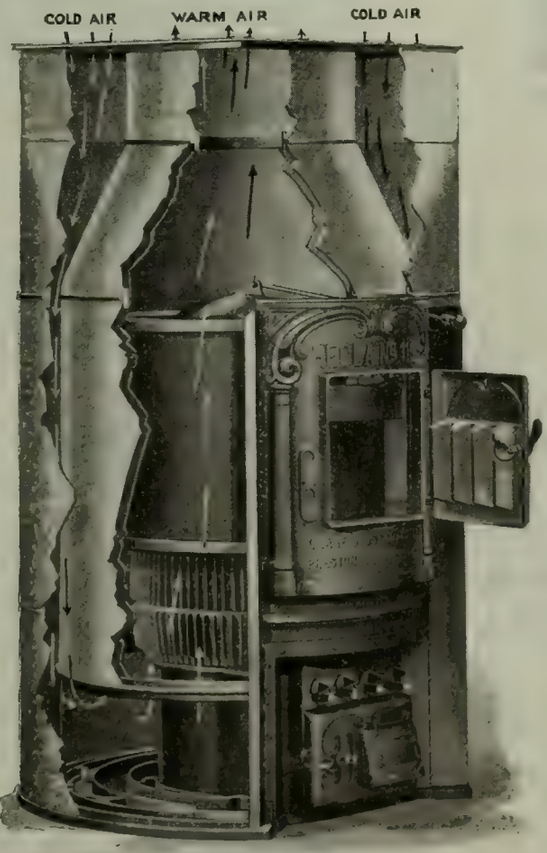
This is the furnace that you can install with little help. It will enable you to do a big business in spite of the labor shortage.

Opens a Big Market



The low price of the Hecla Pipeless puts it within the reach of hundreds of new prospects in every locality.

Furnace comfort — at low cost—is so attractive that every live dealer must see in the Hecla Pipeless a wonderful chance to do big business this fall.



There are many times the number of prospects for the Pipeless that there are for more expensive installations.

The solution of the furnace dealer's labor problem

Here is a furnace you can install in a day.

Upper picture shows the Hecla Pipeless idea. Note the galvanized inner casing and wide air flues. Lower picture shows furnace complete. Only smoke flue has to be added.

Without waiting for carpenters.

Without expert mechanics.

Without tearing a house to pieces.

It is a furnace you can guarantee to do satisfactory heating.

Because, our guarantee is back of it.

The Hecla Pipeless is a proven heating device. It is sound in principle, and it has been proven in practice.

The Pipeless must not be considered as a cheap job. It must not be judged on a price basis.

In many homes it will do better work and do it more economically than the ordinary warm air installation.

Think it over.

Consider the big market.

Consider the ease of installation.

Consider the guarantee of satisfaction.

Write at once for the Hecla Pipeless proposition.

Get started on this profitable furnace line.

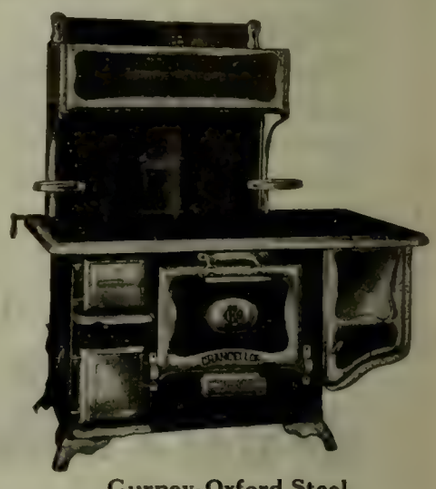
GURNEY-OXFORD

GURNEY-

PRODUCTS ARE THE CHOICE



The Royal Oxford Range

When a dealer sells any one of the many products bearing the oval trade mark "Gurney-Oxford," he knows that his customers are receiving full value for their money, besides lasting satisfaction. The customers on their part are quite familiar with the name and merit of the goods they are buying. They know that behind the dealer is the guarantee of the manufacturer. This makes an ideal buying and selling compact. The dealer is pleased with the ease with which he sold the article and also his profits. The customer is satisfied with the article and the knowledge of having purchased the best.

All kinds of modern heating and cooking equipments are manufactured under the GURNEY-OXFORD trade mark such as furnaces, stoves, gas ranges, boilers, radiators, tank heaters, hotel equipment—in fact any appliance that is modern and made with the idea of giving better and more efficient service will be found in the GURNEY-OXFORD list. Write to our head office or to any of our selling branches for catalog or any special information.

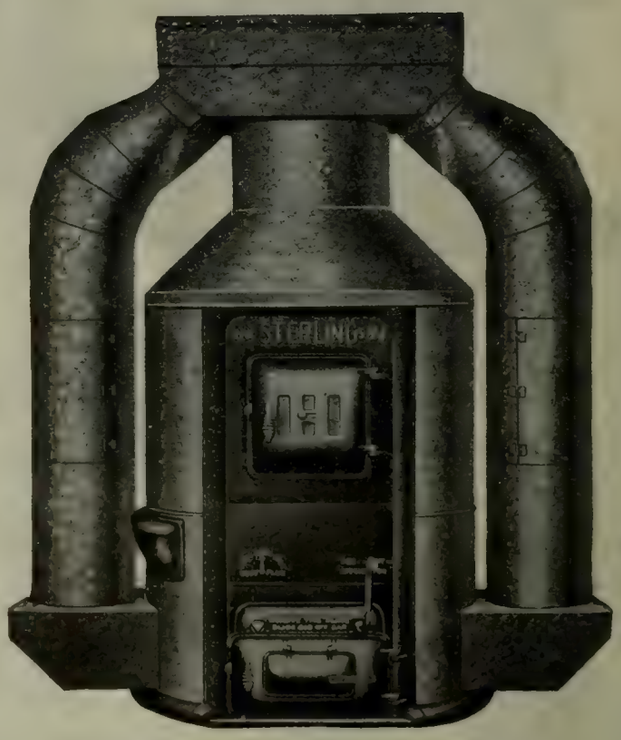
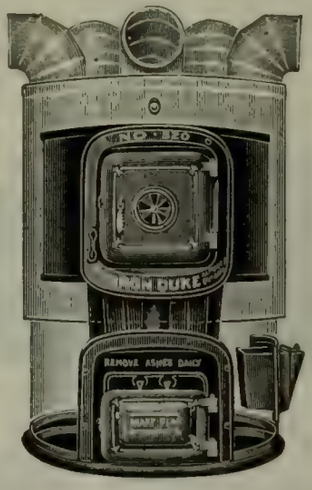
Findlay's Line of Furnaces



Big Pipeless Furnace Business Coming This Year

The question is no longer being asked: "Will the Pipeless Do the Work?" It is now a tried and tested product and the question that interests the dealer is WHAT TYPE OF PIPELESS FURNACE.

The STERLING PIPELESS with its side cold air construction is scientifically correct and mechanically right. The Heat Retaining Apron, which is a distinctive patent of the STERLING makes it possible for us to adopt this exceptional method of construction without heating the basement. We, however, make the Sterling Pipeless with double casing when desired.



The Sterling is made in five sizes in Pipe and Pipeless style, fire pots ranging from 17 to 27 inches.

A line from you, Mr. Dealer, will bring a full description of this furnace, or, better still, our representative will call and talk it over with you.

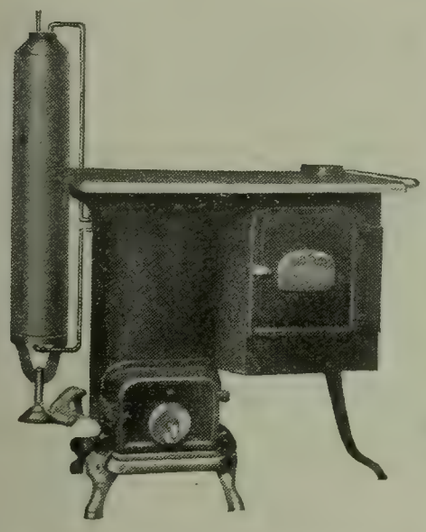
Kir-Ben—five sizes, fire pots, 17 to 29 inches.

Iron Duke—three sizes, fire pots, 17 to 21 inches.

Royal—two sizes, 19 and 21 in. fire pots. An A-1 furnace, but so constructed that it can be sold at a price to meet any kind of competition.

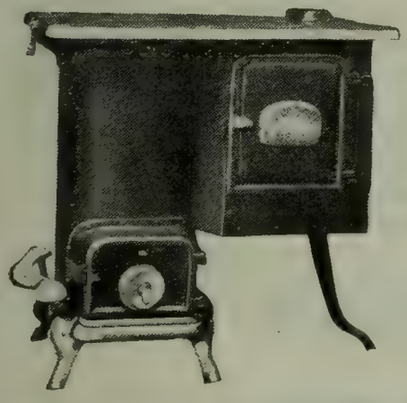
THE LARGEST LINE OF FURNACES MADE IN CANADA TO CHOOSE FROM

We make a furnace to meet any requirement whether it be quality, size or price. Write for fuller particulars. Will exhibit at Toronto and Ottawa Fairs.



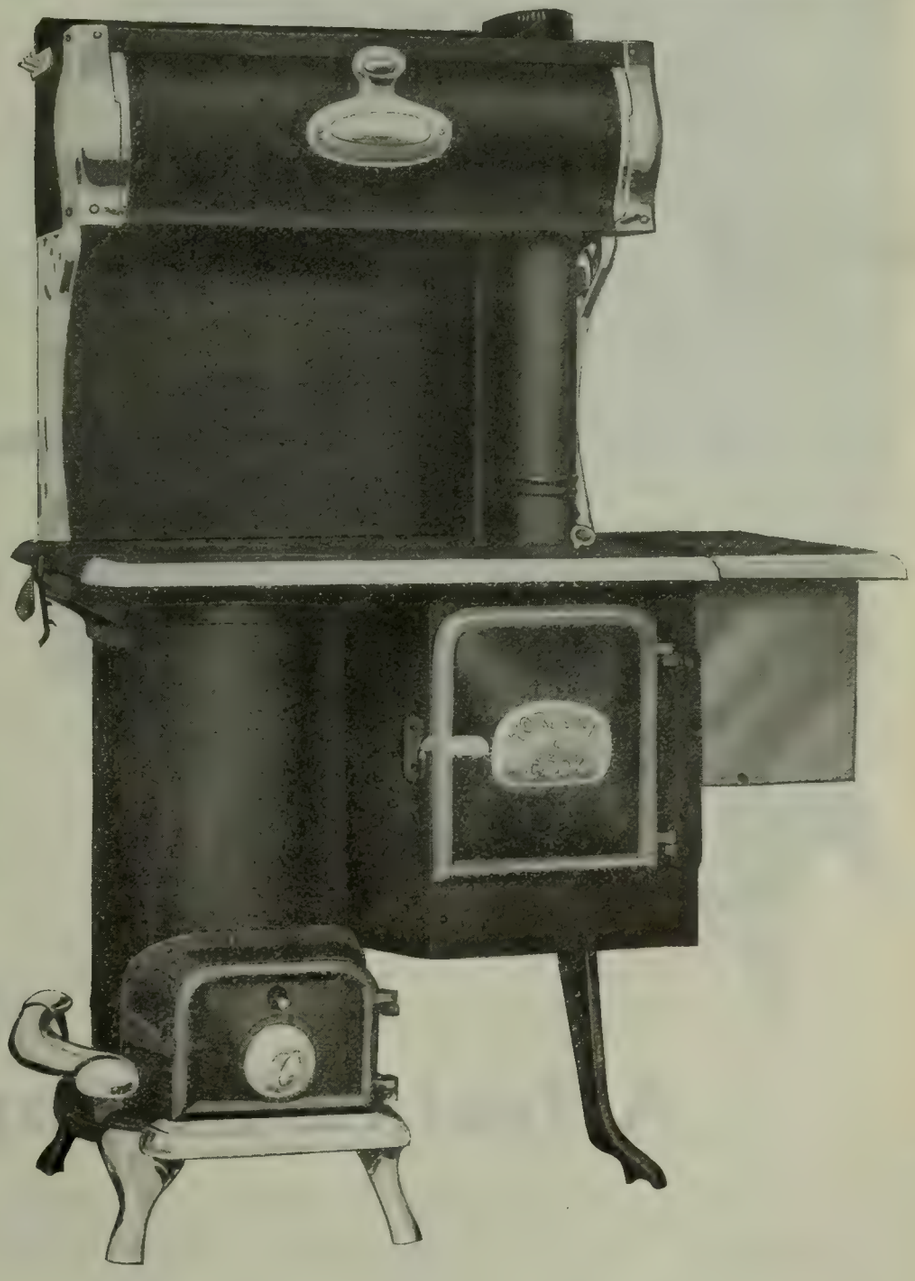
MANUFACTURED BY

FINDLAY BROS. CO., Limited, Carleton Place, Ont.



REVILLON WHOLESALE LIMITED, Edmonton, Alta. Wholesale Agents for Alberta.

Findlay's Tortoise Cook---A Combination Cooking and Heating Stove With All the Conveniences of a Modern Range



SOMETHING NEW ***PRACTICAL*** ***ECONOMICAL*** ***SERVICEABLE***

The Tortoise is a wonderful water heater; ample capacity for a 30 or 40-gal. boiler.

The oven on the No. 4-26 measures 12 in. wide, 11 in. high and 18 in. deep. The oven on the No. 4-24 measures 10½ in. wide, 11 in. high and 18 in. deep.

Two stoves in one; as good a heater as the most expensive base burner, as perfect a baking and cooking stove as the highest priced range. This stove is not a freak nor an experiment, but a sensible, practical Combination Heating and Cooking Stove.

The Tortoise Cook has an ample sized top with four cooking holes; made with or without grates. The bodies are made of polished steel and brick lined. The reservoir on this stove is made of copper or galvanized iron, as desired, capacity—5 Imperial Gallons.

This stove will be on exhibit along with our other lines at the Toronto and Ottawa Fairs.

Record Olympic

Steel Range

Ours is a most complete line of Stoves, Ranges, and Furnaces. If you have delayed handling this line let us hear from you. We would like to explain these attractive stoves and our service. It will be good news to you. Have you a catalogue?

A Trial At Our Expense

Order an Olympic Steel Range for trial ; give it the most thorough and exacting test you know. When you have done this you will find it beyond comparison—if not; return it at our expense.

The Record Olympic is a source of satisfaction to both dealer and consumer. On your part every sale and trial increases your customers' belief and confidence in your judgment.

Hot Air Producer

1—Sheet Asbestos Gaskets
2—Construction Features
3—Clean Out Flues and Caps
4—Downward Draft Flue
5—Fire Travel
6—Fire Pot
7—Triangular Roller Grates
8—Double Casing
9—Low Design Feature

Points That Make Sales

(1) The Asbestos Gaskets are bolted between iron flanges, making gas and dust-proof joints. (2) Simplicity of construction—casing raises from bottom exposing inside for cleaning or repairing. (3) Cleanout caps give access for cleaning flues. (4) Perfect downward draft: retains products of combustion longer. (5) Long fire pot, perpendicular sides overhang ash-pit—prevents dead ash accumulation. (7) Gearless and frameless roller grate. (8) Double casing of galvanized iron and tin with inch air space. (9) Low construction—only 40″ from top to bottom—Write for Furnace Handbook.

The newly equipped store of W. Walker & Son, Ltd., 1228 Yonge St., Toronto

The Greatest Asset

W. WALKER & SON, LIMITED.
WHOLESALE HARDWARE MERCHANTS
1228 YONGE ST

Toronto Ont. August 7th, 19 19.

SUBJECT

Messrs. Cameron & Campbell,
578 Queen St. E.,
Toronto.

Gentlemen:

We take much pleasure in thanking you for the prompt service that you have rendered us on our order No. A. 2681, which called for 70 feet of Paint Shelving and 35 feet of Bennett Shelf Boxes, with nail bins, etc., complete. On giving you this order, we left the arrangement entirely to your judgment, and we might say that we were very pleased with the way you arranged same, and the manner in which you handled this contract.

We find that our sales have already increased considerably in the Paint, and also in the Tool Department, on account of having the goods in view and arranged in a manner conveniently for serving to the customer.

Very truly yours,

W. WALKER & SON, LIMITED,

Per W. L. Walker

MANAGER RETAIL DEPT.

W/MS.

that any store or any business can possibly have is

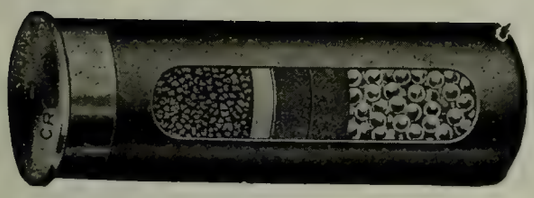
A Satisfied Customer

One customer to whom you have given real service will advertise you more than dollars spent in printer's ink. "Service" should be every hardware dealer's motto, for never in the history of the hardware trade has service been more necessary to hold patrons than at the present time when a very large portion of the business is done with women, especially in household lines.

W. Walker & Son, views of whose retail store are shown above, have found that

Cameron & Campbell Wall Fixtures and Display Cases

enable them to give a service in their store which has resulted in greatly increased business. Beside giving service, the attractiveness of the store draws not women alone, but men to your store.



A Cameron & Campbell fitted store always draws the trade.

How about looking into our proposition and getting an estimate on the refitting of your store.

We are specialists. Send us a rough sketch with measurements and let us suggest. It does not obligate you.

Cameron & Campbell, Queen St. At Don Toronto

FALL HUNTING SUPPLIES

The return to Peace Conditions has released many men from Military Service and urgent munition work, who will take advantage of the first season of freedom and spend a few weeks hunting, which will result in an unprecedented demand for Guns, Rifles and Ammunition.

Supplies of these lines are more plentiful than they have been for the past five years, as the factories are gradually getting their production adjusted to a commercial basis. Deliveries, however, are still slow, and it is only foresight in buying which enables us to offer a complete range of sporting goods for shipment from stock.

We hardly expect that our liberal purchases will be sufficient to supply the demand, and strongly advise our customers to place their orders immediately, both for present and future deliveries.

Our stock consists of the most popular models of Rifles, Guns and Pistols in the following well-known brands.

WINCHESTER, REMINGTON, SAVAGE, STEVENS, HARRINGTON & RICHARDSON and COLTS, also a complete range of DOMINION and AMERICAN AMMUNITION.

We also have an attractive assortment of rifle cases, hunting knives, compasses and other hunting supplies.

Mail orders receive careful attention.

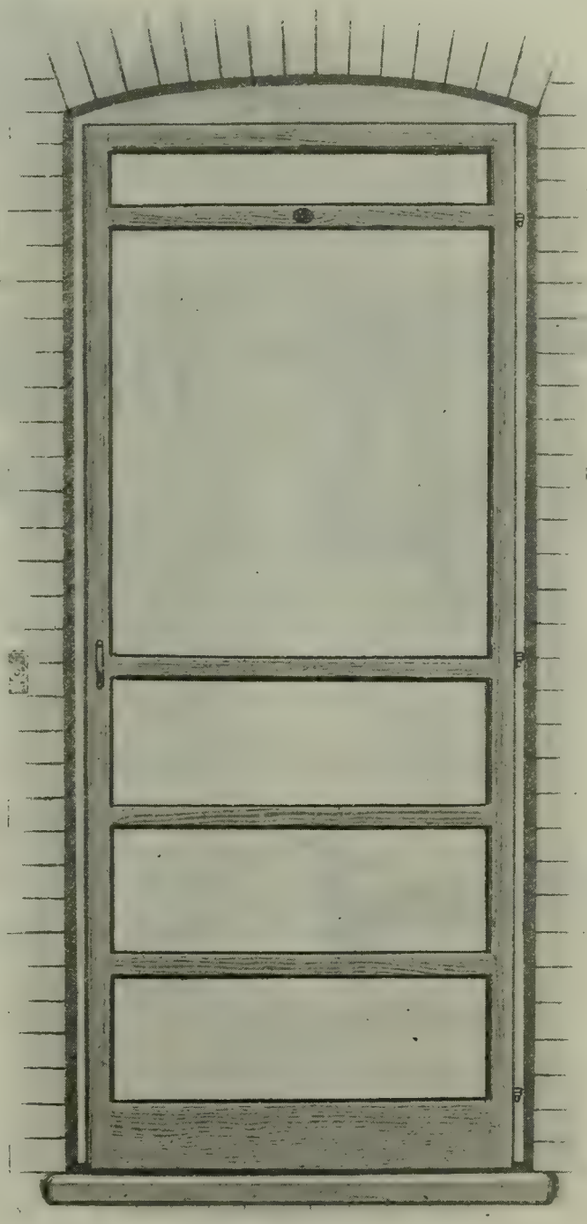
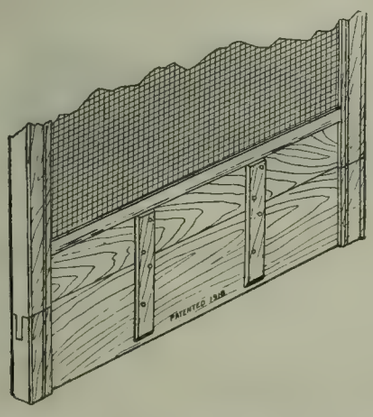
"KASEMENT"



The Emblem of Screen Door Quality



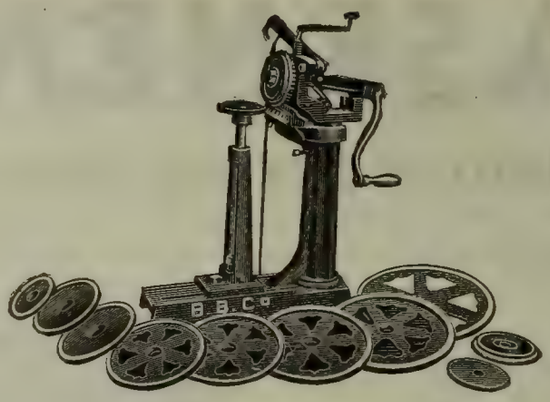
In one of our advertisements we said **Quality Counts.**

The demand for **"Kasement"** Doors has proven beyond a doubt that **Quality Has Won.**

Owing to the unprecedented demand for **"Kasement Skrene Dores"** in Nineteen Ninteen we were unable to fill all repeat orders, **but—with our increased facilities** we will be able to give you prompt and efficient service, and welcome your order and re-orders for Nineteen Twenty.

Our Exhibit at the Canadian National Exhibition will be in the Industrial Building—southeast corner. And we invite you to make our booth your headquarters.

"Kasement" Extension Bottoms
(PATENTED)



The **"Kasement"** Extension Bottoms shown above are finished to match the doors, and especially designed for brick houses which have the narrow door step, about five or six inches above the verandah or porch floor. This extension bottom makes it possible to extend the length of any **"Kasement"** door from three to seven inches.

You can't have a Speedometer on your arm

Even if you could, it would not make you turn at a certain speed every time you used a separator. Own a separator that you do not have to coddle by turning at a fixed speed or by using speedometers and other contraptions. Do the sensible, practical thing and buy a Sharples.

American ingenuity has perfected a principle in the Sharples that enables you to turn the handle fast, slow or "as you like it." You can loaf along, or speed it up—and you do not lose a cent's worth of butterfat nor change the thickness of your cream. From a straight, money-making standpoint alone, the Sharples is the only separator you can **afford** to buy.

AFTER READING THIS SHARPLES AD--- PUT YOURSELF IN THE FARMERS' PLACE

Would you buy a separator that was as contrary as a fixed feed separator—that had to be coddled? Or would you do what thrifty farmers **have done**—invest in the Sharples Suction-Feed that "Skims Clean At Any Speed?" Why not apply the same logic to the line of Separators you handle—and follow the line of least resistance—with the Sharples. Not all dealers can qualify for a Sharples Contract, but correspondence is invited from progressive dealers. Address nearest office.

It's Here At Last!

LIQUID VENEER MOP

MADE IN CANADA

The mop with a swab that comes off with a pull—that can be washed and put through a wringer like a handkerchief—a gigantic improvement over all other mops. It fairly bristles with Liquid Veneer quality.

That's it—it's the *quality* mop. When kept moistened with Liquid Veneer and used on floors, the results are so beautiful as to seem almost incredible. Floors take on a *piano finish.*

It is so superior, so full of quality that no housewife who uses the Liquid Veneer Mop will ever go back to the old, greasy oil mop with its trail of greasy, discolored floors.

5 Big Points of Superiority

1—The swab comes off with a pull.

2—The handle adjusts to any position and remains secure in position desired without tampering with nuts or bolts.

3—Mop has a full yarn centre and is not merely a fringe of yarn around a frame. Provides more polishing surface.

4—Mop is treated with Liquid Veneer, a guarantee of positively unequaled results on floors.

5—New swabs may be bought, saving housewife expense of buying new mop.

To Be Sold On Approval

Mr. Dealer, you may sell this mop on approval. If your customers return any, we will back you up. Retail price in Canada—$1.75 complete, each mop packed in most beautiful lithographed metal container on the market—bright yellow with red and black type. Extra swabs, retail at $1.00 each.

Our Motto—Service. Try us.

Every one of our hangers are silent salesmen themselves. Display them in your store and see.

FROST FENCE FIRST

Frost Organization

IN each farming centre there is a Hardware Man who stands out as the most enterprising and reliable. Customers say they "do better" with him. He sells only the best articles,—articles that build trade. You will find such Hardware Men are FROST men, or are becoming FROST men.

FROST FENCE is a trade-builder. First it multiplies sales. Then it multiplies repeat-orders. Repeat-orders are the only sure sign that the Hardware Man is retaining his hold on the Hardware business of his community. Repeat-orders bring more new customers.

SALESMEN like to sell FROST FENCE because it helps them sell it. When they sell FROST FENCE they know that no sour-faced customers will come back with complaints of slack wires, missing locks or poor galvanizing. It is a clean sale. In the end only the article that sells itself will survive, because its worth must be proven by the article itself, and not by what the salesman says about it.

THE FROST TIGHT-LOCK is the lock of Confidence. Are you a FROST man.

Retail merchandising is the closest kind of dealing with the public. If you deal with any number of people they will judge you accurately and pitilessly, and you will profit just as you deserve

Are you giving the world the best value you know for the profit it is giving you?

In other words, do you believe in selling the greatest value? Do you think about what your **customers** get when you are buying your stock?

Do you realize that the longer-wearing half-soles you sell, the faster and bigger your business grows.

Or if two soles are equally attractive to your customer, do you always recommend the more comfortable?

If you are eager about this "customer-first" policy give serious consideration to Neōlin Half-Soles.

The public has signified to the tune of many million pairs that it believes Neōlin Soles to be better value — soles that give longer wear, more comfort, good looks, health protection.

Shoe manufacturers are making better shoes by building them on Neōlin Soles.

It is up to you as the man who gets the re-soling order to see that you have these better half-soles in your store.

Sit down and figure what half-soles have to be ordered, which should be soles of bigger value. Then order Neōlin Half-Soles.

Neōlin Soles were developed by Goodyear scientists to be better soles for shoes. The imitation of Neōlin's appearance is not hard. It has been done. But no one outside of Goodyear has succeeded in finding out what Neōlin is. For your protection, and for the public protection, we put the name "Neōlin" on the bottom of every sole. See that it is on the soles you get.

Montreal Store Features "Big Three"

Where Furniture, Stoves and Hardware Make For Big Annual Turnover — Carrying Stoves in Wide Assortment Secures Fourfold Turning of Stock—Patrons Must Be Cared For

J. & P. DAVIGNON, LTD., 1036 Ontario Street East, Montreal, have a somewhat unique stock in that they feature what may be styled "The big three" —hardware, stoves and furniture. The term "Big" is used advisedly, for these lines are carried in large supply and extensive assortment. But, without question, the stove stock of this firm is one of the largest, doubtless, to be found in a retail hardware store anywhere from the Atlantic to the Pacific. Not only so; it is of a variety that is seldom seen. From the least expensive oil stove to that of the 1919 model electric range and combination gas and coal range, it would be a safe assertion that the most exacting customer could be well suited and fully pleased with so replete and so varied a stock as to choose "just what I have wanted."

What This Means

In an interview with Mr. Davignon, HARDWARE AND METAL asked if the stove department was a success, and if so, what fact contributed most largely to this success. The answer was definite, convincing, and worth passing along.

"It is necessary to have a large stock so that the customer can get what he wants. This is important. When a woman sees a big showing of stoves she is sure to know that the merchant is not trying to "unload" something which she will not want. She will feel that it really does not matter which stove is bought—the dealer will be anxious to have her pleased, and this is just what he is anxious for. Show her a big line and do not be overanxious to sell her any particular stove—especially if she seems to prefer another. She knows pretty well what she would like to have

(1) Upright wall case for hand and rip saws in the J. & P. Davignon, Ltd., store, Montreal. While this is at the back of store it is easily seen from the front. A good assortment of other tools is displayed in salesmen near the front so that the suggestion as to tool stock is always prominent. (2) The brush display. This possesses, as outlined in the story, the advantage of assisting buyer to make speedy selection, freedom from dust, quick checking by the salesman, and also a neat and compact arrangement. (3) Wood, panelled division between the stove department and the hardware section. This is used for displaying various goods, while above will be observed an arrangement of electric heaters, scales, etc. (4) One of the two fine wall cases. These contain an array of silverware, ornaments, nickeled tea and coffee pots. The arrangement is readily changed when desired.

The stove section in the store of J. & P. Davignon, Ltd., Montreal. Any photograph would hardly do this department justice. There is a splendid array of stoves and ranges, blue and white enameled, nickeled and polished, one of the finest and best stocks carried by a retail store. Stoves may be had at any price from around $15 to ten times this price. Tile back ranges appeal strongly to Montreal buyers.

in a stove or range, and it is best to respect her opinion. If the merchant does not he is the one that will suffer."

There is food for thought. Mr. Davignon has been in this business for many years, and, in a big metropolitan city like Montreal, where there is much opposition, where new methods of heating and cooking are being introduced, it is a creditable thing surely, when so large a stock can be turned four times in the calendar year.

"Think-tank" Salesman

"One of the greatest needs of the storekeeper to-day," continued Mr. Davignon, "is to have good salesmen; men who can use their heads. It is a big problem, and one of the greatest we have."

This is a truth that no merchant will deny. In the stove business, for instance, the salesman will be at sea who has not been qualified to outline the merits of the stoves and ranges which he is trying to sell. It was said above that the woman has well-defined ideas as to what she prefers in the way of a stove. That does not preclude the arguments of a good salesman and which he must use if he will be true to the customer with whom he is dealing. Tact and care will reveal to him the plan he ought to follow, and, as Mr. Davignon observed further, "each customer must be treated separately and her likes considered." There is no line which the hardware man has for sale that should commend itself more to the salesmen for close study than the stove and range stock.

"In view of the big increases in the price of stoves, do the less expensive lines sell best?" HARDWARE AND METAL asked of Mr. Davignon.

"No, we sell the high-priced ones mostly. Price has not made any difference to speak of. The customer wants a good range or stove that can be depended on and will pay the price. We have had no trouble in this matter."

This bears out what HARDWARE AND METAL has repeatedly encountered within the past year in investigation work, and which is that the demand for dependable, high-class goods—particularly such lines as are expected to be in use for several years, has increased. It is a remarkable tribute to the good sense of the average buyer, and it has enabled many a merchant to further his own wishes in persuading the customer to take that which will be a lasting satisfaction, when the purchase price will have been entirely forgotten. "We have the less expensive stoves," said Mr. Davignon, "but they are not the big sellers."

Helps—Little Things

The Davignon firm does some newspaper advertising, and this is distinctive and impressing in its lay-out, but upon this it does not regularly depend.

It was pointed out that a long connection with the trade had served to carry its own advertisement. The big range of stock carried was most effective in leaving a lasting impression. Securing a reliable stove or range here was remembered indefinitely. A larger one was perhaps wanted later. The earlier treatment was recalled and the new purchase made at the same store.

"When we send a driver out with a stove or a range we tell him to place it just where it is wanted. He is expected to set the stove up and to leave it in such a way as it will please the buyer. Then, in addition to this, he is expected to put all the trimmings on the stove and to leave it in perfect order. These things mean much and please people."

Carry Repairs

An extensive repair shop is maintained in connection with the stove department. "We can repair any stove made in America and have repairs in stock for nearly all of them," was the statement made to HARDWARE AND METAL. This, in itself, is a most important feature and one of the attractions that must have brought real business to the Davignon store. No repair job is too small, none too large. It may be a clean-out door or a set of grates that is wanted—no matter what, it is supplied quickly.

Of course all this immense stock requires space. This is afforded on the main floor of the store, and there are plate glass windows extending along one side of the big two-storey block, as well as two windows in front. Much room is available for placing the stove stock to the best advantage.

Manufacturer Co-Operation

Mr. Davignon has done, and continues to do a great deal of newspaper advertising. This is conducted, not at indiscriminate times, but when likely results

will be surer and the effects more direct.

It is well known, even among the most successful manufacturers, that stove selling seasons are well-defined insofar as Canadian territories are concerned at any rate. People will not be persuaded by any argument to purchase a heating stove in July or August, and it follows to a greater or less extent that they will not buy ranges or cook stoves then as they will later, and although odd sales are made in the hot months, the advertising has been mapped out by this firm to precede the busy selling periods. Newspaper space is freely contracted for along in April and May and again in August or early September. Direct messages are prepared and the copy is accompanied by attractive cuts, used freely to illustrate the message and, as far as may be, assist the prospect in reaching a decision.

Since trade is drawn from all sections of the community, and because of the fact that Montreal has a very cosmopolitan aggregation of citizenship, both French and English newspapers are used.

On some occasions the co-operation of the manufacturer has been enlisted. A full page, for instance, appeared some time ago in a French daily, fully illustrated with various cuts, and offering a wide choice of ranges, refrigerators and washing machines, mattresses, etc. The various firms whose goods the Davignon firm were selling, contributed toward the cost of this publicity, and still the firm's name appeared at the foot of the page, thus carrying the impression that the space was used by it.

Get Newly-Weds

In the selling of furniture the big idea is that of securing the "opening" order from Mr. and Mrs. Newly-Wed. The business thus secured is worth while, for it means that every room in the new home—whether it be a modest one or otherwise, will have to possess several pieces of furniture, and with the groom anxious to please his "only" to the limit of his resources if need be, here is that real business worthy the concentrated endeavor of the furniture salesman. Single orders will run into several hundreds of dollars, even where the requirements are modest.

Asked as to the class of furniture usually disposed of to this type of customer, Mr. Davignon stated that, for the kitchen, and perhaps for the bedroom, outlay would be conserved. A medium quality of furniture was considered suitable and the wishes of many were quite satisfied with the less costly equipment. But, with few exceptions, there was no hesitation in putting more money into the dining room suite, the parlor and the living room pieces. If necessary the number of pieces would be cut down, but even the foreign-born buyer would often select the larger articles used in these rooms out of the best assortments the store afforded. This was done, partly, because this furniture would meet the eye of callers first, and a good impression would be made on the neighbors and others coming to the house. And, again, this furniture would be expected to last for many years without replacement being necessary. If well bought, it might, indeed, last a lifetime.

Must be Variety

While furniture is a stock requiring a very great area if the displays are to be made the most attractive, there are few stores which can be arranged—unless they be huge departmentals, to give over the space that effective display demands for such bulky and massive goods. But, with the Davignon firm, the dominating idea has been that of having the stock. To this end the furniture department has had to be somewhat crowded. As will be seen by the accompanying photograph, there is a wide choice afforded the buyer, and, in spite of any handicap that may exist because of the lack of space, the furniture seeker will secure what she wants, in all probability from the assortments carried.

Since competition is daily becoming keener, Mr. Davignon stated that one must sell at a fair price, for the buyer will be more or less posted on prevailing selling prices elsewhere. It was pointed out, however, that a fair price was acceptable to the average buyer.

While some are able to pay cash for their wants, it is generally necessary to sell on the cash-down-deferred-payment-plan. This proves a suitable policy, and with definite payments maturing weekly or monthly the furniture bill is paid regularly and soon liquidated.

(5) *Entrance to the narrow fitting room, 2½ by 60 feet, in the store of J. & P. Davignon, Ltd., Montreal. This is handy and easy of access. It accommodates a large amount of stock, and with the use of electric lamps this stock of pipe fittings is always accessible. It illustrates well the excellent use of what would otherwise be lost space.* (6) *The counter screw case, accommodating a big stock of bright wood screws. This saves time and prevents loss. It takes up but little room.* (7) *The self-measuring pumps, which are located on the floor above the oil tanks in the basement. These are valued as time-savers, and are considered a splendid investment.* (8) *The glass rack. Space used is very small and yet nearly* 100 *sizes of glass may be carried. This is a time-saver, and glazing, when necessary, may be done right in front, on the small counter.*

View of the furniture department in the store of J. & P. Davignon, Ltd., Montreal. Every effort to conserve space and yet get maximum display value is employed. This firm finds the furniture department a paying one, and states that it works in very nicely with the hardware stock.

There is to say in support of deferred payments—that if certain facts are ascertained—as they will be when an account of any size is opened, such business may usually develop to be the very best. It assures the merchant of regular, stipulated payments, and if his sales have been large enough it means a big monthly total of cash takings.

Fine Hardware Department

Under the management of J. A. Lacasse (who also has a general supervision of the whole store) the hardware department commands close attention. The two photographs accompanying will convey a splendid idea of the layouts. In a general sense the stocks carried afford the buyer almost every advantage of choice. The variety stocked is no small one and Mr. Lacasse is certainly kept closely applied in his work of buying and management. To handle the trade some twelve men are employed, including the salesmen of the stove and furniture departments.

While the stoves and hardware are carried on the main floor, with a semi-division between the two, furniture and electrical goods are carried on the second.

One Electric Washer Each Week

Mr. Lacasse referred to the increased business being done in washing machines.

"We sell an average of one electric washer each week. Customers want the better machines and are even not frightened when we ask $87.50 for the better electric-operated kinds. They will buy a cheap one if they cannot buy the one they really want at the time; later they will come in to get the better and higher priced one."

It was further stated that the medium-priced machines did not sell extensively. More and more buyers were coming to purchase the better grade electrical machines, and when they did so they wanted the best. There were several good makes sold, and of these the Davignon store handles some three distinct designs, the most costly retailing at $87.50.

An extensive stock of washing machines is carried, some twelve distinct patterns in all being displayed on the floor. The photograph accompanying does not impart justice to the display at all.

A big array of clothes wringers is always on display and many patterns and grades are carried.

Kiddies' Wagons—Tools

Foor space is given over to the display of kiddies' wagons, shoo-fly horses, speeders, etc. These are ready sellers and at a good price. The boy wants something good, and the heavier and better wagons are specially strong in their appeal to the buyer.

"Tricycles are a big seller," said Mr. Lacasse; "we can sell these now, even easier than we could before. We used to sell them, when prices were low, at about $2.50 each. Now they are worth $6.50 and $7, and it does not make any difference in the number sold, in fact we sell more. The rubber-tired tricycles are easy on the floor of the house and they are used indoors as well as outside."

Tools are sellers to a greater extent than for some time past. "We have sold more of these this season so far than in several years past together," Mr. Lacasse stated. "Men were working at different employment, and as munitions were not being made any more they had to get back to their old work. This has created a demand for saws, hammers, braces and bits, etc. The tool trade is much better."

Success With Accessories

While it is only a short time since auto accessories were put in, they have already sold well and will sell more and more. "We sell a lot of tools and accessories to workmen," said Mr. Lacasse, as he called one of his men over to relate this circumstance.

It has transpired that a great many of the workmen now own cars. They are the very best kind of buyers, in some respects, for accessories. It may be that they have bought a used car. If so they will want at least some new equipment. Knowing the use of tools more or less, they will want a good range of these. They will probably want the better grade, knowing full well that a cheap plier is a poor investment; that a wrench, screwdriver, tires, etc., will have to be good to stand the racket.

Not much display of these goods has been made as yet, but the department is promising expansion right along. It is expected to become one of the best profit yielders in the whole store.

An Ideal Brush Rack

One of the very best arrangements yet seen by HARDWARE AND METAL

for paint and varnish brushes is that used in the Davignon hardware department. It is located above one of the several display tables used and is above the top of the table about two feet. This is shown in one of the accompanying photographs.

Viewing this from the front of the store, the end of the brush rack is seen immediately beneath the sign bearing the word "furniture." There are eleven sections on each side of the rack, and each is divided into four compartments by narrow wood division strips. The brushes are displayed under hinged glass lids and each section rests on an angle of about 45 degrees. This permits the customer to make a quick survey of all varieties. "It takes no time to pick out the brush wanted," said Mr. Lacasse, "and the sale is made very quickly."

"Another thing. Our men can go over the whole stock once a week and see just what we are short of. This display case has been an excellent idea." In all, from 500 to 1,000 brushes may be carried according to the sizes displayed. Surplus brush stock is carried beneath on the low base of the table and in the original boxes. They are quickly available when the sections are to be refilled.

Time-Savers These

In the space allotted for hardware display good use is made of the same. Note the photo of the hardware shelving. Boxes are arranged here and sampled neatly, the finish of the boxes being of green, grained oak, the effect is quite different and quite pleasing.

Just where one of the clerks is standing the entrance to the pipe-fitting room will be seen. This runs parallel to the store, and while it is less than three feet wide it has a length of nearly 60 feet. This space is used to the best advantage, and hundreds of sizes of fittings are stocked here, to be had on a moment's notice.. Electric lights are used in here and a switch is placed in a handy location where it may be turned on and off in a jiffy. This avoids waste of light.

A screw case is placed on the second counter and holds a full assortment of bright wood screws. This saves time and as it has a clever fool-proof idea to prevent pilfering there is no loss from thieving.

The battery of self-measuring oil pumps is worth much to the hardware section, Mr. Lacasse stated. These are placed immediately at the end of the counters and will be readily seen. Value is attached to these for the oil-saving merit which these modern fixtures possess.

The glass rack will be recognized just back of the second counter. This takes up little space and yet carries nearly 100 sizes of pane window glass. It has the advantage of being at the elbow of every salesman serving on this side.

For silverware, electrical goods, cutlery, etc., the wall cases are used. These give protection from dust and make the stock attractive in an added sense.

Say Stove Prices Likely to Advance

Manufacturers Expect That Increase May be Considerable—In Some Factories Wages Have Advanced From 25 to 50 Per Cent. Since First of the Year—Cost of Materials is Also Going Up Steadily

STOVE manufacturers are looking for a considerable increase in the price of stoves. This will be due, they state, to steadily advancing wages, the lower efficiency of the labor they have, higher cost of coal and higher costs of raw materials. Wages in some plants have been advanced since the first of the year from twenty-five to fifty per cent., the figures varying in different departments. Added to this from a production standpoint must be figured the fact that the men are working shorter hours and also that many of the old employees, especially those doing much of the heavier work, have gone back to Europe and have been replaced by men whose efficiency is not nearly as great. In many cases the manufacturers have found difficulty in replacing these men at all.

See Lots of Business

The manufacturers see lots of business ahead and are going ahead with their plans to take care of a good volume of trade.

"Prices will not be reduced in any lines," said G. I. Evans, of the Hamilton Stove and Heater Co., Ltd., Hamilton, Ont.. discussing the outlook with HARDWARE AND METAL, "but rather are bound to increase to a considerable extent. This increase is caused by a variety of reasons, of which the increased cost and lower efficiency of labor, higher cost of coal and supplies may be cited as an example.

We do not agree in the general opinion that present-day prices in the great percentage of commodities are inflated, for it is quite evident that prices of everything, including labor, has reached a new high level, which will never recede.

Supplies and Raw Material

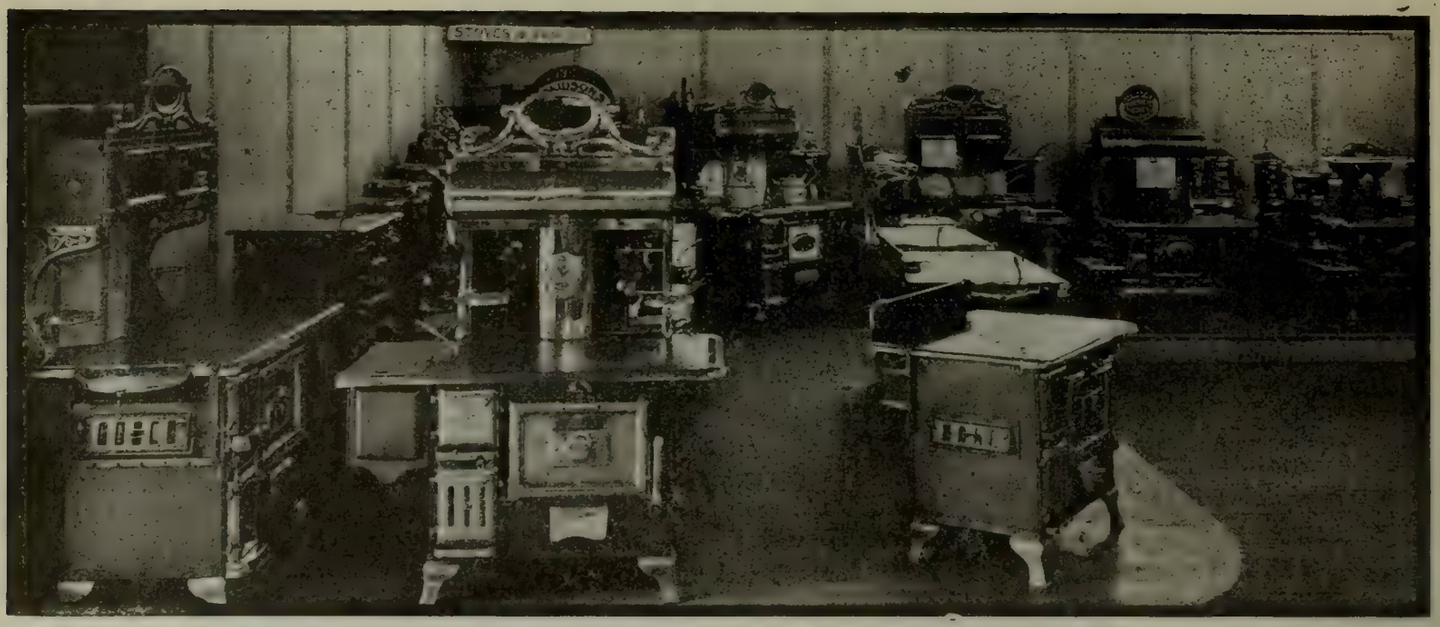
"No great difficulty is experienced in obtaining supplies of any kind, including coal," Mr. Evans continued, "although some items cannot be obtained promptly; in other words deliveries are somewhat uncertain, which to some extent interferes with production.

"We have no particular difficulty with labor at present, although there is more or less unrest in evidence at all times, and efficiency is not as high as it should be owing to the large number of men being reabsorbed into commercial manufacturing. In other words, the old organizations have been broken up and the new men are not yet sufficiently familiar with their work to give the greatest efficiency.

"We have insufficient stock to carry us over any period of labor disturbance, and a great many of our products are being manufactured after the customers' orders reach our factory.

Shipments and Delivery

"We are using every effort to persuade our customers to make their requirements known without delay," stated Mr. Evans, "as we are not adopting a policy of manufacturing large quantities of goods for stock, and for this reason, should any sudden revival of business take place, we will undoubtedly have to allot our output to the best advantage.



"Our reasons in not building up heavy stocks is that there is no particular evidence of any sudden revival in business," Mr. Evans said, "and we prefer to work along on restricted output rather than tie up large sums of money in stock, and if the jobbers and retailers will place their orders for their definite requirements without continually worrying themselves about the so-called inflated prices, we feel that business would be better all along the line."

Sees Big Advance

"When you take into consideration the enormous advance in prices of all raw materials used in the manufacture of our product, as well as the enormous advance in wages, and when you consider the small advance on the price of our goods, it is quite evident that prices must advance," said another manufacturer to HARDWARE AND METAL. "Labor alone since the first of the year has advanced from 25 to 50 per cent.; it varies according to the different departments.

"Furthermore, certain supplies which we require are still advancing owing, as I am given to understand, to the great European demand for these supplies or for some of the material used in the manufacture of these supplies, and it appears that it is the object of some of the American concerns to secure all the European trade possible and make Canadians pay much higher prices than formerly.

"We expect an advance in prices on stoves, ranges and furnaces," this factor

Half the battle in selling stoves is a good display. A neat arrangement, a good assortment do much towards making the favorable impression on a woman's mind, so necessary to close the sale. It is always advisable to keep the stoves bright and shining and free from a litter of pots and pans.

declared, "said advance to take effect any time.

Bought Supplies Ahead

"Regarding our supplies for raw material," this manufacturer continued, "we have not had any serious trouble in this respect as we have, since the beginning of the war, always bought our supplies nine or twelve months in advance.

"Regarding the labor question, it is impossible to get experienced help as there appears to be a shortage of experienced mechanics in our line. We had no serious labor trouble as we have always endeavored to meet our workmen in all their demands. We are expecting a shortage in stoves, ranges and furnaces this fall. Why? for this reason:

"The dealer in the early part of the season would not place his order, expecting a drop in prices. Instead of a drop they advanced. Then, when some of the dealers did place their orders they would not take early shipment but wanted very late shipments; this naturally placed the manufacturer in rather an awkward position, and the stove foundries have not been running to their fullest capacity they would have under normal conditions.

"Therefore," concluded this manufacturer, "the manufacturers have not the stock on hand that they usually have at this season of the year, and with the labor unrest it is questionable whether there will be enough goods manufactured to fill the present orders on hand

"Certainly the wide-awake dealer will have his orders shipped on immediately so as to make certain of having his stock on hand before the season opens and thereby running no risk regarding transportation delay or trouble in the rush season."

Expects No Reduction

"We see no likelihood or possibility of any reduction in prices," said W. S. Fisher, president of the Enterprise Foundry Co., Sackville, N.B., to HARDWARE AND METAL.

"Conditions are such that, in our opinion, if any changes are to be made, it will be the other way for the reason that the cost of production this season is showing a distinct increase. Labor conditions are not getting any easier and wages have increased a very great deal, especially during the past year. In addition to this, higher freight rates and the increased cost of every item connected with the business adds further to the burden.

Have Been Maintained

"After the armistice," Mr. Fisher continued, "the general feeling was that prices of iron, steel and the numerous items that enter into the construction of stoves and furnaces would drop, but instead they have been maintained on the high level previously reached or very close to the same. At present the market is very firm with a higher tendency.

"We had some labor troubles in the early part of the year," Mr. Fisher stated, "which resulted in closing our foundry for five weeks and which has reduced our output somewhat. As we see it there seems every evidence of a short supply of goods this fall, and we feel that those customers who protect themselves by purchasing early will be on the safe side, and for some time past we have so advised our customers.

Tell Your Customers The Right Oil To Buy

A very common mistake is to oil a sewing machine, bicycle or clock with any kind of oil which may be handy. Frequently these are oiled too often, but usually they are oiled too seldom, being left till they squeak. Then they are given too much oil of the wrong sort and there is more trouble. The right oil to use for a clock, no matter what sort it is, is clock oil, which is clean, thin lubricating oil which does not dry or get sticky. It is also suitable for any light machinery. The least possible touch of oil on the working parts only of a clock will suffice, and as the movements are slow they do not need it often. If this oil were used for sewing machines and the like they would require it too often, so a machine oil with more body is best used very lightly, but as frequently as may be needed to keep all the parts slightly greased. Fast running machinery requires oiling oftenest. Whereas once a year might do for a clock, once a day would be necessary for a machine in constant use.

GIVES FIVE POINTS FOR AN ADVERTISING CAMPAIGN

Dr. Chas. Stelzle, of the Publicity Department of the Methodist Centenary Celebration, outlined "Principles of Successful Advertising," at a luncheon of the Columbus, Ohio, Advertising Club.

Dr. Stelzle declared that there are five points to be remembered in an advertising campaign.

"First," he said, "you must make a thorough survey of the field.

"Second, select the group in which you wish to advertise and be sure of your ground.

"Third, assume that the public is totally ignorant of what you have to sell, and prepare your advertisements with this in mind.

"The fourth point is that an atmosphere favorable to the sale of what you are advertising is created.

"The final, and most important point of all, is 'Truth.' This is the slogan of the Advertising Clubs of the World, and is being lived up to by successful advertising men."

Dr. Stelzle said that in preparing for the huge centenary celebration, all these points had been taken into consideration and that the success of the enterprise has been assured as a result.

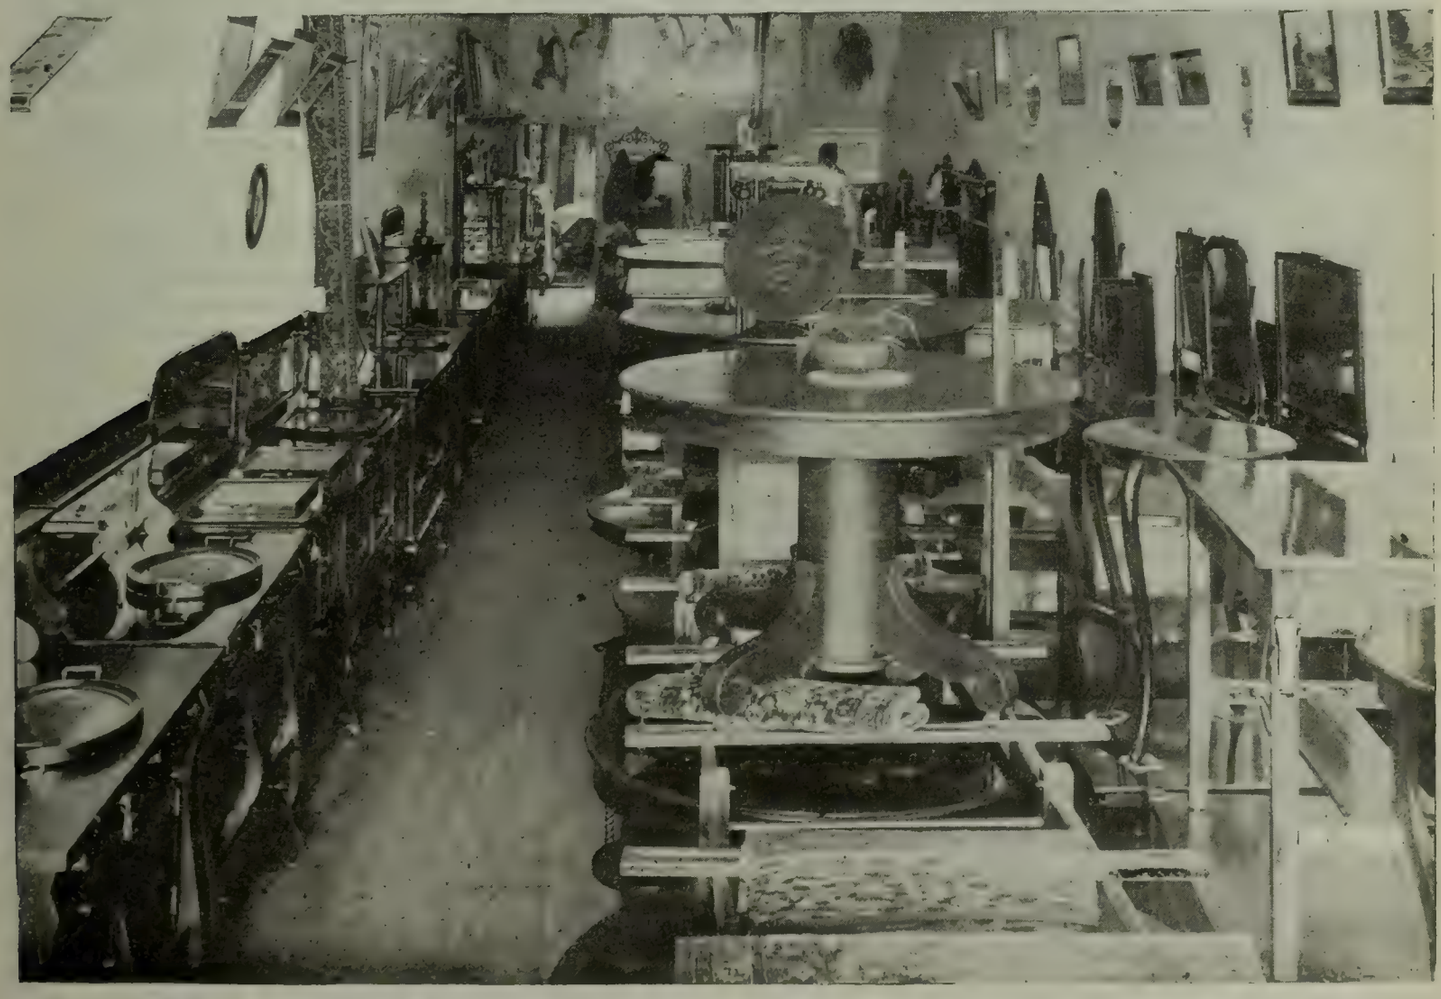
Supplies Complete House Furnishings

Essex, Ont., Merchant by Handling Furniture Finds Cycle Complete —Fifteen Years' Experience Proves This Department a Valuable Asset to Business—Carrying the Stock the Answer to Outside Competition — Store Arrangement and Window Displays Good.

FOR over fifteen of the forty years W. H. Richardson has been in business in Essex, Ont., has this merchant handled furniture in connection with his hardware stock. That he finds this a valuable department is evidenced in a continually growing turnover and Mr. Richardson states that he finds carrying a stock one of the best answers to mail order competition.

One might go back over the period of years W. H. Richardson has been in business and write a mighty interesting story of the early days, showing how merchants conducted operations at that time and wherein the methods of to-day vary. But it is not the object of this review of this store to deal with the past. The present is vital and Mr. Richardson is one of those merchants who has kept his store abreast of the times and stands out to-day as one of the leaders in his field.

Outside Competition



It is by no means easy to get away from mail order house competition and the town of Essex suffers from outside sources to some extent. But this competition is treated by Mr. Richardson as something he cannot eliminate altogether and by selling service, having the goods on the floor where people can come in to examine them, he is minimizing the inroads the mail order house is able to make on his business to very small proportions.

Answer is Carry the Stock

As stated above, Mr. Richardson finds the best answer to meeting mail order competition, is to carry the stock. And that is just what he does. His furniture display is large and well-assorted and would do credit to many large city stores. The town and surrounding country served by this merchant is a decidedly prosperous community and people are willing and able to pay for merchandise of quality which they can see and in this way determine values.

How it Works

"Were I only to carry a few lines and depend on the catalogues of the manufacturers to complete sales," Mr. Richardson stated, "I would be giving the people of this district no better service than they could get from the mail order catalogue. It is by having the goods right on hand for the inspection of our customers that we put it all over the outside solicitors. Another point and this we emphasize is that the goods are here, they are in good order and we put them into the homes of our customers without a scratch on them. In selling, we do not knock the competition we have, but we try to show wherein we are putting out merchandise of quality that will stand up and back of which we

View of the furniture display on the main floor in the store of W. H. Richardson, Essex, Ont. This merchant has handled furniture in connection with his hardware business for the past fifteen years. He finds it a splendid department and intimates that it works in very nicely with stoves and all generally accepted lines of hardware house furnishings.

This shows the other half, the hardware half, of the store of W. H. Richardson, Essex, Ont. A fine showing of stoves, refrigerators, washing machines, tinware, enamelware and kindred lines is apparent. The paint department is at the rear, and the shelf hardware lines at the right.

stand. We are here to listen to any complaints and make adjustments if necessary. We are selling "service" with our goods and there are few to whom this appeal does not reach."

Furniture Big Line

To the right of the store on entering, one steps into the furniture department. On the main floor, dining room suites, parlor furniture, and some bedroom sets are arranged. The showing is an extensive one and as will be noted from the accompanying photograph is arranged in such a manner as to catch the eye and make a distinct impression on the mind.

Has Another Floor

This section, however, does not complete the furniture department as the second floor is practically all devoted to a further showing of these goods. Beds, mattresses and springs, easy chairs, parlor chairs and kitchen furniture, rugs and pictures complete the stock which this merchant carries. There is no need for the customers of this store to go to the city or send to the mail order house for furniture. The goods are carried in stock by this enterprising merchant and that people appreciate this consideration of their needs is shown by the rapid stride this department is making in the matter of sales.

Gives Complete Service

There are many ways in which the furniture department has been found a valuable asset in conjunction with the regular lines of hardware. This merchant might be called a "complete home outfitter" for what is possible on stepping out of the furniture department? Nothing less than that the customer can secure a stove for the kitchen, enamel, tin or aluminum cooking utensils, the tack hammer, the screw driver, the electric household appliances which lighten the housewife's duties. These lines are all under the same roof and it has been demonstrated times without number that the complete service is making new and holding the old customers of this store.

Mr. Richardson states that it has been their experience often in selling a new outfit of furniture that the hardware lines naturally complete the sales. Or the reverse is true, people who come in to buy a stove or enamelware will become furniture customers as well.

Stoves Big Sellers

The store department is a big one with this firm and a stock is always carried which gives an opportunity for selection. Coal oil stoves have enjoyed a remarkably heavy sale during the past summer and the business on ranges is opening up very well. There is some business done also in gas burners which can be installed in a range.

A section of the store display appears in one of the accompanying photographs and back of same is shown the stock of enamelware, tinware, aluminum ware and kindred lines which complete the housefurnishings department from the hardware viewpoint.

Perhaps one should hardly say complete, because washing machines, shown in the foreground, refrigerators and electrical household appliances are other goods which might come under a more extensive classification of housefurnishings. An increasing turnover is revealed in the sales of electric washing machines, the townspeople who have electric power available bring more and more customers for this type of machine. The same is true of electric irons, percolators, toasters and similar goods on which a splendid volume of business is reported.

Paints Get Share

Across the back of the store the paint department appears. Whereas it is not immediately available to a customer entering the store there is nothing to interfere with the view of this section. customers can see the fine display even from the front of the store and the sug-

(Continued on page 138.)

Designs Float to Advertise Stoves

North Bay, Ont., Merchant Employs Effective Method of Keeping Stoves in Public Eye—May be Used in Other Ways— In Selling Stoves Makes Full Explanation of How to Get Best Service—Suggests Accessories

THERE are many new methods employed and many old ones revised from time to time in the successful development of business. At times there is a call for some new advertising angle which will stir up the interest of the trade served to an even greater appreciation of the store service.

It was with such an idea in mind that W. E. Cassidy, who is associated with Geo. W. McDonald, general hardware merchant, of North Bay, Ont., arranged recently a float representing "made in Canada Oil Stoves."

View of the float on Made-in-Canada Oil Stoves, arranged by W. E. Cassidy for Geo. W. McDonald, Sudbury, Ont.

May be Used in Other Ways

Views of the float from different angles appear along with this article, and may form a suggestion for other retailers in connection with their sales program on stoves or some other lines. It need not necessarily be in the form of a float for a parade. The display could easily be adapted for the interior of the store or the idea might be employed in a booth at the Fall Fair.

Variation Good Thing

Variation is a good thing in the arrangement of your display, whether they be made inside the store, in the windows, in connection with a local first of July demonstration or Fall Fair. The main thing is to get the customer's attention first, then the display must be of such a nature that it will create an interest and bring inquiries. When the inquiries are forthcoming it is taken up to the salesman to close up the sale at once or instil the germ of desire into the customer, which will later develop into his buying.

Employs Aggressive Methods

Mr. Cassidy, who designed and painted the float shown in the accompanying photographs, has had splendid success in selling oil stoves, which, it may well be assumed, extends to other lines. His ideas in handling this trade were expressed in HARDWARE AND METAL over a year ago, when associated with Robt. Horne, of Sudbury, and are reproduced herewith, showing wherein aggressive sales methods bring in results. Mr. Cassidy says in part:

"Each oil stove that is sold means a new customer for oil and oil stove accessories. From six to seven gallons of oil per month will last a family of five with an oil stove. This averages about fifty gallons per season.

"After having succeeded in making a sale of an oil stove, I endeavor to sell my customer the accessories, such as ovens, oil stove wash boilers, tea kettles, toasters, and special oil stove oil cans, all of which I keep well displayed on the sample stoves. Five stoves of various sizes, with and without cabinets and ovens, are displayed near the main entrance of the store. The ovens contain self-basting roasters, pie plates and bread pans to fit oven. A record of each oil stove sale is kept in a book for the purpose, the date, name of purchaser, address and employment are registered, along with the size of the stove and accessories purchased.

Always Tries To Interest Customers

"After I am through serving my customers I always attempt to interest them in an oil stove. After lighting it I draw my prospect's attention to the cabinets and different ovens on other stoves until the stove I started has generated sufficient heat to make an impression upon my customer of its actual performance. A small teakettle is placed over the burner and allowed to boil, which takes about four or five minutes.

Makes Explanations

"The flame is then extinguished and a lighted match held above the top of the burner. This ignites the vapor which formerly was generated by the heat in the combustion chambers. This proves that the oil is vaporized into a gas before being consumed, therefore eliminating the offensive odor. This vapor or

Showing the float of oil stoves in the procession. It makes a very attractive arrangement, and serves to keep the store well advertised.

Another view of the procession in which the float of a "Made-in-Canada Oil Stove" was arranged for Geo. W. McDonald at a recent demonstration in Sudbury, Ont.

gas is produced in the perforated combustion cylinders, which produce an inflammable gas through the correct proportions of air and kerosene. The next step is to demonstrate to my customer the simplicity of replacing the wicks, also the cleaning of the wicks and burners.

Further Information

"After having made the sale I now proceed to advise my customer on how to prolong the life of the stove by placing the combustion chambers in a kettle with boiling water. This removes the carbon and soot which clog up the perforations in the cylinders and cause the stove to smoke.

"It is advisable to keep the stove away from a coal or wood radiator. Every oil burning device is subject to capillary attraction. That is, heat produced with a wick or kindler will attract oil towards that which produces the heat. Therefore, if you place an oil stove near a hot range the heat of the range will cause the oil tank under the large one to overflow. To avoid this keep the oil stove in a cool part of the kitchen.

Saving in Cooked Meats

"The average salesman is not aware that meats cooked in an oil stove oven or an electric oven have less shrinkage per pound than meat cooked in any coal stove oven, the saving in a nine pound leg of mutton being as much as 1½ lbs., as compared with cooking the same amount in a coal range.

"A number of careful and independent experiments in England have shown that there is a shrinkage of from 25 to 35 per cent. in the weight of meat cooked by coal or wood, whereas the same amount of meat cooked to the same degree of heat in an oil stove oven loses only 10 or 15 per cent. of its original weight, which would be equivalent to a financial saving of thirty cents or the price of a gallon of kerosene on a roast weighing 5 lbs., 14 ounces.

Advertising and Displaying

"I always arrange to keep an oil stove in the front section of the store during the winter, as we find a good demand from the apartment houses and suites which are steam heated. During the summer months a window display which is changed frequently is devoted exclusively to oil stoves and electrical appliances.

"Every Saturday night an oil stove is kept burning with a kettle full of water on it. The steam from this kettle attracts the attention of the public, many of them asking an explanation. Large cards are arranged along with the stoves giving the prices and sizes. In the centre of the window a stove is dismantled, showing the construction of the burners and cylinders. We advertise in the two leading papers. The ads are changed every three weeks, one featuring oil stoves at one time, and the other advertising matter at the same time. By emphasizing a single article or brand in each ad I find it pays far beyond the old style of advertising half a dozen different lines and claiming each to be the best on earth. By concentrating upon one special stove your ad will make a deeper impression. The average reader remembers one thing where he wouldn't a dozen, and he is more likely to call upon you for it if it catches his fancy. At the end of each month when the monthly statements are mailed I arrange to include a liberal supply of circulars and pamphlets which are supplied by the manufacturers of oil stoves."

SUPPLIES COMPLETE HOUSE FURNISHING STORE

(Continued from page 136.)

gestion to visit this department is never lacking. The spring and early summer trade was splendid, the Board of Trade working with the local paper and merchants in putting over a successful "Paint Up and Clean Up" campaign. Results of their united efforts were apparent in a trip through the town where completed jobs and work under way testified to the power of conceited action along these lines.

Neat Store Arrangement

Through the centre of the store there is a wall dividing the hardware and furniture departments. On the hardware department side is carried the various lines of shelf hardware, neatly arranged in sampled drawers.

Silent salesmen are utilized to display cutlery of various kinds, flashlights and electric household appliances and Mr. Richardson states, that he finds this form of display an excellent method of securing the attention of the customers of the store. Counter display cases are also in evidence and any attractive counter display cards, paint cards, etc., are arranged where they will catch the eye of the prospective buyer.

Windows Drawing Cards

Another form of getting the eye of the public which has, Mr. Richardson finds of district value, is the window display. Two very large display windows front the store, one being devoted almost exclusively to furniture and the other to seasonable lines of hardware. The windows are changed very frequently and goods arranged in an attractive manner. The size of the windows enables a big showing to be made of furniture. For instance, a complete dining room suite or bed room set can be shown at one time. This is considered of distinct value by Mr. Richardson, as it gives the customer passing the store an idea as to how the complete set will appear in the house. Newspaper advertising is employed to reach the customer's out of town as well as those in town.

Does Credit Business

Commenting on the amount of credit business done, Mr. Richardson stated, they had quite a good deal of this to handle, but the losses through watching accounts carefully were small. "The credit business done is smaller than it has been," Mr. Richardson stated, "farmers generally being in good shape due to the high prices they have secured for their various products. This means a bigger percentage of cash sales and knowing the various customers through long association with them we are able to select those we give credit to with reasonable assurance of collecting our accounts."

The office is located right at the front of the store to the left of the entrance. From this it is possible to see all those who enter the store and see that customers are given prompt and careful attention. Mr. Richardson has an extensive collection of manufacturers' and jobbers' catalogues on hand and with those lines of goods which he does not carry in stock is able to overcome this question by showing the customer the catalogue and taking his order from same.

FARMER BEST BUYER WHEN CONVINCED OF WORTH

"The farmer is the best buyer in the country to-day, if you can convince him of the need for and the worth of your product," declared James J. McMahon, general manager of the Standard Farm Papers, Inc., in an address before the Adcraft Club of Detroit.

"In selling the farmer it must always be remembered that he doesn't buy things which he doesn't need, and that he buys everything as an investment. He needed the automobile in his business, so he bought it. If your selling campaign is not bringing the desired result, do not blame the farmer or the dealer. Go on the assumption that they are always right and look close to home and see whether you are presenting convincing buying reasons.

"The farmer has been asked to buy cheap automobiles and has been shown the necessity for the purchase. But he has never purchased the more expensive cars because he hasn't been asked to buy and hasn't been shown that the expensive car is worth more to him.

"The farmer can never be 'sold off his feet,' while the city man is often carried with the wave. The farmer considers all the angles, and if you work under the assumption that you can sell him through your first appeal you will fail in a great majority of cases. He likes to look at the article in question several times and bring his friends to see it and get opinions from them, but he will go out of his way to purchase if he is properly sold."

EXPERIENCE MEETING BROUGHT INTERESTING TALKS

The Lorain, Ohio, Advertising Club has put on a very interesting feature which is called "An old-fashioned experience meeting."

After a luncheon, which was attended by about fifteen members and guests, the chairman called upon each one present to speak for five minutes and give some of his experiences in business. The brief talks were so specific in their character and contained so many actual experiences in business that a number of the audience got out their pads and made memoranda for use in their own work.

Selling 400 Stoves in a Year

Fall Fair Successful Advertising Medium is View of Chatham, Ont., Hardware Merchant—Ed. Wanless, of J. C. Wanless Store, Outlines Points in Connection With the Development of Stove Department—Works With Manufacturers.

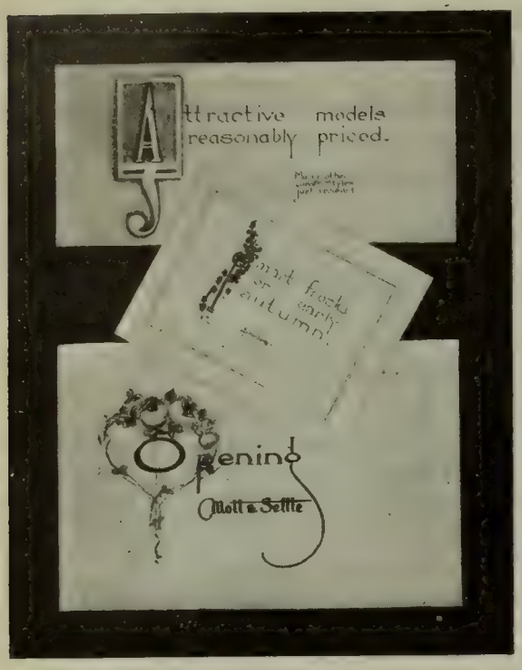
"FROM the standpoint of advertising, I find that the fall fair is one of the best mediums we employ," stated Mr. Ed. Wanless, of J. C. Wanless, Chatham, Ont., in discussing the stove business of the firm and how it had developed to its present large proportions. "From the standpoint of actual sales made during the progress of the fair, I cannot say so much," Mr. Wanless continued. "People generally do not come to buy such lines as stoves but they are interested in seeing the line and we are right there to explain the merits of the ones we carry. The impression made on their minds is a good one and lasting, and we keep a record of those making enquiries so that we can follow them up later to complete the sale."

Stove Sales Heavy

That the stove business of this firm is large can be determined from the fact that they dispose of about 400 new stoves in a year, and in addition, approximately half as many second-hand stoves. "I may say," Mr. Wanless stated, "that the second-hand stove is a real money-making proposition if handled properly, and we endeavor to handle it in just that way. We try never to show any old stove until it has been placed in perfect condition, then we know what we can get for it."

Shows at Fair Yearly

"Do you show at fairs regularly?" HARDWARE AND METAL asked Mr. Wanless, to which he replied: "We show at the Chatham fair every year, this being a three-day fair, and it is attended very largely, especially the second and third days. I might say that this year another day has been added which will be that much better as we will get the benefit of the extra full day in display, whereas now, with a three-day fair it really only means about one and a half days' showing."



Good Location

Speaking of the location of the display he had, Mr. Wanless was very enthusiastic: "We have what we consider the best space in the building," Mr. Wanless stated, "immediately to the left of the main entrance, and as it is on the opposite side of the buildling from the main entrance to the grounds it is easily seen before any other space. Our space is about 12 feet deep and approximately 30 feet long. This, we have panelled, back ends and ceiling with wall board, stripped at the joints and tinted with flat wall paint. We are enabled to leave this background the year around, the only preparation necessary being that we change the color scheme each year. We have electric light fixtures through the ceiling and endeavor

(Continued on page 146.)

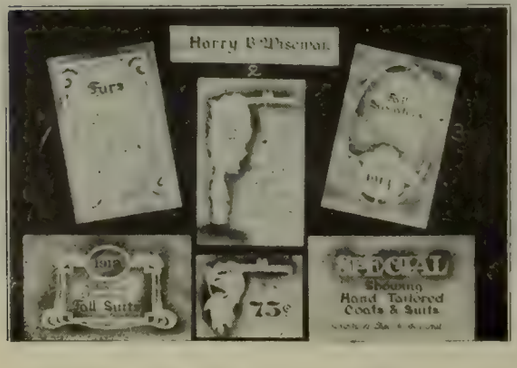
Displuy of stoves put on by J. C. Wanless, Chatham, Ont., on the occasion of the Fall Fair. Ed. Wanless says he believes the Fall Fair one of the best advertising mediums he employs. The free use of banners and cards, easily and quickly read, will be noted.

Show Card Writing

For Disabled Soldiers, Sailors and Marines to Aid Them in Choosing a Vocation

This monograph was prepared by May H. Hope, under direction of Charles H. Winslow, Chief of the Research Division of the Federal Board for Vocational Education. Acknowledgment is due to Dr. John Cummings, of the Research Division, for editorial assistance.

SHOW CARD WRITING



THIS "Opportunity Monograph" has been prepared by the Federal Board for Vocational Education in the United States and issued in co-operation with the office of the Surgeon-General, War Department, and Bureau of Medicine and Surgery, Navy Department, Washington, D.C. There seems to be so much matter of real value that it is reproduced herewith in the hope that it will reach hands to whom it will carry an inspiration for good. We are indebted to the Koester School, Chicago, Ill., for their kindness in loaning cuts.—Editor's Note.

The Purpose of the Show Card

A man's attention is attracted through his sense of sight more readily than in any other way. A word, a phrase, a pithy sentence will catch his eye and focus his interest, where something requiring more concentration would fail. For this reason window dressing has grown into an important feature of every merchant's business, and cards pointing out the quality and prices of the goods displayed are universally used. These show cards were formerly made by sign painters, until some, more far-seeing than others, realized the opportunity to specialize in this line of work, which has now developed into a distinctive trade.

Different Types of Cards

There is a great variety of types in show cards. Some are large, others are small; some are ornamented with designs suitable for the occasion, or season, or goods to be featured in the advertisement; others are plain numerals or letters giving the bare detail of cost. As these cards are shown in the street cars, on moving picture announcements, on billboards at theatre entrances, as well as in the stores, they must be so varied as to be appropriate to their surroundings.

A practical feature in writing show cards is the selection of some special design or slogan with which the article or firm may always be associated in the mind of the public. In this field a showcard writer with originality is able to realize materially upon his ideas.

Future of the Trade

Because the merchant believes that seeing is very likely to mean buying he finds the showcard writer indispensable to his business. Whether large or small, every store needs these display cards with their catchy announcements to aid in promoting business. Present-day competition makes it necessary that every known means of attracting attention shall be utilized by the merchant who would keep up in his line. Progressiveness in store management has occasioned rapid growth in the trade of card writing within the last few years, and the constantly increasing demand for advertising indicates that the trade of showcard writing has an assured future.

Equipment

For the man possessing limited capital the small cost of the necessary equipment is an alluring inducement to enter the trade. A few dollars will cover the entire cost. Brushes, pens, penholder, with ink retainer, ruler, art gum or sponge rubber, thumb tacks, combination compass, a pair of large shears, a T-square, a box of charcoal, soft lead pencils, and cardboard make up the list of necessary material for the showcard writer. A good-sized drawing board completes the list. "The better the workman the fewer the tools" has been said. An expert card writer works efficiently with a board, a T-square, and a half dozen thumb tacks.

What Men in the Trade Should Know

A good general education is essential for a showcard writer who expects to be more than merely a mechanical maker of words and letters. Those who become expert in the art need a knowledge of designing and an originality in composing effective phrases, such as can not be resisted even by those who read the cards casually.

A practical knowledge of the geometric construction of letters is fundamental, for though simple lettering may be largely mechanical work, skill must not be confined to the utilization of mechanical means alone.

A knowledge of color is an advantage to those who

make sign cards. Color combinations and contrasts play an important part in producing attractive cards. As card writers are confronted by all sorts of combinations of words in inscriptions, it is necessary for them to know letter forms; to understand novelty in designing, arrangement, and artistic embellishment; and to exercise taste in harmonizing colors, so as to produce cards that will be not only neat and attractive but at the same time legible.

What Men in the Trade Do

Showcard writers make price tickets and all types of trade cards used in windows, on special sale sections, on the announcement boards of theatres, on automobiles, in cafeterias, in street cars, and wherever else the card may serve as a proper medium for advertising. The trade is carried on in different ways. Cards are sometimes made by salesmen who give only part of their time to this work. Other writers give all of their time to one firm requiring a large number of cards for its own use. Some card writers work for showcard firms and others have their own offices and fill special orders.

Opportunities

The demand for showcard writers is far greater than the supply. Every small town offers an opening for one or more, who would make a good living at the trade in that locality.

How Men Are Trained

Many card writers are trained in the shop. Correspondence courses afford fair advantages to the man who must save time and money, but personal supervision is of great advantage, and personal criticism is essential if a correspondence course is taken. Courses in card writing are now offered in technical schools and Y.M.C.A. classes and vocation schools all over the country.

The length of time required for the completion of courses depends upon the student; one very good course covers eight weeks. Some students after the fifth or sixth lesson have done work sufficiently creditable to bring a money return. Proper and methodical training is very necessary. Care and exactness must first be acquired and speed will naturally follow.

Courses given in showcard writing cover such subjects as how to mix and when to use water color, inks, and oils; the care of brushes and pens; the proper kind and color of cardboards to use; and how to apply bronze and diamond dust. The formation of pen and brush letters is, of course, fundamental, and the principles of lettering must be taught in a simple, thorough, and correct way. Proper instruction, with application, is bound to bring success.

BRIEF SYNOPSIS OF THE COURSE IN SHOW-CARD WRITING GIVEN AT THE KOESTER SCHOOL, CHICAGO.

Lesson plates Nos. 1 *to* 6.—Improved method for teaching correct formation and relative proportions of letters and numerals.—Brush method.

General instructions.—Proper materials, student's worktable, light, how to care for brushes, show-card paint, how to practice, kind of practice that counts, lesson plates explained, how to fill the brush, how to bring the brush to working point, how to hold the brush, position at table, position of paper.

Lesson plates Nos. 7 *to* 10 *Single stroke rapid Roman lettering.*—How to begin the practice, time-saving methods, how to hold the brush, various positions of the brush explained, how to manipulate the brush to produce clean-cut strokes, purpose of single-stroke vertical and italic roman lettering.

Lesson Plates Nos. 11 *and* 12—*How to shade letters.*—Various styles of shading, proper colors for shading, shading as an embellishment, shading to give emphasis.

Lesson plates Nos. 13 *to* 16—Single stroke Egyptian lettering.—Brushes to use, how to hold the brush, how to manipulate the brush to produce the proper stroke, how to practice the elementary lines and curves.

Lesson plates Nos. 17 *and* 18—*Single and double stroke alphabet and numerals.*—Purpose of this style of letter brushes to use, method explained, different methods of finishing the letters.

Lesson plate No. 19—*Single-stroke old English alphabet.*—Purpose of old English lettering how to hold the brush, retouching the principal strokes.

Lesson plat No. 20—*Single-stroke modified Roman pen lettering.*—Advantages of pen lettering for text or descriptive matter, inks to use, how to practice pen lettering, how to hold the pen, how to manipulate the pen to procure clean-cut strokes, how to use an ink reservoir to facilitate rapid work.

Fifteen practical show-card layouts.—In the foregoing lessons the student acquires sufficient ability to enable him to make practical use of his knowledge. The alphabets covered are sufficient for general show-card use. Therefore, at this point, the course presents 15 practical layouts showing how the text should be separated into display lines and descriptive groups, also various styles of letters that may be used in harmony for display and descriptive matter. An appropriate show-card phrase is used for each layout. Display lines and descriptive groups are indicated in the exact size and styles of letters to be used in lettering each layout. Specific directions as to color, combinations, and embellishments are given for each layout.

A study in design and layout.—The principles of spacing, importance of show-card designing, best rules for spacing, lessons in spacing, how to centre a word or line.

Condensing and extending letters.—How to plan lettering to fit a given space, rules for condensing, rules for extending, appropriate uses of condensed and extended letters, practice exercises.

Principles of the balance layout.—Balanced layout defined, how to plan the balanced layout, important points to observe, examples of balanced layout, practice exercises in balanced layouts.

Border lines, underscore, space fillers, and panels.—Brush ruling, how to draw an ellipse, initial panels, initial letters, a few card kinks.

The group layout.—How to plan the group layout, examples of group layout, practice exercises in group layout.

Combination layout.—Purpose of the combination layout, how to divide the phrase into display lines and groups for the combination layout, examples of combination layouts, exercises in combination layouts.

Price tickets.—Normal style price tickets, bold style price tickets, small price tickets, fancy price tickets, illustrative price tickets, practice exercises.

Illustrated show-cards.—Sources of ideas, tracing from clipped illustrations, how to use the pantograph for enlarging illustrations, the mirrorscope, examples of appropriate designs for various purposes, exercises in illustrated show-cards.

Principles of colors—Color contrasts.—How to mix water-color paint, color effects; color combinatin; mixing standard colors to produce shades, tints, and unusual colors; lessons in color combinations.

Show-card embellishment.—Dry-color blending; spatter work; relief lettering; applying metallics, diamond dust, flock, etc.; phrase and picture filing; seasonable embellishments; floral decorations; poster cut-outs; silhouettes; how to paint muslin signs.

Instruction in the use of the air brush.—Principles of the air brush; sectional view of an air brush; illustrating and describing all important parts; air pressure; how to put a gas outfit together; colors for air-brush use; how to use the air brush; care of the air brush; how to cut stencils; practice exercises to gain control of brush; color blending; exercises in the use of stencil designs.

Lesson plate No. 21—Single-stroke alphabet and numerals for modern speed ball pen lettering.

Lesson plate No. 22—Uniform single-stroke alphabet and numerals for Payzant pen lettering.

Lesson plate No. 23—Single-stroke Payzant or speed ball pen alphabet with retouched spurs.

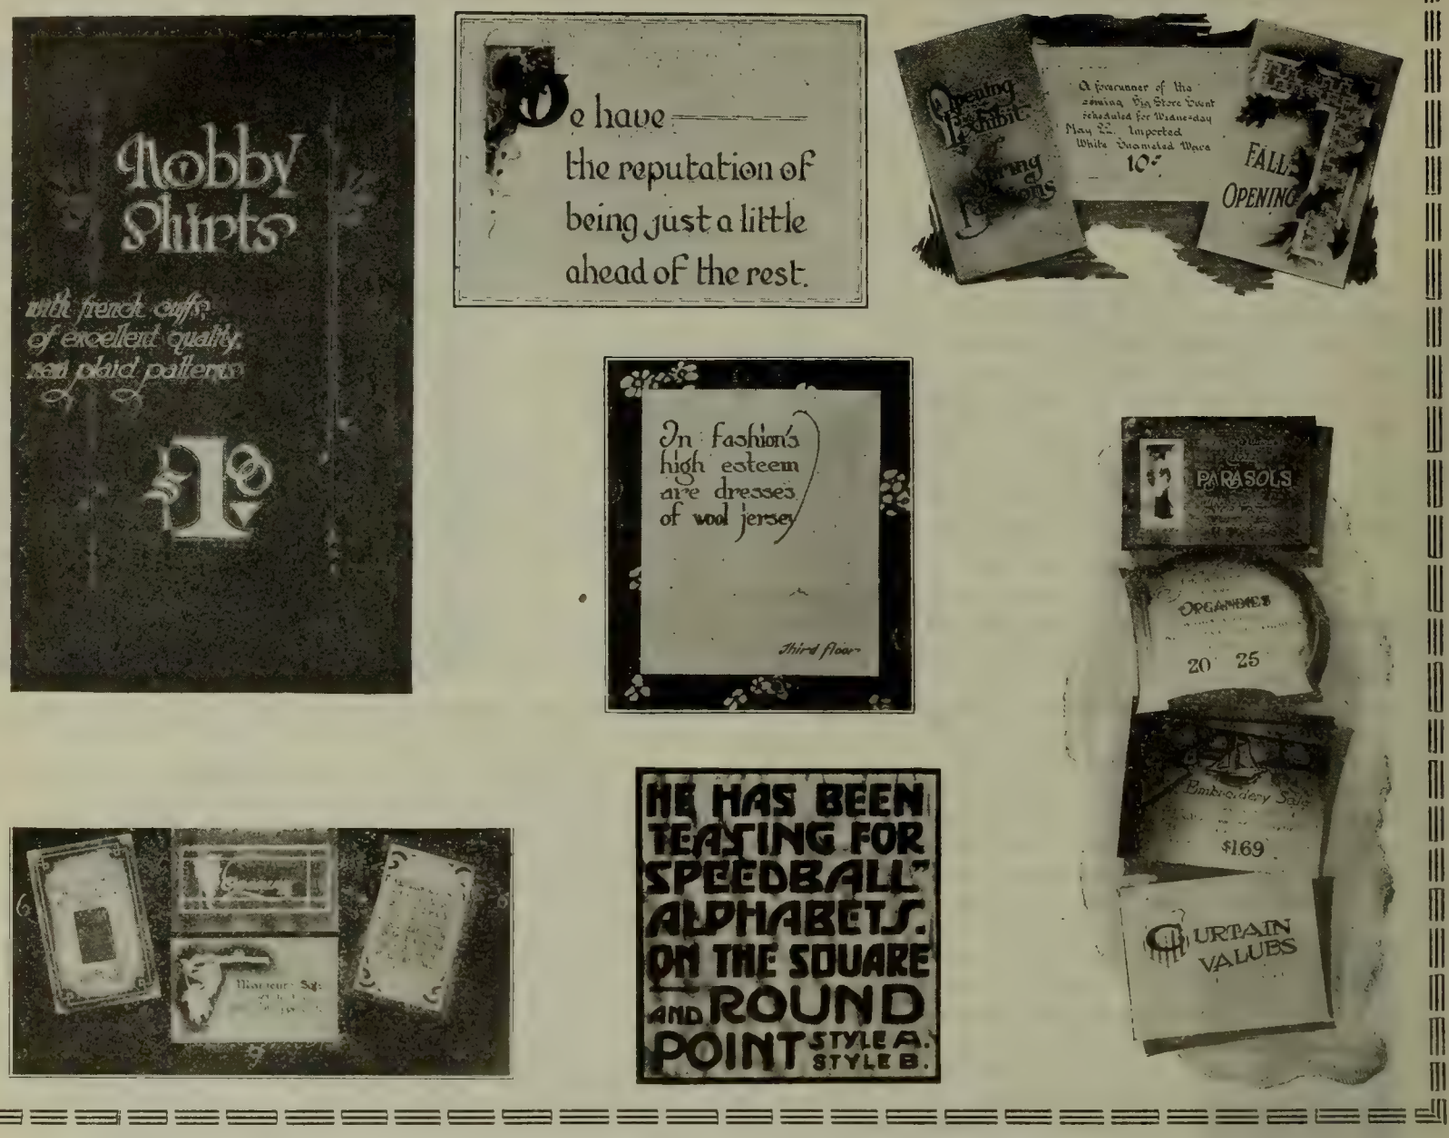
Lesson plate No. 24—Speed ball pen initial capitals, retouched and embellished.

Lesson plate No. 25—Outline Roman initial embellished capitals, plain lower-case letters.

Lesson plate No. 26—Modern Roman and fancy alphabets for music pen lettering.

Lesson plate No. 27—Old English text pen, and small speed ball pen alphabets.

Lesson plate No. 28—Speed ball pen alphabets.



Lesson plate No. 29—Rapid single-stroke antique roman brush alphabet.

Lesson plate No. 30—Rapid single-stroke modified roman brush alphabet.

Lesson plate No. 31—Single-stroke antique alphabet and numerals.

Qualifications

Anyone who can learn to write can learn to draw or paint letters for showcards. It is not essential to have artistic ability, although this would be an asset in the trade; a steady hand and a correct eye are the only re-

Samples of Show Card Writing

quirements, and it is well to remember that "the sight that insures correct drawing is not that of the eye only, but of the mind."

Handicaps

Good eyesight is essential, but almost no handicap other than blindness, or the loss of both arms, is prohibitive. It is an advantage to have both hands, but the fact that one-armed men have so clearly demonstrated their ability to write as legibly as others with both hands indicates that the difficulty for a man with one hand becoming a showcard writer can be overcome.

Desirability For the Disabled Man

The work is not heavy, the hours may be adjusted to the strength of the worker, the prospects for work in the trade are favorable, and the pay is good—all of which characterizes the trade as one suitable for disabled men. A chief attraction which showcard writing holds out for the handicapped man is the freedom allowed in the choice of a working place. He may be independent, not only in the place of his work, but in selecting his own hours for work. This liberty means much for a man who is physically below normal. The conditions under which a writer of show cards works are favorable, both as to time and place.

Remuneration

Showcard writing is a fascinating art and brings good profits. For this reason its appeal will be strong to the wounded soldier.

An exact standard of prices has never been possible for card writing, as so much depends upon the quality of the work and the time required to make the cards. The cost of the material is negligible; but showcards have an intrinsic value to the merchant, who is usually willing to pay for them.

Card writers make from $25 to $75 a week. Advertising cards, being of a temporary nature, must be inexpensive. Rapidity is necessary, in order to make it profitable, as the writers are usually paid by piecework. The example may be cited of a hunchback who began showcard writing at $3 a week and by his energy and application rose to a salary of $40 in a short while.

A lack of application or giving way to discouragement over first attempts may cause failure, but for no other reason should a disabled man who desires to become a writer of trade cards feel the slightest fear of the undertaking. Begin the course with a determination to succeed and remember that lack of confidence is not conducive to success in any trade. Learn the principal strokes with great care, practise diligently until dexterity is acquired, work without hesitation, boldly and with enthusiasm, and in a short time there will be acquired expertness in a trade which is interesting, agreeable, and lucrative.

Keeping Your Tool Sales Active

Building Trades Again Busy Means Bigger Tool Sales—Start the Household off on a Good Winter's Work—Suggestion for Solution of Long, Dark Nights at Home Problem.

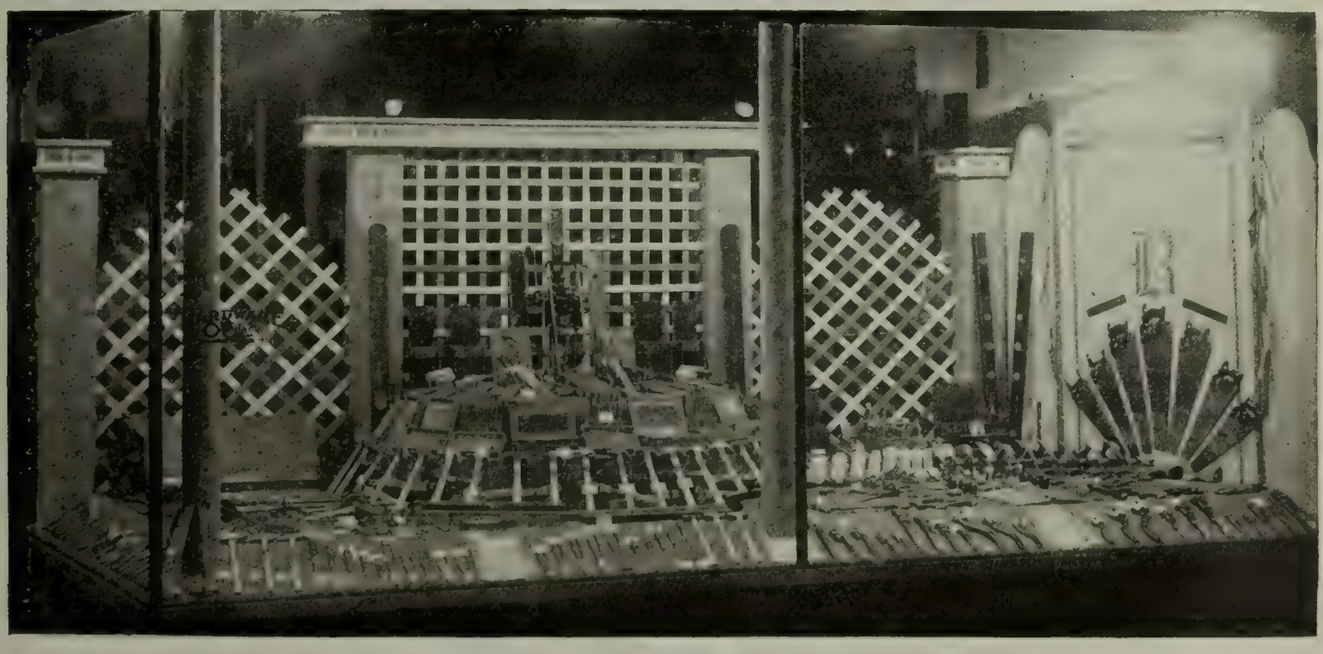
MECHANICS' tools, from the standpoint of the building trades, were rather at a standstill during the period of the war. However, there are evidences of a substantial improvement in the volume of trade coming to hand now that peace has come and hardware merchants all over the country are again turning their attention to the tool department.

Opportunities are many for the successful development of this trade, and no single chance should be missed to encourage this class of business. There must be many carpenters, masons and others, who, with a mechanical turn of mind, undertook the making of munitions and are now getting back into their stride in the building game.

They will require, if not a complete new set of tools, at least many items which are not included in the kits they carry. Careful cultivation of the trade in your community will result in sales in what are often considered unexpected places.

Too often is the remark heard that the trade in a community is worked out—that there is no new business to be had—that opportunities for development along broad lines are negligible. Look around you, Mr. Hardwareman; study your customers' requirements carefully not in a half-hearted way but with a real dectective's instinct for clues.

You will be surprised at what you discover. Bill Jones is still using that old plane, and you have a new type which will enable him to so easily improve the class of work he is doing. The furniture man is specializing on picture framing and does a fair class of work with a panel saw—try to sell him a nice fine hacksaw and mitre box, the use of which will tend to place him in the top-notcher class. Encourage the boys to get a kit of tools and develop their mechanical genius. Perhaps many a householder whom you have never suspected of wanting to do fine cabinet work or build furniture for his home will be interested in combination squares, fancy planes or what-not.



Some other town looks so much better than your own, maybe, but it might prove just the same as yours when you got there. Root and dig for business; you will find it right at your doorstep waiting to come in and this is true of no line in your store more than tools.

Think of the range of goods this embraces. Every home in your town should possess a hammer, saw, screw driver, auger bits, brace, plane and wrench. When you sell the fundamentals and your customer begins to use them, his activities increase to a point where he wants to undertake more extensive operations. It never fails and the inauguration of a campaign which will start the ball rolling should not be delayed any longer than necessary to make plans.

It will not be so long before dark nights and cold ones arrive when a man must stay indoors. Suggest that he open a little workshop all his own—get him to consider the many little things around the house he might fix up—there are few men to whom the fun of "tinkering around," as they term it, does not appeal. Not only will the man become enamored of the idea of making things for his home, but his wife will be your best ally in a cause which will keep him at home and good-natured. Long winter evenings with nothing to do but read soon become boredom—a change of atmosphere, something else to do will not only mean business for you but a happier community.

Below is a suggestion for a window trim which might be arranged. This could be supplemented by an appeal through your local paper. Buttonhole your customers and make the suggestion. Get their wives thinking along similar lines. Make your tool department a hummer. It is possible—make your plans now and watch the results.

U.S. shoemakers say that each immigrant who returns home to Europe takes eight pairs of shoes with him. The Yankees are in danger of losing their soles in this way.

It is difficult to secure a more attractive class of goods than that afforded by a well-arranged showing of mechanic's tools. The building trades will be good buyers again with the increase being made in construction of various kinds. This is a window display arranged for the Bond Hardware Co. of Guelph, Ont.

Employs Card Index System to Follow Up Prospects

S. SCHWANZ.

Hardware Merchant, of Rocanville, Sask., Employs Aggressive Methods in Handling Business—Card Index System to Keep Track of Customers' Possible Wants—Holds Morning Meetings With Clerks to Discuss Day's Doings—Keeps Man on Road Whose Sales Record is Remarkable—A Real Merchant

IMAGINE a country hardware store where the staff gets together every morning for a fifteen minute conference to talk over the work of the day, and plan methods of making sales, as well as drawing inspiration from this spirit of co-operation and camaraderie. Imagine the proprietor of this store keeping an elaborate card index of prospective buyers for various lines of goods, with names and details supplied by wide awake clerks. And think of a hardware shop that keeps a salesman travelling in the country districts almost exclusively, a salesman whose yearly volume of business is greater than any clerk in the store.

In Actual Operation

But it is not necessary to imagine these things for they are all in actual operation in the store of S. Schwanz, at Rocanville, Sask., and a representative of HARDWARE AND METAL personally visited this store and observed the live methods that are bringing increased sales and developing by the most aggressive methods a great volume of business. Mr. Schwanz, who is the moving spirit of all these developments, was the first merchant to locate in Rocanville, coming to this town in 1902, before the railway got in. He built his store in a wilderness, and when the railway depot was finally built he cut a road through the scrub from its door to his premises. He is still a young man, and the enterprise shown at that time has not decreased. Rather has it increased. Formerly he was in the general store business, but in recent years he has specialized in hardware, crockery and furniture, as well as conducting a tinsmithing shop and handling electric lighting plants and other side lines.

Following Up Prospects

"I have discovered a new and valuable method of increasing the usefulness of my clerks, and of developing their co-operation to the greatests degree," said Mr. Schwanz. "My only regret is that I did not adopt the scheme several years ago, for it is having a wonderful effect in stimulating business, as well as creating a spirit for better business in my store. It first came about through an idea that came to me as I thought of the great number of times that customers coming into the store mentioned some article that they wanted, and which they intedned to purchase at a later period. Here were valuable prospects that we were letting slip through our hands for want of a system by which to follow them up. The result was the inauguration of the card index system for prospects. I instructed all my clerks and the salesmen, who by this time I had working in the country districts, to keep their ears wide open for prospective sales in the future, and to jot down the particulars on note books that I provided for the purpose.

The Morning Meeting Results

Right from the start I began to get amazing results, and my clerks developed a faculty for discovering prospects that was gratifying These discoveries were made in various ways. Either the customer mentioned outright that he intended to buy a certain article at a later date, or else he mentioned it to friends who were with him, and sometimes gave notice of his itentions by enquiring minutely about say a range, or a churn or a piece of furniture.

The Morning Meeting Results

"In order to stimulate interest in the plan," Mr. Schwanz continued, "I made it a rule that each clerk should report at least one prospect every morning, and as many more as he could muster. Out of this grew the suggestion and adoption of morning meetings, where the staff could get together to discuss these prospects and plan for the day's work. It was just a case of their drifting into my office for an informal discussion before getting down to the real efforts of the day, and I quickly learned that this plan gave scope for the clerks to express their ideas, and made them feel a greater responsibility in their work and that they were an important part of the machinery. This plan also tended to improve the friendly relationship between me and my clerks. They liked to be taken into my confidence, and to have their opiu-

THE MORNING MEETINGS:

"Out of the card index system to prospects," stated Mr. Schwanz to HARDWARE AND METAL, "grew the suggestion and adoption of morning meetings where the staff could get together to discuss those prospects and to plan the day's work. It was just a case of their drifting into my office for an informal discussion before getting down to the real efforts of the day. I quickly learned that this plan gave scope for the clerks to express their ideas and made them feel a greater responsibility in their work; that they were an important part of the machinery. This plan also tended to improve the friendly relationship between me and my clerks. They liked to be taken into my confidence and to have their opinions asked on various phases of the work. If their ideas were practical they were put into force, which was more often the case than otherwise."

MR. SCHWANZ SAID:

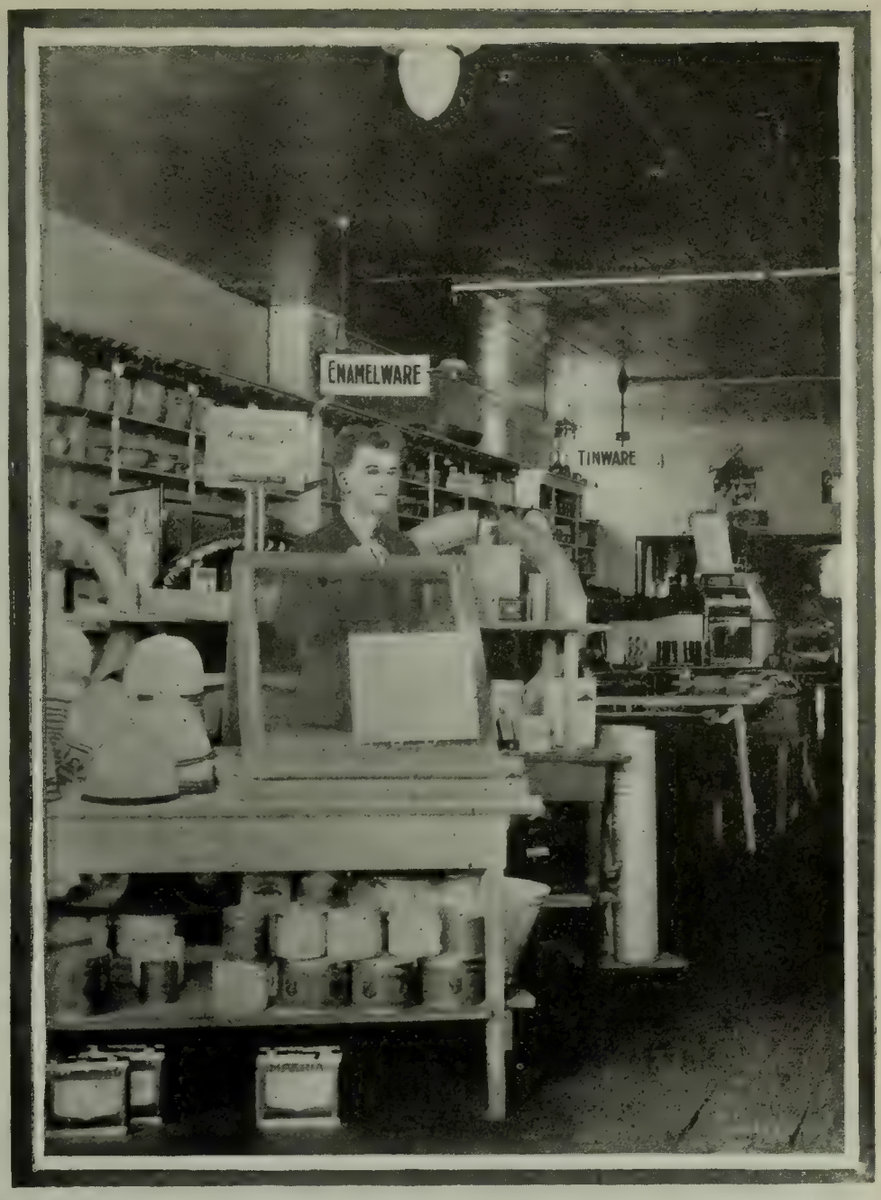
"I have discovered a new and valuable method of increasing the usefulness of my clerks, and of developing their co-operation to the greatest degree. It first came about through an idea that came to me as I thought of the great number of times a great number of customers coming into the store mentioned some article that they wanted and which they intended to purchase at a later period. Here were valuable prospects that we were letting slip through our hands for want of a system by which to follow them up. The result was the inauguration of the card index system for prospects. I instructed all my clerks to keep their ears wide open for prospective sales in the future and to jot down the particulars on note books that I provided for the purpose. Right from the start I began to get amazing results and my clerks developed a faculty for discovering prospects that was gratifying."

ions asked on various phases of the work. If their ideas were practical they were put into force, which was more often the case than otherwise. For a while during an extreme rush of business the morning meetings were dropped, but it was the clerks who were the first to revive them. They told me they missed the get-together system, and that they did not seem to be able to start their work with the same inspiration, vim and clear-cut conception of what they were to do.

How Follow-Up System Works

"So much for the morning meetings. Now as to the handling of these prospects. I have purchased," Mr. Schwanz stated, "a new flat topped desk for my office, with top right hand drawers arrangetd for a regulation card system. I have this divided into three compartments. In one of them I keep a duplicate set of cards alphabetically filed, so that when I look through the glass window of my office den and see a customer from some distance out in the country coming in to trade I look up to see if he is a prospective customer of some article. If he is I pass the word to the clerk, and so when the farmer and his wife have concluded their business my clerk will address them somewhat like this:

Customer is Flaattered



"By the way, you were saying, Mr. Smith, when you were in a few weeks ago, that you were thinking of buying a range. We have a fine new line in that I would like to show you while you are here, etc."

"Never have I known a farmer to take offense at this," continued Mr. Schwanz. "Rather is he flattered to think that you have his interest so much at heart as to remember him, and all the elements are present for the concluding of the sale. This duplicate system also has this advantage that you are able to canvass your prospect for the sale while he is in town, and in your store, instead of, as would otherwise be the case, having the outdoor salesman make a trip to his distant home with a motor car.

"In another compartment," Mr. Schwanz went on in explaining his system further, "I keep a set of cards in a file for every day of the current month. These are extracted from a general file for every month in the year.

The Daily Reminder

"Say, for instance, a woman makes known the fact that she intends to purchase a sewing machine if the crop turns out alright. Her card, with details of the prospect, is filled for the month of August. When the first of August rolls around all these August cards are taken out and redistributed day by day, in order that the work of going after the prospects may be equally spread over the month. Prospects in various districts are grouped for a call on a special day, and so every prospect is followed up. Instead of making a hit or miss canvass through the country after business the salesman starts out in the morning with some place to go, and with business to transact. He makes his trip with more assurance than he otherwise would, and it is really remarkable the number of sales that we make in this way. The very act of going out after a prospect brings its reward in other ways. When the call is made on Mrs. Jones with regard to the sewing machine she is very likely to say that her neighbor was also thinking of buying one, or if not a sewing machine something else handled in the store.

A corner in the interior of the hardware store of S. Schwanz, at Rocanville, Saskatchewan, with Mr. Schwanz standing in the foreground. The glass enclosed office in the rear, from which he keeps an eagle eye for prospects, is shown. It will be noted that the store is divided into departments, each of which in indicated by a sign. The location of the enamelware and tinware departments is shown in this picture, and it will be observed that a small electric light bulb is supended from the ceiling in front of each sign to direct customers who do their shopping in the evening. Two of the hand-painted cards which adorn the store, setting forth its policy, are shown, also the system of indirect electric lighting which is supplied by an electric lighting plant, which also supplies current to two other stores in the town. The main counter running the full depth of the store, and the artistic cabinet behind it, are not included in this picture.

Opportunity to Sell Other Lines

"The salesman is also given an entree to this family," Mr. Schwanz pointed out, "for the sale of lightning rods, electric light plants, hot air or water-water-heating plants, soft water tanks, automobiles, etc. When he has concluded his round up with the prospects he may put in the balance of the day making straight canvas in the neighborhood.

"As illustrating the value of the card system, just yesterday my salesman placed an order for a 20-foot pump which a farmer spoke of buying away back in the early spring. It seems to work out that when a family has made its mind up to secure some certain article, it becomes almost a certainty that sooner or later they will buy that article. When a women takes a great interest in a churn in my store, it is quite evident that she needs a churn, and means to have one some time. It then becomes

a diplomatic piece of salesmanship to sell it to her, and in this connection tact and judgment must be shown in order to present the subject at a time that the family is financially able to negotiate the deal.

Get Manufacturers' Co-operation

"Another part of this follow-up system I have adopted is to notify the manufacturers of any special lines I carry to send my prospect their best literature. By this co-operation I quietly pave the way for a sale. In the case of a special line of ranges that I carry the manufacturers have a most attractive booklet, illustrated in bright colors, which they send out. They are only too glad to get my tip."

Mr. Schwanz stated that he started the system of outdoor canvassing last year. The salesman employed on this work was formerly his tinsmith, and is a practical electrician. He is consequently able to give expert advice on the installation of heating and electrical systems, as well as conducting a straight canvas for hardware orders. This agent has had excellent success this year in the sale and installation of lightning rods, which appear to be a source of never-failing demand in the country.

A new plan inaugurated at this store is that all orders for tinsmithing and repair work must go personally to Mr. Schwanz in order that promises are not made that cannot be fulfilled. Previously all clerks took these orders, and there was constant conflict and confusion.

Things to do To-day

Prominent on the proprietor's desk is a folder marked, "Things to do To-day"; by this means nothing is overlooked either in connection with store or office work. He keeps an indexed card system of quotations given him by travellers, so that when one of these gentlemen calls to say what he is able to present he is able to check him up, otherwise the quotation would slip his memory in a few hours. In one instance his card system showed three quotations on linseed oil, when a fourth quotation was presented. In this one instance when he needed oil he was able to select the lowest quotation, which was $13.45 lower than the next highest on a single barrel.

Keeping Clerks' Sales Records

The four clerks employed in the store are designated by the letters A, B, C and D, in operating the cash register, and a daily check is kept on the total sales put through daily by each clerk, also the sales each month and each year. These figures are matters of discussion by the way at the morning conferences, and a spirit of friendly competition is engendered that is good for business. It is a remarkable commentary on the work of the outside salesman that his sales for last year totalled $24,000, including orders for tinsmithing, while the record of the next highest clerk stood at $20,000. Mr. Schwanz has developed a system of communicating with his clerks by means of electric buzzers. One pressure of the button calls clerk "A" for instance, while clerk "D" is called when the buzzer is pressed four times. This signal system is not operated in an autocratic manner, but in order, say, to call a clerk into conference with regard to a customer in the store, perhaps with regard to his line of credit, or perhaps with regard to a follow-up in connection with the prospect system.

Carry Complete Stock

This store maintains a general stock of hardware, crockery and paints, with some furniture on the second story which is reached by a stairway at the rear. Needless to say, in keeping with the systematic operation of the store this stock is attractively displayed. Hand-painted cards have a part in this display, and month in and month out silently convey to the customer the desire of the firm to give service. Here are the texts of some of these card announcements:

"The right place to go for your requirements is where you can secure the best value from all aspects. A critical survey will convince you that the place is here."

"We are not satisfied unless you are."

"Not how much, but how long it will wear is the true test."

"Our policy is to consider no trouble too great as long as you are satisfied."

"We sell only dependable goods."

An interesting feature of this store is that it uses one of the electric lighting plants for which it is the agent. In this way it constantly advertises the utility of this plant. Incidentally, light is supplied from the same plant to two other stores on the main street, one of them the largest general store in town. Meters are installed in these stores and they pay a specified rate the same as city stores. This feature, by the way contains a hint for country merchants to combine in order to have their stores lighted by electricity at a minimum of cost.

SELLING 400 STOVES A YEAR

(Continued from page 139)

to make it as homelike and comfy as possible.

Wants Additional Space

"You will appreciate what I think of the fair as an advertising medium when I state that I am trying to secure some additional space this year," Mr. Wanless went on. "There is another desirable location which I believe may be available, and if so I will make a good strong bid for it.

Works With Manufacturers

"In connection with our displays, which are not confined exclusively to stoves," Mr. Wanless stated, "We usually have representatives of the various goods shown and we have received very many favorable results from these demonstrations. Even though we do not sell a dollar's worth at the fair we would consider it money well spent from the advertising standpoint.

"We advertise our display extensively in the two daily papers, and we also take a full page in the fair programme, so that the people are fully familiar with what we intend to display and how we intend to display it."

Merchants Build Fence

The fair grounds at Chatham are on the town line leading from what is considered the best farming district in the whole community. The fence along the road was in very bad repair so Mr. Wanless, along with some of the other merchants, made a proposition to the fair board that the merchants put up a good fence, and for their work in this respect that they be given the right to paint ads. along its length. The fair board accepted the proposition and secured a good fence, whereas the dealers have a good display space for advertising.

Aggressive Methods Throughout

But if Mr. Wanless' methods of selling stoves are successful, they are no more so than those employed in handling the other departments of the business. Whether it is builders' hardware, tools, paint, or roofing, which one might mention, the same aggressive methods will be found employed. Mr. Wanless does a big roofing business and expects to see this department show even bigger strides this year.

Tinsmithing, sheet metal work, heating and plumbing, are all done by this progressive firm, and great care exercised to see that results are profitable. Time cards are turned in by the men and an accurate check on the material used, so that charges are fair but complete in that they include all the details.

Crowded for Room

The J. C. Wanless store is not as large as Mr. Wanless would like. "We are terribly crowded at the present time and have to use two or three nearby warehouses to stock the heavier and bulky classes of goods."

In the display of stoves shown in the accompanying photograph—to come back to this again because so much of the store and its policies can be seen through the medium of this display—it will be noted that an extensive use of cards is made. Attention is drawn to the various departments in bright, snappy cards, and across the top, painted banners emphasize what are considered some of the store's leading lines. Manufacturers' literature is used where it works well, and this is true of the store displays.

Mr. Wanless has a fine display window, which is changed weekly and trimmed with seasonable merchandise. The goods are well arranged, show cards printed and price cards utilized. Aggressive merchandising methods, with close attention to detail and attentive service to customers, are resulting in a constantly increasing volume of trade for this progressive firm.

To Sell Fixtures Carry Stock

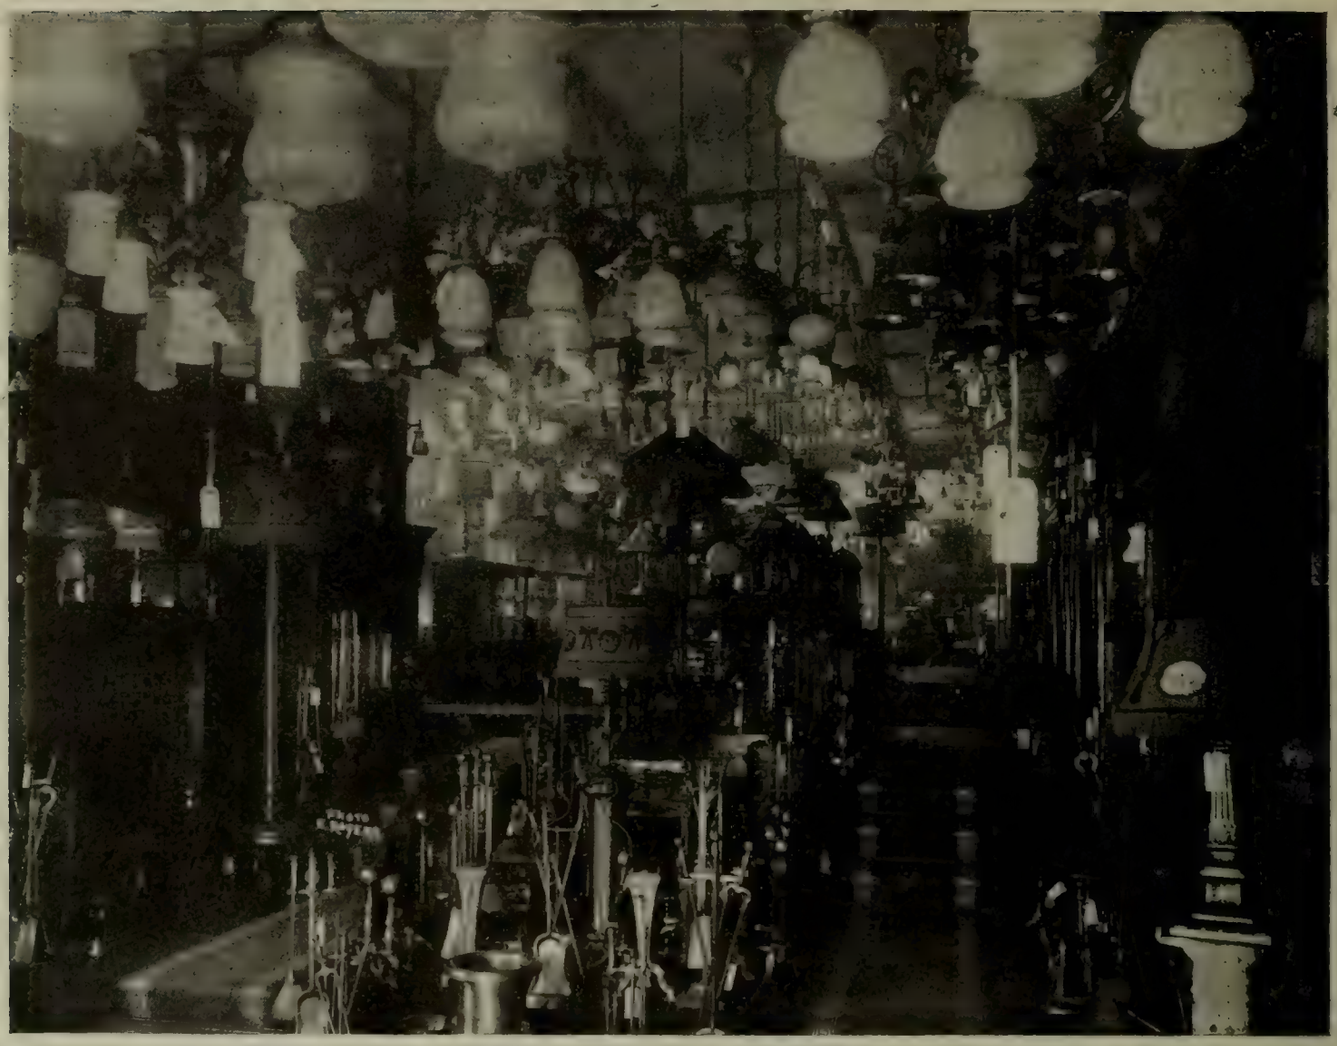
Big Opportunity for Hardware Men to Supply Electric Lighting Equipment in the Thousands of New Homes Being Erected—Dealers Say Best Results Are Obtained by Having the Goods to Show Buyers

COINCIDENT with the building boom that is going on all over the country, hardwaremen who are handling electrical fixtures are cashing in on a lot of good business. It is nice business to handle, especially for the hardware man who puts himself in the position of being able to handle a complete order. He need not necessarily do the installing, but if a man who is building a $5,000 home comes into the store and the dealer has the stock from which the man who is building can pick out everything he wants, the hardware man takes a nice order which carries a good margin of profit. Many hardware dealers are getting orders of this kind regularly and are finding that it pays, and pays well to have the goods on hand so that prospective buyers can make their entire selection.

Fit Up Display Rooms

One Western Ontario hardware firm which has been developing a large trade with home builders has fitted up right in the very front of its store an electrical section. This dealer caters only to the class of trade that wants good goods and is willing to pay a reasonable price for them. He does not go after the very cheap trade, nor yet after the millionaires. If the millionaire should come to the store the dealer would promptly show him goods as high as he wants to pay from his catalogues. However, as millionaires do not come in every day to buy, he does not stock the very high-priced goods. There is a class of people, however well-to-do, who come in every day, and the hardwareman finds it is good business not to sell them from catalogues but to have the merchandise right there, in place and connected up so they can see it.

Customers Like It



"Customers like to look at a display like ours,'" he stated to HARDWARE AND METAL. "When a man comes in with his wife to look at fixtures they very often compliment us not only on the stock we carry but on the way we are able to show them just exactly how the goods will look when in position. We get a lot of good orders simply through having the stock on hand. Not only that, we frequently sell them bathroom fixtures and other things they may need for their new home. Many people like when they start out buying to be able to clean up the whole purchase at one go. If they come to a hardware store and find they can get all the electric fixtures they need there we find that they will buy and never bother going around to any other store to look things over.

Send Others, Too

"We have found also that they are not only satisfied themselves but they will send their friends. We have had many instances of people coming in and giving us their complete order for fixtures in this way. There is another way we often get business. One of our satisfied customers will be talking things over with a person who is planning to remodel his house or to put in new fixtures. Every time he will tell about the

One of the surest ways to sell electric light fixtures is to carry the stock. Another thing to do is to display them. This shows a window display in the Barton-Netting Co., Ltd., Windsor store, which makes a splendid impression. Fire place fixtures will also be noted in the centre of the display.

Showing the interior of the display room of the Barton-Netting Co., Ltd., Windsor, Ont. A most impressive showing will be noted here, not only of electrical fixtures, but of fire place fittings and mountings. The electrical fixtures are connected up so that their appearance when illuminated can be gauged.

stock to be seen at our store. We got into the electrical fixture business because so many people asked for them when they were buying hardware that we saw a chance to open a new department. It proved a real opportunity and has developed steadily. Our experience is that is pays to size up very closely the class of trade we want to get and then stock to meet every requirement of that trade.'

Not the Best Way

A great many of those who handle electric fixtures in a small way try to sell them from the catalogue. Very few hardwaremen have adopted this plan. The majority of hardwaremen put in a stock of the goods and then proceed to let the people know that they have electric fixtures by advertising, by displays, and by sending out special matter to home builders and other interested. In this way they are getting results. Some of the results are surprising. In one rather small Ontario city a hardware dealer who has developed his electrical fixture business has a really handsome show-room. He advertises regularly and is doing more business than the Hydro shop located near him. This, in spite of fierce competition from the Hydro, which has tried and is still trying to corner the trade. One of the surprising results of this business battle is that more business than ever has been developed. The two larger houses have not only increased their turnover but they have helped the sales of smaller dealers. Another result is that they have practically put the mail-order houses out of business in that city and district as far as electrical goods are concerned.

From Out of Town

The hardware dealer attributes his success entirely to his aggressive methods. He was not afraid even with a Hydro shop in town, to go right out after business. He put in a stock that is equal to, if not superior to the Hydro store and then he advertised freely and backed up his advertising with window displays. The result is that he is more than holding his own. His electrical goods' showroom is known not only in his home city but for miles around, and hundreds of people from towns and villages around come to him for their fixtures and other electrical needs.

Building is Increasing

Each week sees a greater volume of building getting under way than the week previous and those who have been in the offices of architects and contractors state that the outlook is for more than ever. Next spring is expected to see a building expansion that will surpass that which was under way when the war broke out. All this building activity spells opportunity to the hardware dealer. Thousands of the new dwellings to be erected will be lighted by electricity, and the hardware man has a splendid chance to supply the equipment. It is essential as pointed out before to buy the class of fixtures that are suitable for the locality. According to those in the trade the best results are obtained from a sales standpoint by carrying the stock to show the buyers and not trying to sell from catalogue. There is a big and growing trade to be had and the man who gets it will be the man who goes after it.

MARITIME BOARD OF TRADE CHANGES DATE OF MEETING

An appeal having been received from a number of the members of Boards of Trade who in the past have been regular attendants at and participators in the deliberations of the Maritime Board for the postponement to a later date of the meeting called for 20th instant, the matter was referred to the executive.

It has been decided to postpone the meeting to Wednesday, September 17th, then to meet at Moncton, N.B.

Carries Stock to Back Sales Program

Written for HARDWARE AND METAL *by G. S. H. Williamson, Associate Editor.*

"WHETHER it is cement, tile, woven fence, paint, electric fixtures or automobile accessories, we carry the stock. there is no getting away from the fact that therein lies one of the biggest elements which has contributed to the success and continued growth of our business." In these words Iven H. Cook, one of the partners in the Lendon and Cook business at Leamington, Ont., summed up the answer to the questions of HARDWARE AND METAL'S representative as to how this firm were successfully meeting the competition of to-day.

Carry the Stock

"There is only one way to secure and handle trade," Mr. Cook went on. "We might take full page space in our local paper, we might dress our windows attractively, we might have a store neat in appearance, but unless we carried the stock to back up our sales activities, of what use would a sales programme be? Mind you, we believe in the power of advertising though our newspaper efforts in this respect have not been so very extensive. The windows are splendid drawing cards and we try to have the store interior well ararnged. These are elements which are not overlooked, but the point I am making is that one must have the goods the people want and when they want them."

Serve Good Community

The town of Leamington is an aggressive one located in the heart of one of the finest farming and fruit districts of Western Ontario. The business handled from not only the town but surrounding country is large so it is necessary to be prepared to meet the requirements of the people. In this respect, it is noted that this firm had handled before the summer was one-third gone over seven cars of cement and three cars of tile. In addition, wire fencing is bought by the carload as well as motor lubricating oil and lime.

In handling these lines, a quick turnover is aimed at. This means it is possible to sell on a narrow margin and in this way this business is handled through local channels. Outside competition is felt to some extent but is reduced to the minimum in the thriving centre.

Excellent Display Features

A splendid arrangement of showcases greets the eye of the visitor on entering the store. There are five cases arranged in rectangular form, one case being square with the entrance and two cases deep at right angles to the opposite ends of the show case across the front. This makes a fine layout and adds much in the way of display to impress the mind of the customer.

The cases which form the sides of this rectangle are a rather unusual style and serve a double purpose. Not only are they display cases but they are stock cases as well. A careful examination of the accompanying photograph shows where there are four tiers of drawers. The lower tier extends right to the front of the case, the next is set back about 8 or 10 inches, the third another 8 or 10 inches back with the top row being open and back sufficiently to permit a full view of the lines shown below. This arrangement of the display cases has proved a great success, Mr. Cook stated, and no better means of describing them can be given than just to direct attention to the photograph. Ordinary drawer pulls enable easy handling and for small lines of automobile accessories or similar merchandise this style of show case has demonstrated its usefulness and adaptability to two purposes very successfully.

Impossible to Effect Sales of Merchandise Unless Merchant Carries Stock, is the Opinion of Iven H. Cook, of Lendon & Cook, Leamington, Ont. — Excellent Display Arrangement Shown in This Store Which Does Much to Keep Goods Moving — Showcases Serve a Double Purpose, That of Showing the Goods as Well as a Means of Carrying Stock —Merchandising Electrical Fixtures Found to be no More Difficult Than Effecting Sales of Paint— Sells Service, Which After All is One of the Best Answers to the Cry of Outside Competition.

Show the Goods

Getting the goods out where people can see them and be reminded of their needs or where their curiosity and interest can be turned into sales is the idea followed out by this firm. To the left of the main entrance as shown in one of the accompanying photographs, this is demonstrated still further. Here two large silent salesmen are shown carrying a display of silver-plated flatware, carving sets, glass cooking ware, cut glass and silver-plated hollow-ware. Back of the first salesman is seen a wall case which is stocked with bright, attractive goods. The neat arrangement of shelving backing it all wherein the many lines of shelf hardware are stocked in sampled drawers gives completeness to the showing that is very acceptable.

House Furnishing Prominent

On the right-hand side of the store at the very front is the office. Backing this is open shelving on which enamelware, tinware and various lines of house fur-

A close-up of the combination display and stock cases which Lendon and Cook, Leamington, Ont., find so useful. A good idea of the arrangement of these can be gathered from this photo and may offer suggestions to some other dealer. The "arrow" points the way up the stairs to the paint department.

nishings are carried. Stoves are arranged in front of this in season, summer lines being shown prominently when the writer was there, although the regular lines of stoves and ranges were also very much in evidence. Mr. Cook stated, that they had had a splendid season on oil stoves, but found an all-year-round display, enlarged in the fall of course, on stoves and ranges secured good returns.

Merchandising Electrical Fixtures

Another part of the complete service rendered by this aggressive firm is that of selling electrical fixtures. These are sold in just the same way as nails or cement or paint would be in that the customer looks after the installation. A good assortment of hanging fixtures is carried as well as wall brackets, reading lamps and the many small fixtures required for the various parts of the work of installation. Commenting on the fact that there was no electrician employed by the firm, Mr. Cook said: "It is true there may be odd instances where we could increase our sales in this line if we had a man to install fixtures, but the bulk of our business is done with customers requiring a new fixture to replace one they don't like. There is no great trick in hanging a fixture and a man who is at all handy can easily take care of this work. We show what is necessary to make the connection and trical fixtures successfully without being called upon to undertake all the work of installation."

Reading Lamps Up Front

The reading lamps are stocked at the front of the store, but the various fixtures are hung and connected up at the back. When lighted the display presents a very pleasing appearance and the customer is well able to picture how these would show up in her own home. One of the accompanying photographs gives an idea as to how these goods are arranged.

Open For Argument

One might say that merchandising electrical fixtures in this way has its drawbacks. This is a debatable point, however. Take in the case of the paint department which in the Lendon and Cook store is located on the second floor. It is not essential that the firm supply a painter to apply the paint. The salesman explains the use of the paint, how it is applied, the proper type of brush to use—the customer does the rest and the results, if directions are followed, are satisfactory.

Paint Department Upstairs

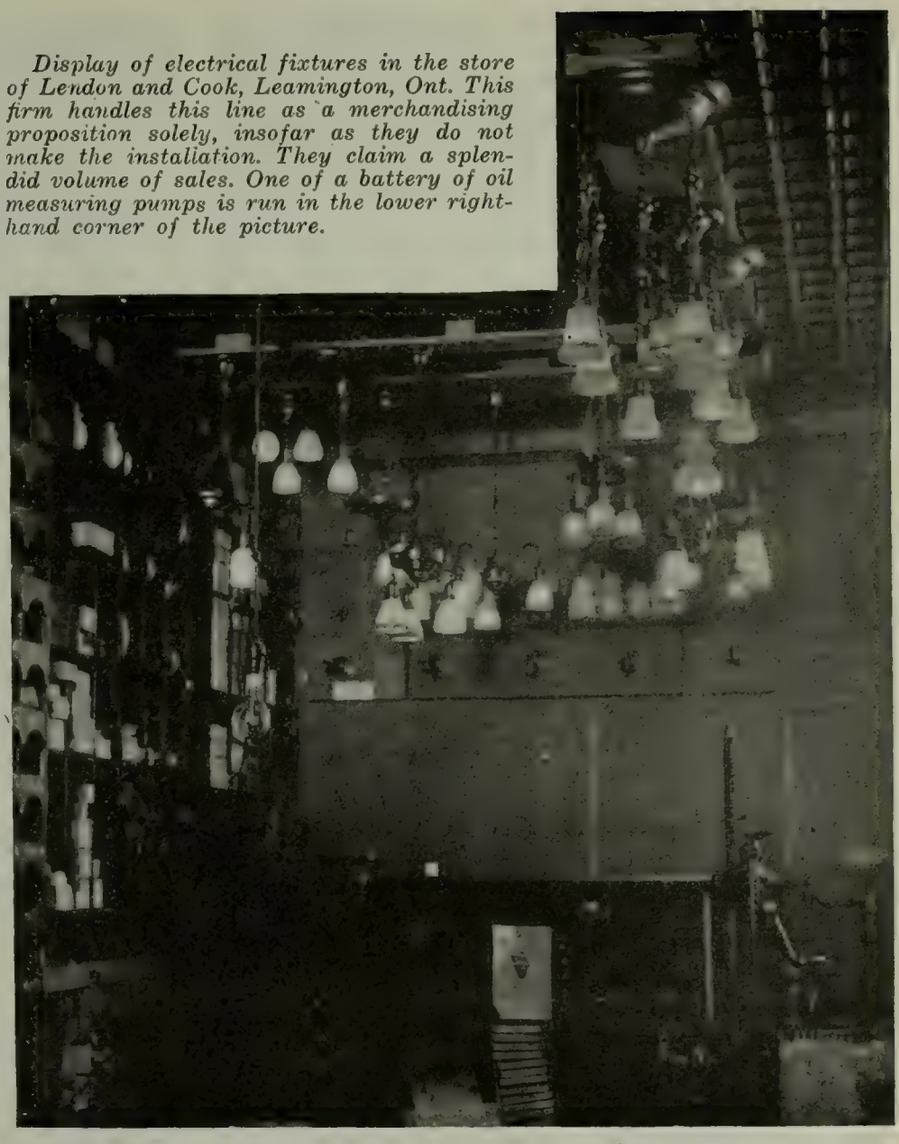
Much has been written as to why the paint department should have a place on the main floor at the front of the store. Manufacturers of other lines will tell you why their lines should be in a like position. The main thing, however, is to see that the customer's attention is drawn to the line and in the case of paint where considerable time is very often taken in the selection of colors, a department away from constant interruptions may well have its advantages.

Time For Selection

Color cards, saddles and attractive advertising on paints are in full view of customers entering the store. The suggestion for its use is plainly given where every one can see. Where it comes to selecting the kind and choosing colors, there is no one who objects to going upstairs where time can be given to this important part of the sale. Free from any distributing influences or counter attractions. The lady customer (who to-day forms the greatest proportion of paint buyers) is given that personal attention which does so much to please and

The wide use of silent salesmen and wall cases in the Lendon and Cook store at Leamington, Ont., can be estimated from the above photograph. Getting the goods out where people can see them, and incidentally carrying the goods, are considered mighty good policies by this aggressive firm. The arrow points to a card on "cash business." The firm now offering an inducement to cash customers. They expect good results from same.

advertise the service of the store. Mr. Cook states that he finds their paint business showing a splendid increase and attributes it in no small measure to the little attention to details which they give in handling their customers



Battery of Oil Pumps

At the back of the store is arranged a battery of oil pumps. This method of handling oils has been found decidedly satisfactory from every angle. There is no leakage, the customer gets exact measure and the speed with which they can handle this end of their trade is found of distinct benefit.

At the back of the store, a fireproof warehouse is used in which to carry the surplus stock of nails, glass, rope, binder twine, pumps, pipe, building paper, roofing and many other lines. The firm has another warehouse in which such lines as cement, lime, etc., are carried.

This firm operates another store also, the Greenhill Hardware Co. "We cannot expect to handle all the trade in the one store," Mr. Cook stated. "There are some of our customers who won't go down to the other store and there are many of the other store's customers whom we do not reach at all here. We find the two stores work in nicely together. We handle cement, lime, tile and many of the heavier lines exclusively from this store but otherwise the stock in the Greenhill Hardware Co. is complete. The branch store idea has worked out successfully we find."

The Doherty Electrical Co., hardware and electrical fixtures, is moving from 416 Roncesvalles street, Toronto, to 351 Roncesvalles street.

Display of electrical fixtures in the store of Lendon and Cook, Leamington, Ont. This firm handles this line as a merchandising proposition solely, insofar as they do not make the instaliation. They claim a splendid volume of sales. One of a battery of oil measuring pumps is run in the lower right-hand corner of the picture.

Explains Gross and Net Profits

Reasons For Failures Outlined—Turnovers, Not Leftovers, Should be Slogan —One Method of Increasing Net Profits —Time Most Costly Element.

AN instructive study of gross and net profits has been made by N. W. Cooley, of the Burroughs Adding Machine Company. He gives the results of his examination of the subject in such clear and simple language that his article is herewith reproduced. Mr. Cooley begins by asking:

Can you tell what your profits are on an article that you sell? Do you know what your net profits were last year?

Have you a reliable system to furnish you with that information?

If so, then you are on the safest and surest road for a realization of your ambition.

According to the most reliable authorities there have been established in the past few years about 20,000 new places of business each year; during that time the average number of failures has been 15,000 per annum.

The United States Federal Trade Commission, after investigation, reported that 90 per cent. of the manufacturers had no adequate method of ascertaining the cost of production and many had no cost system whatever. Out of one and a quarter million retailers less than 40,000 paid an income tax in 1917.

Poor System the Reason

Why such a small percentage? Because, through poor system, they either had not secured profit enough to put them in the taxpaying class or if they were, they did not know it

If that irrefutable law of averages says that 75 per cent. fail it is certainly of interest to know some of the prime causes for such failures as well as a remedy for prevention.

Malcolm Kerr, professor of industry of the University of Pennsylvania, has given much time to research

and study of this problem and he enumerates eight causes, viz.: "Acts of God." dishonesty, inexperience, nepotism, over-conservation, poor location, unwise use of capital, and poor accounting. Under the law of averages it has been learned that every dollar received represents three separate divisions and that the percentages are 75 per cent. for cost of merchandise, 18 per cent. overhead expenses, 7 per cent. average net profit.

There are some of you that have made much more during the past year; there are some that possibly made less and perchance some that have no idea as to what they have earned as a net profit.

However, you may think, the law of averages is a mighty good indicator of what you can expect. Therefore, if the average net profit is 7 per cent. and you would increase it, your only sure method is by the reduction of expenses that will clip that 18 per cent. overhead.

The Net is Important

By your mark up, if right, you establish the gross profits but the net profit is the all-important subject to you. Some of your expenses may be too high, due to either ignorance, inexperience or indolence. You may be using your capital unwisely by extending long-time credit to customers who should pay you but prefer to use the money for other purposes because you do not enforce collections. In other words, are you acting as a banker for some of your customers, but not securing the compensating interest?

Too Many Relatives?

Is your store filled with relatives? Professor Kerr gives it as the third most productive cause of failure; because you have been economic, energetic and ambitious is no indication that your son, nephew or brother-in-law has the same ideals and if they do not, the sooner they are pensioned elsewhere and you secure efficient help, the sooner the net profits will increase.

It is Location?

Have you a poor location? The fact that you may have a "low rent" is not a proof that you have a cheap rent. A small amount added to the present rental might secure another location that would permit and produce increased business to such an extent that the selling cost per dollar would be materially reduced regardless of the "high rent."

Over-conservatism has reduced profit. Dishonesty has caused losses and produced 6 per cent. of the failures, but as such causes always gain notoriety many think that this is a low percentage.

"Acts of God" have produced failure, but the fire of 1906 proved that though men may lose their property, if they have character they will be re-established, as were many after that great fire, who have made a success and never suffered from the stigma of failure, because they were looked upon as men that knew their business.

What of Accounting System?

Have you a poor accounting system?

Do you know what you ought to make and do you know what you are making?

Is your office machinery running smoothly; is it automatic to the extent that at any hour you can find out those important facts that insure net profits?

The National Association of Credit Men has issued a pamphlet containing fourteen rules for figuring cost and profit. If you have not carefully studied these rules, secure a copy from the credit man of some of the houses that you deal with and give them the consideration that they merit and you will be the gainer, for if followed there will of necessity be an increase in the net profits. These ever-increasing net profits are what provide comfort and peace of mind. They are based upon the cost of doing business the money spent in making or trying to make a sale. It frequently costs a great deal more to try and make a sale than to actually make one.

Causes of Failure Causes of Reduced Profits

The eight primal causes of failure are likewise eight causes of reduced profits. What are you doing to know the cost that tends to increase or decrease your net profits?

Daniel C. Roper, commissioner of internal revenue has urgently requested every retail merchant to keep books and to keep them right. If they are not kept right it is all waste labor and they only clog your business because, relying on them, they mislead you and insure a reduction of net profits.

To have thorough information of the cost of doing business you must have complete records that will show you a proper segregation of your expense account. If correctly done and frequently referred to, it will help you immensely. The average business man does not secure the per cent. of profit that he imagines that he is securing. He frequently fails to enter legitimate charges and then when the expense is figured he thinks that he has done better than he really has. For instance, recently a merchant was attempting to sell his business. The prospective buyer asked for sales, expenses and profits. The seller showed figures that led him to believe that he was making money but the buyer noted the absence of rental charge and a small expense for clerk hire. The seller explained that he owned the building and that the service of his children enabled him to get along with little clerical help. This was decidedly a case that did not show the bona fide net profits and the sale was based on corrected figures.

Another great "cost of business" is idle stock on your shelves.

Turnovers Not Leftovers

Turnovers not leftover should be the slogan of the retailer.

A "going inventory" is the greatest possible advantage to the dealer and is so proven by the largest and most progressive of business men, who would not incur the expense if it were not profitable.

If it is advantageous to Armour and Company, the California Packing Corporation, Marshall-Wells and Company and thousands of others it would pay you. Such concerns can tell you at a momen's notice the quantity of any commodity that they own, also where it is located, in which one of their many branches or factory plant, and were it not so they would never be abel to conduct such an enterprise. With such information recorded, one can see at a glance the quantity of goods purchased, the cost, the sales, how long they were in stock and with such a visualization they are prepared to hurry up the turnovers and you will have your total expenses for the year. Divide this figure by the total of your sales and it will show profit.

The turnover can be accelerated by good advertiseing, by placing in conspicuous position and by co-operation among the sales force, but the foundation of the knowledge that begets the net profits is in the records.

One Method of Increasing Net Profits

One of the simplest methods of increasing the net profits that I have seen in a retail hardware store is a plan followed by a Mr. Fisher, of the Keystone Hardware Company, of Denver. Having decided on the location where he will place goods in stock he makes a small tag showing maximum and minimum quantity to be carried. This is fastened on the shelf and when the low-water mark is reached a new order is placed. By this method he has found out that he can get along with a smaller quantity that if he depended on a hit or miss plan. He also has made sample boards on which are

various sizes of hinges, nails, screws, bolts, etc. These, convenient to the customer, enables him to decide just what he wants without a clerk being required to show several different articles, thus saving time and increasing net profits.

Time Most Costly Element

This brings us to the question: What is the most costly thing that you handle in your store? You will probably think it is a mower, or some expensive farm implement. Such is not the fact. The most expensive thing that you have to deal with is time and what time you can save on an employee is an addition to net profit, but the time gained in quick turnovers is of such value as to be unappreciated.

You have a tractor that costs you $2,000 which is to be sold for $4,000. Your selling expense is 20 per cent., or $800; if sold in the first year this would give you a net profit of $1,200, but if not sold until the second year the selling expense is 40 per cent., or $1,600, and your net profit then is only $400. Should it be your misfortunte to have to hold for the third year you suffer a loss of $400, hence time is a most important consideration.

Suppose that you had handy a card showing the date of purchase, the price paid and the daily expense in carrying this article, that you posted to it daily and saw the cost growing larger and larger until it exceeded the sale price, do you not realize that you would make a great effort to dispose of this article? The "going inventory" will give you such information.

Carrying Stock Eats Up Profits

Actually and literally, costs are daily growing on every article that you carry in stock and a neglected commodity can eat its head off in time. It is just such things that have a tendency to reduce your net profits. You may not have the time personally to attend to the detail; you may think that you can not afford to hire a person to attend to this detail for you, but as a matter of fact you can not afford to be without the information.

In any community you can find someone who is capable of installing a simple system that will meet the necessary demands of your business.

What You Should Know

You should know the daily sales by clerks, the daily sales departments, daily sales, cash and charge, the amount of outstanding accounts, money owed, bank account, monthly sales by clerks and by departments, a segregated expense account, amount of bills receivable and bills payable.

If you keep your "going inventory" you can readily ascertain your gross profits, make your deductions of expenses and thereby find your net profits. The time and money spent for this information will prove a good investment. It will keep you informed as to the success or failure of your efforts. If the profits are not what they should be the figures will point out where the excess expense occurs and you can make correction. Alway bear in mind that your profit percentages should be figured on the selling price.

Departmentizing Valuable

Departmentization will prove of inestimable value in showing you where the leaks are, for too often one paying department is carrying the burden for the unprofitable ones and with the right information you can get rid of the exacting load.

Guess-work means glimmering profits.

Lack of knowledge means a lack of profits.

Many leaks mean many losses.

While an intelligent knowledge of your business that can only be secured through the medium of reliable figure facts will bring to you the happy condition that is always desirable and invariably produces the satisfactory and never-failing net profit.

Retail Hardware Costs

System of Harvard University Bureau of Business Research:

Standard per cent. of sales	Obtainable for	$1 expended
Salaries	3.41	.1750
Rent	3.41	.1750
Advertising	1.12	.0586
General Expenses	1.01	.0530
Insurance Tax	.99	.0520
Delivery	.91	.0466
Supplies	.60	.0300
Depreciation	.52	.0260
Heat, light	.43	.0220
Bad Debts	.31	.0160
Typical Costs	19.41	$1.0000

Figures Cost and Profit

The following fourteen rules for figuring cost and profit are issued by the National Association of Credit Men:

1. Charge interest on the net amount of your total investment at the beginning of your business year, exclusive of real estate.

2. Charge rental on real estate or buildings owned by you and used in your business at a rate equal to that which you would receive if renting or leasing it to others.

3. Charge in addition to what you pay for hired help an amount equal to what your services would be worth to others; also treat in like manner the services of any member of your family employed in the business not on the regular payroll.

4. Charge depreciation on all goods carried over on which you may have to make a less price because of change of style, damage, or any other cause.

5. Charge depreciation on buildings, tools, fixtures, or anything else suffering from age or wear and tear.

6. Charge amounts donated or subscriptions paid.

7. Charge all fixed expenses, such as taxes, insurance, water, light, fuel, etc.

8. Charge all incidental expenses, such as drayage, offiice supplies, livery, or expenses of horses and wagons, telegrams, telephones, advertising, canvassing, etc.

9. Charge losses of every character, including goods stolen or sent out and not charged, allowance made customers, bad debts, etc.

10. Charge collection expenses.

11. Charge any other expense not enumerated above.

12. When you have ascertained what the sum of all the forgotten items amounts to, prove it by your books, and you will have your total expenses for the year. Divide this figure by the total of your sales and it will show you the percentage which it has cost you to do business.

13. Take this percentage and deduct from it the price of any article you have sold, then subtract from the remainder what it cost you (invoice price and freight), and the result will show you your net profit or loss on the article.

14. Go over the selling prices of the various articles you handle and see where you stand as to profits; then get busy in putting your selling figures on a profitable basis and talk it over with your competitor as well.

Montreal has a street cleaning device which sweeps the dirt to one side of the thoroughfare, where it is taken up by suction into a machine following up. Another feature of the road-sweeping scheme, is that sprinklers in front of each machine lay down the dust. Proving that ingenuity and machinery in unison make a wonderful combination.

Getting the Workingman's Trade

They Are Good People to Sell to, Says C. W. Summers, of London, Ont.—They Know What They Want and You Have Got to Study Those Wants—How He Solved a Vacuum Cleaner Problem

Based on an interview by C. E. PARSONS, of Hardware and Metal, with Ex-Ald. Chas. W. Summers, of C. W. Summers & Sons Hardware, London, Ont.

MR. WORKINGMAN and his Wife are good customers. They know what they want and pretty nearly what they can afford to pay for it. If you as a merchant study these wants and lay in your stock accordingly, there is no trouble about getting the business.

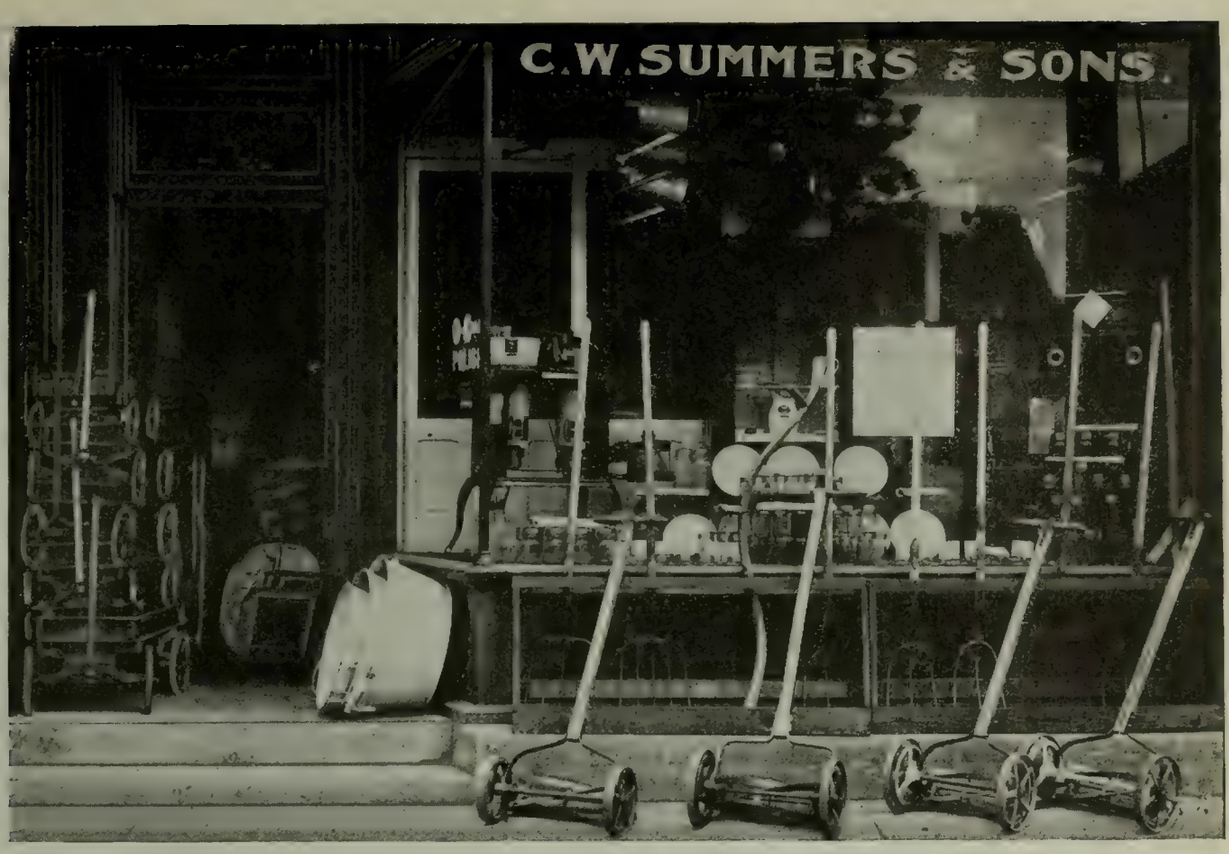
These are the views of Ex-Alderman Chas. W. Summers, of C. W. Summers and Sons, hardware, London, Ont. Mr. Summers' store is located right in the heart of a suburb of London that is made up entirely of workers. The district only a few years ago was a commons which has grown up owing to factory development and Mr. Summers' store has grown up with it and the opinions he holds are these gathered as a result of actual experience.

Want Good Things

While his customers want good goods they do not want a lot of frills at fancy prices, Mr. Sumemrs says: They are willing to pay a reasonable price but they want goods that are going to be of real use to them and will give good service. They don't want cheap stuff that will not stand up at any price.

"I find that the great majority of my patrons," said Mr Summers to HARDWARE AND METAU, "want to pay cash for what they get. They are good buyers and are interested in anything that will make their homes better or more attractive. They like to keep their homes looking nice and as a result we see lots of paint. Not only the men, but the women buy paint. The men of course look after the outside work, painting the house, the verandahs, the fences and so on, while the women are always wanting to fix up something inside—a piece of furniture or some similar job.

Appreciate Service



"A great many of our customers I find appreciate fully the value of painting," Mr. Summers continued, "not only as a beautifier but from a preservation standpoint. They do not always, however, know about the best paints to use for the work they intend doing. We always find out about their plans and then tell them why this paint or that will give them the best results, how to prepare the work, how to finish it and what brushes to use for the best results. They are keenly interested in all these things and appreciate all the help and suggestions that are given. Very often I find that when they have other work in mind they will come into the store and ask about what would be best to use. Frequently they send in a friend who has mentioned something to them about going to paint. No matter what you sell if it is good and the people like it, they will talk about your goods and your store.

Like to See Stock

"People like to see what lines we have in stock," stated Mr. Summers, "and I find that we simply cannot have too much stuff on display. Naturally, kitchenware is one of our big sellers. We carry a good stock and figure on turning it over three times a year. We keep a special display

Here is a dealer who finds in Mr. Workingman and his wife mighty good customers. They want to be shown, but when they see the value in an article, are willing to spend their money. A wide range of goods is carried and demanded. This is a view of the store of C. W. Summers & Son, London, Ont.

Store front of C. W. Summers & Sons, retail hardware dealers, London, Ont. Splendid use of the windows is made by this firm, who also find that goods shown outside the store have a great attraction for the customers whom they serve.

stand for showing these lines besides our shelf stock and get excellent results from it. I have found a constant demand for dishes. There was a call for them right from the start and I would say that we are handling five times as many now as ever before. We keep our stock out on display tables, and very often people who come in to buy some other line altogether remember that they need certain dishes and buy them right there. All our display tables have proven good sellers and keep a lot of stock turning over all the time."

Business is Good

Mr. Summers states that business has been good right along. During the war every workingman who was available had all the work that he could do at good wages. The district where Mr. Summers' store is made a splendid record in recruiting. Many of these men are now coming home and great preparations are made to have the homes looking their best for "the boys who have been over there." This means increased sales of paint and other things.

"There has been a tremendous increase in gardening in the last three or four years," said Mr. Summers. Before the war nearly every one had a garden, but following the call for more production they doubled and trebled their efforts and all the children had gardens. We have had a splendid increase in our sales of gardening tools, seeds and supplies and it is being fully maintained at the present time. Most of the workers have learned the value of a good garden in fighting the high cost of living and many of them have gardens that anyone might be proud of."

Every Spring and Fall Mr. Summers sends out hand bills on which are featured seasonable lines. Care is taken to make sure that a bill is left at every house in the territory the store covers, and Mr. Summers says they produce big results. People come in almost as soon as the bills are distributed and keep on coming in for weeks asking for goods that were listed. Usually about one hundred items are mentioned, and in each case the price is given. There is a special section for paints and wood stains with a talk about the lines handled and the results that may be accomplished.

Poultry Supplies

Another line which is a big seller with Mr. Summers and which was increased as a result of the war, is poultry netting and supplies.

"A great many of the people in this district," said Mr. Summers, " have always kept chickens. Since the war, however, our business in poultry netting and supplies has increased at least fifty per cent."

An example of what Mr. Summers meant by pointing out the necessity of careful selection of stock for the buying needs of his district shown by his sales of electrical utilities.

"We have sold a good many irons, toasters and the smaller articles," he said, "but when it comes to the high-priced goods, I find that there is little sale for them."

However, there are more ways of killing a cat than hanging it, and when Mr. Summers found that he could not sell such lines as electric vacuum cleaners, he hit upon another plan for making money out of them. He keeps several machines and lets it be known through cards in the window and store that they are for rent either by the hour or by the day.

"They are out nearly all the time," he said, "and have paid for themselves a good many times. A lot of women who wouldn't think of buying a machine are quite willing to rent one for an hour or two at a reasonable rate, and we are quite willing to let them have them."

Get Good Results

Mr. Summers has always had splendid results, he says from his display window. He keeps a seasonable display in the window all the time, and it is changed each week.

"A lot of farmers pass our store both on their way to market and on the way home," he said, "and we find that many of them come in to buy the things they see in the window, and other lines also. It is often a surprise to us the results we get. These are not only apparent just at the time, but often people will come in perhaps a month after and ask for something they saw in the window."

In addition to his display tables, Mr. containing displays of cutlery, casseroles and other lines. The arrangement of these is most attractive and adds greatly to the general appearance of the store. Mr. Summers says these sell a lot of goods and that when he gets more room he will put in more of them. Alarm clocks he says are a good line with him as people in his section don't take any chances on being late in the mornings. He keps an assortment of clocks display-Summers has several silent salesmen

A part of the floor display during the season for it consists of oil stoves, and Mr. Summers says his sales of these have been satisfactory. "Speaking generally," said Mr. Summers, "the workers have been making good money and they are buying freely. I have found business good right along."

Beats Season With Window Displays

Sydney, C.B., Firm Secures Remarkable Results From Display Windows—Always Plan to Be Just a Little Ahead of the Season—H. E. Call, Manager for Thompson & Sutherland, Ltd., Sees Marked Increase in Buying as a Result.

H. E. CALL, *manager of the Sydney, C.B., store, of Thompson and Sutherland, Ltd., is strong on window displays. At the same time he had three mighty attractive windows running. In addition to the fishing tackle display shown herewith, there was one for incubators, showing dozens of young chicks with a hover and a seed window showing vegetables and plants in boxes well matured.*

"It means early for a fishing tackle display," said Mr. Call, "but the idea is to beat the season. We set seeds out each year and have them sprouted to display in the window. Our spring down here is late and the season is short for growing. A week's time in the spring makes a great deal of difference in sales. These displays have made a marked increase in buying."

Thompson & Sutherland is one of the largest hardware firms in Eastern Nova Scotia, having large retail stores at New Glasgow, Stellarton, Westville, Sydney, North Sydney, Glace Bay and Sydney Mines. In addition to their extensive retail business they are doing a very large wholesale business which is handled mainly from North Sydney. They are large manufacturers of stoves, ranges, furnaces, tinware, etc.

This firm has recently made a large addition to its premises in Sydney, having built a new cement annex, 45 x 75 feet, four storeys, which is used as a warehouse, but has display windows on Charlotte Street. Business in all lines has been remarkably good in Sydney, which is becoming increasingly important as a distributing centre and now handles a very large volume of Newfoundland business. Expectations for a large hardware trade have generally been fulfilled, Sydney's building permits being one-third greater than last year.

Two of the window displays put on early this year by Thompson & Sutherland, Ltd., Sydney, N.S. The display on the right shows a fishing scene and was the subject of much favorable comment, besides bringing in business. The four men shown in the picture, commencing at the right, are H. T. Sutherland, president of the firm; Roy Pace, chief clerk; H. E. Call, Sydney manager; and W. S. Thompson, secretary-treasurer.

Forwarding Interests of the Paint Trade

IN putting forth any effort, any general co-operative effort, destined to benefit any collective interest or number of interests, it is essential that the individual be submerged to a very large extent, oftentimes totally.

After all, every individual falls into a certain classification in which the characteristics of each are as much alike as peas in a pod.

No one is so peculiar or unique but what he can be pigeon-holed into a classification with hosts of others, whose self-centred appraisal easily destines them to the place they belong to.

Classifying the Dealer

Retail merchants, whether they sell pins, paint, or potatoes, are readily classified — not alone in the mercantile agencies, but by other characteristics, some of which determine their success and some of which determine failure.

Some are boosters, some are knockers, some grouch, some drag, some are so indifferent to the opportunities about them that it is a wonder they keep their heads above water.

Getting Down to Cases

No getting down to cases in the paint trade, and speaking more particularly of the advancement of the fall painting idea.

Few retail hardware dealers realize the important position they occupy relative to the trade as a whole and the tremendous assistance they can offer in advancing this idea.

Not Revolutionary Idea

Fall painting is not revolutionary, it is merely a means of advancing the all-year-round use of paint.

Advancement cannot be made by taking a "let-George-do-it" attitude. Manufacturers of paints and varnishes cannot do it alone. Masters painters cannot do it alone. Retail paint dealers cannot do it alone. The consuming public cannot do it alone, or if they can it would only be by a very slow evolutionary process of changing their habit of spring painting to fall painting.

United Effort For Results

But given the impetus of the united effort of manufacturers, master painters and retailers and the public would soon take to the idea of fall painting.

Not that it is desirable to do away with spring painting, by no means. What is needed by the trade is more painting; and fall painting should be one means to this end.

All the united effort of the paint manufacturers could not push forward the fall painting movement successfully without the local effort of the retailer. The same could be said of the local retail merchants without the co-operation of the broad-gauged national advertising of the manufacturer.

So closely linked are the interests of each of these factors that it is truly surprising the amount of short-sightedness displayed by many individuals towards any co-operative effort involving the furthering of the personal interests of that person.

Fall Painting is Not Revolutionary—It is Merely a Means of Advancing the All-Year-Round Use of Paint.—Co-operation is the Keynote Upon Which an All-Year-Round Trade in Paints Can be Done—Work With the Manufacturer—Get the Painter's Assistance—Boost Advertising

If then the larger problems before the trade are incapable of entire solution by any individual, or any section of interests, and co-operation is necessary to put them over, it can be readily seen that the more individuals or sections of individual interests that submerge themselves into such co-operative effort, the more success is assured. And the more successful the effort is the more those individuals will emerge with profit and benefit to themselves.

However, everyone is looking out for number one, and consequently face the question, What can be got out of it? Too frequently this attitude becomes a boomerang to the one who holds it.

Getting back to cases, let one examine briefly some of the benefits to be derived by each factor in the paint trade. The manufacturer welcomes the fall painting idea because it tends towards more even all-year-round production and employment of labor. Overhead charges are lessened per unit of his production. He can buy more uniformily throughout the year and lessen the necessity of having his raw materials accumulate storage and interest charges. He can pay his labor better, yet realize a more even return and perhaps a larger return on the money invested in wages. His turnover becomes greater. Instead of being rushed to death at one season of the year and laying off trained members of his staff at another, he can keep his organization going the year round. He can also utilize more labor and pay out more salaries. Fall painting will assist to reduce selling costs. Quite true, he can make more money, but he can also whittle down other expenses, which must be figured in the cost of production.

The United Efforts of Manufacturers, Jobbers, Retailers and Master Painters Will Further the Fall Painting Idea.

Fall Painting Means Not Only a Greater Volume of Business, But a Lessening of Overhead—

And he can do much of this to the benefit of the retailer. He can broaden his distribution and give him more uniform service. Instead of trying to please everybody at once, the manufacturer can arrange his distribution throughout the year.

The painter's problem is of a similar character, but in a much smaller way. In the spring everybody is on his heels to get their particular job done. He cannot get enough help. He has to look forty ways at once in order to keep his trade satisfied. At other times he is wondering what he can do to keep Jack, Bill and John busy, or he has to lay them off. Perhaps there isn't enough coming in to pay his own wages and overhead. The painter knows that fall is the best time of the year to paint in, but somehow the people haven't the same courage for it that they had in the spring.

Get Trade Coming

While the retail hardware and paint dealer may have other lines to engage his attention in the fall, yet few are so stubborn as to throw away business if it comes their way, or can be made to come their way. And that's the problem—to make a greater volume of paint trade come their way. Mark you again: fall painting will not accomplish it all, but it can be made a mighty factor in accomplishing such a result. The paint department has gradually become a more weighty factor and means of profit as the paint trade has grown. In very few stores has it reached anywhere near a maximum. There is room for growth. And that growth is dependent not alone on volume, but on more frequent turnover.

Increased Turnover

It is not necessary to dwell with any paint dealer upon the effect that would be produced if there was as great a volume of business done in the fall as there is in the spring. He knows well enough what it would mean in turnover, lessening of overhead, better utilization of shelf space and profits.

Drawbacks in One-Season Business

Summing up the question from the standpoint of the trade as a whole, manufacturer, master painter, and retailer alike confront the rush effort of one season against the dullness of others. Where

one lacks sufficient turnover, so does the other. Where overhead tends to become excessive with one, it also becomes excessive with the other. After all, the drawbacks of a one-season business are common to all. Such conditions, then, call for united co-operative effort to overcome them. More painting and fall painting mean more sales and more turnover. That is one knot to be untied; the other is the getting closer together of all factors to promote trade efforts that will lessen the seriousness of these problems.

In these the retail hardware dealer has a serious duty to perform that should not be overlooked and which will be to his benefit in the long run. The promotion of the fall painting idea affords an opportunity to show what he can do in this direction.

Ways and Means to Increase Painting

Room For More Paint Business to be Done— Study the "Why" of Fall Painting

Expansion of Trade Largely Up to Dealer— Personal Association Much to Do With It— Good Stock and Effective Advertising Necessary

NO doubt hundreds of commendable advertising and selling schemes could be devised and offered to accomplish this purpose.

It is not the purpose of this article to devise or increase their numbers or to be too specific. Space will not permit.

The whole question now resolves itself into the necessity of getting the consumer, the public, the trade or whatever you like to call the fellow that buys paint, to apply paint in the fall.

There is the fellow, too, that applies very little paint, or no paint at all.

GET THE DELINQUENT

Suppose one lets the chap that applies one coat of paint regularly alone, and gets after the man that doesn't apply it, and induce him to do so in the fall. If we got them all collectively it would soon reverse the conditions of the trade and the usual spring business would look like a standstill beside the amount that would pile up in the autumn.

ROOM FOR EXPANSION

There is plenty of room for more paint business. Yes, three or four times the total of Canada's present yearly total business is possible.

But before one starts in at the job, there must be good, sound reasons for getting a man to paint in the fall. These have been amply set forth on another article of this issue.

STUDY THE "WHY"

While you are at it and the suggestion is fresh turn to that page and let those reasons soak into you mentally so that you can put them forcibly into your advertising and into your selling talk with your customers.

Give these reasons to your clerks and have them drilled thoroughly in the "reason why" of fall painting.

When you have done this you have gone a long way with one of the most forcible and effective means of promoting fall painting.

LIES WITH DEALER

If you can only realize it, Mr. Hardware Merchant, you have in yourself and your staff the very best ways and means of promoting any forward movement of this kind. Your own personal first-hand contact with your trade can do more, perhaps, than by any other means to promote sales of paint or any other branch of your business.

Fall painting has actual common-sense, dollar-in-pocket arguments for the consumer that you can put over in your personal contact with your trade, and that no other form of advertising can reach.

It is not the intention of the writer to look for the occult, the mysterious or the complex in suggesting ways and means of promoting fall painting. Let one come out straight from the shoulder and say bluntly and frankly that it is very largely up to you. And in doing so will be found wrapped up in the old saying that "the Lord helps those that help themselves."

OTHER MEANS TO EMPLOY

Now that that is settled, let one look around for other means that will be more or less supplementary and undoubtedly helpful in assisting your personal efforts.

Already such help is being planned in a general way to promote the fall painting habit. The committees in charge of both the American and Can-

adian "Save the Surface" campaigns are preparing to launch fall campaigns, largely with the idea of encouraging fall painting as well as the dominant idea of teaching protection and preservation.

These campaigns in their broadness cannot hope to take the place of your own local efforts. Your efforts and theirs, of necessity, will supplement each other. But neither one can take the place of the other.

PLANS ARE AVAILABLE

Both committees have drawn up plans and suggestions which they will gladly offer to any retail hardwareman who wishes to avail himself of them. These suggestions, of course, are largely of an advertising nature, giving publicity to the sound, economical reasons of why the surface should be protected and saved. In this your local newspaper can be of great service.

KEEP STOCK ATTRACTIVE

But with all this, it is necessary to hark back to your own personal effort, which can only be your own business, conducted by yourself. In this reference is directed more especially to the arrangement of your stock, shelves and window displays so that they will suggest painting in the fall.

MAKE WINDOWS WORK

If the paint department is allowed to slide so that it takes on an air of "I-don't-care-whether-I-do-business-or-not" it does not encourage, let alone suggest, to the people in the store that painting can be done in the fall. If the windows are not dressed with a fall display a good booster for the fall painting habit is certainly overlooked.

Without going into detail of suggestions, it can be safely said that if the paint department is arranged with a positive idea towards fall painting, fall paint buying will come your way. If it is allowed to run down to a negative idea, fall paint buying will not come your way.

BE PREPARED

And another thing, do not fire off any fall paint advertising guns unless you have the paint department spruced up to a positive desire to do fall business.

Another powerful fall painting promoter which has been referred to—your store windows. There are enough advertising and window dressing suggestions embodied in the sound fall painting reasons to give your star window dresser two or three busy evenings in his windows. These are ways and means that rest entirely with you. That is why such strong emphasis is being placed on *you* in this article.

GET MANUFACTURERS' CO-OPERATION

Many paint manufacturers are now planning their fall paint campaigns. These will be helpful and you may possibly seek their co-operation in this direction. As usual, they will be willing to furnish you with circulars to enclose in parcels or to distribute amongst your trade. The main thing in such co-operation is that you see to it that they are distributed.

GET THE EXAMPLE

Precept and example are both powerful factors in starting the ball a-rolling. Perhaps your store or your home, or the home of your chief clerk are in need of paint. Have them painted this fall and use them as an opportunity of telling of the advantages of fall painting. If the idea is novel to some of your customers they will follow the result of your work with interest, and doubtless you can plant the seed of the fall planting habit with them where it will grow and multiply throughout the community.

SELLING THE IDEA

To a great extent the promotion of fall painting involves the necessity of first selling the idea through good, sound, reasonable reasons that are back of it. Your main task is to bring your trade to the point of conviction that paint should be used for protection and preservation, and that in order to do so the fall is the best time of the year to apply it. Let this dominant conviction run through all of your advertising and selling talk. It does not take long for sales to follow conviction.

Again let it be emphasized that bringing this conviction forcibly home is mainly up to you. And it is you who will reap the benefit in larger business, and extended service to your locality through your paint department.

"Why" of Fall Painting Explained

Reasons Are Many—Receptive Condition of Surface Free From Moisture Strongest Talking Point—Priming Coat Most Important — Scientific Study Points to Fall as Best Season For Exterior Work

THE first requisite for the successful painting of any material is a dry surface and a dry atmosphere. The importance of these conditions is doubled when a porous material like wood is to be painted.

"The wood must be dry and the weather must be dry, otherwise the paint, whatever its composition, will not hold. Furthermore, the inside of the house must also be dry, or moisture driven through the wood by interior heat will carry the outside paint away in escaping.

The Best Time

"Early fall, after the long, dry summer-time is perhaps the most propitious time for painting; next best is late spring or early summer, after the spring rains are over, and before dust and insects fill the air."

The above conclusions are a summary of the experiences of both paint manufacturers and master painters all over Canada and the United States.

A Case in Point

A master painter drew the writer's attention to some veranda posts on which the paint was blistering and peeling. Said he: "If those posts had been painted in the fall instead of the early spring, that blistering would not

have occurred. The owner insisted against all my reasoning that I should go ahead with the work. The trouble was that the sun had not had an opportunity of driving out all the moisure that the unprotected surface had absorbed during the winter. If it had been left till the fall, the moisture would have all been driven out and the paint would have remained firmly on the wood.

Paint Dries Naturally

At a conference with a committee of master painters the writer recently took the opportunity of citing John Dewar's observation on the results of fall painting. "Taking the years together I personally prefer the autumn. It is because, as a rule, we have more settled weather, coupled with the fact that paint dries best in cool, clear weather. The drawing and absorbing influences of a strong sun are eliminated, permitting the paint to dry and harden by natural processes, and when the summer sun has returned its effect on the paint is minimized. The average good job of painting done in late September, October or early November will present better protection, better wear and look better the following August than the average job in that month painted in June previous. It is, I believe, generally accepted that mid-summer weather is, as a rule, not suitable for best results in exterior painting by reason of its many deteriorating influences on the paint coatings, also upon paint in the pot."

Woodwork Seasoned

Without one dissenting comment every one of these Canadian master painters agreed upon the soundness of these conclusions.

Years of practical experience has taught these men that exterior woodwork is in a more seasoned condition to properly receive the application of paint. Every man cited numerous instances in proof of their favorable attitude towards fall painting. Not only does painting in the fall of the year produce an appearance that is more lasting, but it gives more complete and adequate protection all the year round.

Moisture Eliminated

Ideal conditions for the application and reception of paint are brought about in the fall by the fact that the summer sun has an opportunity of driving out and eliminating every trace of moisture. Every craftsman recognizes the virtue of seasoned lumber. The woodworker can produce a much finer piece of workmanship with seasoned than with unseasoned wood. This is true of the painters, probably more so, because of the fact that he is dependent upon having the pores of the wood absolutely free or empty of moisture and saps so that he can drive in the essential preservative liquids of his paint. These obtain a deeper and firmer grip on the wood, which promotes better wearing qualities.

Priming Coat Important

It is mainly from the standpoint of the priming coat that this phase of fall painting becomes significant. The priming coat at all times is the most important part of painting. The materials used and the workmanship should be of the very best. If the prime coat falls down all of the rest of the job falls with it. The condition of the surface on which paint is to be applied must be at the very best. In this the painter is largely at the mercy of the weather conditions which govern the state of the surface to be coated. The fall of the year finds every exterior surface more ready to receive the priming coat properly. After he is assured that his prime coat has obtained a thorough grip on the wood he can apply his finishing coats with full assurance that his work will perform the service that it should.

Unseasoned Lumber Hard to Combat

Unseasoned lumber is one of the worst conditions of any building material that a contractor and afterwards the painter have to combat. All too frequently the property owner rushes his painter onto the job of painting a new building, when he should hold him off until assured that every portion of the building, including the plaster, is absolutely dry. Hosts of painters can tell of myriad paint troubles for this reason. To ensure the most thorough protection and more lasting results a building erected in the spring or summer should not be primed until the early fall at the earliest. By so doing, the summer sun has not only seasoned the lumber, but it has had the opportunity of driving all traces of moisture out of every portion of the building. One particular job on a new house comes to mind; the exterior woodwork of the house had been erected through the summer. It was allowed to stand until late fall when the prime and second coats were applied. The finishing coat was not applied till late the next spring. Few jobs wore or kept their appearance as well as on that house. The owner was not in a hurry to paint until surface conditions were right. His primer and second coat were applied on an ideal surface under ideal fall conditions, and the results more than justified his patience.

Taking year in and year out, weather conditions in the fall are more uniform and lend themselves better to continued painting operations.

Fall Painting Considered Best

Without going too deeply into technicalities or reasons why, it is practically the unanimous opinion of all paint men that paint applied in the fall takes on peculiar drying qualities that give it more lasting results and better wearing qualities. The mild warmth of the fall apparently produces a slower and more permanent oxidation process that gives the oil better life and elasticity. A too hot sun, such as is experienced in the depth of summer, promotes an over-rapid oxidation that causes blistering. This is avoided in the fall. The moist conditions of the spring, while they retard drying as well, do not permit paint to get the same firm "set" that it takes on in the fall.

Thorough scientific and practical investigation of painting conditions in the spring, summer and fall, and a comparison of the same have brought unmistakable proof of the fact that fall painting permits paint giving its best service and efficiency.

Conscientious paint dealers seeking to give their trade the best service should not overlook these facts in governing their paint departments and in planning their advertising and sales promotion work.

ADVISE BUYERS ABOUT USES OF LINSEED OIL

Hardware dealers may frequently give customers useful information in regard to linseed oil and its uses. It is astonishing how little the average individual knows about linseed oil and he thoroughly appreciates advice which will enable him to get the best results. If left to himself he would probably use boiled oil where raw is required or vice versa and by using the oils indiscriminately would get into trouble.

Because of its appearance many people have the idea that linseed oil will make a good lubricant but it is altogether unsuitable for this purpose. It dries like a hard varnish and, of course, would clog any machinery almost as badly as varnish would, except that it hardens slowly. For this reason it is quite unfit for using on hones and whetstones when sharpening tools, as it makes them hard and useless, but it is often so used in workshops and many workmen have spoiled oil stones before finding out the reason. If used for oiling the bright blades of saws or other tools it makes them brown and varnishy.

But linseed oil is the very best for rubbing into the wood parts of tools to keep them clean and it imparts a hard finished surface. For woodworking and polishing it is also invaluable.

Boiled linseed oil is the only kind for mixing paint or it would never dry. Cottonseed oil is often used instead of linseed but it is a poor substitute. Linseed oil is useful for domestic purposes in reviving varnished furniture and leather goods.

Rearrangement Brought Quick Results

W. H. Cuddy, of Strathroy, Ont., Sold More Paint This Spring Than in Previous Two Years by Putting Paint Section Right Up at the Front of Store and Specializing on One Line Instead of Two

Based on an interview by C. E. PARSONS, of Hardware and Metal, with W. H. Cuddy, of Strathroy, Ont.

W. H. CUDDY, hardware dealer, at Strathroy, Ont., made two experiments this spring that brought most interesting results from a sales standpoint. Up to this year he had always handled two brands of paints and had established his paint department at a section of the store where it was somewhat inconspicuous. Enamelware, in which he has always done a good trade, occupied what Mr. Cuddy considered the best space, right up at the front, running from the front door right back half the length of the store. This spring Mr. Cuddy decided to make a "drive" in paints, and after carefully considering the matter, laid out a plan of action which included the removal from the place of honor in the store of housefurnishing goods, replacing them with paint. An aggressive newspaper and circularizing campaign was instituted, backed up by paint window displays. He decided that instead of handling two brands of paints he would centre all his efforts on one, that he would put his paint department in the best display space in his store, and that he would let people know all about the paints he had for sale by advertising.

Got Quick Results

"I got quick and very satisfactory results," said Mr. Cuddy to HARDWARE AND METAL. "There is no question at all that I will sell twice as much paint this year as I have sold in the past two years. The way it is moving I would not be surprised if the sales records do not exceed that estimate. I have demonstrated to my complete satisfaction that it pays to handle one line of paints and not to try and handle two."

Mr. Cuddy began his advertising campaign in good time to arouse interest in spring painting. He used quarter-pages and half-pages, and in addition sent out about 500 special paint circulars. Besides these, when mailing his monthly accounts, he enclosed paint literature. He backed all this advertising effort by nicely arranged window displays, which he kept changed each week. In brief, he went after the paint business, determined to increase his sales, and he has more than surpassed his most sanguine expectations.

Put on Demonstration

Another method Mr. Cuddy used to stimulate interest in spring painting was to put on a two-day demonstration. A representative from the factory demonstrated and explained thoroughly the use of the wall and ceiling finishes, as well as stains and varnishes for old floors,

View of the paint department of the W. H. Cuddy store at Strathroy, Ont. The arrangement of stock makes a fine impression on the customers of the store, and since moving this department up to the front, this dealer has doubled his sales of paint. An aggressive advertising campaign has been run and the volume of business has grown rapidly.

woodwork and furniture. This demonstration was well advertised a week before it took place, double space being used and ads. put on both the front page and on an inside page of the weekly paper. The demonstration was one of the most successful of its kind ever held in Strathroy, and brought in a large number of people, many of whom purchased paints or other goods. A number of prospects were also secured and these will be followed up.

Did Not Hurt Sales

In rearranging his store and putting the paint department to the front, Mr. Cuddy states he has not hurt his sales of enamelware, whatever.

"But putting the paint right to the front," he said, "I have jumped the sales more than I ever expected in this department, and am more than satisfied with the results. I am keeping the enamelware well forward, too, and have not lost any of the business I did in that line."

As will be seen from the accompanying photos, Mr. Cuddy has a window display of paints and a window display of enamelware. In going after increased sales in paints he did not forget the possibilities of selling more brushes. As will be seen from the photos, brushes are a prominent feature in the window display and in the store display as well. In the latter they are right up near the front, shown in a neat and attractive silent salesman. Every time he has made a paint sale, Mr. Cuddy has suggested brushes, and he has made a new sales record this season in brushes as a result.

Another Profitable Change

Another profitable change he made this spring also was in connection with the sale of auto finishes. In former seasons he only stocked black finishes. This spring he stocked a complete range of colors and included some mention of this in his advertising matter. "As a result I have sold just four times as much goods," he stated:

The space which is now occupied by the paints and varnishes was formerly used for displaying enamelware. This has always been one of Mr. Cuddy's big sellers. While it has been moved back, Mr. Cuddy is still showing it conspicuously and maintaining his advertising, and the sales have not suffered in any way.

"Our sales in this department," he said, "have shown a steady increase, and we turn the stock three times a year."

The Stove Department

Stoves are another good seller with Mr. Cuddy. He goes after this business by holding demonstrations and by advertising.

"Last season was not a good selling season on account of the mild weather," he stated, "but our sales exceeded 200 stoves. I consider that very satisfactory."

Mr. Cuddy has in connection with his store a special show room for stoves. In this room he carries a large stock and says he finds that by doing this he can often put through a sale, where, if he had only one or two models or sizes, he would lose the business. He makes all deliveries, not only of stoves, but of other goods by auto and finds that his patrons, many of whom are miles out in the country, appreciate the prompt service. Very often if they come in and buy a stove in the morning he will have it out to their home, set up and in operation before they return. He always makes sure that each stove is properly set up and in perfect working order before the men leave. He also does a considerable business in repairs.

Good use is made of the windows of the W. H. Cuddy store at Strathroy, Ont. One display is of paint run in conjunction with a good showing of paint brushes. The other window is devoted to enamelware, which is a big seller with this merchant.

His Roofing Sales

Each season Mr. Cuddy's sales of roofing average two carloads. Most of this business comes to him as a direct result of his advertising and of his connection with the farmers. A great deal of it comes in over the telephone.

"It is surprising," said Mr. Cuddy, "the part that the telephone plays these days in business. We get any number of inquiries over the phone from farmers who are too busy very often to come into town themselves. We give all such orders our most prompt attention and try to make a quick delivery by auto of the goods. When people learn that they can get goods this way quickly and satisfactorily, they naturally buy oftener, and our telephone business has shown a steady increase."

Likes Early Closing

While the great majority of the farmers in the vicinity of Strathroy own automobiles and often come into town in the evenings, Mr. Cuddy does not see any reason for keeping open after six o'clock.

"A great many of those who come in their cars," he said, "are the younger people. They are out for fun, not for buying. I am a thorough believer in early closing. People will buy in regular hours if the merchants educate them to it."

Mr. Cuddy is also working as closely as possible to a cash basis. "I find a great many people these days want to pay cash for what they buy," he said, "especially if I make it worth their while. To all those who want to pay for what they get when they get it I give a two per cent. discount."

Want Better Goods

"People are demanding better goods than they formerly did," said Mr. Cuddy. "I find right along that it is not any more a question of price altogether, but of quality and service. If I have a line of goods that I can boost to the limit and stand right behind in regard to what they will do, and another line which are a little cheaper, but for which I cannot make the claims I can for higher priced goods, the buyer will take the high-priced stuff every time. The farmers are buying more and better things every year. They want their homes comfortable, they want modern labor-saving equipment and appliances for both their homes and their work, and they are willing to pay for them. The merchant who has goods that he can show the farmer will save time, and help him get away from hard and heavy work, or that will make for comfort in the home, can sell them every time. The same applies to the farmers' wives. They want time and labor-saving devices just as much as the men. They are working more and more toward this all the time. Between what the farmers' sons and daughters are learning at school and college and the improvements made possible through electric power

Increasing Dealers' Fall Paint Sales

Growth of Ready-Mixed Paint Sales Can Be Turned Into Year-Round Business — Fall Painting the Solution of One-Season Idea — Increased Turnover the Profit-maker

IT is not so very long ago that the sale of ready-mixed paint was practically unknown except in a very few hardware stores.

Buying mixed paint was then a novelty, until manufacturers took hold of the problem by means of advertising and made it a habit.

In short, the public took on the paint habit through the aggressiveness and publicity of those who foresaw that people could be made to realize the service of their products in this way.

RAPID GROWTH

Older hardware dealers can easily recollect the rapid growth of this habit, its development and the corresponding widening of the distribution of paints and varnishes.

It was demonstrated that people's ideas towards paints and varnishes could be moulded by the proper means and methods.

ONE-SIDED EFFORT

In the light of present knowledge of paint and its uses it is now seen that this molding was somewhat too one-sided. The habit was only taken on in spots, or at certain seasons of the year.

The problem of the paint trade to-day is to mold public opinion in a broader way and to make the habit more continuous.

FALL PAINTING THE ANSWER

The proven efficiency and service of paints and varnishes applied in the fall presents an opportunity for this development.

The fact that property owners and householders were brought to the habit of using ready-mixed paints and varnishes generally breaks down any barriers or objections to the possibility of promoting the fall painting habit by the same means and methods.

Advertising properly directed will be the strong right arm of both paint and varnish manufacturers and retailers to bring about this highly desirable development of the trade.

And who is there to gainsay its beneficial possibilities when it means increased volume of business, greater turnover, lessening of overhead and an increase of profits?

REMARKABLE GROWTH

Compare the days gone by when there was no paint department in the average hardware store, with the present time when the paint department in some instances is almost the keystone department of the store.

Frankly, there is one drawback to the paint and varnish trade, and that is that the turnover is not frequent enough. Certainly it is not as frequent as it might be and the development of the fall painting idea will go a long way towards increasing it.

ALL-YEAR-ROUND SALE

We have compared the past with the present; let us compare the present with the future, when, by means of more all-year-round sales the greater turnover of the paint department will yield larger profits and become a still more important factor in the store.

It cannot be said that this is mere academic talk or ephemeral reasoning. The trade has already experienced a certain amount of growth in fall painting, but it has by no means realized all that it might.

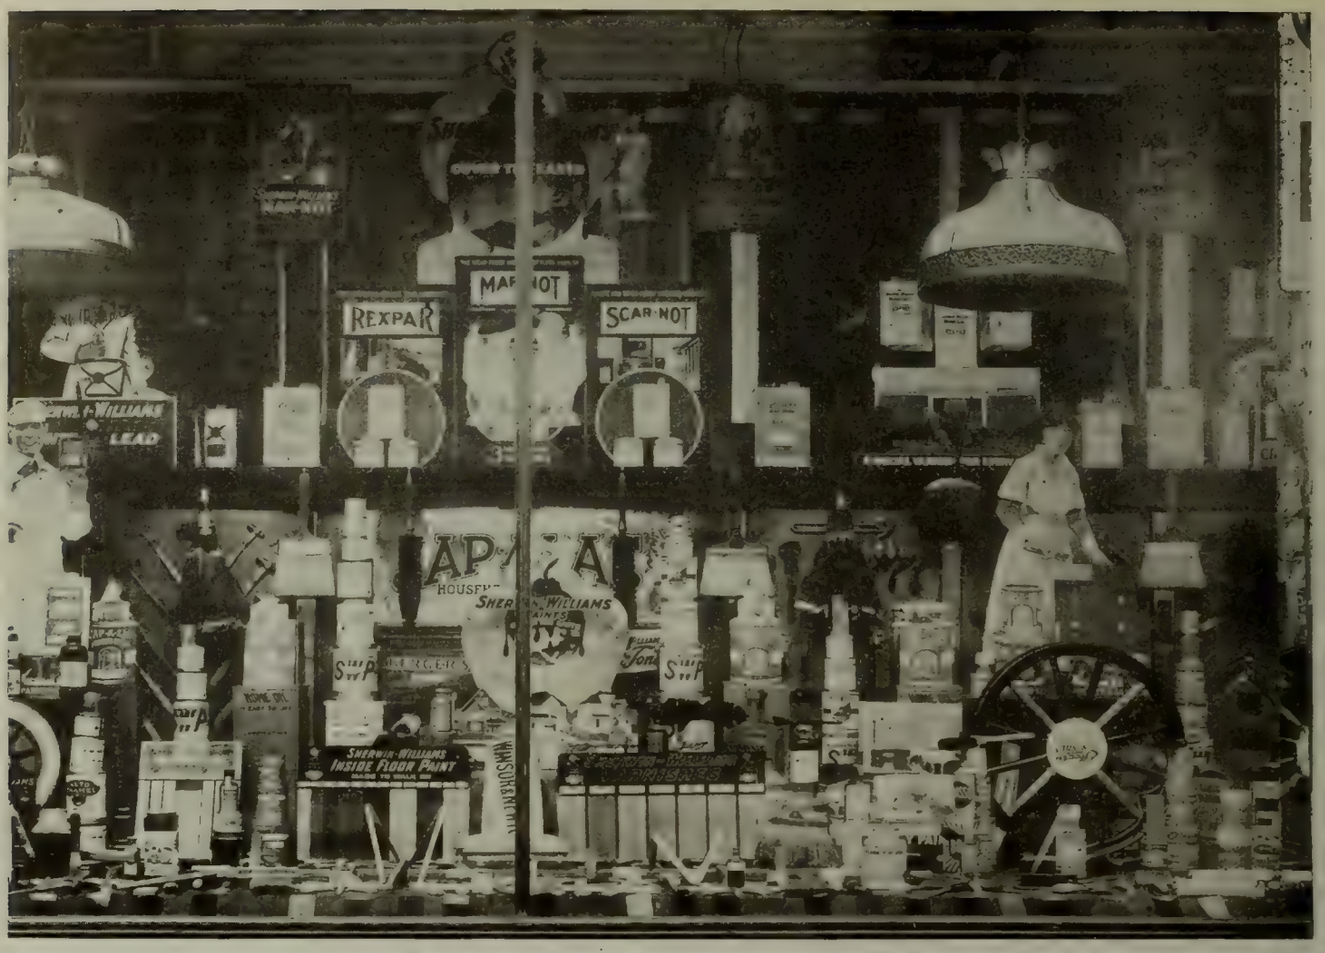
THE SERVICE IDEA

Sound reasoning and shrewd business judgment brought about the ready-mixed paint habit of earlier days without a tithe of the scientific knowledge that is possessed about the product to-day. The definite scientific knowledge that is possessed to-day concerning the greater service brought about by paint applied in the fall provides a stepping-stone for advancement that none of the pioneers of ready-mixed goods possessed, or at least developed.

The trade to-day, therefore, has the backing and assurance of scientific and even practical certainty that points the way to more business.

AN EVER-WIDENING CIRCLE

But fall painting is not alone or inseparable from other possibilities. It can be made the forerunner of further development in the trade. It can prepare the way towards bringing about the habit of interior painting of all sorts during the winter or indoor months.



GETTING DOWN TO CASES

Perhaps the purpose of this article can be better illustrated by using a concrete illustration in which a quart of paint, a dollar and a section of shelf space are the chief factors.

In November or January, say, a paint dealer places his signature on an order which means that in exchange for a quart of paint he will part with a dollar on next April 1st or 60 days thereafter. (If he is wise he will let the dollar go in fifteen days and claim his 2 per cent.). In March the quart arrives and is given shelf space costing rent, insurance, and other overhead expenses. In April or May it leaves the shelf and the cash register bulges a profit. A spring sorting order finds another quart taking its place, but the chances of this quart leaving that space lessen as the season advances. It may be a summer boarder or it may not. For our purpose, however, it goes forth at the end of May to be replaced by a third quart which is more than likely to become a summer resorter without hope of leaving.

NO STAR BOARDER WANTED

Now, the point is, shall this quart become a star boarder for the fall and winter, eating its head off with overhead, or shall it not? The promotion of fall painting heightens the possibility that it will be ousted into profitable exchange and replaced by another which shall just as readily follow its course, and be again replaced by a quart that will perhaps readily sell for indoor purposes, a dollar that will go and come with each quart and each time it comes bring a profit is infinitely more nimble in producing bigger business than the one that sits tight on the shelf under a label. And remember, shelf space means money, too. For shelf space, as pointed out,

Window display of paints arranged recently for Omer Deserres, Montreal. This dealer believes implicitly in the value of the show window, and arranges his goods so that they not only attract, but so that they are a material aid in developing sales. The above window not only shows paints and varnishes, but many painters' requisites, such as brushes, dusters, graining tools and kindred lines.

is not merely a small circular area on a board, it is money in overhead, taxes, heat, light, clerk hire, delivery charges, etc.

Fall painting will make the dollar invested in paint hop around more frequently and more nimbly. It will provide accommodation for more active roomers where otherwise only one sleepy boarder might rest, without profit, from early summer till the next spring.

SOUND BUSINESS

Fall painting is sound and beneficial, from both the scientific and practical standpoints. Its extension is sound from a purely business standpoint. With these premises established, the paint dealer who utilizes them to make his paint department a live, active, all-year-round means of profit is going to realize bigger and better business and extend better service to his community.

REARRANGEMENT BROUGHT QUICK RESULTS

(Continued from page 162)

lines, the next generation of farmers is going to do many things in a far different way from what the old school of farmers have been doing them. I always keep in mind that the boys and girls who are coming into my store now will very shortly be the men and women who are doing the buying and I always try to keep in close touch with them."

Has Found It Pays

"I have always been a thorough believer in newspaper advertising and am using more space now than ever. There is no other way in which I can so quickly or so thoroughly reach the people all over this district as through the newspapers. I can quickly test the results, and have done so time and again. When I put in an advertisement and people who live miles out in the country start coming into the store and asking for the things I offered, or when they send in orders for these lines over the telephone, or by friends who are coming in, there is no doubt at all that they have seen and read the advertisements. It frequently happens that perhaps two or three weeks, or a month, after an ad. has appeared some farmer or his wife will come in and ask for something that we featured."

Displays Are Good

Mr. Cuddy states that he has found display tables, and counter displays produce a lot of business. As will be seen from the photo, he has a display table right inside the door. He has others at various points in the store and keeps them changed regularly. His silent salesmen filled with cutlery and silverware is always kept up at the front of the store, and Mr. Cuddy says splendid sales have resulted in these lines.

His results have been so satisfactory from both his windows and store display in general that he is plannig to remodel his entire store by taking out a partition which now divides the main store from the stove show rooms. If this is done, he will also remodel the front of the store and put in two large modern show windows.

WORTHLESS CHECK A FALSE STATEMENT IN WRITING

The giving of a worthless check by a bankrupt was held to constitute making a materially false "statement in writing," in a decision of the United States District Court for Massachusetts in re Robinson. There being some doubt as to whether the bankrupt obtained any property thereby, his discharge was granted.

Quiet Colorings Are to Dominate

Prices Five Per Cent. Higher—Tendency is Toward Narrower Borders — Tapestries Will be Popular

Written by A. H. ILLSEY, Associate Editor Hardware and Metal

TRADESMEN throughout Canada will have no complaint in choosing their stocks of wall hangings for the season of 1920. For the choice afforded by the manufacturer will enable him to select those patterns which the needs of his trade will have suggested. It is taken for granted that the good merchant will select for his trade that which they will most probably appreciate when the paper is applied to wall, for, as was pointed out to HARDWARE AND METAL by a large Montreal manufacturer, the matter of following the customer's likes and dislikes is the surest index to successful wallpaper selling. Therefore, as stated, there will be no dearth of patterns to meet the requirements. Whether the papers are sold in the metropolitan city, in the large or small town or the rural community, patterns suited to every taste will be procurable, and at a wide variety of prices.

The Moderate Lines

Manufacturers have provided a splendid range in what may be called low-priced and the medium-priced grades to satisfy the popular demand. Striped patterns are very popular and will be freely sold in 1920. The "all-over" effects are very pretty and will be procurable in rose patterns.

Prominent are the pink roses and flowers. These are made the more pleasing and effective through the employment of either white or grey grounds. In the lower-priced papers this idea strongly dominates the range and those selling these extensively will be pleased to learn that the available patterns afford wide selection.

An inexpensive tile design is offered which will find admirers because of "different" effects which may be secured through their application. These will be popular for kitchens, "tiles" being used more extensively each year in this part of the house, permitting of the varnished papers being washed with advantage.

Light striped papers will be available in pale white grounds.. In blues and pinks, with cut-out borders, the effects which one may secure will make a strong appeal.

For halls and living rooms, in the moderate-priced papers, there is an inclination to slight designing with a quietness in effect, while some of the hangings tend strongly to plain effects all through. There is a greater tendency constantly to eliminate strong, outstanding designing.

Then, by way of affording still wider selection, a range is shown having a slight touch of gold in the pattern. When this is completed, with cut-out border to match, the effect is good and will be much approved.

Tapestries Big Line

Coming to the hangings for those who want something better and different, tapestries will be even more popular than ever before. Halls and dining rooms have been singled out in the manufacturers' plans as commanding a first place in his productions, and there will be no lack of variety when one's stock is being chosen.

Then enter the Japanese grass cloths. The appeal they will make to the taste of many communities will favor their selling, and is expected to extend to all

ONE OF THE NEW 1920 PATTERNS

This is a design printed by The Watson-Foster Co., Ltd., Montreal. Photographed from original painting and revealing a wholesome and homey effect to the Living-Room. It will be noted that this has a cut-out floral border. The striped papers continue to be very popular and will meet with a wide approval during the coming season.

parts of the country. They may be had with or without motif effects and cut-out borders are also suited well to the patterns. One manufacturer stated, however, that tapestries were decidedly popular, and that, in some instances, the grass cloths were giving way to the former.

For bedrooms, soft greys and creams will lend attraction and afford that cosy atmosphere so much to be desired, and particularly in the rigorous Canadian winter. This is one of the strong talking features which will commend itself at once to the dealer when asked to suggest patterns.

Other features of the tapestries are those of big leaf effects, a variety of pretty birds, and which, with many, are always a first choice. Cross-color, in some of the tapestries, are improved through the development again of depth, and which imparts real richness.

Shadow Cloths—Old Colonials

There will be shadow cloth effects for those who want them, and these will find their way into many retailers' stock racks. Among these will be "all-over" designs, and others will come with and without birds in the designing. The use of white lines will lend splendid effect to these shadow cloth patterns, white cut-out borders will again accompany the various patterns extensively.

To see the old colonials is to appreciate the fact that many tastes have been weighed again by the maker and he has afforded another good range. Here will be found both delicate and strong combinations and the "all-over" range is quite extensive.

A line which will appeal to many may be styled an all-over "glory" effect. This will impart a look of uniformity to the room to which it is applied. An added advantage is that of a moderate cost for really superior paper. For halls or living rooms these will meet with favor. Those wanting moderate-priced papers will buy them in fawns, browns and tans. The method of manufacture is such as to impart a good effect from all positions, no matter where one is sitting in the room.

Ceilings and Borders

For the same reason cited above, ceiling papers, while dispensed with in some parts of Canada, give a warmth to the bedroom which is lacking on a plain white surface of plaster. A range of delicate patterns is shown and the figuring may be selected in small or large patterns. The larger, HARDWARE AND METAL was informed, are considered the better, and quite superior in many cases to the small figuring. Oatmeals, too, will find favor as ceiling papers.

Provision has been made for those who will carry a line of bathroom and kitchen hangings. Varnished papers still are popular and the utility of these will always be recognized. Blues and greens for bathrooms and brown tones for kitchens, and both with narrow borders, will be procurable in suitable range.

For the most part, borders will be narrow—nine inches in many cases. There are two reasons for this. In the first place the high cost of erecting houses to-day has suggested lower ceilings. Enter the narrow border, for, of course, the wide will never answer in the room with ceilings lower than are generally adopted in the modern house. And so, nine inch borders, if you please, will be big sellers in 1920.

The second reason assigned is that of the present plan of placing picture mouldings above the border. It would never do to use a wide border where this plan is followed nothing but a narrow border being permissible.

"Cut-out" borders, as will have been noticed throughout, are decidedly popular. This does not mean that they always are most effective. Sometimes, as the manufacturer uses it, the regular border, uncut, is best and imparts a better effect with the paper for which it is procured.

A Small Advance of Price

Merchants who sell papers will be very glad to learn that the average price will probably not exceed five per cent. more than the quotations of 1919. In view of the fact that most commodities have continued to advance materially, this should be considered no barrier to a speeding up of sales plans for the coming fall and for next spring. In fact there ought to be a greater opportunity than ever for the aggressive dealer who wishes to turn his stock several times. It will be none too early to make plans.

The five per cent. increase is assigned to an increased cost of paper rather than to increased costs for labor. All grades of paper have been very firm in price and advances have, from time to time, taken place. The coming season ought, assuredly, to be an active one for the sale of wall papers.

Paint and Wallpaper Popular Sellers

Dufresne, Limited, of Montreal, in Favor of Selling These—Bigger Sales This Year Than Ever—Customer Will Buy Better Brushes if so Advised—Big Repeat Orders for Both Lines

THE present year has been one of, if not the best, in the history of Dufresne, Limited, 988 St. Catherine Street East, Montreal. As an indication of this, Mr. Dufresne told HARDWARE AND METAL that their sales from May 1 to 10 this year were equal to the total for May of 1918.

While this firm carries a comprehensive stock of hardware, it does pay special attention to the paint department. Its policies have worked successfully in this section of the city, Mr. Dufresne stated, and a continued good business is looked for. Care in the filling of orders and attention to many points sometimes overlooked by storekeepers have contributed to securing for the store a large following of customers that return repeatedly for their needs from year to year.

One of the changed demands this year has been that for different sizes of containers than usually sold in the past. "It has been a big year for the four and eight pound cans," said Mr. Dufresne.

Asked as to why this change had come about, Mr. Dufresne stated that he believed it came from the fact that so many painting jobs had been put off for the past three or four years that it took a great deal more paint to do the work. "It used to be the rule to buy a small tin of paint and just brush up so as to keep the woodwork looking alright. Now this work has to be done better, as it has been neglected, and the average customer can use the larger quantity without any trouble."

Reorders Often

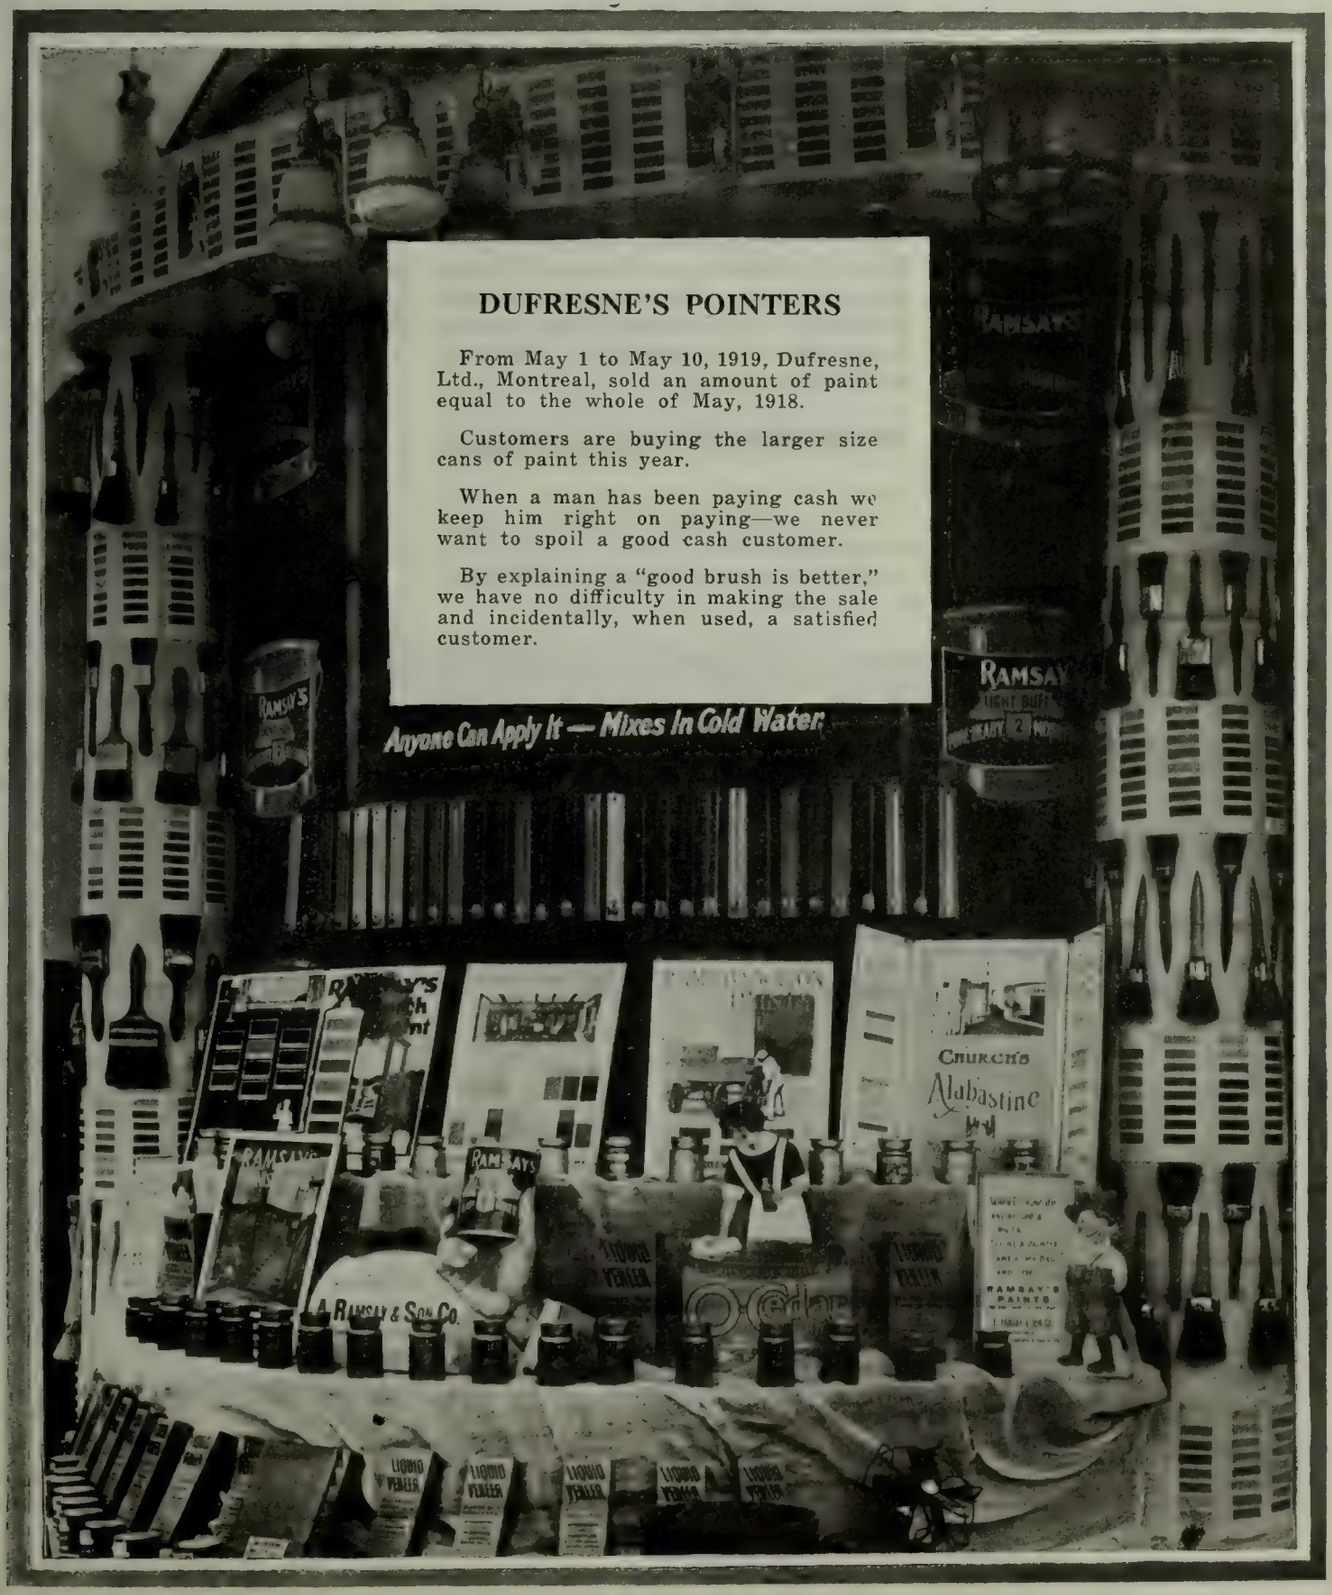
In speaking of the increase in sales more definitely, Mr. Dufresne said that he had usually ordered his wants twice a year. During the present season, however, he had had to re-order several times to keep his stock in the proper shape. It was a condition quite unusual, and, of course, a very gratifying one. Regardless of the fact that prices were higher for paints, there has been no difficulty in making sales. "People must have paint now, and they know it will cost more."

The Dufresne order for paints totals about four tons that is, this would cover the ordinary requirements for the season. With the special repeat orders, it will total more, of course, this season.

Small Losses-Customers

HARDWARE AND METAL was interested to know how the credit end of this business worked out in practice—for a credit business is conducted in addition to that of cash paid across the counter. In referring to this matter, Mr. Dufresne spoke most encouragingly of the results.

"In four years we have not lost $100 from poor accounts. The loss is a very, very small. A millionaire customer is not always good pay, and the worker or wage earner may be far better in this respect. I have had some men rather surprised when I would not give them credit. When a man has been paying cash we keep him right on paying, even when he asks, sometimes, for credit. If he says anything we just tell him that he is a good cash customer and that we do not want him to be any but a good customer; that we do not want to spoil him."



Here is a unique attitude, surely. Mr. Dufresne is very well pleased with the results which have followed his adherence to this policy. He believes that to be firm with customers, as indicated in the foregoing plan, is best for all concerned. It has seldom given offense, he says. For the most part, a 30-day credit plan is followed.

Big Wallpaper Sales

As indicating how splendidly wallpaper and paints fit into the hardware stock, it was pointed out that sales this year were much heavier than they have been for years. In addition to the opening order in the beginning of the season, three repeat orders have been sent in. In fact, one of the difficulties experienced this year was that of getting stock. Manufacturers had run short of various patterns, and it was not always possible to keep up every line.

A pleasing side of the trade this year has been that of the selection by customers of good grade papers. This is in common with the plan followed by the

Continued on page 170

Window display recently put in by Dufresne, Ltd., Montreal. This is a fine showing, not only of paints, but of brushes as well. Extensive use is made of color cards and display cards, which lend a bright, attractive appearance.

Merchant Sees Big Wallpaper Future

Verdun Hardware Dealer Sold Twice as Much This Year as Last —Little Waste or Loss From Leftover Patterns—Leads to Sales of Paint and Other Profitable Hardware Lines—How to Buy and Sell It—Big Trade Being Developed for Wall Papers Should Cause Dealers Not Handling This Line to Look Into Possibilities—Repeat Business a Factor Which Should Not be Overlooked—Careful Study of Territory One Serves Necessary in Outlining Buying and Selling Policy.

THE Verdun Hardware, 1491 Wellington Street, Verdun, Quebec, has developed a satisfactory trade for wallpaper, so much so, in fact, that it is one of the important departments of the store at certain seasons of the year. And although it is not considered a big seller at other seasons, the proper planning will avoid carrying over considerable quantities of the commodity and therefore of keeping capital tied up which might be used for the purpose of products which are in demand from week to week and month to month.

Although it is but four years since this store was opened at the present address, F. Lusignan, the manager and owner, stated to HARDWARE AND METAL that business is developing satisfactorily. With respect to wallpaper sales this development is such that the sales of the present season were double those of last year. That is proof positive that the line is taking. Selling prices were perhaps a little higher than the year previous, but the turnover accounted for twice the stock sold in 1918.

Extent of Stock

"We carry about one hundred and fifty different patterns of paper, Mr. Lusignan said. "There are from 100 to 105 designs of regular stock and then oatmeal papers and varnished patterns make up the difference. This makes a large enough stock for our trade."

It was pointed out that a big sale is obtained for papers ranging in price from 15c to 25c per roll. At these costs the outlay required to paper an average room does not exceed $3 to $4, and the average customer was willing to expend this amount. Even if several rooms were to be papered the cost would be well within bounds and when completed, the stock would be pleasing to the buyer.

One fact was pointed out which was well to take cognizance of, and that is that some patterns need not be carried in stock. This refers to the hardware man who desires to keep his investment pared to the lowest point. Of course the application of this idea will depend upon the nearness of one's supplier. If he be far removed his service may not afford such dispatch in deliveries as to remove the necessity of carrying the higher-priced papers in his paper racks. But where the manufacturer or jobber has a stock of these better papers available, the retail hardware man may sell from the pattern book. As a rule the customer will decide several days in advance and this will afford the time necessary to bring the paper forward.

Border Gives Profit

Some have reported that there is a loss from the stocking papers which cannot be avoided. The first consideration is therefore that of securing a good margin of profit. This involves the sale of borders wherever possible. Mr. Lusignan states that borders are not always asked for and that they cannot always be sold. But it should be the salesman's endeavor at all times to sell a line of border suited to each pattern of paper. There are two reasons for this—the one just named and also because it has been necessary, in making a sale, to spend much time in showing the range of patterns available. "If we had ten books of samples, there are people who would want to look through an eleventh," said the proprietor of this store.

It is the part of a good salesman to persuade each buyer to purchase a border. It makes the room, when papered, much more attractive, and once the paper is selected the time required to choose a border is quite negligible, generally. That's why the profit is in the border.

Must Make Hay Early

'Most of the sales of wallpaper are made in the months of April, May and June—sometimes running a little into July," said Mr. Lusignan. "There is also some demand in the fall of the year, but this is not large. If people have not done their house-cleaning in the spring, then they will do it in the fall and we make some sales."

In view of this fact, it is necessary to push sales aggressively in the early spring months. This means that stock must be secured early and any publicity that is to be undertaken planned well ahead. This involves, as an important consideration, the display of patterns along in March, or even in February. If they be shown early one's customers are given a suggestion which is very important. Customers remember such suggestions and will call them up at the time a purchase is decided upon.

"If we did not carry wallpapers, there are many customers who would go elsewhere, and they would also buy other things there. It is a good plan to carry papers for this reason."

This observation of Mr. Lusignan carries an important moral. It surely is important to-day to give one's customers every chance to buy what they want under the one roof.

Displaying Few Losses

Papers are bought early. They are displayed in the store and in the windows. When the representative of HARDWARE AND METAL called, three designs of wallpaper were being displayed in the window—although this was early in August. But here was the same important idea being carried out—that of impressing the customer and the prospective customer, that wallpapers were to be had within.

The Verdun Hardware considers its windows very important as a publicity medium. In fact more importance is attached to them than to any other publicity means adopted. Next to well-planned service to each customer, it is the only means of publicity used. The owner states that in a new district such as this there is more regular and more refined trade, whereas, in the large city, the big store secures a passing trade. Customers of to-day may not return to-morrow, perhaps never again. On the other hand, they will come back to the store located in their own district, to-morrow, and next week, and so on.

Losses are prevented by keeping patterns sold up. "We dispose of many old lots to the painters," said Mr. Lusignan, "and lose very little, in fact losses are very, very few."

8,400 Pounds Whiting

There is much benefit to be derived from the sale of wallpaper. In the matter of paint sales, there is a kindred and direct connection, and Mr. Lusignan reported a much bigger sale this year for some lines than ever before.

"We sold 25 barrels of whiting this year, averaging 336 lbs. each," he said. "And there must be a big sale of this line in the district, there being six or seven stores in this neighborhood."

"Paint has sold better this year than for some time. Many thought the price would be less this year and put off painting. But they soon realized that it would not be cheaper and have simply had to paint this year. I put off painting two houses last year myself, but I have had to paint them this year. The better wall coatings are selling to a greater extent all the time, too. These have a deeper tone than kalsomine and do not rub off."

Then there are pastes for paperhanging, brushes, etc. The selling of wallpapers has been a great help in increasing other sales all through.

A Bigger Future

Mr. Lusignan looks forward to the time when sales of wallpaper will be much larger. This will come with each succeeding year.

"When a new house is built," he said, "the white walls answer very well, for two or perhaps three years. After that

Progress in the Fall Painting Idea

More Fall Painting is the Forerunner of More Painting in the Indoor Months and Its Development Will Help Make an All Year Round Turnover—Many Advantages by Painting in the Fall

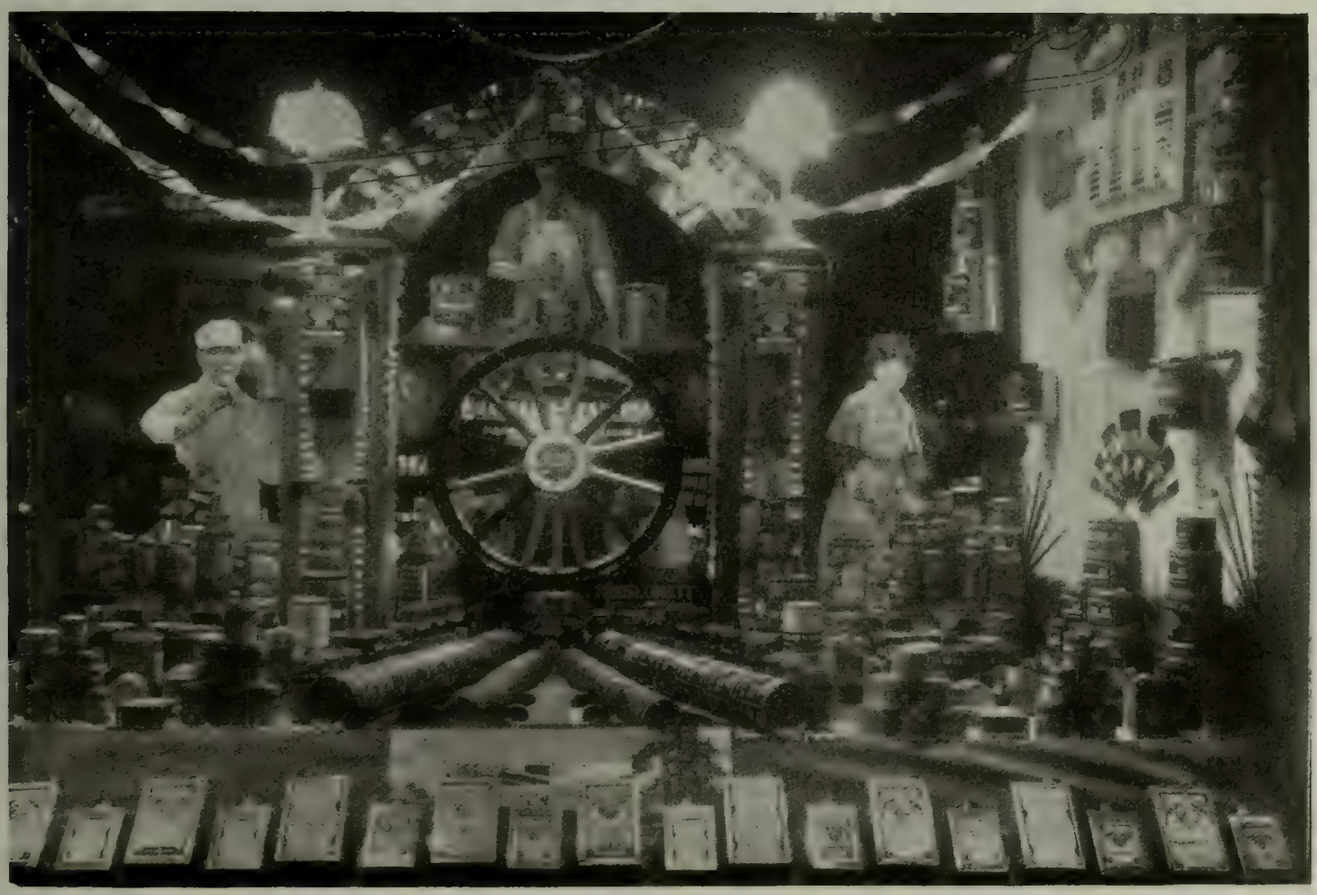
THOUGH the promotion of the fall painting idea is comparatively recent, there is evidence of very considerable progress from this effort. Apparently it is only a matter of time until the idea gathers momentum, then the large number of property owners will learn to break away from the established precedent of the spring painting habit and realize that fall painting has economic advantages for them as well as the trade.

Every paint manufacturer knows that fall painting has advantages from every standpoint. Much could be accomplished in strengthening their efforts to promote the idea if every paint dealer would get behind his promotion work and push fall paint sales for all he is worth.

Use the Newspapers

Quite a number of paint dealers are using their local newspaper space to bring fall painting before their trade. This is a hopeful sign and there is every reason to believe that shortly this advertising will become general rather than exceptional.

Master painters almost without exception are convinced that fall painting produces the best results for their customers. Indeed many of them have used their personal influence to induce clients to paint in the fall rather than in the spring. While they appreciate that it will bring about better business conditions they back their effort with sound practical arguments drawn from their experience in applying paint at all seasons of the year.



In many ways it is evident that the fall painting idea has progressed to the stage where all factors in the trade are ready for a big united effort to put the idea over and give it the impetus needed to make it general. In some sections of Canada, especially Alberta, the bulk of the painting is done in the fall. Just why this has come about is somewhat difficult to explain, sufficient to say, that if the habit can be carried out successfully there it should be possible elsewhere.

Paint in the Fall

In many sections of the United States the bulk of the painting is also done in the fall. In Washington, D.C., this is notably so, and the master painters put on a co-operative newspaper advertising campaign in the spring of the year to divert some of this business to that season. Their purpose was not so much technical as to make a more even distribution over the year.

In other sections of the United States it is reported that the painting trade is distributed about equally between spring and fall. However, these conditions are largely local, and by no means general. American manufacturers who have national distribution are continuing their efforts to make the fall painting idea more general and their persistence year after year is an indication that much progress is rewarding their advertising effort.

Quite frequently in Canada those in the trade meet property owners who express a preference for fall painting on the basis of protection that paint affords during the severe conditions of winter and early summer. With the increase of advertising paint for purely protective purposes it is easily seen how the fall painting idea will make easier progress

It is when dealers devote time to the arrangement of their window displays that best results are consistently obtained. The above showing is the work of time, but the sales have more than justified the effort. Dealers are more and more linking up their paint and varnish displays with brushes and other kindred lines, with gratifying returns. The above window in the store of M. Philbin Hardware Co., Montreal, is no exception.

and will have a stronger appeal to those desirous of exercising economy through the preservation of their property.

See Its Value

It is understood that the Canadian "Save the Surface" committee have become so impressed with the progress and necessity of fall painting that they intend to devote a part of their campaign to the fall issues of farm papers and newspapers and that fall painting will be featured in these ads.

In close conjunction with the advocating of fall painting has been the endeavor to bring home to the consumer the advantages of painting indoors during the late fall and winter months or what are known as the "indoor months." Fall painting and indoor month painting are so closely related that the one largely assists the other. Fall painting is the forerunner or stepping-stone to the indoor month movement, and the more generally fall painting is done the more it will induce the public to take on the indoor month painting habit.

Any movements of this nature need the whole-hearted co-operation of every factor engaged in the sale and distribution of paints and varnishes. Progress is necessarily retarded if the enthusiasm or co-operation of any one factor is not forthcoming. In this respect retail paint and varnish dealers have a large amount of responsibility placed upon them. They can carry on the idea in their immediate locality as no amount of general advertising can do when it comes to putting over the final conviction that fall painting is an advantage to their trade. If every paint dealer throughout the country would put his shoulder to the wheel during the fall of the next four or five years the movement would go forward by leaps and bounds. It wouldn't take long for the trade to be able to say that fall painting was a fixed habit that had come to stay.

Would Help Himself

In doing so the merchant would not only be helping the trade as a whole but he would be helping himself to a position where his paint and varnish department would be a profit earner the year round with a minimum of lulls and a maximum of turnover. And this is the sort of progress that he should be looking for as a business man.

The paint and varnish industry in Canada has been an example of progress for the past twenty-five years and stands to-day as one of the pioneers in agressive co-operation between manufacturers and retailer. But the limit of its progress and possibilities is not even in sight yet, with the tremendous amount of property that continues to remain unpainted or insufficiently painted from year to year.

There is ample room for more spring painting, for more fall painting, and more indoor month painting.

The progress that fall painting has already made has contributed to some extent to the expansion already made by the trade. But the retail paint dealer, as well as the manufacturer and the painter can s and for a great deal more expansion and progress. If fall painting can help out in this direction now is the time to start preparation and plans for boosting fall paint and varnish sales.

PAINT AND WALLPAPER POPULAR SELLERS

(Continued from page 167)

buyer in paying a little more in these days of high prices that he may get something dependable.

Dufresne, Limited, value the wallpaper department highly. A good profit is to be had if one watches stock and prevents its accumulation, and if patterns are well sold up before the close of the selling season. Suitable and convenient display of patterns is made at one side of the store, and the stock is carried in a rack holding a large range of patterns.

Sell the Better Brushes

Nearly one hundred styles and sizes of brushes are carried in stock. These are sampled and kept in drawers, divided to meet the needs of the stock.

An interesting sidelight was thrown upon the efforts put forth to sell the better grade of brushes. "If you explain," said Mr. Dufresne, "the customer will buy the better brush. Take a kalsomine brush, for instance. The cheap brush may be alright for a cheap job. But when the ceiling is being whitewashed or kalsomined, the material used will slop all over, for the brush that was poorly made will not carry it. If a good brush with solid bristles has been sold, it will not cause any trouble, and a good job can be done. The customer, too, will be fully satisfied."

This is a very interesting argument. It shows how important a thing it is for the hardware dealer to point out to the customer what a brush is, how it is made and what the advantages of the higher-priced brush are.

"Then it is just as easy to sell a high-priced brush. Why not sell a brush at several dollars, and make a good profit? A little extra argument will give one the much larger profit, and, in addition, make a more satisfied customer."

Windows Made to Pull

Answering HARDWARE AND METAL'S query as to how trade was secured, it was indicated that much of the trade came from long-established customers, who had been won through the dependence they had been able to place in the store for service and satisfactory goods. Newspaper advertising was not employed, but use of the window was made right along. That this medium draws trade will not be denied when the accompanying display is studied. Anyone desirous of painting will surely be drawn within the store if they are passing. The display denotes what good use has been made of the background, and in fact this gives window in question real life and interest. It is one of those displays which emphasizes the great value attached to a suitably arranged "backing." It has paid for the time spent upon it.

MERCHANT SEES BIG WALLPAPER FUTURE

(Continued from page 168)

time paper is required and is extensively used. This will mean more paper sold all the time."

This district is one which is sure to expand once the cost of building material is reduced. When it is remembered that this store was opened in 1916—two years after the outbreak of the war, it is not to be wondered at that its owner has faith in the future. There will be much building done here and the hardware man with a good stock who goes after business aggressively will reap the profit. It requires vision and the results will follow.

Buys Advertising Space To Announce Correction

A Detroit department store bought advertising space a few days ago to advertise the fact that it was in error when it announced in a previous ad-advertisement that it was selling heavy 3-ply garden hose at a specified low price.

Following up the advertisement on complaint, says a bulletin from the Associated Advertising Clubs, the local vigilance committee found that the hose was 2-ply.

It was at the suggestion of the vigilance committee that a correction was publicly made.

At the suggestion of H. C. Dart, secretary of vigilance work in Detroit, many stores of that city have adopted the practice of making public correction of errors.

They believe that in addition to increasing public confidence in their advertising, by making the people realize that every statement is made with the greatest care as to its accuracy, the policy will also help keep the department managers and others who contribute to their advertisements, exceedingly careful.

A large department store was the first to adopt the practice as a regular policy, though corrections of advertisements had previously been made in Detroit and in other cities, says the bulletin from the advertising clubs.

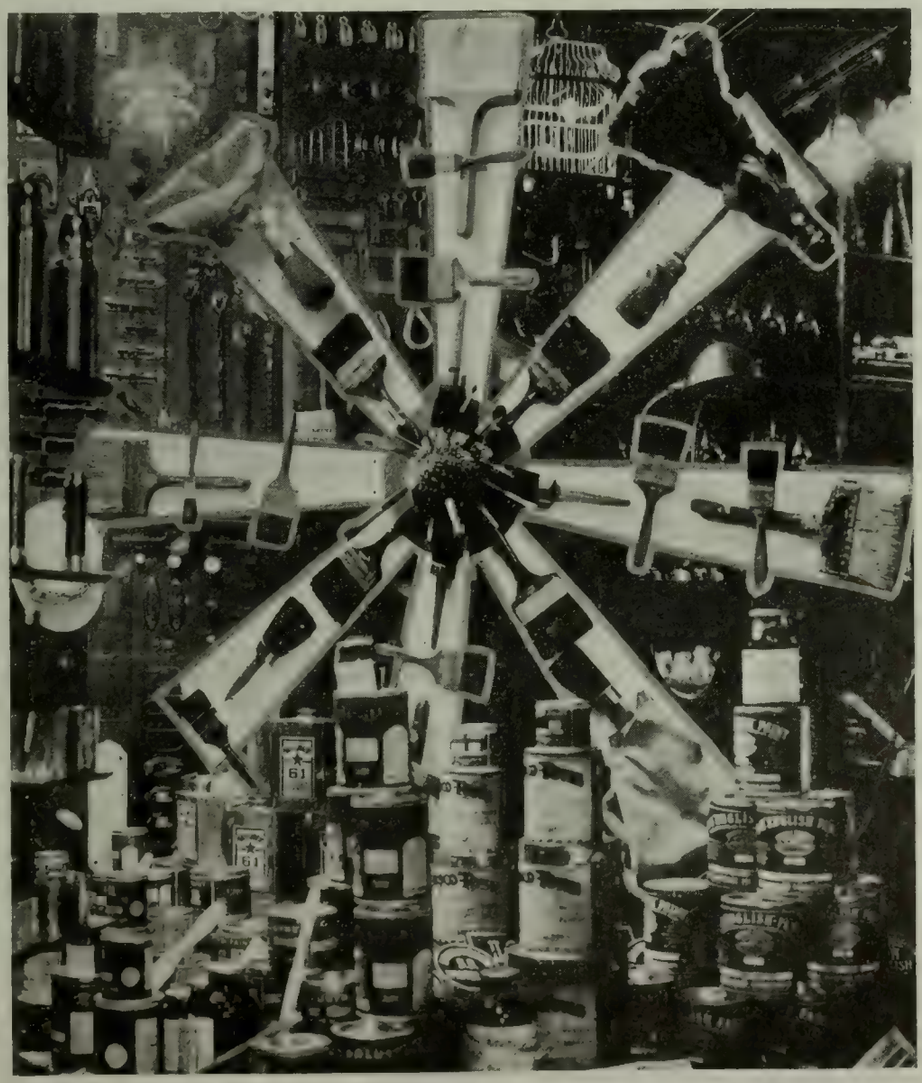
In a few previous cases, such corrections have been voluntarily made, and it has been the custom of many vigilance committees to use pressure to get advertisers to make such corrections in other cases. In many instances, the committees have felt that the making of corrections would help insure greater future care, and advertisers who have been flagrant in their careless statements have sometimes been given their choice between making corrections and being prosecuted.

Advising Customers About Brushes

Hardware Dealers Can Render Real Service by Helping Buyers Select the Best Brush for the Work in Hand and Also by Telling Them About How to Clean and Care for Their Brushes After Finishing the Job

RENDERING the maximum amount of service to the customer is perhaps the outstanding feature of present-day retail merchandizing. To find some way in which he can render greater service to the public than his competitors is one of the highest aims of the retailer to-day. It cannot fail, therefore, to be of interest to hardware men generally to have pointed out to them one or two ways in which they can render service to their customers, service which, perchance, may pass unnoticed at the time, but which will undoubtedly make its impress upon the mind of the recipient and influence him perhaps unconsciously to give preference in his future dealings to the merchant who gave it.

In many cases it is simply a case of imparting information. Take, for instance, the case of paint brushes. What does the average man know of paint brushes, of the difference between the various kinds and for what purposes each kind should be used? This is where the hardware man or the hardware clerk can be of service, but he does not always avail himself of the opportunity. In many cases his own knowledge is limited and he has not that thorough knowledge of the use of the things he sells which every good salesman should possess. To any such the information here given will be of assistance.



Put in Paint First

A most important matter, and one which many painters have not learned, is never to put a new brush in water. After a brush has been in use it may be kept in water, but new brushes should never be treated to a bath, for the simple reason that the pores of the bristles absorb the water and then when the brush is put in paint the oil cannot penetrate. The water causes the bristles to swell and the result is unsatisfactory work. Once the pores of the bristles have been filled with the oil from the paint, however, no such trouble is experienced, no matter how much the brush is put in water.

Flat brushes of widths suitable for the various uses up to 5 or 6 inches wide, are more generally used than other forms because a greater amount of surface can be covered at a stroke. For painting sashes and other small surfaces small oval brushes with a chisel shaped end are most satisfactory. Varnish brushes are also made chisel shaped or slightly tapered instead of being square on the end as this allows the varnish to flow more evenly. For whitewash or kalsomine a very wide brush is preferable, as these are applied lightly to the surface and are not rubbed in.

The washing and cleaning of brushes is another subject on which the average user of paint is woefully ignorant, and on which the hardwareman who is well primed on the subject can give him some very useful information.

Brushes for applying oil paints should be well cleaned after using, though for keeping overnight it is generally sufficient to wrap them in several thicknesses of paper. Only a careless painter will leave his brush standing in paint overnight. Besides gumming the brush up the bristles are more or less bent, and the brush does not work well till after it has been used for some time the following day. Brushes should be cleaned with turpentine or coal oil after they have been used in oil paints; turpentine is preferable but coal oil is nearly as good except where the brush has been used in a color containing turpentine.

Something unusual is very often adopted successfully by hardware merchants in displaying various lines of merchandise. This shows an unusual display of brushes which it is indicated, secured splendid results.

Getting Them Soft

Perhaps the difficulty most frequently met with by the amateur painter is the brush that has become stiff and hard with gummed paint. The simplest way to free a brush of gummed paint is to place it in vinegar which is almost boiling. After moving it backwards and forwards for a few moments, the bristles will become soft and the brush can then be washed out with benzine. If paint gets very hard in a brush one way to soften the paint and free the bristles is to soak the brush in raw linseed oil for 24 hours. Then put the brush in a pot of benzine and after a while work the bristles until they become separated, when the paint will soften so that it will wash out. Fibre brushes, such as are used for whitewashing, may be soaked in soda

See Firm Prices For Brushes

Manufacturers Discuss Outlook and Expect That Prices Will Advance Materially This Fall and Will be Stationary or Higher Before Next Spring—Situation Centres Around the Prices of Bristles—Buyers Are Very Numerous—No Labor Troubles

DISCUSSING with HARDWARE AND METAL the outlook in regard to brush prices, W. G. meakins, of Meakins and Sons, Limited, Hamilton, Ont., stated that in his opinion the price of brushes will advance quite materially this fall, and that prices will be stationary or higher before next spring.

"Any buyer who needs brushes," said Mr. Meakins, "will, in our opinion, run no risk of there being any drop in price before he might sell the goods. We do not expect a drop in the price of any kind in brushes. The demand for brushes is very good. Of course, the trade slackens off as usual at this time of year, but special business keeps our own plant running full time with a full staff.

Bristles Are Dearer

"The reason that there will be an advance in the price this fall," Mr. Meakins continued, "is that in the winter of 1919 the price of bristles advanced practically 50 per cent. The different brush firms in Canada had all bought their bristles for their winter trade and although they might have had to buy a few cases at the new prices, the majority of the goods which were being sold were being manufactured out of bristles bought at old prices. In consequence, there was an advance of only 15 per cent. We all anticipated that the high prices which were going into force last winter would not continue, but in place of their coming down they are holding firm at the high advance of last winter, and from the present outlook, they are going to stay there. As nearly all bristles bought under old contracts have now been used up, goods will have to come up to their true level all round.

Come From China

"Practically all our bristles, as you are aware, at the present time come from China. Chinamen are paid for these goods in silver and the high price of silver tends to keep bristles at a high price. Regarding deliveries, we are not experiencing any great trouble in getting supplies direct from China. They are a little late in arriving, but not enough to cause us any trouble.

Regarding Fibres

"Regarding fibres, the common grades of brushes are mostly made of Mexican fibres," Mr. Meakins stated. "These were being sold at 100 per cent. advance over prices of three years ago. We expected they might go down, but in place of this the European demand is going to make them, from the present outlook, advance in place of decline. This European demand, which is now commencing, will, we think, also have a serious effect on the price of bristles.

Hardwood is Dearer

"Regarding handles and other supplies we make our own handles. The price of hardwood has advanced 150 per cent. in the last four years. It is getting scarce and we expect it will stay high for at least two or three years. "We have had no labor troubles in the brush industry and do not expect any."

The Buying Policy

"In regard to a buying policy for the retailers to adopt," Mr. Meakins continued, "we know that the retailer will not lose money on any brushes which he might buy at the present prices. We think, in towns where building is going on (and there is a lot of building going on, although the prices of building materials are high), that the demand for brushes will be larger than it has been any time during the last five years. We think dealers should keep up their stock a little better than they have in the past four years. We also look for a very large spring trade next year, as there is no doubt a great scarcity of houses in nearly every Canadian city."

The Price Question Again

"The most important question in connection with the brush business at the present time is prices," said John C. Boeckh, secretary-treasurer of the Boeckh Company, Limited, Toronto, in discussing with HARDWARE AND METAL the general outlook for business.

"The market for bristles is very firm to-day," Mr. Boeckh continued, "and the prices have advanced considerably in the past few months. It seems to us that prices on all kinds of bristle brushes will be advanced materially within a very short time, and this may also apply to other brushes as other materials used in the industry, such as lumber, are much higher than some little time ago. In fact, our present contract for lumber was placed at much higher prices than the last time we purchased.

"While we have had no labor trouble in our factory," said Mr. Boeckh, "yet wages seem to keep advancing all the time, and this, of course, will have its own effect on the prices of our products.

"We believe," Mr. Boeckh said, "it is an opportune time for the retailer to place orders for all kinds of brushes, and particularly paint brushes, for the reasons already stated, and also for the fact that it is quite possible that bristle prices may advance again before very long.

"Bristles are also very scarce and with all the countries coming into the market for supplies we do not see how there can be any reduction in values and there is the probability that advances will continue."

ADVISING CUSTOMERS ABOUT BRUSHES

Continued from page 171

water and when soft washed out with soap and water and rinsed clean. The caustic in the soda, which would destroy the life of the bristle, does not affect the fibre.

To keep brushes in good condition they should be hung on nails driven in the inside of a tub, partly filled with water, turpentine or raw linseed oil. The nails should be driven at a height to allow the bristles to be covered for about two-thirds of their length into the liquid, but in no case should the bristles rest on the bottom of the tub. When water is used care must be taken that the binding is not covered, as the water is likely to swell the handle and not the binding. Raw linseed oil is the best liquid in which to hang brushes but it is rather expensive.

If a brush has been used for shellac varnish it should be kept in alcohol or in the varnish itself. As a general rule a varnish brush may be kept in the varnish in which it is used.

Many painters, after cleaning their brushes, work a heavy lather of mild soap into them before putting them away. Whenever brushes are to be put away for any considerable time they should be cleaned and stored where it is damp enough to prevent shrinkage of the handles. When a brush has been hung in linseed oil care should be taken to work the oil out of the brush, as otherwise it will leak out and splash.

GET YOUR COAL IN

The Canadian Manufacturers' Association is sending out the following notice to its members all over the country:

Nation faces coal shortage. A coal famine likely this fall. Buy your coal now. This is the warning that is being sent to all United States coal consumers. Canada looks to United States sources for 60 per cent. of its supply. Production in United States mines is running 20 per cent. below actual requirements. Those who postpone putting in the season's requirements will come out at the short end.

EDITORIAL COMMENT

THE 31st FALL NUMBER

THIS issue is the 31st Annual Fall Number of HARDWARE AND METAL. The issue is the largest of its kind ever produced in Canada. It contains a wealth of practical information and we know in advance from previous experience that during the fall and winter months our readers will consult the issue on many occasions. The advertising pages contain a vast fund of information which the advertisers desire to place before the Canadian hardware trade. HARDWARE AND METAL has been published every Saturday for the past 31 years, and is the only weekly hardware paper in Canada. Practically every worth-while buyer of hardware in Canada is a subscriber. We are constantly aiming to improve our paper and make it more valuable for the retailers in whose interests the paper is published. We have under way at the present time a greatly extended program.

WORLD-WIDE IDEAS

IT is a good plan for everyone, and especially merchants, to get all the good ideas and generally useful information possible. No one man has a monopoly of these things and one of the real services that a good trade paper performs is to gather from all parts of the world the information that really counts. HARDWARE AND METAL has exceptional facilities for getting and for presenting to its readers this class of information. To the dealers who follow it closely it mirrors everything that is happening in the hardware field. Dealers can see at a glance what those in the trade are doing not only in Canada but in the United States, in England, in short the world over. Its market reports are a barometer showing exactly what is happening in the trade and also forecasting what is going to happen, thus enabling those who follow them to shape a course which means real money to them. Its advertising pages bring dealers into personal touch with the offerings of scores of the world's largest manufacturers. The advertising section is a sales manager who is consulted from coast to coast by the best dealers in the Dominion. In its editorial pages will be found the most efficient selling methods, the latest ideas in store management and the general conduct of business adopted by hardware dealers all over the country. All the services mentioned above might be considered personal in that the matter chosen is carefully selected from the huge mass of material available and only that which is of direct interest to the hardwaremen taken handed to his desk for him to consider at his leisure. No individual could possibly render this service or secure for himself these facts. It is only the co-operation of many men at work constantly in all parts of the world that makes this result possible. The man who regards his trade paper simply as "a magazine" and does not read it carefully is missing much. This, as the biggest and best yet printed, has an especial value.

BUSINESS MEN SHOULD HELP

BUSINESS men, if they will, can lend most valuable help in the making of better laws. Their efforts can be exerted not only locally but in bettering provincial and federal legislation. Men who by their sheer ability to grapple with and master business problems have won success possess qualities which fit them for dealing with civic and general public problems. One of the worst things that is frequently said about the Government at Ottawa and the smaller but important governments in scores of Canadian municipalities is their utter failure to conduct business in a business-like way. The merchant who governs his own business successfully is eminently fitted for taking his share in helping solve community difficulties. His advice and counsel based on long experience would be invaluable. Probably at no time in the history of the Dominion are men of this kind needed to direct public affairs so badly as at present. Canada is at an important stage of its development and if left to the devices of the professional politicians the country may be set back for many years. Business men have had good reason to know just how little aggressive or constructive leadership there is at Ottawa when commercial interests are at stake. With this in mind, and the future of Canadian business depending upon the action that is taken, or not taken now, business men owe it to themselves to take an interest in the law making that is to be done.

TURNING LOSS INTO GAIN

INITIATIVE and persistence will often change a cause of loss into a source of gain. An example to this effect, worthy of wide emulation, is furnished

in the Exchange Sheet of the Ohio Retail Hardware Association.

In Putnam County, Ohio, there is a Farm Bureau through which the farmers are buying binder twine at a price below that which the dealer has to pay. H. C. Hummon, a hardware retailer at Leipsic, Ohio, had 40,000 pounds of twine in his store, which cost him 21½ cents a pound plus freight, drayage, and war tax. He was confronted with the prospect of a loss on this stock because of his inability to sell it at the same price at which farmers were buying twine through the Farm Bureau. He did not whine about the disagreeable situation. Instead he secured a ball of last year's Grange twine, weighed it in comparison with a ball of his own twine and found that the latter was three-fourths of a pound heavier than the Grange twine. Measuring the two balls of twine he discovered that his twine was 336 feet longer. It takes 26 inches of twine to tie a bundle of wheat. He proved to his customers that twine bought from him would tie 155 bundles more than the twine bought through the Farm Bureau. He showed that his regular price to the trade represents the Grange twine as worth only twenty and seven-tenths cents per pound. As a result of his agitation in this matter he received a letter from the Agricultural Extension Service of the Ohio State University, Columbus, Ohio, assuring him that the authorities at the University, who are in control of the county agents, have instructed them explicitly to confine themselves to educational efforts and carefully to avoid any activity that smacks of commercialism. In other words, it is held that the organization of farmers for the purpose of buying and selling is not the function of the county agent, and is work that he should not do.

A MILLION CARS BEHIND

THE statement made recently at a gathering of American automobile manufacturers that the firms are now more than one million cars behind in their orders indicates, as nothing else can, the outlook for business in auto accessories. Despite the fact that the auto makers have been building extensions to their plants and placing orders for huge quantities of new machinery they cannot begin to keep up with their orders. When it is considered that only a few years ago the cars in America could easily be numbered in the hundreds and that now there are more than five million in daily use, it will be seen what an enormous industry this has grown to be. It is growing now more rapidly than ever and the tractor business just now is where the auto business was ten years ago. Look ahead another ten years and try to figure out how many autos and how many tractors will be in use then. Every auto that is turned out and every tractor too, has to have accessories and supplies. Figure out what an enormous business the auto accessory and supply business is now and then try and estimate what it is going to be. The hardware dealers who have been handling auto accessories are going into the business more and more extensively each year as they find a demand that is steadily increasing, that carries a good profit and is a nice business to handle. For some time past the number of cars in use in Canada has been doubling every two years and from present indications this figure will be increased at the end of the next two year period, if the manufacturers can supply the goods. There are now, it is estimated, over 300,000 autos and trucks in daily use in Canada. City dwellers are buying cars fast, but for every car sold in the cities, two are being sold to the farmers. There is little doubt that the auto is here to stay. It is filling a definite and very important place in the every day life of people and also in the business world. It has proved its worth, and city dwellers, business men and farmers are buying them because they get real returns in service. The few hardware dealers who are not handling auto accessories may find it to their profit to consider carefully not only the present situation, but the future possibilities for business. In many hardware stores the auto accessories department has come to be one of the most important in the business. The merchants are finding that it is not a business that comes and goes, but that there is a call for accessories the year round. Many have found, especially those who ventured into the business cautiously, making a small start at first and feeling their way carefully, that there was a steady and insistent call for more goods than they were handling. They were forced to meet this demand and before they knew it had developed a flourishing department that not only paid well, but was an excellent feeder very often for other departments. Other merchants realizing the possibilities which exist, have, through intelligent and progressive methods worked up tremendous turn-overs in supplies for motor car owners. The opportunity exists in every section of Canada. Hundreds of hardware merchants are cashing in on this business. Are you getting your share out of it? A certain amount of the trade will come to you, but the big things come only to the men who go out after them. In this issue you will find advertisements featuring many profitable motor accessory lines.

THE BUSINESS OUTLOOK

THE business situation in Canada at the present time presents a remarkable example of what confidence will do. Following a period of mid-summer activity that was most unusual and which was marked by a scarcity of many lines of goods, the hardware trade is entering the fall with the same conditions prevailing. If anything the shortage of goods is accentuated and the general demand

apparently increasing as the farmers receive their money from a bountiful harvest. Money continues easy and the general feeling seems to be that there is a period of prosperity ahead for Canada. Conditions generally are in marked contrast to what many business men prepared for only a few months ago. Many of them showed great uncertainty in regard to prices and also trade prospects and as a result could have sold a much larger quantity of goods if they had had the goods to sell. With export demands steadily growing and the home trade brisk it does not appear that goods will be any too plentiful for some time.

COAL FAMINE FEARED

FROM time to time notice has been directed by HARDWARE AND METAL to the coal situation and the fears of a shortage during the coming winter. Conditions according to the latest information available are growing steadily worse from a production standpoint. Canada looks to the United States for sixty per cent. of its requirements and at the present time production in the American mines is twenty per cent. below actual requirements. A few winters ago many merchants had it vividly impressed upon them what a coal shortage means in severe weather and what effects it has on business. The situation now presenting itself has a most important aspect for hardware dealers. There will undoubtedly be a big demand for heating equipment. Wood in many sections of the country is almost as expensive and as scarce as coal. Electricity and oil are the two substitutes that have been steadily increasing in popularity. In many districts, of course, electricity is not available. There is every indication that the calls for oil-burning equipment this fall and winter will break all records.

NEW BOARD ON JOB

THE new Board of Commerce has a big task ahead of it. In hardware trade circles in Canada, as in other trades, rumors have been going the rounds for many years of alleged combines, associations and other influences that are supposed to curtail production and boost prices, and in other ways stifle competitive effort. If illegal practices exist they should be wiped out, and the new Board, it is expected and hoped, will either kill or cure the evils, if they are found to exist. Present indications are that the Board will get down to business at an early date.

EFFECTS OF STRIKES

ONE effect of the numerous strikes which developed in various parts of the Dominion earlier in the season has been to delay a very large amount of building. It is estimated in Winnipeg alone that construction work which would have run into several millions of dollars has been held up. It is now too late in the season for the parties who had planned to build to proceed. In spite of labor troubles, however, there has been an excellent building year and there is every indication that the spring and summer of 1920 will see an even better one. Architects are very busy and state that new projects are constantly developing. Some of these call for large expenditures. From the standpoint of the hardware man there is a lot of good business in sight in the building field.

THE FARMER AND THE FAIR

IN the next six weeks well over two million farmers, their wives and families will be attending the district fairs. It is one of the days that the farmer sets apart in the whole year to meet with his neighbors and other farmers in distant parts of his district. They all go to see what is newest and best in stock, machinery and other lines. Hundreds of thousands of farmers make a special point not only of going to their district fair but also to the larger fairs which last for several days. These fairs, both the small and the large, offer merchants one of the finest possible opportunities for demonstrating their goods and talking about them personally to prospective buyers. The farmer, taking him collectively, is now perhaps the largest purchasing agent in the Dominion and he has plenty of money wherewith to buy. Few dealers have a stock more adapted for attractive and serviceable display than the hardware man with stoves, ranges, paints, electrical labor-saving devices, and many other lines to show.

SENTIMENTAL ARGUMENTS INSUFFICIENT

RETAILERS' advertisements appealing to customers to deal at home in order to patronize the local stores and thus build up the community are not receiving much favorable attention these days. Sentimental arguments in favor of community buying is not sufficient. It appears too much one-sided. Buyers are more likely to listen to such arguments only when sufficient additional information is given to prove that the customer will actually benefit from a quality or monetary standpoint when buying from the local merchant.

Handle Buildings from

Complete Building Service Rendered by McKelvey & Furnish Equipment for Any Size Structure—Sixty- and Timely Display Features—Firm Issues 32- stantly Widening — Plumbing Department

Written for Hardware and Metal by

"WE not only supply the material for buildings but we put up the buildings ourselves—we handle everything from drawing up the plans in our architects' office to supplying the painters and paper hangers to put on the finishing touches." In these words, J. J. Druce, vice-president and manager of McKelvey and Birch, Ltd., Kingston, Ont., outlined briefly the complete building service they are equipped to supply with their organization. And it is a complete building service, too, for either a small house or a university building; excavation work, bricklayers, plumbing and heating, plasterers, roofers, painters, in fact all trades which bear on building are employed by this firm.

Established in 1854

It was in 1854, sixty-five years ago, that the firm was first established by John McKelvey, now retired, and the late Sam Birch. Three years ago the business was taken over by a limited stock company, the plumbing department being the first to come under this arrangement, with the hardware and associated departments soon following. Since that time the activities of the company have been extended to take in all building trades and at the present time, with much work on hand, the payroll includes about 190 employees. C. A. MacPherson is president of the company, J. J. Druce vice-president and manager, Chas. D. Home, manager of the hardware department, and O. J. Warren, manager of the plumbing department.

Speaking of the organization, Mr. Druce could not conceal a note of pride in his voice as he said: "We are just one happy family here. We have one man who has been with the firm over forty years; my own association dates back over thirty years, and I can pick out fifteen or twenty men whose period of service will run twenty years. Our idea is to work together. We can secure far more satisfactory results by co-operation than with constant wrangling. We have no place for the chronic kicker who is never satisfied and would disturb the harmony which prevails." Asked as to whether any trouble had been experienced with the men of the various building trades whom the firm employs, Mr. Druce stated that they tried to watch living conditions and raise the wages of the men proportionately without being presented with "ultimatums." "The result has been that we have had no trouble whatever," Mr. Druce went on; "wages have been raised to meet the conditions that prevail and consequently a spirit of good will prevails all the way down the line."

Wide Field Covered

Speaking of the scope of work and field which the firm seeks to do business in, HARDWARE AND METAL was informed that not only is the city of Kingston and the country immediately surrounding same developed, but work had been undertaken in Belleville, Brockville, London, Ont., and even some business had been done in London, England, a few years back by the late Mr. Birch. "We will do work at any point in Canada," stated Mr. Druce, "the completeness of our organization enabling us to figure advantageously, with the result that our business circle is constantly widening."

Issue 32-Page Catalogue

One of the biggest sales developing features which the firm has for the hardware department is the yearly mail-

To the immediate left on entering the McKelvey & Birch Ltd., store, at Kingston, Ont., one sees arranged in a silent salesman a fine display of automobile accessories. Back of this and beyond is the display of shelf hardware, mechanics' tools and builders' hardware. The drawers on the shelving are sampled, the wall cases carry a fine showing of goods, the counters, both on top and in front have displays under glass which add much to their value. Altogether, the arrangement is good, merchandise being out where people can see and have the suggestion to buy constantly before them.

G. S. H. Williamson, Associate Editor

order catalogue they issue. The last issue, just off the press, is a 32-page catalogue, which is sent out to a mailing list of 13,500 people. In the catalogue, particular attention is given to the listing of household supplies such as stoves, tinware, enamelware, dairy supplies, refrigerators, pneumatic water supply systems for country homes, pumps, washing machines, etc. "The results obtained are really remarkable," stated Mr. Home, manager of the hardware department. "Not only is this noticeable in the increasing mail-order business which we can call a direct result, but with the greatly-increased use of the automobile. Our stove sales directly to former mail-order customers only has shown a tremendous spurt. People whom we would rarely, if ever, see enter our doors are now consistent visitors. The business we are getting is traceable to the good impression created by the catalogue with the convenience afforded by the automobile, which lessens distance materially."

Farmers Better Buyers

Asked as to the class of goods the farmer is demanding, both Mr. Home and Mr. Druce stated there was a call for merchandise which would minimize farm work in the home. "This is slow in coming but it is coming," stated Mr. Druce. "We can see it in the plumbing department, in the call for power washing machines and power churns. We are also selling quite a few electric lighting plants, which is a class of business that opens up great opportunities. In the next few years there will be great development along these lines and the field presents almost unlimited possibilities."

Big Stove Department

One of the most interesting departments in the McKelvey and Birch Ltd. business, is that devoted to stoves. Not only is the sale of new stoves maintained at a very high average, but this firm does a remarkable trade in second-hand stoves.

On the main floor a small display of stoves is kept, but the complete showing is seen on the second floor. Here all types of new stoves are handled and the newly fitted second-hand stoves are also in evidence. Two stove fitters are kept busy fitting up the old stoves which come in, and these men are capable of building a complete new stove. Repairs are carried for practically every make, and when the stove fitter completes his work the newly-made stove is ready for many, many years of good service. "This end of the business is one which has grown remarkably," said Mr. Druce. "We have often had twenty or twenty-five stoves refitted on Monday morning, and by Friday of the same week completely sold out. We comb our district here very carefully for all the stoves we can get, and send one of our men both east and west to pick up stoves in surrounding towns. This is one branch of the stove business which never seems to lag and for which the sale is ever present."

The display of new stoves is neat and well arranged, and a splendid turnover is maintained in these. The store display is backed up by window displays and newspaper advertising with gratifying results.

Newspaper Advertising

Speaking of newspaper advertising brings one's attention to this carefully planned part of the sales programme of this aggressive firm. Space is used in

This shows the opposite side of the McKelvey & Birch, Ltd., store, hardware department, Kingston, Ont. Here will be seen housefurnishing lines such as enamelware, tinware, etc. In the foreground and to the left will be noted a section of the display tables which are placed directly facing the entrance. Silent salesmen and counter show cases are made good use of, and the young lady who takes care of this department sees that arrangement of merchandise is neat and attractive.

Show room of plumbing supplies in the store of McKelvey & Birch, Ltd., Kingston, Ont. It will be seen that the various sizes of tubs, styles of basins, etc., are out where prospective buyers can see and determine upon the types which they consider best adapted to their use. This display is in plain view from the street through a big plate glass front, the immediate foreground in the window being used to display smaller items. Brass goods are stocked in drawers, the drawers being sampled and in this way gain display value.

the two Kingston dailies which brings in excellent returns, and just recently the idea of offering 'Saturday specials" was adopted. The returns from these ads, which are slated to run in the Thursday and Friday editions of the papers, have been splendid. "Whereas direct results are almost always difficult to trace in the regular advertising we do," stated Mr. Home, "there is no question in regard to the 'Saturday specials' we offer. Perhaps in instituting this class of advertising we obtained a better idea as to whether the newspapers were closely read for the advertising news. The results are apparent in 'Saturday specials' and we believe that we are getting good value from our entire newspaper advertising campaign."

Buying Power of Newspaper Employees

In commenting on the question of newspaper advertising and its value, Mr. Druce brought out a point which is very often overlooked. That is the buying power of the newspaper as a company and meeting the individual employees' requirements. "We find that we are getting a tremendous amount of business just now from the papers themselves and their employees," Mr. Druce pointed out. "We have been called upon to do a great deal of work around the printing plants, and we know many employees who buy from us through our advertising, and who influence their neighbors to do likewise. If we were getting no more business than that generated from these sources as a result of the space we are using, we would feel well repaid. But of course the effect of our advertising is shown also in the increased business from the city and surrounding country served by these papers."

Ever-Increasing Territory

Very often the merchant takes the attitude that he is getting all the business there is in his district—that the territory is limited and possibilities for expansion nil. It is a mistaken idea which merchants in neighboring towns are cashing in on. Speaking on this question of restricted territory and limited opportunities for trade, Mr. Home said: "We are never satisfied to stand still and rest on the laurels of the past. To-day is here and the possibilities for trade are greater than ever before. Unless we are showing constant increase we feel there must be something wrong and the territory we serve is constantly widening. We do intensive work on the immediate territory which we serve, and it is not difficult to increase the scope of our activities all the time. A territory is never worked out or played out unless the merchant serving the territory is worked out or played out. One cannot sit still in this old world of ours—one goes ahead or goes back. We are in the class with those who want to go ahead and are working toward that end."

Telephone to Customers

Another instance of how aggressive tactics are succeeding for this firm is instanced in the business that is done over the telephone. "We have a regular list of customers served by stage routes whom we call at least once a week on the telephone," Mr. Druce stated to HARDWARE AND METAL. "This work is systematized in such a way that each customer can tell what time we will call and has his list of goods ready to read off to us. They appreciate this attention too, and the expense of phoning is very small when the business which we secure is taken into consideration, besides the good will engendered."

Big Plumbing Business

One of the most important departments in the business is that devoted to plumbing. The stock carried is extensive, the business handled of large

ONE HAPPY FAMILY

Speaking of the organization, J. J. Druce, vice-president and manager of McKelvey & Birch, Ltd., Kingston, Ont., said: "We are just one happy family here. We have one man who has been with the firm over 40 years my own association dates back over 30 years, and I can pick out fifteen or twenty men whose period of service will run 20 years. Our idea is to work together, co-operation rather than constant wrangling—we have no place for the chronic kicker."

There in brief is one reason given for the continued success of the firm's business. Are you getting similar results? Are your men staying with you or drifting away? Have you given proper consideration to the "one happy family" idea? Think it over.

NEWSPAPER EMPLOYEES' BUYING

In commenting on the question of newspaper advertising and its value, J. J. Druce, vice-president and manager of McKelvey and Birch, Ltd., Kingston, Ont., brought out a point which is very often overlooked. That is the buying power of the newspaper as a company and meeting the individual employees' requirements. "We find that we are getting a tremendous amount of business just from the papers themselves and their employees," Mr. Druce pointed out. "We have been called upon to do a great deal of work around the printing plants. We know also of many employees who buy from us through our advertising and who influence their neighbors to do likewise. If we were getting no more business than that generated from these sources as a result of the space we are using, we would feel well repaid."

Did you ever consider the newspaper in the light of a source of revenue as well as an expenditure? Think it over.

volume, and altogether this is one department which has developed to a point where it is almost considered in the light of a separate business.

And in a way it is just that. There is no little corner with a sink or a basin to form the display. There is a real showroom which provides an opportunity for customers to make a selection easily and by comparison with the various types of goods available. The accompanying photographs give some idea as to the arrangement of the display. The baths, closets and basins are all arranged where easily seen, and on the wall above will be seen mirrors, medicine chests and bathroom fixtures of many kinds. Attention was also drawn to the arrangement of shelving for carrying bibbs, cocks, and various lines of brass goods. This is not a new method but it is one too seldom employed. Advantages are the constant display of the goods when sampled on the front of the drawers; an arrangement of stock where it is easily and quickly available and the ease with which stock can be taken and orders for material running low can be placed.

Daily Check on Stock

The stock of pipe, fittings and various plumbing supplies is arranged on the floor above the main floor and in the cellar below. A daily check is kept so that the amount of goods on hand is always known. The firm employs a card index system by which every item carried in stock is listed. Slips for all the material used on a job are filled out daily and deductions made from the cards. It is possible by this system to determine at all times the amount of goods on hand without leaving the office for a trip to the stock rooms.

Watching the Work

Another point in connection with the sanitary and heating work is the close check kept on the work done by the men. As soon as a certain job has been completed time cards and list of material used are sent in to the office, and in fifteen minutes the foreman of the work is advised as to whether the firm has made any money on the job or not. If not, there has to be some satisfactory explanation forthcoming—if so, the foreman is told of that, too, and commended when the figures prove to be on the right side of the ledger. "We are not just looking for a chance to complain and find fault when no money is made," explained Mr. Druce. "We want the men to feel some responsibility in their work and an interest in turning in profit-making cards. We are far happier to be able to say to the foreman of the job, 'Well done,' than to have to criticize—not alone because money has been made, but from the fact that we all like to be making a success of the work in hand, no matter what it may be. Incidentally, I might say that we were able last Christmas to share a mighty nice little stake with our employees, so they realize that it is to their interest as well as ours to show a profit on the work they are doing."

Arranging Displays

Displays form an important part of the work done by the advertising man. Not only does he prepare newspaper copy, but he arranges the windows to correspond with the goods advertised in the papers. The floor display is also suited to the advertised lines and in this consolidation of effort splendid results are obtained.

Windows are Current Events

One rather good idea carried out from time to time in the window displays is linking up the store's merchandise with happenings of the town or pictures running at the local theatres. When the writer was in Kingston, one of the latest pictures of Charlie Chaplin, the popular moving picture comedian, called "Sunnyside" was being shown at one of the theatres. A rake was termed "a fine-tooth-comb," a lawn-mower carried a card about "clippings from the Sunnyside barber shop," and in this way, novelty, which is sometimes found of value, was injected into the showing of these goods.

The windows are changed at least once a week and occasionally when a special class of goods is featured for the Saturday specials ads., the windows will undergo another transformation to emphasize in their way the importance of the merchandise being offered.

Rest Room for Girls

"One of the best investments ever made" is how Mr. Druce spoke in mentioning the rest room, which the firm has fitted up for the young ladies in their employ. Large easy chairs and Davenport and a separate lavatory have been installed. The firm sets aside a certain amount of money for the upkeep of the rest room, and have a woman come in from outside to look after sweeping and dusting and installing clean towels. Mr. Druce is very proud of "our girls," as he terms them, and rates their ability and position in the successful operation of the work they do very highly. Mr. Home also spoke very glowingly of his young lady assistant's work in the

Showing a couple of pages from the 32-page mail-order catalogue issued by McKelvey & Birch, Ltd., Kingston, Ont. Splendid results are secured from these and the catalogue displays a very wide variety of merchandise.

hardware department. She looks after the housefurnishing goods such as enamelware and tinware, and is rated as one of the firm's best sales mediums of paint. This young lady also handles the shipping, making out the delivery slips and freight bills for out-of-town shipments and sees that the goods are put up and got out promptly.

Auto Accessories, Too

The firm handles auto accessories, and in the accompanying photo these will be seen on display in one of the showcases in the foreground. This department is showing a nice increase and is business that can be handled easily and profitably.

It might be mentioned also that a garage is run in conjunction with the business of the firm. There are six motor cars in addition to ten horses maintained for delivery, and the work on their own cars forms a part of the work done in the garage. Outside work is handled also, and it is found that the garage brings quite a good deal of trade for the auto accessory department. The motor deliveries, wagons and dump carts are all painted a distinctive red and are becoming known as McKelvey and Birch deliveries through the consistent use of this color.

Store Stoves

A form of service rendered by the firm and a profitable one is the storing of stoves during the summer season for many of the store's customers. The charge made for this service embraces taking the stoves down in the spring and putting them up in the fall, besides the insurance. Any repairs that may be necessary are extra, and the firm sells stove pipes, stove boards, and other accessories, business which might otherwise be divided with the other merchants were it not for the "stove storage service."

Other Business Sources

The firm does a big business in the various lines of boat supplies. This comes from boats coming from the Upper Lakes and includes such lines as rope, packing, oils and greases, pipe fittings and kindred lines.

The building supply business is of large volume too, over 75 cars of bricks alone being handled this year as well as correspondingly large quantities of lime, hard wall plaster, cement, etc. Altogether the McKelvey and Birch business renders a complete building service. Their success is attributable largely to constantly keeping their methods through sixty-five years' dealing with the public right up to the minute and rendering service which brings the customers back.

Here is shown a reproduction of a "Saturday Speciuls" ad. of McKelvey & Birch, Ltd., Kingston, Ont. Direct results are traceable to these ads. according to this firm. Read what this firm thinks of their newspaper advertising—not only as an outlay but as an income from the paper. The accompanying article tells the story.

NO REDUCTIONS MADE IN DEMURRAGE RATES

Judgment has been handed out by the Railway Commission on an application made by a number of shippers in Canada asking that the present high demurrage charges be lowered. The shippers are not unanimous on the application, the Ford Motor Co. pointing out that it would prefer that there should not be a return to the old conditions of continual car shortage.

The Montreal Board of Trade is also in favor of the high charges. The fact that the greater part of the country's grain will move this year through Canada, and not through the United States, as it has been doing, was thought to be reason enough for the high demurrage. The application was dismissed.

BUSINESS BRISK AT SHEFFIELD

There are indications of a considerable expansion of overseas trade, chiefly in tools and files, says a report from Sheffield, Eng. During the last week or two many enquiries have been received from Belgium, Greece, South Russia, and Poland, and some substantial orders have been placed, satisfactory arrangements as to payment having been arrived at. The bulk of the business under negotiation, however, will involve considerable credit, and most of the local manufacturers, being already full of work, are not disposed to take any risks. Prior to the war, Germany was a considerable buyer of Sheffield crucible steel and files of certain types, and makers expect shortly to be approached on the subject of resuming this trade. In the lighter branches many orders from Scandinavia and Switzerland are being booked. Makers of tools essential for carrying on the domestic crafts and industries have no difficulty in obtaining the current prices.

A new hydro-electric plant will, it is understood, be erected in Taiwan, Formosa, under Government auspices. A copy of the charter of incorporation of the company, which is capitalized at $15 000,000, is on file in the Far Eastern Division.

How to Fix Sporting Goods Window

Attractive Displays From Now on Will Create in Sportsmen an Irresistible Desire to Get Out in the Woods—Your Window Can be Made to Yield Some Splendid Profits in the Next Few Weeks

FROM now on hardware dealers can cash in on some real profits by arranging attractive window displays of fall sporting goods. These will fan into flame that smoldering desire which is in so many men who long to get away into the great woods with a dog and gun and spend a couple of weeks or more at their favorite sport, hunting. Windows of this kind are not difficult to arrange and they are not expensive, as most of the materials needed may readily be obtained from stock and the nearest woods.

Keep Them Natural

By combining a selection of rifles, ammunition and similar goods with a camping scene, a setting may be made that will carry an irresistible appeal to the hunter. It will set his mind working on the hunting trip he has been planning ever since his last one, and start him thinking of the things he needs, and eventually bring him into the store to buy them.

In planning a sporting goods window for the fall it is well to plan it around some central figure or scene or perhaps both. This will increase its effectiveness as a selling factor and not make it a mere attention drawer without any sales "pull."

Arranging the Display

For instance a seasonable and very attractive display of fall sporting goods may have for its central idea a camp scene. In the centre may be shown a canoe, while at one side may be placed a small tent and at the other side some bushes. The scene may be made more realistic by building a camp fire in front of the tent, making the fire effect of red tissue paper with an electric bulb under it. A further touch of realism may be given to the scene if a flag pole is rigged in front of the tent and an electric fan placed in the bushes. This will not only agitate the bushes but keep the flag floating and put a lot of real action into the display. By the side of the canoe or near the tent may be placed a figure, either wax or a cutout, with a rifle and dressed in hunting costume.

Show The Goods Too

This is merely a suggestion and may be varied in a thousand and one ways which occur to the window dresser. The effective arrangement of the rifles, ammunition, etc., is entirely a matter for his own taste, depending also to some extent on the size and layout of the window. Some hardware dealers find that it improves their window to introduce into the display a few stuffed birds, a stuffed wildcat or some other animal. Frequently these are placed at points where they will direct attention to some of the stock, or where they will harmonize especially well with the advertising matter of the manufacturer that may be used.

An ingenious window dresser can at small expense, arrange a most attractive and successful display, successful in that it will not only be most striking, but a real sales producer. A variety of decorative accessories may be utilized which, while inexpensive, will heighten the general out-of-doors effect. Birch bark is very often used effectively. If it is not available bark from other trees may be placed here and there. Very often a branch or two well placed, especially if it is filled with richly colored autumn leaves, looks well.

Some Use Pictures

Very frequently large pictures are secured from railways companies or other firms, and are placed to advantage in a display. It is always well, though, when fixing up a display of this kind to bear in mind that every article shown should bear directly upon the central idea, and which will help feature the merchandise which the dealer is planning to sell. The hardware dealer has right at hand, usually, between his own stock, the help supplied by the manufacturers and branches, etc., easily obtained in the woods, everything necessary for carrying out a decorative idea which is bound to create an interest and inspire a buying desire for the goods shown.

Very often the window dresser may be able to take advantage and make the most of some special feature that is entirely local, and which will carry an especially strong appeal to the local hunters.

A Good Background

While it is not always necessary, it usually happens that a well arranged background will add very materially not only to the decorative value, but to the sales pulling value of the general

Continued on page 185

Not every window is so arranged in regard to lighting and size that the clear, outstanding effect shown above is obtainable without any background. Note the use made in the above arrangement of the bushes, camp kettle and small tent, also the decoy ducks, rifles and the advertising matter supplied by the manufacturer.

Firm Gives Picnic to Customers

Bothwell, Ont., Firm Employs Novel and Effective Advertising Scheme — Does the Catering and Supplies Prizes—One Thousand Guests—One Hundred Cars Line Up For Drive to Picnic Grounds—Dent Bros. Open Grocery Department in Conjunction With Hardware Business

There were over 1,000 men, women and children in attendance at Dent Bros.'s, hardware merchants, picnic at Bothwell, Ont. This shows the happy crowd just before starting out for the lake, where a most enjoyable day was spent. Not only were the mothers and fathers pleased, but the children, who are the customers of to-morrow, will long remember these yearly picnics and patronize the Dent Bros. store in the years to come. The "arrows" point to the three Dent brothers—they start from the main entrance to the hardware department of the store. Groceries are also carried.

THERE are Sunday School picnics, lodge picnics, individual firm picnics, but the case of Dent Bros., retail hardware merchants, of Bothwell, Ont., who have instituted the idea of giving a picnic to all of their customers in the town and surrounding country, marks a new era in this summer pastime.

Quite an undertaking one would say, and it is just that, but nevertheless it is one that has been tried out successfully and is rated by this aggressive firm as one of the best advertising expenditures ever to receive their official sanction.

First Picnic

Two years ago the idea was first put into practice. The firm handles a popular line of motor cars and named the picnic after the cars. There was method in this procedure as will be seen from the way the picnic was handled.

First of all invitations were extended to all those who had purchased cars—a record having been kept each year. These invitations were worded so that the car owner and his whole family were included. Next on the list, or perhaps it might be said of all the others, invitations were sent out to attend Dent Bros.' —— picnic. Every customer and prospective customer was invited, whether he was a car owner or not, by personal solicitation and general invitation through the press for fear some individual might be left out.

One Thousand Guests

The response was splendid, and the idea took like an epidemic of measles. Everyone wanted to attend Dent Bros.' picnic (they don't all want measles), and there were over one thousand turned out, including the children, who had one of the best days of their young lives.

The first year the picnic was given the firm supplied all of the lunch, two trucks being required to take the various things down. A fine programme of sports was also arranged, including a baseball match, and the firm provided prizes for the winners of the various events.

One Hundred Cars Line Up

The picnic was held at the Beach, a comparatively short distance from the town, and the only thing incumbent on the guests was that they arrange their own transportation. This was not difficult, and a very imposing sight was that of the 100 cars strung out along the road on the way to the picnic grounds. Besides those that formed in the procession there were over 35 cars brought a full complement of picnickers to this enjoyable event.

In one of the accompanying photographs the cars are seen drawn up on both sides of the road in the block where Dent Bros. conduct their business. The showing is a good one, and the other photo, which shows the crowd with its preponderance of kiddies, gives some idea of the attitude towards this event when the big smiles are noted.

The First Car There

A rather novel point in connection with one of the accompanying photos is the inclusion of the first car sold in Both-

well in 1901. It is still on the go, and, whereas considered somewhat the worse for wear, is still able to cover the ground alright.

Customers In On It

When the picnic was held last year the customers of the store asked that it be made a "basket" picnic, each one bringing their own eatables. The customers felt that the firm, in supplying the prizes and looking after the arrangements, were doing more than their share. They wanted to help. That was the plan which was finally carried out, but this method was not quite as successful as the one where the firm did the catering, with the result that future picnics will be given wholly on the responsibility of the firm.

Money Well Spent

There are three Dent brothers, and they are all very enthusiastic over their picnic. "True it is that it costs some money, but it is money well spent," the members of the firm agree. "We reach all of our customers and many not our customers. This get-together picnic does more to dispel any little differences which may have arisen during the past year than any other method we might adopt," stated John Dent to HARDWARE AND METAL. "Differences will arise at times and a customer is temporarily lost. After the picnic he is usually back again. Enthusiastic over the good time he and his family have had."

Children To-day, Customers To-morrow

Another point which this picnic idea gets over in a most convincing way is the creation of a new list of customers for the years to come. There are hundreds of children in the Bothwell district who now look forward to Dent Bros.' —— picnic. It will be only a short time before they are the buyers or additional customers for the store. Early impressions usually last, and those who have been responsible for in any happy youthful hours will benefit when these children grow up and require hardware. They will remember Dent Bros. and will be glad to reciprocate.

No Mail-Order Picnic

"What of your mail-order competition, Mr. Dent," asked HARDWARE AND METAL at this point. "There is some of this competition in every community, I believe, and ours is not free from it." Mr. Dent replied, "but the mail-order house doesn't give picnics and cannot give the service that we do. People want service to-day and are appreciative of our efforts to give them a greater community interest through the medium of our picnics. After all, the town is essential to the farm lands around it, and when one treats customers fairly, supplies good goods at fair prices, he is going to get the best of the trade. The mail-order house does not cause us to sit up nights worrying by any means."

Mailing List Effective

Speaking of the firm's method of going after business, Mr. Dent stated that they had a splendid mailing list which they kept right up to date at all times. "We find that our customers like to secure advertising material from us so that they can study at their leisure," Mr. Dent said, "and we get splendid results from the material we send out. It is not our policy to send circulars to a man unless we feel that he would be interested. For instance, why send cream separator literature to a man to whom we have sold one? There are customers we know are interested in securing a new stove, and we arrange that they get material of this nature. With paint, we send in a list of prospects, with class of work they are likely to be interested in, to the manufacturer whose line we handle, and the manufacturer co-operates with us by sending out latest matter pertaining to contemplated work.

The above shows the line-up of cars on both sides of the street photographed at the time of Dent Bros.'s, hardware merchants, picnic at Bothwell, Ont. This picnic was the development of an idea emanating from the sale of motor cars, purchasers of automobiles being invited, and in addition, all the other customers of the store. In the "circle" are the three Dent brothers, who are responsible for this novel advertising and get-together event with their customers. The "arrow" points to the first Ford car bought in this district back in 1901—it was right in the vanguard of the procession.

A mailing list can be of distinct value when handled this way, and I know of no other way that would not reveal a large proportion of waste. We feel that every piece of advertising we send out goes direct to a possible customer. There is no overlapping if we can avoid it."

Newspaper Space Used

Space is also used in the local paper every week and Mr. Dent believes that they are getting very satisfactory results therefrom. The firm picks out definite, seasonable lines to advertiser, makes the appeal in a straightforward way, and following this policy, gets the maximum returns from the space they buy.

Good Windows

Linked up with newspaper advertising is that employed in the windows. A splendid store front faces the street and attractive and seasonable merchandise is always on display for customers to see. The displays are changed weekly.

The store arrangements are good, the merchandise being neatly and attractively arranged on shelving or in showcases or on the floor according to the class of goods. Washing machines, refrigerators, stoves, cream separators, etc., are all shown down the centre of the store. The paint department is to the left and shelf hardware to the right on entering.

Sells Automobiles

The firm handles automobiles, and dispose of about fifty every year. They used to handle garage work as well, but Mr. Dent stated that they found that too much was expected of them in the way of fixing up the cars, so turned all their work over to another garage man. The present arrangement works out nicely and they find merchandising the cars a profitable end of the business to take care of.

One Brother on Road

There are three brothers in the business, two of whom are in the store all the time, whereas the other brother is on the road all the time. The brother who looks after the outside work pays particular attention to selling motor cars, farm implements, cream separators, and kindred lines, besides stirring up a great deal of business for the other departments.

Incidentally it might be mentioned that the firm recently opened up a grocery department in another wing of the store. Where as operated almost as a separate business, the grocery end is one which draws a large amount of its trade from customers who have patronized the hardware store for years. The two stores are joined by a door, but each has its separate entrance and display windows on the street. A sister looks after the grocery department, so the entire business can be said to be a family affair.

Altogether the Dent Bros.' business is one of the progressive types. Good service and careful attention to detail are bringing them an increasing volume of business every year.

On Cash Basis

The business is run on a cash basis—the entire town as a matter of fact operating on this principle. Mr. Dent states they can see no falling off in trade since the plan was adopted and most certainly there are no losses through bad accounts.

Auto Accessories Now Leading Line

Western Merchant Places Great Importance on This New Department—Carries Wide Variety of Motor Oils—

Window Displays Used in Ratio of Three to One With Other Hardware Lines—Remarkable Growth in Few Years

The above is a view of the oil room of J. G. Gunn, Vancouver, B.C. Twenty different kinds of oils are carried, which enables this dealer to satisfy the whims of all motorists.

J. G. GUNN, 563 Broadway West, has been in the hardware business in Vancouver for the last eight years. The business that produced the profits when Mr. Gunn started, was the extensive building being done in Vancouver at that time. With the cessation of building operations that followed the real estate slump six years ago the hardware business lost its most profitable trade.

Finding a Substitute

At this stage Mr. Gunn started casting around for something to take the place of building hardware. The gasoline business looked like ready cash business at any rate, so he put a gasoline pump out on the curb. Shortly after this innovation, the jitney began to flourish, and the new gas station did on an average from 500 to 600 gallons a day. The fact that the cars stopped for gasoline in front of a hardware store naturally caused them to begin asking for necessities, such as spark-plugs, wrenches, etc. A free air station was next installed, and the demands began to be for inner tubes, patches, and other necessities, of which Mr. Gunn began to carry a larger assortment.

Steady Increase

The auto accessory business has steadily increased from a few necessi-

J. G. Gunn, Vancouver, B.C., like many other hardware merchants, found on the outbreak of war and the cessation of building operations, that he must find a substitute for the building trades he had been supplying or practically close up shop. He branched out into a wide range of auto accessories, a few of which he had been handling before, and to-day considers the department so important that three of his four display windows are devoted to their use. The regular hardware lines occupy only one window, which Mr. Gunn states, represents their relative importance to-day.

ties to a full line of accessories, including a very respectable showing of what might be termed luxuries. The fact that most drivers are rather cranky about the oil they use has increased the oil business immensely, because Mr. Gunn has made it a policy to humor each man's individual whims, and twenty different brands of cylinder oil are on tap. In order to accommodate the increasing accessory business it has been found necessary to rent the adjoining store, where the barrels of oil are all arranged on a rack, with drip pans underneath.

Four Display Windows

Altogether, Mr. Gunn has four good display windows, and it is to be noted that three of the four are dressed with auto accessories. Mr. Gunn intimated that he had them dressed in about their relative importance as sales producers.

Keeps Hardware Lines

Mr. Gunn stated to the representative of HARDWARE AND METAL that the trade brought to the hardware section by the accessory section is both large and profitable. It is all spot cash. For instance, a car stops at the pump for gas, or at the hose for air, and if it's a camping expedition starting off there are bound to be several articles from fishing tackle to frying pans that are going to be required, but "why go further?" The business man on the way home from the office, stops his car for gasoline, and takes home something he needs in the garden, or the chicken wire his wife's been reminding him about. "It's a splendid feeder for the other lines in the hardware business," says Mr. Gunn.

Because there are so many coming and going all the time, this store uses the display system to the nth degree. Everything that can be displayed on racks to give a suggestion and reminder to the man who "only came in for a spark-plug," is displayed. In the hardware section could be noted pot-covers on a rack, carpenter rules in a special display case, brushes of all kinds hanging on a rack, window screening on a rack, and garden seeds displayed. In the accessory section were noted racks for displaying a complete line of wrenches, racks for displaying tire sets, and a rack of auto fenders, on which were draped traveling rugs. According to Mr. Gunn, the auto accessory business works well in connection with the hardware, is profitable, and a great help to the regular hardware business. Any hardware clerk can very shortly master the application of any attachment you are likely to have for sale, and the service makes for more sales. It has been found necessary to instal a vulcanizing department, which enables the firm to give an even more complete service.

HOW TO FIX UP A SPORTING GOODS WINDOW

(Continued from page 181)

display. In some stores windows are large enough or are so arranged in regard to lighting that a background is not necessary, but in the majority of instances a good background is needed to add the finishing touches. It is easily arranged and inexpensive also. It must, of course, harmonize with the main plan. Some window dressers use one panel. Others use a large central panel with two smaller ones, one on each side. Frequently no panels are used at all but a background of foliage is constructed. If panels are used they may be made of wall board, with the back braced to prevent warping. Wooden strips will be sufficient for this.

Sometimes steps or a platform may be ingeniously arranged and in this way a great deal of merchandise displayed. On these also may be placed if desired window cards directing attention to some special features the dealer desires to emphasize. Some dealers use the tops of the panels for this purpose also, painting in in neat lettering and in colors that will harmonize with the general scheme some such wording as: "It's hunting time. We can supply every need." Sometimes a large picture of a hunting scene or a woodland scene may be hung from the larger centre panel, so as to stand between the lettering at the top of the two smaller panels. An arrangement of this kind, however, is entirely a matter of choice with the window dresser, who may use his own ingenuity and secure any number of other equally effective and equally attractive results.

Much interest is being shown in China in motorcycles, due to the fact that they can travel on the narrow paths used by foot passengers and for wheelbarrows, although there are but few roads suitable for automobiles. If these paths were improved somewhat, commercial travellers could penetrate with ease to places which are now practically inaccessible.

Window Displays of Oils Get Results

Very Desirable Returns From This Method of Display — Newspaper Advertising Planned to Work in With Windows—Growing Trade in Motor Oils Developing—Oil Chart and Literature Effective Aids

"YES, we got pleasing results from our oil and grease window," said F. G. Webber, manager of that department in the J. H. Ashdown Hardware Co., Ltd., of Calgary, in answer to the question asked by a representative of HARDWARE AND METAL. "Was the percentage of sales much higher than an ordinary week when there was no window display?"

Concentrated Effort

"To back up the window display there was advertising run in the newspapers at the same time, so that there was a concentration of fire, so to speak, on this particular department," Mr. Webber continued. "Our methods of sales are kept pretty well up-to-date all the time, so we do not need to make any change when we have a window display on, except to keep on the jump all the time, and make every step count.

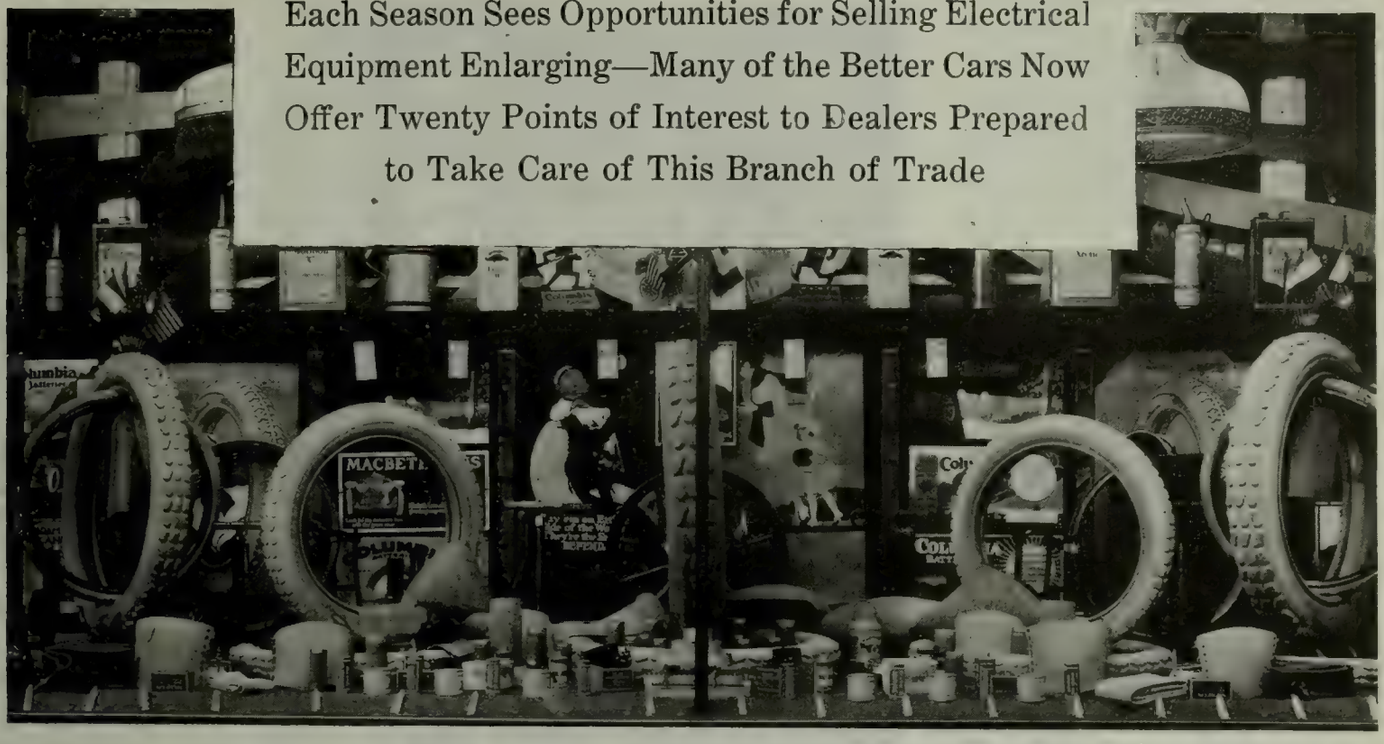
Growing Business

"I find that the oil business is one that is continually growing," Mr. Webber stated, "and the oils that sell best are those used in the motor trades. There is always a good, steady sale for household oils of all kinds, but the big growing trade is that of motor oils."

Speaking of window displays for oils and greases, Mr. Webber does not believe in surfeiting the public with oil windows. HARDWARE AND METAL man asked him how often he thought there ought to be a special display. "Three times a year," he replied, "I think, is plenty. I like one in spring for tractors and autos, then one in midsummer for autos alone, and another in the fall for autos alone. After all, the automobile we have always with us, and as the oilless auto has not yet come into fashion, we can always depend on that business."

Oil Chart Prominent

"During our last display the special oil chart was very much in prominence," Mr. Webber said, "and there was also a call for literature, which was given a prominent place. All advertising literature issued nowadays is of high quality, and very attractive. It does not detract from a well-dressed window, and helps out wonderfully well with enquiries. People may come in and simply ask for



Continued on page 188

One may say a can of oil is just that and no more—there is nothing about it to emphasize particularly. One cannot look at the above window and fail to be impressed with the idea that there is something else besides the can, and that with the emphasis placed on oils by the use of a window display, there are sales possibilities. Every motorist or user of motor power seeing this display is a probable customer, and the results achieved are said to be excellent. The window was dressed by H. Bowen for the J. H. Ashdown Hardware Co., Ltd., of Calgary, Alta.

Big Field in Electric Auto Accessories

Each Season Sees Opportunities for Selling Electrical Equipment Enlarging—Many of the Better Cars Now Offer Twenty Points of Interest to Dealers Prepared to Take Care of This Branch of Trade

EACH season sees the field for the sale of electrical automobile accessories widening. Not long ago there were only a few of the accessories exclusively electrical. This year a great many of the models offer at least twenty points of interest for the dealer from an electrical standpoint. Electrical auto accessories, like most other electrical goods, are popular with those who use them. People will gladly pay more for any article in which they have implicit confidence, and they have come to regard electricity as a great silent force which does its work quickly and thoroughly. Its convenience is never questioned. The mere touching of a button and the work is started and carried on efficiently without any more worry or trouble to the owner. It is this dependability and efficiency that is making electricity so thoroughly popular to-day and is creating the demand for more and more electrical equipment of all kinds.

Depend on Electricity

Every automobile now in use depends for its successful operation upon at least some electrical devices. More and more though, especially in the higher priced cars, are electrical devices of all kinds in demand. Take a medium-priced car of this year's model and it has an electrical starting system. Here is a little electric power plant in itself, complete with an electric motor to "turn over" the gasoline engine, a storage battery from which the starting motor draws its energy, and a generator which recharges the battery when the gasoline engine is running.

This little power plant in itself requires regular inspection and the dealer who is in a position to give this service and lets the public know that they can depend upon him will get a lot of calls. Also the dealer who knows how to locate and remedy irregularities in the ignition system and in the electric lighting system will find that he will be wanted often. Very frequently these troubles may be traced directly to poorly-insulated or badly worn wiring.

Will Start Trouble

One insignificant little ignition wire shaking constantly against a metal part may soon wear through its covering and produce an exasperating skip in the motor. The dealer who can locate this trouble quickly and fix it up for the car owner, restoring lots of "pep" to the ignition system, will not only sell the goods required but he will have made a friend of the car owner and will be talked about for weeks and months to come. When a dealer gets a whole lot of car owners talking about his store in this way and the service it renders he is putting himself in the way of a fast growing business.

It is not necessary that hardware merchants operate a garage or master every detail of the mechanism of the various cars now operated to be able to cater to the requirements of the motorist. It is better, however, that some time be devoted to ascertaining what ills usually afflict a car and being able to offer a remedy. With the growth of the motor and the increasing demands being made for electrical equipment, a working knowledge of the lines in demand should be gathered. This does not entail a great amount of genius and the opportunities to turn this knowledge to good account in the development of business are almost too numerous to mention.

Storage batteries need regular attention if the best results are to be obtained, and in connection with this many car owners have been sold hydrometers and volt ammeters in order that they may keep the batteries at their best.

The brushes in the motors and generators wear out and have to be replaced. This is a simple matter but one which pays and in which the dealer can be of service to the car owner.

Shortage of Cars

As a result of the shortage of new cars thousands of "veterans" are being rebuilt, and in many of these a great deal of new equipment is installed. On a great many of these cars electric lighting systems are put in and on many others self-starting equipment. All this means a lot of excellent business for the man with the goods to sell and the knowledge of installation. In a great number of cases the gas lighting systems may be changed to electric, and this means the sale of bulbs, magneto connections, switches, and other equipment. By keeping in touch with the garage owners and the men handling used cars, as well as with the owners of new cars, the dealer who handles elec-

trical goods can turn over a lot of equipment.

Electrical Accessories

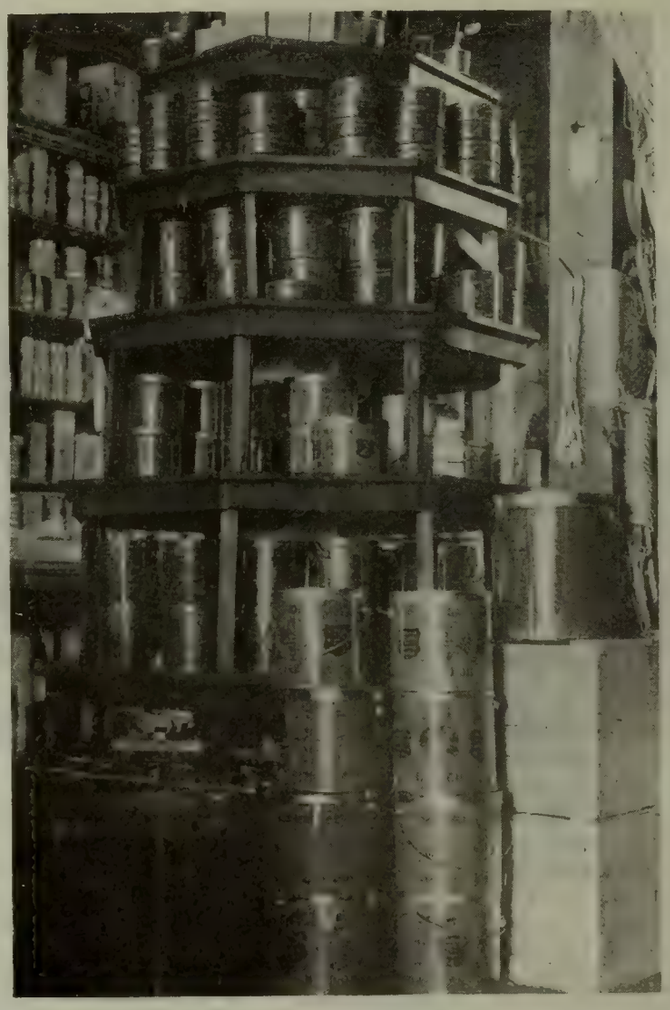
As stated above, the list of electrical auto accessories is growing steadily. Some of the equipment most called for includes fuses for all makes of cars, incandescent lamps for all makes of cars, complete headlights, complete sidelights, complete spotlights, electric pumps for garages, ignition lock switches, electric warning signals, dash ammeters to show whether generator is charging or discharging, spark plugs, breaker points, electric motor and generator brushes, non-glare lenses for lamps, generators, storage batteries, volt ammeters, hydrometers, ignition cable, magnetos, distributors, commutators.

Car owners are good buyers and as soon as they locate a dealer from whom they know they can get service and dependable goods they are not slow to come. Not only that, they send their friends and the friends send others and so on. This business can also be stimulated by frequent window displays and by proper advertising. Some dealers who have developed a large business encourage car owners to come to their stores by advertising to supply free distilled water for the storage batteries and also by featuring in the ads. that their store is the place to come when in trouble for both advice and repairs. With the constantly increasing number of automobiles and the very rapid development of the accessory business the auto trade has come to be a very important factor all over the Dominion. It is going to increase steadily and offers the hardware dealer some splendid chances for making good profits.

WINDOW DISPLAYS OF OILS GET RESULTS

Continued from page 186

some of the pamphlets and booklets, and between these and the window display I can count quite a number of new customers.



"I do not look for any reduction in the prices of oils for this year," said Mr. Webber, in answer to a question. "Present-day prices have increased on an average of about twenty-five per cent. over 1914, and there might possibly be an increase in some cases."

Kindred Lines Move

All the odds and ends that go with the use of oils and grease are kept well displayed in Mr. Webber's department and many sales are made just because they are mentioned to the customer when he is buying something else.

The oil department of the J. H. Ashdown Hardware Co. is growing, and under the management of Mr. Webber it seems destined to go forward with the times.

Striking Display Stand For Lubricating Oils and Greases Sells the Goods

This striking display stand for the sale of oils and greases is located in the hardware store of Busse Brothers, Gull Lake., Sask. It was made by a carpenter on the premises for this special purpose, and is located in the centre of the store. It is octagonal in shape, resting on a base seven feet in diameter and is about eight feet in height It has five shelves, each smaller than the one below it, and the square posts supporting these shelves are reduced in size the higher they go. A great quantity of goods can be stored on this stand.

The stand was placed on wheels to turn on a circular wooden track, but without ball bearings, with the result that this feature was rendered useless owing to the great weight placed on the axles.

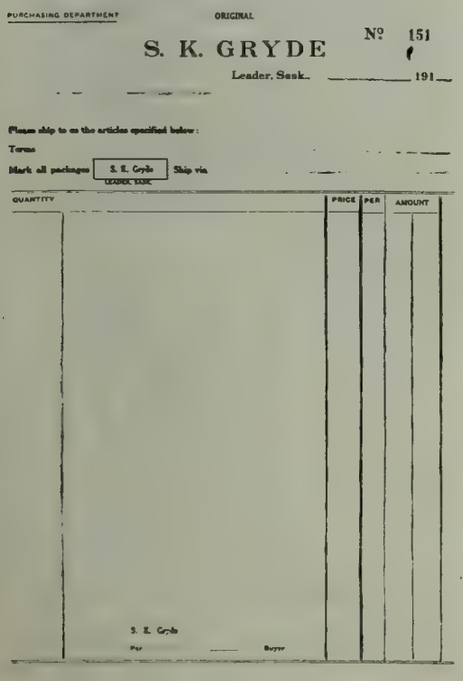
Electric Bulb Trade is Worth Going After

Many hardware dealers are finding that handling electric bulbs is a business which is not only a steady, all year round trade, but carries with it profits that are worth while. Each year sees a steady growth in the number of homes lighted by electricity, and as bulbs are required not only for these but for replacement in homes already wired, there is a lot of trade that is easily handled. There are bulbs and bulbs. Some will get out of commission in a very short time and others will give good service. The dealer who handles the bulbs which stay on the job for a reasonable time is the man who soon wins for himself a reputation with the housewives. Dealers state that it is mostly the women who buy bulbs, and that they are quick to tell one another when they get bulbs that give good satisfaction. They are also quick to talk about bulbs that require replacing after they have only been in use for a few days. What they say in cases of this kind is not good advertising for any dealer.

There is another source of profit for dealers handling bulbs and that is in factories. Some hardware dealers supply all the bulbs required in stores, offices and factories, and have quite a turnover each season. A great many hardware dealers find that it pays well to mention occasionally, in their advertising copy, something about the bulbs they have in stock, always giving prices. Very often a window display of bulbs and other electrical equipment will produce excellent results.

Hardware dealers frequently find that having their store known in the district as the store where reliable bulbs can be procured means the sale of many other lines. Women especially who come in to make their purchases of bulbs ask about enamelware, and other lines with the result that a good deal of extra business is obtained.

According to manufacturers the hardware men are becoming the largest distributors of bulbs in many places, and because they go after business aggressively their sales show a steady expension.



The T. F. Shurly Co., Ltd., of St. Catharines, Ont., manufacturers of saws, is now occupying its new plant. New equipment has been installed and the firm's output will be greatly increased.

How Other Hardware Men Do Things

Points in Retailing of S. K. Gryde, Leader, Sask.

MANY hardware merchants are adopting the plan of furnishing travellers with order blanks that have been especially printed for this purpose bearing their name, instructions how to mark packages, and consecutively numbered to avoid errors. These order blanks are printed in duplicate, the original on white paper and the duplicate on yellow paper. The duplicate is perforated to fit into a loose leaf file and the sheets are filed away in orderly fashion according to numbers.

By this system the merchant can at any time turn to his file and ascertain if he has placed an order for certain goods instead of depending on his memory. If he happens to be away on a trip and certain stocks are low when a traveller comes, any clerk can, by referring to the file, discover whether an order has been placed for this line. By this system a record is kept of the quantities of goods ordered and the price to be checked up later when the goods and invoices arrive. The form adopted by S. K. Gryde, hardware merchant at Leader, Sask., is shown herewith:

The Pipeless Furnace

The pipeless furnace is becoming popular in the West, where the average farm home is small and compact. S. K. Gryde, hardware merchant at Leader, Sask., who handles a furnace of this type, states that since the day he received his first consignment there has been a good sale, and customers have again and again expressed their satisfaction with the heating qualities of this plant. In his district about 90 per cent. of the buyers are of foreign extraction and reside in small houses. The furnace is so easily and so inexpensively installed that it suits their purpose admirably.

This "Close-up" was taken in the store of S. K. Gryde, hardware merchant, of Leader, Sask., to illustrate his method of displaying kitchen utensils, auto acessories and miscellaneous articles immediately in front of the entrance to his big store. The display never fails to catch the eye of customers, and results in many sales. Mr. Gryde is the man in the background without a hat.

Keeping Prices Right

With prices of all lines of shelf and heavy hardware constantly increasing, the merchant is placed at his wits end to keep his stock marked up in accordance with wholesale quotations. Many merchants in Western Canada are not attempting to mark up goods, with a few possible exceptions. With a heavy stock they look upon it as too great a task, and content themselves with securing a standard margin of profit over cost price. The onsequene is that in many instances they are selling hardware retail at what it is now costing them wholesale in a great many cases, and are losing money.

The proposition of keeping goods properly marked up looks very formidable, but in reality it can be made very simple if the system adopted by S. K. Gryde, hardware merchant of Leader, Sask., is used. This merchant's record of cost and selling prices is kept in one little leather bound note book about 7 by 5 inches in size. This book, which can be purchased from any good bookseller is alphabetically indexed on the outer edge of its leaves, and is ruled for two columns of figures. The name of every article on sale in the store is recorded in this book by lead pencil with the wholesale price marked in alphabet code in the first column and the retail price in the second column in plain figures. With this system all that Mr. Gryde has to do is to watch the market quotations as tabulated each week in HARDWARE AND METAL and the quotataions furnished by travellers and simply change the lead pencil figures in his book. He stated that he believed fully in advancing prices in keeping with the market, but that he was unable to do so because other merchants in Leader did not, he had therefore adopted a policy of striking an average, fifty-fifty, that is to say he advanced his prices fifty per cent. on the market quotations.

This little book is kept in its place in the office where it is available for any clerk to see, and the wholesale prices in code eliminate the possibility of the customer seeing these figures by accident.

With this practical system at work this firm finds itself in a position to keep pace with rapidly fluctuating prices, and the retail figures on any article can be ascertained in a second if they are not retained in the memory. Without some such system the merchant is at sea.

Selling Goods in Bulk

The advantage of selling goods in bulk wherever possible is exemplified in the experience of S. K. Gryde, hardware merchant of Leader, Sask. Mr. Gryde

Operates Successful Furniture Department in Connection With Hardware Business

Combination hardware and furniture store operated by Aos & Hellekson, at Cabri, Sask. A broad archway at the front of the hardware store leads to the furniture department, which, as the photograph discloses, is of a very pretentious nature. The demand in this district is for high-class furniture. This merchant has under advisement the opening of a phonograph department in connection with this salesroom. By putting on musical programmes he could attract large crowds to view the imposing display of furniture, which at present is only seen by the casual customer.

In keeping with modern ideas of merchandising it will be observed that an effort is being made in the hardware department to place as many articles out in the open under the eye of the customer as can be conveniently arranged. In this store, as in all other stores in Western Canada, the oil stove is a big seller, the three-base burner type being the most popular. It will be observed that a large portion of the shelves on this side of the store are given up to paints.

put on what he terms a "drive on oil" this spring with results that have since turned out greater than he expected. By newspaper canvassing, by personal solicitation of farmers who came into the store, and by visiting customers in the country, he sought to sell motor lubricating oil in quantities ranging from 5 to 25 gallons, or sufficient to last the farmer throughout the season. As a special inducement he made a quantity price, and was enabled to do so by the discount he secured by buying in large quantities from the refiner.

"I found," said Mr. Gryde, "that by doing very little pushing it was just as easy to sell oil in large quantities as in small. We pointed out to the farmer that if he bought his season's oil in advance it would save him coming to town for it at frequent intervals during the summer with a consequent loss of time and money. Incidentally the time of my clerks was saved by being relieved from filling these small oil orders from time to time. We made a big clean-up on oil, and secured a portion of the business that would have otherwise gone to other stores, but best of all we disposed of our stock at a time when crop prospects were looking rosy in the spring, and at a time when the farmer was more prone to be optimistic of the future. As it has turned out there is going to be practically no crop in the district this year, or if any, very light. We have not loaded the farmer up with oil in a bad year for he will use it all on his tractor and automobile, and he was enabled to buy cheaply. The transaction was beneficial for all concerned.

Hardware Merchant Minimizes Fire Risks

A hardware merchant at Maple Creek, Sask., uses an old furnace in the rear of his premises for burning up the accumulation of refuse from the store. By removing all waste inflammable material of this kind the possibilities of fire are greatly reduced.

Handling Toys in the Hardware Store

Toys in the hardware store for the Christmas trade. Why not? One of the livest retail hardware salesmen met with on a recent trip through Western Caanda suggested the idea. He was formerly employed with the firm of James & Reid at Perth, Ontario, and stated that this firm made a practice of keeping a stock of toys on hand all the year round, many of them being of the mechanical variety. At the Christmas season they made a killing.

H. S. Hall is the name of this salesman, and he is employed in the hardware establishment of J. E. Thompson at Rivers, Man. He has only recently returned from overseas. Mr. Hall told of the aggressive selling methods of the Perth store. He states that they not only sold toys, but a general line of gift goods which were pushed by window display and by newspaper advertising. It was the custom, he said, to place triple decker tables down the centre of the store, perhaps five of them, consisting of 5c, 10c, 15c, 20c and 25c tables with the price mark on each table, printed prominently on a large card. Kitchen utensils formed a large part of this display, but all of the smaller articles in shelf hardware were thus placed out in the open where they would come under the eye of visitors to the store. Counter boxes were used with false bottoms so that it was not necessary to use a great quantity of goods to fill them, and when stocks ran low they could be turned over to display a few articles to the best advantage.

Many Sales Made

Sales were constantly being made off these tables. It seemed impossible for a woman to come in to make even a

small purchase without picking out some article for household use. It was these tables which were turned over exclusively for the sale of toys and gifts at Christmas time. When nicely decorated and emblazoned with seasonable signs in red and green they presented an attractive appearance and brought a handsome return in business. Toys went over big according to Mr. Hall, who intends to carry out these ideas in the Rivers' store.

Had Own "Santa Claus"

In connection with the sale of toys this Perth firm attracted unusual attention to its display by being the only store in town to have its own Santa Claus, who was welcomed at the railway depot by cheering crowds of children, who were presented with gifts of small bags of candy from his capacious bag.

Go After Business

Mr. Hall is of the opinion that hardware dealers are largely to blame themselves when they fail to successfully combat the mail-order business. In the first place he says they do not give the farmer what he wants by studying his needs, but try to load onto him something else which, in their opinion, should be satisfactory. The result is that a great many customers who are inclined to be stubborn in their desires have recourse to the mail-order catalogue. Again, some hardware merchants are content to sit in their stores and wait for business to come to them instead of going out after it. Mr. Hall told of two occasions when he suceeded in securing furniture orders for $125 and $160 respectively in Rivers by going out after the business. In both instances the sales were made to young married couples about to start a home. They were visited personally by this salesman, who, with the aid of an excellent furniture catalogue, was able to take their orders and pave the way to further purchases in the store.

It is one of the duties of Mr. Hall to look after advertising, the time of his employer being largely taken up in the operation of a garage. In talking advertising, Mr. Hall deplores the slackness of some manufacturers in not sending out advertising cuts to the country merchant. By not doing so, he says, they are missing a rich opportunity to place their goods before the public. Any merchant, says Mr. Hall, would be only too glad to brighten up his advertising with illustrations of this character. At the present time many advertisements in Western Canadian small town newspapers are devoid of cuts of any kind.

Sell Wall Paper

The Thompson store deals in wall paper, and a sample rack is displayed near the front of the store. It also sells two lines of phonographs, and stocks rugs, which are displayed on a unique rack just under the ceiling above the hardware cabinet. On this rack, placed at an angle of 45 degrees so as to display the rugs from the floor of the store, strong wooden pegs are inserted at intervals to support these rugs. Cut glass, silverware, auto accessories and electrical goods are also carried and displayed in large quantities.

Spread of Golf Fever Means New Business

Manufacturers of golf goods should look to the smaller towns of Western Canada as a new field for the sale of their products. The golf fever has hit the prairie country, and hit it hard. Golf courses have been established recently at Brandon, Swift Current, Maple Creek, Medicine Hat and Red Deer. There are municipal golf courses at Calgary and Edmonton. In the little town of Red Deer, Alta., hardware merchants have made the sale of several complete sets of golf clubs this summer, and the list of golf "bugs" is growing every day. At Calgary the Hudson's Bay Company has established a private course for its employees in the valley of the Bow River.

Kitchenware Displayed in Novel Form

A onvel and striking display of kitchen utensils has been carried out in the Miller Hardware store, Virden, Man. A section of shelving immediately in the rear of the main counter was removed and the space left converted into an alcove built in the form of a concave. Wall board was used for this purpose, and was covered with a spotless white oilcloth. Against this background, which gave the impression of cleanliness, the various utensils were placed, and made one of the most inviting displays possible. Many of the articles were of shining new metal, including polished nickel. Few women who visit this store can resist the temptation of making a purchase of some article or other. The display is a permanent fixture, and solves the problem of disposing of kitchen utensils which are being brought to a high point of perfection. Unless the more modern utensils are well displayed they will never be asked for, and consequently will remain unsold.

If the plans now under consideration to improve the sewage disposal and water supply of Shanghai are carried out, large quantities of pipe and other supplies will be required, as there is at present no sewerage system whatever. It has been recommended that a sewage-disposal plant be installed instead of discharging the waste into the river or using septic tanks. Inquiries should be addressed to the Secretary of the International Municipal Council, Shanghai, China.

Employs Effective Background Scheme to Create Interest in Enamelware, Etc.

Exterior view of Hamilton Hardware Store, Gull Lake, Sask. Mr. Hamilton is standing in the doorway.

The photograph below illustrates the remarkable effect achieved by Cliff. Hamilton, hardware merchant of Gull Lake, Sask., by painting the walls of this store a flat black in order to make graniteware and other articles stand out prominently. The same effect is carried out in one window where tools are displayed, making them stand out attractively and with great prominence. A mirror with frame painted in black is placed at one corner of the window, and reflecting the display gives the appearance of great volume. The cabinet in the rear of the main counter is painted black, causing the samples attached to the drawers to stand out in marked contrast. "It hits them in the eye," is the way Mr. Hamilton describes it, and what he says is right. Shining kitchen utensils, tinware and nickleware are made to appear even more polished and shining than ordinarily. The jet black of the walls and cabinet is relieved by gilt lines.

Mr. Hamilton got his idea when he happened one day to put some black burlap in the bottom of a showcase. He used one coat of paint on the walls. "It shows the dust and is hard to keep clean," he said, "but it is worth while in the additional trade it brings."

Miniature 10c, 15c, 25c Store Idea Proves Successful Innovation in Maple Creek

One of the finest features in the hardware department of the A. A. Meneley & Co. departmental store at Maple Creek, Sask., is the extraordinary amount of goods that are placed out on display in the centre of the store. Table after table is loaded down with articles, and the vast space is turned into a veritable fair or bazaar. Perhaps the most interesting phase of this policy is the sale at these prices on establishment of a miniature 10, 15 and 25 cent store, with the goods placed on three separate triple deck tables on which large price signs are placed. As a result of this great display F. Hockin, the manager, states that customers walk around and help themselves just like the modern cafeteria, carrying an armful of goods to the clerk for parcelling. They are, of course, led to make many more purchasee than they otherwise would have done.

Mr. Hockin believes that the time will come when shelves will become a thing of the past. He contemplates taking his graniteware off the shelves and placing it on tables.

A Good Business Man, or a Good Fellow

Two Instances of Western Business Men That Are Worth Consideration—Being a Good Fellow at the Cost of Business Does Not Pay

TWO instances were met with during a recent trip around the West which goes to prove how dangerous it is for a man to neglect his own business in order to secure prestige in the eyes of his neighbors by devoting most of his time to various other interests. It is like the old fable of the dog who grasped at the shadow and lost the substance.

The first of these cases was met with in the town of Cabri, Sask. Here the story was told of a merchant who formerly occupied a corner store, but who had made an assignment the year before. The consensus of opinion about this merchant was that he was one of the finest fellows the town had ever known, but that he talked too much. No man could have been more popular than he while he was in the town. He was president of the Board of Trade, and a member of several committees; he was chairman of the school board, and a trustee of the church. He also took a prominent part in politics. He was popular, extremely popular, and if he had had the money to back it up he probably would have come out on top. The trouble was that he neglected his business. He was always on the street or at meetings, or ball games, or something else when he should have been in the store. When a customer did come in to see him, the story goes that he would spend a very considerable time in an effort to convert him to his side of politics. Meanwhile other customers waited. He formed enmities by the stand he took on various subjects before the numerous boards and lodges of which he was a member, and he let his business run itseif. He was a good fellow and he allowed a heavy line of credit. Finally one day in Winnipeg there was a meeting of credit men. They decided that the Cabri merchant had reached the end of his tether, and they proceeded to jerk him up with a snap that could be heard in all the adjoining towns. At one sweep he lost his business, his home, and the savings of five years as represented in assets.

Attention That Paid

The second case was revealed in the town of Wetaskiwin, Alta. Here a live wire has stepped in, and starting with a $1,500 stock in 1916, he has developed his business in three years to the largest general store in the town with a turnover close to the $100,000 mark. Adjoining his premises is the big store that formerly held the premier place. Its proprietor was a member of the Provincial Parliament. He was accustomed to spend considerable time among his constituents and attending the sessions of the house. He left his business to his clerks. That is the explanation given by townspeople for the remarkable achievement of the stranger who usurped his position in the brief period of 36 months. The new man devoted his full time to the business. He made it a point to meet customers, make friends of them and see that they were satisfied. He strove in every way to give service. The people wanted service. They switched over to the new store.

Looking Ahead For Future Customers

All the boys and girls of Maple Creek, Sask., and the country round about were invited by A. A. Meneley & Co., of Maple Creek, to a special juvenile picnic. Special programs were distributed all through the district covered by the store. Besides containing a list of 17 sports for which prizes were given, it contained the following announcements:

A. A. Meneley & Co. invite all the boys and girls of the town and district to their Juvenile Picnic AT THE BARRACKS BRIDGE
Parents send your children. Let 'em all come. We will take care of them. All kinds of fun. Read our time card. Cars leave Post Office at 3 o'clock sharp, **and for love o' Mike be on time.**

Prizes will be given for each of the above events and will be on exhibition in the windows at the BIG STORE.

Entries for the sports must be made before 11 o'clock on the morning of the picnic. Make your entries at the store.

Free Picture Show at the Grand

At 8.30 p.m. we invite the parents to meet the children at the Grand Theatre. We have arranged for special comedy films.
Two Side Splitting Hous with Charlie and Fatty
EVERYTHING FREE. Money will be no good. Just pack your eats. Everything else will be provided

The boys and girls came out in crowds and had a splendid outing.

"We find it a good investment from an advertising standpoint," said a member o fthe firm to HARDWARE AND METAL, "and we are also catering to the good will of the young people. They are our future customers."

FINNISH RUBBER AND LEATHER FACTORY

The Helsinging Sanomat, a Helsingfors daily, states that it has been decided to establish in that city a firm for the manufacture of rubber and leather goods, to be known as the O. Y. Finska Treugolnik A. B. The capital is 5,000,000 marks, ($965,000 at normal exchange), but may be increased to 15,000,000 marks ($2,895,000.) Because of its close connection with the Treugolnik Co., of Petrograd, this Finnish concern will doubtless prove a great factor in the rubber and leather trade.

Opportunities for the Hardware Merchant in the Sale of Prepared Roofing and Roof Repair Materials

Points in sale of roofing outlined by D. P. HATCH, Sales Manager The Barrett Company, Ltd., Montreal, P.Q

THE enormous increase in the sales of Prepared and "Rubber" Roofing during the last ten years or so, would tend to indicate that hardware merchants generally, are more and more realizing the opportunities for real profit in handling this line.

Knowledge Essential

It goes without saying that in order to sell any article successfully, the seller must be thoroughly conversant with it. One of the most successful salesmen that has ever worked for this company, upon being asked to state the principal reason for his continued success, replied: That he defied any man to ask him any question about either the process of manufacture or the practical application of any of the goods that his house produces which he could not fully and completely describe. That intimate knowledge of his line was the secret of his success.

Explaining his continued selling success, a roofing salesman stated "That he defied any man to ask him any question about either the process of manufacture or the practical application of any of the goods his house produced which he could not fully and completely describe." That intimate knowledge of his line was the secret of his success.

The successful retailer of roofing materials to-day is the man who is prepared to visit the job, size up the kind and class of work in progress, determine the nature of the roof deck and its incline and then be ready to recommend to his prospective customer exactly the type of roofing most suited for such work.

In the same way a close understanding on the part of hardware merchants and the man behind the counter of the more salient features of the manufacture of roofing materials and their practical application, is surely bound to result in greater and more profitable sales of such materials.

No Hidden Secrets

It may possibly be that the sale of roofing and roof repair materials is more technical than the sale of the average article in the hardware merchant's stock. However, no longer are there any dark secrets and mysterious formulae surrounding the manufacture of this class of goods. The salesmen of all reliable roofing houses to-day are willing and prepared to describe in detail all processes of manufacture or application. This information may be had for the asking.

Visit the Job—Advise Application

The successful retailer of roofing materials to-day is the man who is prepared to visit the job, size up the kind and class of work in progress, determine the nature of the roof deck and its incline and then be ready to recommend to his prospective customer exactly the type of roofing most suited for such work. Further, he must be prepared to advise his customer as to how best to apply the roofing, how to construct flashings properly around chimneys, skylights and curbs, how to properly fasten the roofing at the eaves, how to line the valleys and in fact be prepared to inform him on all the practical details of application.

Big Field in Roof Repair Materials

Again there is a most profitable field, indeed, for hardware merchants in the sales of roof repair materials. Much prepared roofing, as well as roofing of other types, has been sold in the last ten or fifteen years. A great deal of this is now due for repair each year. Talk the roof repair proposition over with the next roofing salesman that visits you; assimilate all the information that he can give you and ask him to explain the different lines of roof repair materials that he sells. It is undoubtedly a true statement to make that the possibilities for profit to the retail merchant in the sale of roof repair materials is bounded only by the knowledge and activity of the men behind the counter.

There are relatively small hardware dealers upon the books of this company whose sales of roofing and roof repair materials are abnormally large—out of all proportion, in fact, to the size of their business as a whole. This volume of business in roofing materials has simply been developed by a close and careful study of the roofing problem.

Co-operate With Manufacturer

Reputable roofing manufacturers are always prepared and pleased to assist the retailer in every possible way. Samples, attractive literature imprinted with your firm name, cuts for use in local advertising, testimonials of service, etc., etc., may be had upon your simple request. Roofing problems may possibly be bothering your clerks. Get them together some night, call in a practical man and go into all the details with them.

Turpentine Prices Have More Than Doubled Since the First of the Year

TURPENTINE has been one of the surprises of the year. Had anyone predicted six months ago that all price records would be smashed, those in the trade would have paid little attention to the prophecy. But this is just what has happened, in fact, it is still happening.

On January 1, with an active demand the turpentine market was steady, with quotations ranging from $1.07 to $1.10 per Imperial gallon. Reports indicated that shipments overseas would commence at no distant period, and were likely to be heavy.

By the middle of January prices at primary points had advanced five cents and the market was showing great strength. From New York came reports that stocks were getting low.

By February 8 the price had dropped two cents, and by the 15th of the month the decline had reached five cents, prices being quoted at $1.05 to $1.08 per gallon. The market continued to decline, and a week later prices were down to $1.04. By March 8 it was down to $1.03.

By March 22 the price was advancing, and had risen four cents. By March 29 it was $1.10 and by April 5 had climbed to $1.12. On April 12 it had dropped back to $1.10, and on April 19 had jumped again to $1.15. In another week the price had moved up to $1.17, and by May 24 was $1.20.

Stocks Reported Low

By June 1 heavy shipments were being made at $1.30. The next week saw a jump of 20 cents, prices being quoted at $1.50, and reports stated that the stocks at Savannah were at the lowest point in many years. By the middle of June quotations were up another five cents, and a week later were up to $1.60.

On July 1 prices stood at $1.65, with heavy shipments moving overseas. A week later prices were unchanged, but shipments had practically ceased overseas, and a reaction was looked for. Reports regarding short crops, however, caused prices to hold fairly well, and although prices dropped, they did not fall below $1.55.

Overseas buying commenced again, and with German buyers coming into the field prices began to soar in a fashion never before experienced in the history of the Southern markets. By July 26 the quotations were around $1.82. By August 2 they were $1.95, and a week later had climbed to $2.21. During the next week they had risen to $2.50, but later reacted and came down to $2.40. The latter figures are entirely unprecedented in the history of the market and fully justified the opinion of the importers that there was no telling where turpentine would soar to as stocks were very low and there was a big demand.

"There will be no more cheap turpentine for some time," said Mr. Robert Pinchin, proprietor of the Ontario Oil and Turpentine Co., Toronto, in discussing the outlook for turpentine with HARDWARE & METAL. "Prices have stopped advancing for a day or two because the Germans, who will be heavy buyers, have not been able to make satisfactory arrangements for credits. This will no doubt be arranged shortly and then I expect prices will start to jump again. Just how important a buyer Germany is of turpentine may be gathered from the figures showing the amounts imported in the year before the war 3,275,929 gallons. Germany was easily the largest buyer of turpentine. There are other factors to be considered now also. When the war broke out the demand for turpentine was cut off and hundreds of southern producers were ruined. Then came the demands for men in munition plants, and thousands of those who had been employed in the production of turpentine at low wages went into other occupations at very high wages. Just how seriously production was affected is shown by last year's figures which totalled about one-half of a normal crop. This year's production will not be any larger than that of 1918, if it is as large. Thus the situation is that with half a crop there is an unprecedented demand. The producers are doing their best to stimulate production, but they have to pay their men very much higher wages, and cannot get the men they want even then."

Canada's Imports of Turpentine

1914	1,114,363 gallons
1915	917,912 "
1916	1,026,768 "
1917	1,109,029 "
1918	978,125 "

Big Business Ahead for Hardware Dealers Who Handle Cement

"THERE is record business ahead for dealers handling cement and no one is going after the trade more aggressively than the hardware dealers," said John Lavelle, sales manager of the Alfred Rogers Company, Toronto, in discussing the situation with HARDWARE AND METAL.

"Cement sales opened up well in the spring, they have been improving all summer and the outlook for the fall is still better. We are looking for 1920 to be, perhaps, the greatest year on record. There is every indication that it will be the big year."

Prices to be Steady

As far as prices are concerned, Mr. Lavelle stated that there is little reason to look for any change. He expects that they will be maintained at about the present levels.

"The hardware dealers are real business getters," said Mr. Lavelle. "Forty per cent. of our distributors are hardwaremen, and I would say that approximately they handle thirty-five per cent. of the total business. They go right out after trade and we find that they are right on the job all the time. They are in touch with those needing supplies and with prospective buyers, and they keep well informed regarding the needs of those in their territory. They are not afraid to advertise and let the people know that they have got the goods. In short, they are live wire merchants and they are getting splendid results.

Lots of Business

"There is no question at all about the volume of business to be had. The trade among the farmers is showing an increase of forty per cent. so far this year. During the past week or so it has slackened a little, because the farmers have been very busy harvesting, but indications are that there will be a big call for cement this fall from the farmers. They are prosperous and they are putting some of their money into new and better homes and buildings and into improvements. Had it not been for some shortage of help among the farmers during the spring and summer, sales would have been even bigger, but now that many of them have their sons home and the help situation relieved, they are going right ahead.

Big Building Program

There is a big building program under way which will call for the use of a lot of cement. In some of the big centres trade has been affected because of unrest and labor troubles. Taking it all around, though, a splendid lot of building is under way and I should say that sales of cement this year will be approximately double those of last year. There is lot of work going ahead this fall and a lot of other work is planned for the spring. The architects all over the country are very busy, and some of the jobs they are getting out plans for run into large sums. Many of the contractors have plenty of work on hand to keep them busy all the rest of this season and are being asked to figure on other work. It certainly looks as if there was no doubt about the business ahead."

The Roland Hardware Co., Ltd., of Roland, Manitoba, has been granted authority to increase its capital up to $50,000.

Render Service You Would Like to Get

A Woman's Ideas on Merchandising — Mary J. Stewart, of Tilbury, Ont., Employs Aggressive Tactics in Conduct of Hardware Business — The Barb Wire Move—Sells Customers Service—Studies the Game

Written for Hardware and Metal by G. S. H. WILLIAMSON, Associate Editor

IN the olden days (and not so far back either) when one mentioned the hardware store, it was generally considered the man's place to do the shopping. The hardware store catered to the men—the women occasionally did do the unusual and entered the sacred precincts of the men's store, but it was not often. To-day the hardware store is as much the women's store as the men's—perhaps more so—thus do things change.

The Woman Proprietor

The process has been gradual, was almost imperceptible at first but it came and it is a change which hardware men all over have been quick to appreciate and turn to good account. However, there is one field which man still claims superiority in— in numbers at least—and that is the proprietorship of the store. That it will continue so seems probable, but that is no reason why women cannot function from the proprietor's chair in the store as well. They are doing it, and the case of M. J. Stewart of Tilbury, Ont.—The M. standing for Mary—is a living example of successful operation of a hardware store by a woman.

It's a Partnership

To be absolutely correct, the writer should say "two" women, for Mrs. Stewart and her cousin, another young lady, are handling the business. There are no big burly men around, either, to handle the stoves, move the furniture and do the heavy lifting. With the aid of a boy, these two women are handling one of the nicest hardware businesses one would wish to own.

Tilbury, Ont., is situated in the very centre of one of the most prosperous sections in Canada, and on the country road between Essex and Kent Counties. It is 35 miles east of Windsor, and 20 miles west of Chatham. The country surrounding is given over to the production of canning crops and the town is well known as a canning centre. The locality is also a great oil centre. The community is a prosperous one, so that it is an unusually advantageous position for the hardware merchant.

Established 42 Years

The business has been established for 42 years in the one place, Mrs. Stewart's husband being interested, until his demise about one and a half years ago. To-day the store has one of the best locations for taking care of trade any proprietor could wish. It is situated on a corner, with a large corner window, which gets double display value, and as well, there is another large display window at the front of the store. The interior of the store is well fitted up, and as will be seen from the accompanying photograph, the goods are out where people can see them.

SELLING SERVICE

Mrs. Stewart says: "As a customer for other lines of goods, I appreciated courteous treatment, promptness in being waited upon and having the feeling that the merchant sold goods back of which he would stand. That formed our interpretation then of store service and our customers know that they can get satisfaction or their money back."

The Barb Wire Story

Mrs. Stewart firmly believes in having merchandise out where customers can see it. "It is in this way that we save ourselves much unnecessary effort in making sales, and make sales which otherwise would not be thought of," Mrs. Stewart stated. "Perhaps I had this brought home to me most forcibly in regard to barb wire. Rather an odd instance to cite, perhaps, but it illustrates the point I would like to make better than any other line I could mention. I found on taking over the store that there was a large stock of barb wire in the warehouse. It had been there for a long time, and there seemed to be no call for it. I moved a spool out to the front of the store—right on the sidewalk where everyone passing would see it. The barb wire has been moving ever since—we have cleaned out all the old stock, re-ordered once, and I am expecting the arrival of the second order placed almost any time now. There was a concrete example of what display would do, and we have profited by it to the extent that we get everything out we can for people to have the suggestion to buy constantly before them."

MOVING BARB WIRE

Speaking of the value of display, Mrs. Stewart cited an instance on the sale of barb wire which had been a sticker. She said: "I moved a spool out to the front of the store—right on the sidewalk where everyone passing would see it. The barb wire has been moving ever since and we are expecting now delivery of our second re-order."

Was Not Versed in Business

"It was not an easy task for me to try to manage this business," Mrs. Stewart continued. "I had never bothered about the store when my husband was living, and probably never would have could I have sold out to advantage. I had the business, however, and I felt that I should be making it bring me in some revenue. I secured my cousin's cooperation and we started in. Here we are still, and if I may say so, going strong. The business has practically doubled in the past year, and I am convinced that we are making a success of it. Our bank book is the best evidence of this."

"To what do you attribute your success," Mrs. Stewart was asked, to which she quickly replied: "'Service.' There are many ways in which customers may be treated," Mrs. Stewart said. "I know because I was for many years and am still, a customer for many lines of goods. I appreciate cour-

Window display in the M. J. Stewart store at Tilbury, Ont. A nice display of aluminum cooking utensils is shown, and a rather novel way of showing small kitchen articles and paint brushes is employed. The effect is good, and the ar-

teous treatment, promptness in being waited upon, and having the feeling that the merchant sold goods back of which he would stand. Right there then, was what we adopted as our interpretation of how we could sell service to our customers. We have advertised and put into practice the slogan: 'Satisfaction guaranteed or your money back.' We stand back of every thing we sell—if it doesn't turn out right, we make it right, and there is no better foundation on which any business can be built.

Devoted Time to Study

"The past year has been a mighty hard one, I can say that," Mrs. Stewart stated. "We knew practically nothing of the details of the business, but we have studied hard in an effort to learn. In this connection I can say that HARDWARE & METAL has been of inestimable value to us. It has been our good Samaritan and helped us over many difficult places. Articles on how other merchants have made a success of their business, and the markets have given us information we could have secured in no other way so quickly and advantageously. We study also manufacturers' catalogues and circulars on the goods we handle, and the result has been that we are becoming increasingly interested in this erstwhile 'man's game.'"

Store Arrangement Good

The arrangement of the store is good. To the right, on entering, is shelving for tools and builders' hardware. The goods are neatly sampled on the fronts of the drawers, making a splendid showing of these goods. Display cases are also used which serve to emphasize the various lines of merchandise displayed therein. To the left, furniture, stoves, washing machines and kindred lines of house-furnishings are constantly on display. These goods are kept dusted and polished, presenting a most attractive layout.

Furniture Good Line

Mrs. Stewart is very enthusiastic over the opportunities which handling furniture presents in selling other lines carried regularly in the hardware store. "It gives us an opportunity to sell the bride and groom, as an instance, their complete house-furnishings with the exception of window blinds and curtains. For the parlor, dining-room, kitchen (including enamelware, tinware, aluminumware and stoves) and bed-room. We have the stock here for the entire house, and it is business the hardware store can handle to distinct advantage," is how Mrs. Stewart outlined their attitude on this department of their business.

The windows are used to distinct advantage, and it is perhaps here that these ladies excel. They naturally have a taste for arranging goods in an attractive, sales-compelling way. The accompanying photograph shows a well arranged display of kitchen utensils and a background built up from hanging many small lines on clothes bars. The idea is excellent, and being unusual, the results proved decidedly effective.

"There is, perhaps, one point I should mention," Mrs. Stewart said, "in reference to how we manage in handling stoves and the heavier furniture business. Our customers are remarkably good, the men from the farms usually bringing in a neighbor to assist them in loading onto their waggons, and thus relieving us of much of theis work. Almost a 'self-serve' proposition one might say, but we are giving service, and the assistance the men give us in this respect is cheerfully given."

View of the interior of the store of M. J. Stewart, Tilbury, Ont. Neatness is one of the first things to appeal to the eye of the visitor to this hardware store. The displays are well arranged, and goods out where they secure the attention of the customers.

Altogether, the M. J. Stewart store is a good store, well conducted, adopting progressive selling methods and making progress. Its success is in no small measure due to the fact that M stands for Mary—a business woman.

May Sell Linseed Oil by Weight in United States

THE following announcement is being sent to the trade by American linseed oil crushers and their representatives:

For some time the Linseed Crushers' Industrial Council, of which our company is a member, has been conducting a work for the betterment of the conditions in the industry, which impose unfair burdens on manufacturer, distributor, and consumer.

The council has now under consideration a question of a substantial change in the merchandising policy of linseed oil—that is, changing the unit price of oil from a gallon to a pound basis.

This change would mean that linseed oil would be quoted at so much per pound, and no recognition given to the gallon measure.

As you know, the majority of vegetable oils are now sold on the pound basis, and in order that the council may have the advantage of full and complete expressions from its trade on this subject before making this change in policy, will you kindly register your vote by making a check opposite "Yes" if you recommend the change, and opposite "No" if you do not?

Do not fail to note on the back of this card, before mailing the same to us, substantial reasons for your decision.

We thank you for your co-operation in this matter in behalf of the industry.

According to Canadian crushers, with whom HARDWARE AND METAL discussed the question, the adoption of the weight standard would make little difference to them.

"While we nominally sell by the gallon," said one crusher, "we are really selling on a weight basis, because many shipments, especially those going overseas are reckoned on the basis of nine pounds to the gallon. That is a standard for linseed oil."

Another crusher pointed out that there is a slight difference in the weight of various linseed oils. He thought that the sale by weight strictly might have advantages in this way, but stated that before the measure is adopted finally its effect in relation to other liquids should be considered. It would make no change as far as the Canadian trade is concerned whether linseed oil is sold by the gallon or by the pound as far as the crushers are concerned, he said.

Reports from across the line state that the weight system is favored by some dealers in the States owing to the fact that in handling there is often a loss of from 3 to 3½ per cent. Manufacturers, it is stated, figure this loss in their costs, but many dealers and contractors do not realize that the loss reaches this amount.

Merchant Who Buys Early Saves Worry

Montreal Jobbers See No Advantage in Delayed Buying — Auto Accessories Reveal Rapid Development—Business All Along the Line Is Showing Increases—Collections Splendid

FOLLOWING their own policy of buying liberally, the advices being sent out to their travelling men by Lewis Bros., Ltd., Montreal, suggest that the matter of purchasing for the selling needs of the coming fall be plainly placed before the retailer. If he decides to protect himself all well and good, otherwise he will have to accept the responsibility of shortages when the goods are needed.

This is the buying and selling policy of the above firm for the coming months, according to John A. Frazer, sales manager of the company. In an interview, Mr. Frazer expressed some interesting phases of the situation to HARDWARE AND METAL.

Reasons for Buying

"Any small declines in the price of various lines of hardware have almost invariably been followed by advances to fully offset these, if not to advance the prices," said Mr. Frazer. "This has largely been the result of labor increases, and the tendencies have been upward right along. We see no likelihood of lower prices for a long time to come, in fact it may be several years before prices that can be considered low, will prevail.

"There will be great activity all this fall and next winter in the big automobile factories. I understand that there will be three eight-hour shifts in many of these plants, enabling the manufacturers to sustain operations the full twenty-four hours."

There are two outstanding reasons justifying the belief that prices will hold firmly, and with wages continuing high, and likely to, Mr. Frazer sees no prospect of lower levels obtaining.

Did Not Cancel

"We had bought very heavily of certain lines of auto accessories. An announcement was made that a certain large manufacturer would sell his own lines at a very close price. This, we understand, led to the cancellation of many orders and to the temporary holding up of others which had been placed with private manufacturers. We had ordered very extensively, and while the quantities were heavy we considered it better business to leave the orders as placed, rather than reduce them. Since then we have repeated on many of these lines several times, and for one line alone we recently received the twenty-ninth invoice."

Mr. Frazer referred to the fact that one large manufacturer, selling a line of automobile horns, was behind on his deliveries 97,000 horns. This is added proof that, in such a line as accessories there will be no surplus of stock and no probable decline in the markets.

On a recent visit to a large United States centre, Mr. Frazer had requested acceptance of a large order by a manufacturer of certain accessory lines, leaving the matter of delivery entirely with the firm on the understanding that they would accept. He had not yet learned the verdict, but hopes to secure the goods sometime within the next six months.

Increases Already

There has been a splendid buying spirit among the retailers, Mr. Frazer states. They seem to have anticipated the difficulties that might be met in securing goods. In any case they have been selling freely and have had to place repeat orders. Orders for fall delivery are accumulating and there is improvement in this respect as well as in orders received for immediate delivery. In fact, accessory sales have surpassed all estimates, and each month has recorded large increases.

Mr. Frazer pointed out that the same was true, largely, of other departments. Asked as to whether lines which had been very slow purely on account of the war were again selling. He replied that a real revival of buying was manifest for sporting goods. Rifles and shot guns and all kinds of accessories pertaining to this department were moving freely now. Not only so, but ammunition for trap shooting was moving again in fairly large quantities.

Price No Object

There had been an increased demand for plated ware and for electrical goods. Cutlery was a big seller. And one of the notable features of the present buying is that of the high-grade goods selected. "A merchant used to balk at the high prices," said Mr. Frazer, "but he has come to know that good merchandise will cost money, and he pays the price."

Summing up the present outlook, Mr. Frazer concluded: "We have, in my opinion, entered already upon a new era. It is the merchant who is going after business to-day who is getting it, and I believe that there are many years of prosperity ahead in this country."

Eastern Canada Prospects Excellent

The present conditions as affecting the hardware jobbing trade in Quebec and the Maritime Provinces are reported excellent by George C. Davis, vice-president and general manager of Frothingham & Workman, Ltd., Montreal. To HARDWARE AND METAL, Mr. Davis stated that business was most satisfactory and that there was every reason to anticipate a big fall trade for all lines of hardware.

Asked as to whether the present and prospective activity was applicable to any one section of the country, Mr. Davis said that all the eastern territory was in a healthy business state. This was evidenced in the number of orders received and in the tonnage going forward to all parts of the Maritimes, while Quebec Province business was very active.

Not only is there a free movement of goods to the retailer but the orders are larger. This is a change from the practice of most merchants since the signing of the armistice, and Mr. Davis attributes the improvement to a return of confidence. He also believes that the average merchant has satisfied himself of the improbability of declines coming on hardware lines, generally. Thus arriving at a satisfactory conclusion as to his buying, he is making his demands upon the wholesaler somewhat larger, realizing that it is well to have such stocks as may be required by his trade, and having them wanted.

A Big Variety

In the matter of selecting hardware at present, Mr. Davis stated that the demand was for a general class of merchandise. There was really little hardware in which the turnover was suffering, and, in addition to this there was a welcome return to the purchase of some goods which had been slow sellers owing to the effects of the war.

Sporting goods are having a fairly large sale at the present time, and a large distribution of them is being made in all directions. Nickeled goods and electrical are enjoying an increased demand from all parts. In this respect a notable movement has developed for electrical washing machines. It is simply a question of being able to secure the stock, and it was stated that delays had held shipment of these goods back.

Wire nails have been a big seller. Mr. Davis understands that it has been with some difficulty, indeed, that nails have been secured to meet all requirements.

Asked as to the condition of accounts, Mr. Davis expressed himself as most pleased. "There are very few returns from the bank these days, and bills are promptly paid. This condition is even more favorable than ever, for there have been times in the past when returns from the bank would reveal 12 or 15 unpaid bills." There was little fault to find in this respect.

As to the tendency of prices, Mr. Davis feels, decidedly, that the basis for most lines will hold firmly and that higher prices may come. "There has been a tendency upward lately, and many lines have gone up. With wages high and likely to continue, there is not much likelihood of lower prices prevailing," he stated.

Successful Program at Man. Convention

Retailers Disclaim Responsibility for H. C. of L.—Decide to Form Joint Stock Fire Insurance Co. for Merchants—A. G. Box, Pierson, the New President—Small Attendance Did Not Mar Enthusiasm

Written by E. H. SCOTT, Western Representative MacLean Trade Newspapers

BRANDON, Aug. 15.—Business of far-reaching importance was transacted at the fifth annual convention of the Retail Merchants' Association of Manitoba, which was held at Brandon, August 13, 14, and 15, and this despite a very small attendance, there being present only about 30 delegates from points outside of Brandon. The membership in the province totals over 800. The fact that harvesting started about three weeks earlier than usual this year was mainly responsible for the poor attendance.

It was decided that in future district conventions should be held at points all over the province, these conventions to appoint delegates to the annual gathering.

Chief among the resolutions passed was one disclaiming responsibility for the high cost of living, and calling for an investigation of the charges made by Dr. R. J. McFall in this regard. It was decided to form a joint stock fire insurance company for merchants. There were several other resolutions passed, including a proposal to ask for a Federal law prohibiting premium contests. A. G. Box, hardware merchant, of Pierson, was appointed president. He is an energetic young country merchant, and as former vice-president took a leading part in the convention.

Several inspiring addresses were given by F. H. Mann of Devils Lake, North Dakota, and by R. L. Line of Columbus, Montana.

The entertainment features provided by the Brandon branch were excellent. Noonday luncheons at the Prince Edward hotel, with sing-songs from a printed card, were the rule daily. A well-staged banquet and dance brought the proceedings to a close.

The Secretary's Report

I have much pleasure in presenting to you the sixth annual report of the Manitoba Board of the Retail Merchants' Association of Canada, Incorporated. This report covers the fourteen months between the last convention held at Winnipeg on June 18 to 20, 1918, and the present meeting, August 13 to 15, 1919. During this period your Executive officers have had under consideration a large number of questions of great importance to the retail trade. The financial statement presented by the treasurer covers the fiscal year ending March 31, 1919.

Sixteen meetings of the Executive have been held. The membership as of July 31, 1919, totals 785; in Greater Winnipeg 330, other points in Manitoba 455. All of these members are in good standing; all dues having been paid. Our association work throughout Canada is receiving greater interest, more sympathetic co-operation and larger financial support on the part of members than formerly. This is due to the fact that the members are beginning to measure and appreciate the service which our organization renders. During war time great opportunities were given for the exercise of co-operative effort and I would like to take this opportunity to direct your attention to the untiring and unselfish services of the Dominion Secretary, E. M. Trowern, at Ottawa, and the enthusiasm and genuine interest of J. A. Banfield, Dominion President, in all questions which affect the status of the retail trade in Canada.

At the last convention held in Winnipeg June 18-20, 1918, the following Executive officers were elected: George W. Markle, Winnipeg, president; A. G. Box, Pierson, first vice-president; A. F. Higgins, Carman, second vice-president; T. A. Connell, Winnipeg; treasurer; J. H. Curle, Winnipeg, secretary.

Action was taken on the resolutions passed at the last convention as follows:

1. Resolution on "Win the War Effort."—The Executive officers and members of the association have been identified with the various movements which had for their object the success of the war, and general rejoicing accompanied the signing of the armistice and peace terms.

2. Resolution asking merchants to study Transient Traders' Act, and that municipalities be requested to observe same. During the year this matter was covered in a bulletin to the members. In addition, municipal officers should be requested to examine the 1918 statutes and amendments.

3. Resolution asking for co-operation with the University of Manitoba in the establishment of a Chair of Commerce—The officers have the assurance of the Advisory Committee on Commercial Education of the University of Manitoba that a director of commercial education will be appointed as soon as a man with the qualifications desired can be secured.

4. Resolution on Conference of Farmers and Commercial Organizations—A. F. Higgins and your secretary attended a meeting called by Henry Detchon, honorary secretary of the Joint Committee of Commerce and Agriculture, with a view to bringing about such a conference. Satisfactory arrangements were not made as to the date of the conference and the meeting was postponed indefinitely. The last general meeting of the Joint Committee of Commerce and Agriculture was held at Regina in March, 1918, when A. F. Higgins, H. L. Montgomery and your secretary were present.

5. Resolution as to Time of the Holding of the Convention—To be determined by a questionnaire. Numerous interviews with members caused your executive to choose the month of June.

6. Resolution on Parcel Post—This matter was referred to the Dominion Executive for action. The Dominion Secretary has forwarded a letter to the members of the House of Commons and the Senate with statistics showing that the rates on parcels are not sufficient to pay for the service. Letter rates are high in order to absorb the loss occasioned on the parcel post service.

7. Resolution on Benefits of Prohibition in Manitoba—This resolution was passed to assist the campaign for prohibition in New Zealand. Your Executive is co-operating with the Social Service Council of Manitoba in an effort to secure satisfactory permanent prohibitory laws in Canada.

Resolutions 8 to 11 covered thanks to the press, Industrial Bureau and exhibitors and speakers.

12. Resolution appointed A. F. Higgins, H. L. Montgomery and William Iverach to meet farmers, manufacturers and wholesalers. This matter was referred to in Resolution No. 4.

13. Resolution re Bankruptcy Act—A special committee of the Dominion board met a special committee of the Dominion House when this bill was introduced in 1918. Numerous changes were suggested so that the whole retail trade would not be tied up. Your Executive, co-operating with Horace Chevrier, met in conference with W. F. O'Connor, K.C., and H. P. Grundy, when further changes were considered and agreed upon. The Act goes into effect in 1920.

Recommendations.

In addition to the resolutions referred to, your Executive was requested to ask for a revision of, "The present method for the inspection of weights and measures." This matter has been referred to the Dominion Executive.

"The Cold Storage Problem."—This matter will have to be taken up with the Minister of Agriculture. The Deputy Minister will likely be present to make a statement to the convention.

"The Classification of Freight."—This was referred to the Dominion Executive.

"District and Sectional Meetings throughout the Province."—This matter is under consideration, and will go into effect with the appointment of a business expert at the university.

Community Building and Affiliation With Social Service Council.

During the year the Executive received an invitation to affiliate with the Social Service Council of Manitoba and they did so. Your secretary is a member of the Committee on Community Organization. This department of the Social Service Council has as its secretary F. C. Middleton, who was appointed on June 1, 1918. Excellent work has been done throughout the province, clubs having been formed in 25 centres. We expect during the year these will become a get-together medium for the farmers and the merchants to their mutual benefit and the good of the community generally.

Co-operating with a representative of the wholesale grocers, a questionnaire was pre-

OFFICERS FOR 1919-20

The following officers were elected:

President, A. G. Box, Pierson.

First vice-president, A. F. Higgins, Winnipeg.

Second vice-president, T. A. Connell, Winnipeg.

Treasurer, J. W. Kelly, Winnipeg.

Honorary secretary, W. E. Crawford, Brandon.

Advisory committee, W. L. Salmon, W. J. Devlin, Winnipeg.

pared with a view to securing the selling policy of all wholesale grocers soliciting business from the retail trade of Manitoba. The selling policy of these wholesale houses are now on file for reference. We would urge the members again to advise our office of all irregular selling.

Fixing of Prices by Dominion Government

Your Executive was requested to co-operate with the Government in the event of such action being taken.

Provincial Taxation Board

Your Secretary was appointed a member of the Manitoba Tax Commission. During the year meetings of the commission have been held at Winnipeg, Brandon, Souris, Portage la Prairie, Morden, Dauphin, Neepawa and Minnedosa. At all of these places evidence has been secured regarding the methods of making assessments and the collection of taxes. Merchants have shown their interest in the various sessions by submitting figures and other valuable information as a protest against the present tax on personal property and rental values. Practically every retail merchant was in favor of a tax on net profits and salaries in lieu of the business tax as now imposed.

Assisting Farmers in Greater Production

Reports go to show that great assistance was given to farmers by merchants and clerks throughout the Province of Manitoba during the 1918 harvest. In some places the stores were closed for part of the day to help the farmer in this movement.

Application by Express Companies for Increases in Rates

Your secretary appeared before the Board of Railway Commissioners at sittings held in Winnipeg, when objections to the application of the express companies for increased rates were heard. The burden of the arguments were presented by the Winnipeg Board of Trade, with whom we were pleased to co-operate. An examination of the proposals of the express companies revealed the fact that they desired to reduce the tariff on those packages which entered into competition with the parcel post rates and have the increases apply to the heavier packages. We drew the attention of the commissioners to the fact that this would mean that one branch of the business would be conducted at a loss while another section would take care of this loss, and at the same time produce a profit on the entire investment. We opposed this attempt of the express companies to follow the lead of the Dominion Post Office in its policy of carrying parcels at less than the cost of the service.

1919 Legislation

(a) Licensing and Bonding of Produce Dealers—Manitoba has suffered for many years with certain produce dealers who were unbusinesslike and dishonest. Their plan was to offer higher prices than that paid by regular reliable dealers, with the result some persons, attracted by the price, made shipments and suffered losses accordingly. These were reported from time to time, the latest being those who shipped to the Anderson Produce Company December, 1918. Your Executive officers were of the opinion that the operations of this class of dealer should be checked. We sought and secured the support and co-operation of the officers of the Manitoba Grain-Growers' Association, the Home Economics Society and the Manitoba Agricultural Societies in our efforts to eliminate such, and by a special Act granted by the Government, which went into effect May 13, 1919, all dealers whose principal business consists of handling farm produce shall be required to obtain a license of $10.00 and furnish a bond for $3,000 before doing business in Manitoba. I would urge all shippers of produce to co-operate as far as possible in carrying out the provisions of this Act. Our association will use its best efforts to make it hard to be dishonest in business.

(b) Amendment needed in respect to certain licenses. Your officers have applied for the Amendment of the Municipal Act and the Transient Traders' Act in respect to the exemption from licenses of goods manufactured in Manitoba if sold by the manufacturer or his authorized agent. This provision is unfair, is out of date and discriminates. At the suggestion of the Committee on Amendments to the Municipal Act this matter will be considered with the Union of Municipalities prior to being brought again before the Government.

(c) Early Closing Movement Growing.—This question has been a live issue in Winnipeg for years, but more particularly during the past year, due to an appeal that has been made from the decision of the magistrate based on the amended by-law. Your officers have studied this question carefully and are fully convinced that early closing by-laws if introduced must be properly enforced. Dealers who wish to enjoy the privileges of remaining open after the closing hours of other stores should (as provided for in the Shops Regulation Act) be required to confine their stocks to those lines which may be sold after hours. This action on the part of your officers has not been popular with some dealers, who looked at the question purely with a selfish motive, but we believe that early closing will never prove satisfactory until there is administration that is guided by the best interests of all concerned, and it must be fair and effective.

View of Rosser Ave., Brandon, Man., looking west. One of the principal retailing streets of this Western city. Inset is the new fire hall.

Many suggestions and inquiries have been received from country towns on closing stores for one-half day each week. Many merchants are enthusiastic over the advantage of having a half day free. No doubt this question will be brought before the convention for your consideration.

(d) The Chinese Trader—Complaints have been received from time to time during the year respecting the practice of certain Chinese merchants who conduct business under very unsanitary conditions, and who also ignore the Lord's Day Act. There is a strong demand for more effective regulation of such traders with a view to having them adopt higher standards of living.

Service of the Manitoba Office

Throughout the year every effort has been made to furnish the members with satisfactory service in the following branches:

1. Information on the best methods of bookkeeping.
2. How to display goods and where to get fixtures.
3. Information regarding competent help.
4. The checking of freight bills and information on other transportation matters.
5. Credit information and collections.
6. Information on advertising and selling.
7. Information on insurance, fire, accident and health.
8. Information on irregular selling.

Dominion Legislation and Activities

Mr. Banfield, Dominion President, will cover the work of the Dominion Executive in his address. I will not make any attempt to include these matters in this report except to state that I believe we have had good co-operation with the head office.

The Future of Association Work

If the association work is to make more rapid strides, there must be greater co-operation among merchants generally than there has been. I am convinced that the getting together of merchants will benefit customers and dealers, and would greatly add to the possible usefulness of the association.

J. H. CURLE, Secretary.

Many Important Resolutions Passed

One of the most important resolutions passed by the Brandon convention of the Manitoba Retail Merchants' Association was that disclaiming responsibility on the part of the merchants for increasing prices, and the high cost of living. The resolution demands an immediate investigation into this charge preferred by Dr. R. J. McFall, High Cost of Living Commissioner. The president of the Retail Merchants' Association for Manitoba, George W. Markle, moved the resolution, while the seconder was Ald. J. B. Curran, of Brandon. This important resolution asks that a speedy inquiry be undertaken at once by the Board of Commerce. It also further states that Dr. McFall is confusing the minds of the consuming public on the real causes of the trouble. This resolution is as follows:

Full Inquiry Invited

"Whereas the retail merchants of the province deplore the ever-increasing high prices prevailing for the necessities of life and realize that they are helpless to remedy the conditions, and whereas the High Cost of Living Commissioner, Dr. R. J. McFall, has given statements from time to time to the press which in effect indirectly charge the retail merchants as a class with demanding exhorbitant prices. Now be it therefore resolved that this convention declare its stand in relation to these charges.

"The recent inquiry of the Federal Government and other investigations that have been made during the war and since the signing of the armistice, has shown conclusively that the retail merchants as a class have not made unfair profits. It must be apparent to anyone who has followed the exposure of profiteering during the war and in recent months, that the retail merchants are not among those who have made even unusual profits, while at the same time these investigations have shown that enormous profits have been made by many other classes who are much nearer the source of supply than the retailer.

"It therefore appears to the delegates here assembled that the High Cost of Living Commissioner in making such charges is diverting and confusing the minds of the consuming public on the real causes of the trouble. And inasmuch as the retail merchant comes more closely in contact with the consuming public than the producer, manufacturer, or wholesaler, is therefore placed in a more or less defenceless position by these official charges.

"Therefore be it resolved that we urgently request that the newly-appointed Board of Commerce fully consider the

J. H. CURLE

Secretary of Manitoba Branch of the Retail Merchants' Asseociation

question as it applies to the retailer, at the earliest possible date. Further, be it resolved that a copy of this resolution be sent to Dr. R. J. McFall and such other officials of the Government dealing with the problem of the high cost of living."

Other resolutions were passed as follows: "Resolved that the incoming executive be requested to secure legislation whereby all retail stores in Manitoba will be required to close on Wednesdays or Thursdays at 1 p.m. each week and every other day excepting Saturdays and days preceding holidays at 6 p.m. during the months of June, July and August."

Resolution of Community Work Lectures

"Whereas satisfactory results have attended the work of the University of Manitoba in the short courses in merchandising offered in February, 1918 and 1919, and the field work done among business people in August, 1918, therefore be it resolved that the members of this association express their appreciation for this service, which has been rendered by the University of Manitoba and that we continue to co-operate with the university for the advancement of commercial legislation with a view to having extension work serve as many business centres as possible."

Resolution on Community Work

"Whereas the Social Service of Manitoba established a Community Organization Department on June 1, 1918, with F. C. Middleton as secretary, and which department has been the means of organization of a large number of community clubs throughout the province, which clubs have added to the happiness and prosperity of the centres so organized;

"Therefore, be it resolved that we the members of this association co-operate in every possible way with the Social Service Council in the promotion of this work."

Resolution on Soldier Settlement

"Resolved that the members of this association use every means possible to co-operate with and assist soldiers going on land in Manitoba."

Resolution on Taxation

"Whereas the Manitoba Taxation Commission had held sessions throughout the province to receive evidence on methods of assessment and taxation.

"And whereas it is the intention of said commission to make recommendations to the Government:

"Therefore, be it resolved that the members of this association be requested to submit to the commission evidence in the form of statements to show inequalities which exist in the distribution of the business taxes as distributed under the tax on retail values and personal property, and that we urge for the appointment of a permanent taxation board to have supervision over assessment on taxation matters in the province with a view to increased efficiency."

Resolution on Licenses Respecting Goods Manufactured in Manitoba

"Whereas under the Municipal Act no license is required in villages or rural municipalities for hawking, peddling or selling from any vehicle or other conveyance any goods, wares or merchandise manufactured in this province if the same is hawked or peddled by the manufacturer or by his bona fide servants or employees;

"And whereas such goods if stocked in a retail store are subject to a business tax;

"Therefore, be it resolved that the executive be requested to apply to the Legislature for an amendment to the Municipal Act whereby this exemption will be removed."

Resolution on Produce Dealers

"Whereas there have been many losses in the past on shipments of produce by farmers and merchants through the operations of unreliable and dishonest produce firms;

"And whereas the Manitoba Government at the 1919 session granted legislation whereby produce dealers are now required to be licensed and bonded;

"Therefore, be it resolved that we co-operate with the Department of Agriculture by reporting all cases of irregular buying or selling of produce with a view to having the provisions of this act carried out."

A resolution protesting against the alleged inequalities of taxation in Manitoba was passed as follows:

"Whereas the Manitoba Taxation Commission has held sessions throughout the province to receive evidence on assessment and taxation;

"And whereas it is the intention of said commission to make recommendations to the Government;

"Therefore, be it resolved that the members of this association be requested to submit to the commission evidence in the form of statements to show inequalities which exist in the distribution of the business taxes as distributed under the tax on rental values and personal property, and that we urge for the appointment of a permanent taxation board to have supervision over assessment on taxation matters in the province with a view to increased efficiency."

After some discussion among the members, this resolution was unanimously adopted. It was generally felt by the members that under existing conditions the merchants were being overtaxed. After a short discussion, an amendment is to be asked for by the Retail Merchants' Association to the Municipal Act, requesting that the exemption be removed regarding non-requirements of a license for hawkers and pedlars selling from any vehicle or any other conveyance in the province.

Dominion President Speaks on Community Building; Outlines Aims of R.M.A.

J. A. BANFIELD, of Winnipeg, the president of the Dominion Board of Retail Merchants, addressed the delegates. He dealt with legislation enacted reecntly and suggested changes and improvements therein.

"I notice that in the Council of Agriculture platform," said Mr. Banfield, "their statement of regrets at the shifting of young men from the farms to the cities. Surely there is a remedy for this, and I feel that if they look into the homes they will find considerable of the cause, and the blame is not altogether with the farmer; it rests also on the merchants in the small towns, because in their hands lies the upbuilding of their community."

Mr. Banfield then dealt with the comparison of educational advantages, the wage question, and general public utilities in the farming districts. He advised the establishment of public libraries and the establishment of community centres "where all classes of the community might gather and get acquainted."

Dealing with the principles of the Retail Merchants' Association, Mr. Banfield stated that the association stands for "Honest weights and measures, no misrepresentation in the quantity, quality, or value of the goods sold; one price to customers on proprietary trade-marked articles upon which a fair price has been fixed and printed by the manufacturer; no deceptive tricks to allure customers to buy goods that they are familiar with at a cent or two below the regular price, and then get back from them more than the loss made in goods that they are not familiar with; no false advertising, no attempt to rob the working classes or the farmers by buying manufactured articles or produce that has been made by those who receive starvation wages."

Co-operatives and Mail Orders

The association aims to oppose any attempt on the part of any promoters or persons who are not familiar with the retail problem to induce our customers to place their money, or their trade in speculative co-operative stores or society ventures on the idea that they will be able to buy much cheaper and have dividends paid back to them, which dividends, if paid, are overcharges or bribes, paid back to customers in order to deceive them and endeavor to hold their trade; to point out to every resident of our cities and towns that if they want their city or town to prosper, they must keep their money in local circulation, and that the retail mail order houses that send goods into the municipality which are carried by merchants are not contributing to the support of the municipality; to endeavor to give the best service and accommodation to the buying public and to give to those who are worthy credit when they require it; to keep a register for the inspection of all the merchants, of those persons who habitually make it a practice to avoid paying their accounts, so as to prevent them from securing further credit and to send the names of those who have met with misfortune to the proper officials

J. A. BANFIELD

Winnipeg, President of Dominion Executive Council of R.M.A.

in the municipality whose duty it is to examine into all such unfortunate cases; and to ask our customers and citizens of our cities and towns to patronize those retail merchants who believe in the above principles, and who have united with their fellow-merchants, whose duty it is to see that these principles are lived up to.

Delegates Attending The Convention

The following merchants were in attendance at the Brandon convention:

S. R. Acheson, Boissevain; R. C. Balloch, Reston; Frank H. Brady, Reston; A. G. Box, Pierson; F. T. Baxter, Winnipeg; H. Bicknell, Wheatland; J. A. Banfield, Winnipeg; G. B. Bedford, Brandon; E. Bolton, Brandon; S. Broomhall, Brandon; J. Bedford, Brandon; W. D. B. Boyd, Roseisle; T. A. Connell, Winnipeg; W. Chrests, Brandon; W. E. Crawford, Brandon; J. N. Campbell, Makinac; W. J. Currie, Lauder; H. Cooperman, Brandon; S. Cooperman, Brandon; W. J. Draper, Brandon; A. J. Doak, Brandon; H. Davis, Desford; George Dinsdale, Brandon; J. F. Dobber, Brandon; W. W. Donaldson, Brandon; J. M. Donaldson, Brandon; John Farrell, Brandon; T. F. Foreman, Brandon; D. Hetherington, Souris; M. A. Hetherington, Souris; A. Hartley, Virden; H. E. Hatteim, Rapid City; A. L. Hall, Brandon; M. Johnston, Brandon; E. T. Johnson, Boissevain; W. S. Kenner, Pierson; A. B. Knowlton, Brandon; K. M. Kerr, Brandon; J. W. Kelly, Winnipeg; A. E. Ligne, Rapid City; P. Lamont, Brandon; S. H. Lees, Souris; T. E. Morris, Alexander; J. F. McDonald, Brandon; S. K. McDonald, Brandon; W. E. Minion Brandon; R. F. McBurney, Brandon; J. H. Niore, Souris; E. B. McDonald, Souris; W. F. Murphy, E. Newdale; J. W. McArter, Souris; E. J. McKittrick, Brandon; J. B. Ober, Brandon; John Pepkin, Brandon; Geo. Parrett, Brandon; Jas. Rothnie, Virden; J. H. Rankin, Brandon; J. M. Robertson, Brandon; E. E. Riesberry, Rapid City; S. D. Robertson, Brandon; J. G. Robertson, Brandon, H. H. Sutherland, Brandon; O. Sawyer, Aexander; Mr. Shewan, Brandon; R. H. Vankirk. Winnipeg; Chas. P. Williams, Plumas;; Geo. White, Brandon; W. Hutchings, Brandon; Ed. Hill, Brandon; W J. Creelman, Brandon; Louis Franchard, Ste. Rose Du Lac; S. Delveaux, Ste Rose Du Lac; Jos. Molgat, Ste Rose Du Lac; Wm. Shear, Brandon.

Retailers Decide to Form a Joint Stock Fire Insurance Company

AN important move in the history of Manitoba retailers was taken at the Brandon convention of the Manitoba Retail Merchants' Association when it was definitely decided to form a joint stock fire insurance company.

Little discussion followed the reading of the resolution, which was moved by D. W. Boyd, of Rose Isle, and seconded by W. E. Crawford, of Brandon. By this resolution it was decided to form the company as soon as sufficient stock is subscribed to by the members. Only members in good standing will be allowed to hold stock or carry insurance in the company.

Refused to Co-operate

This action was taken as a result of the refusal of the Saskatchewan Retail Merchants' Mutual Insurance Company to cooperate, and as a result of advice from the Manitoba Fire Insurance Committee against the forming of a mutual company. This action is being taken largely on account of high premiums charged by the insurance companies for insurance of retailers' stock and property.

The resolution, which follows, was adopted:

"Whereas a committee of this association has been studying the question of forming a fire insurance company with a view of effecting a saving on the insurance premiums for the members;

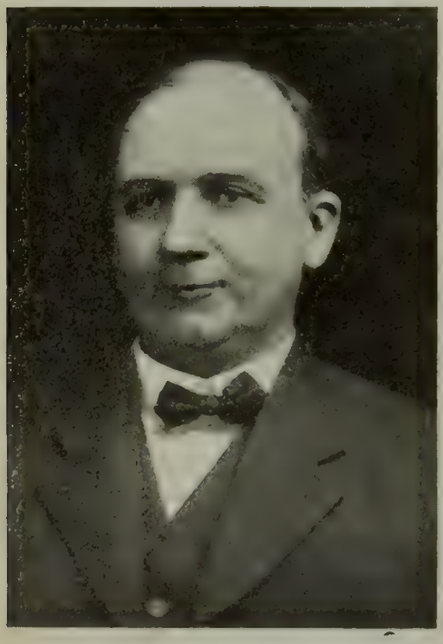
"And whereas negotiations have been carried on with the directors of the Saskatchewan Retail Merchants' Mutual Fire Insurance Company with a view to having their company extend its operations into Manitoba, and whereas the Saskatchewan Retail Merchants' Mutual Fire Insurance Company

does not consider the time opportune for such extension of operations;

"And whereas the Manitoba Fire Insurance Committee has advised against the formation of a mutual fire insurance company in Manitoba,

"Therefore, be it resolved that the officers of this association take the steps necessary to form a joint stock insurance company as soon as sufficient amount of stock has been subscribed by the members, the said stock to be limited to the members in good standing in this association."

During the discussion which ensued President Markle pointed out that in the case of a joint stock company all risks could be reinsured, whereas this would be impossibls in the case of a mutual company. Under this plan, too, the operations would be unlimited. He stated that in April or May of last year, when enquiries were sent out, the merchants immediately offered business amounting to $215,000. He made the statement that A. F. Higgins, a Winnipeg grocer, had offered to subscribe $10,000 for stock in a merchants' insurance company.



F. H. Mann, president of the North Dakota Retail Merchants' Association, said that he was also president of the Merchants' Mutual Fire Insurance Company of North Dakota. This company, he said, wrote all classes of insurance, and operated the same as the old-line companies. They offered a cash discount of ten per cent. for insurance paid within 15 days. Insurance to the amount of $4,000,000 was carried, and the company had been able to pay a dividend of 20 per cent. His company, he said, had the privilege of reinsuring risks, and further protects itself by scattering its insurance. For instance, it would not place insurance on an entire block. He told further about the Implement Dealers' Insurance Company in his state, which had been operating successfully for 18 years on the note system. That is to say that only 60 per cent. of the premium was payable in cash, the other 40 per cent. in the form of notes, on which money was never realized except it became necessary to assess the members in the case of some great conflagration. He said that the merchants' company was the largest in the state.

Newsy Features of the Convention Briefly Told

A very important resolution was passed by the R.M.A. regarding future plans for conventions. It was decided that in future, district conventions would be held. At these district conventions delegates familiar with local conditions in their respective districts would be appointed to attend a yearly conference to conduct the general business of the association. It was further pointed out by J. H. Curle, provincial secretary, that such a movement would awaken intensified interest among merchants who have not as yet linked up with the association.

* * *

W. J. Keyes, of Kelvin Technical School, Winnipeg, spoke on practical retail advertising: "Many merchants," said Mr. Keyes, "could not see the connection between selling and advertising. Good advertising results in reduction in price of goods to the consumer, an important item at the present time. He advised co-operation between retailer and manufacturer in advertising as this would result in assisting the retailer in making his advertising expenses cheaper.

ALDERMAN J. B. CURRAN,
Proprietor of the Brandon Hardware Co., Brandon, Man., and 1st Vice-President of the Brandon branch of the R.M.A. of Canada.

Edwin Loftus, K.C., lecturer of the Manitoba Law School, addressed the convention on "Commercial Law as Related to the Retailer."

"Partnership," said Mr. Loftus, "is a poor proposition for the reason that partners are liable for partnership debts even if they do not know such debts are being or have been contracted. Oral contracts," he said, "open up a large field for fraud." In order to get away from this in 1910, the statute of frauds was passed. His whole address dealt largely with questionings of vital interest to merchants, and was made interesting by the illustration of practical cases coming under his attention daily.

* * *

The question of better distributing of merchandise caused a brief discussion. Particularly in respect to the jobber selling goods direct to the consumer, in a district at a price that prevented the local dealer from competing for the business. Better co-operation between the wholesaler and retailer was considered necessary and the following resolution was adopted:

"Whereas, the problem of the effcient sympathetic co-operation of manufacturers, wholesalers and retailers, and

"Whereas, the limited co-operation of the past has not produced as rapid strides as is desired in solving the problems of modern merchandising.

"Therefore, be it resolved that the executive be requested to use their best efforts to get the manufacturers and jobbers of Canada to assume greater responsibility in studying and assisting to solve the common problems of distribution."

* * *

A window dressing contest was a feature of the convention of the Manitoba Retail Merchants' Association at Brandon, August 13-16.

The judges, H. R. Vankirk and J. Baxter, expert window dressers, stated the interest taken was very keen and the windows generally were exceptionally good. The prizes were awarded as follows:

First prize—Knowlton's shoe store. This was a display of ladies' footwear. The feature of this window was a neat and well-executed background. The merchandise was seasonable and neatly displayed. Another good point was the splendid range of all prices ticketed with exceptionally neat price tickets. A well-designed and harmonious show card was well placed in the display. The percentage awarded was 95 per cent.

Second prize—Clement's drug store. A display of toilet powder. 90 per cent. award.

Third prize—W. T. Creelman, display of ladies' and men's footwear, 85 per cent. award.

Fourth prize—McPherson & Bedford, a display of bedroom furnishings; awarded 80 per cent.

Fifth prize—McCulloch Drug Co., a display of kodaks and candies, 75 per cent. award.

Sixth prize—Johnson Hardware Co., a general display of hardware.

Seventh prize—Star Grocery.

Eighth prize—W. S. Gooden, gents' furnishings.

Ninth prize—S. A. Thompson, clothier.

Tenth prize—Cut Rate American Shoe Store.

JOHN POPKIN,
Of the Johnson Hardware Co., Brandon, Man., Secretary of the Brandon branch of the R.M.A. of Canada.

Canada's Paint Bill for 1919 is Large

Western Provinces Have Been Using Much Paint, Too—Merchants Continue to Manifest Usual Optimism—Linseed Oil Price Fictitious—West Will Yield Fair Crop Flaxseed, Says W. S. Fallis

AFTER an absence of a month in Western Canada, during which time he traversed all the provinces right through to the Pacific Coast, W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Ltd., has returned to headquarters in Montreal. To HARDWARE AND METAL Mr. Fallis stated this week that he had found business excellent and considerably larger than is looked for at this season of the year. July itself, said Mr. Fallis, was a remarkably good month and one of the biggest on record. There had been big increases in the gallonage going forward and all lines are moving freely. An immense volume of business has been passing all through the season, and shipping staffs have been extremely busy. The demand has been heavy for both prepared paints, specialties, and for white lead in oil.

British Columbia Good

Conditions are very good at the Coast and throughout B.C., Mr. Fallis said. While his trip had necessarily been filled with business every day, and at all stages, a little stop was made in the Okanagan fruit district. "The fruit farmers there are very prosperous and are getting big prices for their products. The crops are good this year and the yield of berries has been large and that of apples also is heavy.

"Fruits are commanding higher prices than ever before. Three cents a pound used to be an average price for berries. I learned of one fruit farmer who had disposed of his crop this year at 17c per pound and this man had a yield of thirty tons.

"The apple crop will be a large one and the growers are selling this as it stands, right on the trees, realizing from $2.10 to $2.25 per box for the same," continued Mr. Fallis.

The Coast is a busy place and shipbuilding at both Vancouver and Victoria has been conducted actively. In this respect the absence of strike difficulties has been a welcome change from the earlier conditions obtaining there this year.

Alberta-Saskatchewan

Much has been said regarding the conditions affecting the development of the crop in Alberta. There will not be a big yield in some sections of the "sunny" province, particularly in the south, in that region south of Calgary. Here, drouth has worked some hardship and there can be no improvement, of course, now that the season has developed so far.

From Red Deer north the prospect is better and there will be some fair yields, while from Edmonton toward Saskatoon, in a diagonal line, there will be quite a large yield. This section of Alberta and that north from Edmonton will prove better, perhaps, than other sections in the province.

In Saskatchewan there will, Mr. Fallis says, be a fair crop. Here the yield will vary greatly according to the district. All south of the main railway line is more or less affected by lack of moisture, this belt being tributary to that of Southern Alberta. From the district around Moose Jaw to the Manitoba boundary the conditions are much better and the yield here will be good. Around Saskatoon and north from there, the conditions are fairly good.

Manitoba Is Best

From the standpoint of actual grain yields Manitoba will be the star province of the West this year. It has been estimated from time to time this year that there would be an immense yield there. Of recent weeks there has been some development of rust, but this will not be responsible for a drastic revision of estimates, it is thought. Mr. Fallis believes that the farmers of this province will reap a record crop, notwithstanding any drawbacks there may be.

One of the big yields in Manitoba this year will be that of flax. "I would estimate this to total 3,000,000 bushels," said Mr. Fallis. "This will be a big factor in the general flax situation and the farmers of Manitoba have all been raising a little flax this year. Taking all the production of the Western provinces, this year's yield of flax may even exceed the crop of last year, although the West has produced as much as 17,000,000 bushels in a single season."

Abnormal Flax Prices

The prices asked at present for flax Mr. Fallis considers abnormal and quite decidedly on a high speculative basis. "After seed passed the $3 mark the benefit passed from the farmer to the speculator," said Mr. Fallis.

Asked as to whether prices were likely to lower on seed, Mr. Fallis believed that they would later on. There will be a large yield of flax in India this year, Mr. Fallis stated, and once the crops are harvested and available he believes that prices will be more favorable. It is not clear, just at present what the definite trend of the market will be later. Conditions, as surrounding flax, have been most difficult to define and the heavy speculative feature has been manifest for many weeks, making it decidedly difficult to make plans, excepting from day to day.

A Good Sign

Mr. Fallis believes that the West will take hold of its problems in that progressive and optimistic manner so characteristic of it. The difficulties there will not be few, in some districts, but the business conditions will depend, in large measure, upon the people themselves. With colections good to date, which they have been, Mr. Fallis states, there ought to be progress and reason for a steadying of conditions that will discount the necessity of any undue alarm.

A careful student of Western conditions for many years, and as one who has unbounded faith in its future, Mr. Fallis believes that conditions will prove satisfactory, in the long run, throughout the West.

LITTLE PROSPECT OF DECLINES IN SHEET BUILDING MATERIAL

The last decline effected in architectural sheet metal building materials was in February of the present year. This decline, HARDWARE AND METAL is informed, was made with a view to stimulating building. It was also made to apply to materials which had been bought from the mills at high prices, the manufacturers of the finished product absorbing whatever loss there was through these reductions.

It was pointed out to HARDWARE AND METAL this week by a large Canadian manufacturer that a further readjustment of prices had been under advisement for some time, but these are now unlikely to materialize. As he stated, "We fully intended to make another material decrease in prices during this month, but the increased cost of labor, plus exchange and an unexpected increase in freight rates, both in the United States and Canada, prevented us from taking any step.

"Now we have been advised that a general strike in the sheet steel industry in the United States is imminent, in fact there are already strikes in two mills from which we receive our raw materials; consequently we cannot see any daylight for this last half of the year, and prices will have a tendency to increase, rather than otherwise."

Thus, a condition has been created which was quite unlooked for some time ago. It is apparent that lower prices are not probable under such conditions as those just recited. The market will be a firm one.

The Imrie McFarlane Hardware has opened at Tillsonburg, Ont. The firm will conduct both a wholesale and retail business.

EVENTS IN THE TRADE

New Firms

A. Findlay has opened a hardware store at Chatsworth, Ont.

Business Changes

Cornfield, Sask.—Partnership has been dissolved in the Lutz Hardware Co.

Wroxton, Sask.—M. C. Kremer, hardware, is succeeded by Pawchuk Bros.

Teeswater, Ont.—John McGowan, of Hamilton, Ont., has purchased the hardware business of R. J. Mann.

Incorporations

Morse Oil Company, Limited, capital $1,500,000, head office Toronto, plans to prospect for and manufacture and deal in oil.

J. E. Dennie, Limited, capital $24,000, head office Toronto, plans to manufacture and deal in paper bags, cardboard and paper products.

Scarfe & Company, Limited, capital $500,000, head office Brantford, Ont., plans to manufacture and deal in paints, oils and varnishes.

Handley-Page, Limited, capital $2,500,000, head office Morrisburg, Ont., plans to manufacture and deal in aeroplanes and aviation equipment.

Personals

A. G. Hayes, of the Consolidated Plate Glass Company of Canada, Ltd., Toronto, is in Winnipeg on business.

Robert R. Jamieson has been appointed assistant advertising manager of the Sharples Co., West Chester, Pa.

Robert Pinchin, proprietor of the Ontario Oil and Turpentine Co., Toronto, has returned from a business trip to Cleveland.

C. A. Thomas, manager of the Toronto branch of the Sherwin-Williams Company of Canada, Ltd., is spending his holidays in the Lake Simcoe district.

J. L. Finley has been appointed superintendent of the Imperial Ooil Co., Montreal, to succeed D. M. Allan, jr., who is going to Halifax.

James Sutherland, of Vancouver, B.C., has been placed in charge of a new tinsmithing and plumbing department just started by the Fulton Hardware Company, of Enderby, B.C.

Norman Miller has been appointed manager of the hardware and auto accessory departments in the store of A. Kenneman, Kindersley, Sask., hardware, tinsmithing and electrical work.

James N. Makin has been appointed superintendent of the Australian Division of E. C. Atkins & Company, saw manufacturers of Indianapolis. He will be located at the E. C. Atkins & Co. Branch House, 5 Australasia Chambers, Martin Place, Sydney, N.S.W.

R. J. Mann, who, after being in the hardware business at Teeswater, Ont., for 37 years, has sold out to John McGowan, of the Steel Company of Canada, Hamilton, Ont., will leave shortly for Galveston, Texas, to spend the winter. Mr. McGowan is a former resident of Elora, Ont.

Obituary

The death occurred at his home in Toronto of Samuel Allsopp, tinsmith and roofer.

The death occurred at Vancouver, of Colin Kennedy, manager of the coast branch of the A. R. Williams Machinery Co., Ltd., Toronto. For many years he was with the Warnock Edge Tool Works, of Galt, Ont.

Death came very unexpectedly to J. Halloran, of the plumbing firm of J. & A. Halloran, at his home, 640 Barton St., Hamilton, Ont. He had not been in good health for some time, but on the evening of August 18 retired as usual. He was found dead in bed next morning, death having resulted from an attack of heart weakness.

John R. Folsetter, for many years in the hardware business at Ayr, Ont., died at his home there on Friday last. For the past ten years he was manager of the Ayr branch of the Standard Reliance Mortgage Corporation. He took an active part in public affairs and was a member of the council for 12 years, a Justice of the Peace and chairman of the Patriotic Committee.

Trade Notes

Empire Tractor Co. has been registered at Toronto.

The Beaver Broom Mfg. Co. has been registered at Montreal.

The Abernethy Oil Co., Ltd., of Abernethy, Sask., has been incorporated.

The International Silverware Co. has been registered at Montreal by Charles W. Meakins.

The Orpen Conduit Co., Ltd., of Toronto, is succeeded by the National Conduit Co., Ltd.

The Clarke Delorne Electric Supply Co. has been registered at Montreal by Malcolm S. Clarke and Rosario Delorne.

A winding-up order has been granted for the Clark Pressed Metals, Ltd., of Toronto, and N. L. Martin appointed interim liquidator.

The Sharples Milker Company of West Chester, Pa., has been organized to manufacture and sell a milker made by the firm. L. P. Sharples, former secretary-treasurer of the Sharples Seperator Co., will be president of the new company.

United Motor Service, Inc., have opened an office and service depot at 88 Adelaide street West, Toronto. They represent the service branch of the following firms: Delco Engineering Laboratories of Dayton, Ohio, manufacturers of electric equipment for automobiles; Remy Electric Co., of Anderson, Ind., manufacturers of automobile and tractor electric equipment; Klaxon Warning Signal Co., of Newark, N.J., manufacturers of Klaxon warning signals, also Jaxon Steel Products of Jackson, Mich, manufacturers of automobile rims and rim parts. Mr. C. D. Fairweather is the Toronto branch manager.

Montreal News

Mr. Orsali, of the Imperial Oil Co., Ltd., has returned from his holidays.

Archie Macfarlane, of A. Macfarlane and Co., is away on holidays this week.

S. A. Jones, vice-president of Newton Line Co., Homer, N.Y., was in Montreal last week.

George A. Paine, of the A. J. Reach Co., Philadelphia, Pa., was in Montreal last week.

Ernest Bureau has been covering territory in the Maritime Provinces and returned early this week.

A. W. Poole, of McArthur Irwin, Ltd., paint and color manufacturers, was in Toronto during the week.

Jack H. Meikle, Caverhill-Learmont representative in the Ottawa district, was in Montreal this week.

Mr. Bedell, of the hardware department of the Hudson's Bay Company, Calgary, has been a visitor to Eastern cities, making Montreal one of his points of call last week.

W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Ltd., has returned to Montreal after an extended absence of one month in the West. Mr. Fallis was through to Vancouver and Victoria.

T. H. Jordan, vice-president of A. C. Leslie and Co., Ltd., has returned after spending his vacation at York Beach, Maine.

W. J. Egan, Canadian Trade Commissioner for South Africa, has just returned to Montreal. Mr. Egan finds the trade eager to learn of the trade possibilities with the South African Union, and of which, it is understood, there are many.

Royal Cluxton, manager of the Canada Paint Co., Ltd., has so far recovered as to be about for a few hours each day. Mr. Cluxton will probably spend a few weeks in the South before returning to his desk.

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., Montreal, returned from his holidays this week. Mr. Goodwill reports the Gaspe Coast lumbering industry an active one, and says this is one of the best holiday resorts ever.

St. John, N.B., News

The city was in festive garb this week in honor of all returned soldiers of the province and of the Prince of Wales, who set foot on Canadian soil for the first time at this port. Great crowds came to the city for the occasion, and two days were observed as public holidays in honor of the dual events. The first, "Soldiers' Joy Day," was marked with a lengthy procession, in which many of the local business houses showed enterprise by entering floats; the second was observed with special ceremonies in honor of His Royal Highness. The programme in connection with the latter was finished about noon in the city, and because of that and owing to the many people from outside points among the visitors, the business houses resumed business in the afternoon and kept open in the evening. The local hardware stores were all nicely decorated with flags and bunting and special patriotic designs in honor of the occasion.

Major Percy D. McAvity, of the 26th Battalion, of T. McAvity & Sons, had the honor of presenting to His Royal Highness the King's and regimental colors, which the Prince then presented to the battalion in behalf of the Daughters of the Empire. Major McAvity had command of the color party.

The Maritime Nail Co., Ltd., had two floats entered in the parade, one of which, representing "Canada Welcoming the Prince," won third prize for being especially spectacular. It was beautifully designed and richly decorated. Their second float, showing a trench scene, was also very good.

W. H. Thorne & Co., Ltd., had a float on which was seen a model airplane with the firm's service card showing thirty-three members upon their honor roll, two of whom had made the supreme sacrifice. It was designed by Mr. Gandy and driven by Arthur Woods. The float attracted much favorable comment.

Third prize for the original floats was won by T. McAvity & Sons in a float representing "No. V. F. 889, from Newfoundland to Ireland," a model of the big 'plane which made history. It was trimmed with bunting, flags and rosettes and manned by young men and women in R.A.F. uniform, Jack Edwards as pilot, E. L. Brennan, Arnold Robinson, Misses Emma Rice, Allison and Dorothy Day, with Jack McKay and C. F. Coleman driving.

"My Old New Brunswick Home," was the title of the float entered by James Pender & Co., Ltd., which was much admired. It was a typical home scene in the rural districts. Those taking part in the representation were Edward Howard, L. B. and R. F. Mabee, Robert Carson, Stanley Irvine, and Fred Charlton.

PETERBOROUGH BICYCLE PARADE

The Bicycle Dealers' Association, of Peterborough, Ont., celebrated peace day by a fancy bicycle parade which was a big success. A large number of gaily and tastefully decorated bicycles took part in the parade, also a number of bicycle floats, and a considerable procession of riders on bicycles which were not decorated.

R.M.A. DELEGATES TO NATIONAL INDUSTRIAL CONVENTION

According to an announcement made by J. A. Banfield, president Dominion board of the R.M.A., E. M. Trowern, secretary of the R.M.A. of Ottawa; J. A. Banfield, president of Winnipeg, and E. H. Watson, a prominent wholesale and retail boot and shoe merchant of Montreal, will represent the R.M.A. at the National Industrial convention, which will meet in Ottawa Sept. 15, and will be presided over by the Premier. All organized commercial and labor organizations will be represented.

CRAWFORD GRIFFIN DROWNED

Crawford Griffin, aged 16, son of Wm. J. Griffin, of Hamiota, Manitoba, was drowned at Shoal Lake while in swimming at a Sunday School picnic. His father is well known to the hardware trade throughout Manitoba, and before taking up residence at Hamiota he resided both at Winnipeg and Shoal Lake.

NEW STORE FOR REGINA

A new hardware store is being opened in the city of Regina to be known as "The Capital Hardware and Sporting Goods Company."

The men behind the gun are Don F. Bolster and C. M. Carruthers—both are experienced men. Mr. Bolster has been in the employ of the Marshall Wells Company, of Winnipeg, as a traveler; later he bought out a business in Prelate, Sask., which he recently sold. He has been manager of the Frank Woods Hardware in Regina, and now opens out in the Darke Block, 2121 Eleventh Avenue, in the store recently vacated by the Ontario Wind Engine and Pump Company, who have removed to their new warehouse and office on St. John street. Mr. Carruthers has had several years of experience in the hardware business.

HUGE NEW ROLLING MILLS

According to press reports the new steel rolling mill which is to be erected on the British Forgings site at Ashbridge's Bay by Baldwins, Limited, of Swansea, Wales, is to be known as Baldwins Canadian Steel Corporation, Limited.

A. M. Russell, of Hugh Russell & Sons, Montreal, is to be president of the new company, which is expected to provide employment for 2,300 men within a year.

CATALOGUES and BOOKLETS

JOHN MILLEN & SON, LTD.

Bulletin No. 46, issued by John Millen & Son, Ltd., 321 St. James St., Montreal, lists the lines of automotive equipment handled by the firm. The bulletin is attractively illustrated and copies of it will be sent to any readers of HARDWARE AND METAL upon request.

* * *

MARBLE ARMS AND MFG. CO.

The Marble Arms and Mfg. Co., of Gladstone, Michigan, has gotten out a calendar for 1920. It shows an attractive painting by Philip R. Goodwin, the celebrated painter of sporting scenes, and is lithographed in several colors. The calendar is 27 inches long and 18 inches wide. Readers of HARDWARE AND METAL may secure one free by writing to the Marble Arms & Mfg. Co., Gladstone, Mich. The firm stipulates that the dealer must make the request on one of his own business letterheads as these calendars are not for general distribution.

* * *

F. E. MYERS & BRO.

Three catalogues just issued by F. E. Myers & Bro., of Ashland, Ohio, contain much that is of interest to hardware dealers. Catalogue No. P. P. 20 lists the shallow and deep well power pumps manufactured by the firm and contains full details regarding working heads, pumping jacks, hydro pneumatic pumps, countershafts, power spray pumps, working barrels, and deep-well cylinders. It contains 142 pages. Complete Catalogue No. 54 contains 430 pages, and in it are listed pumps and hay tools. Catalogue No. H. T. 54 lists hay tools and door hangers and contains 122 pages. Each catalogue is profusely and attractively illustrated. Copies of the catalogues will be sent to readers of HARDWARE AND METAL, who are interested, upon request.

Quebec Province Business Good

Colonel Robert Starke, of the wholesale hardware firm of Starke, Seybold, Limited, Montreal, reports business in the Province of Quebec as very satisfactory. This is the present condition and there is splendid promise of its being better. Col. Starke stated to HARDWARE AND METAL.

"Crops are good in the lower district, below Quebec," he stated. "I have been over the territory there and the prospects are good. I also understand that there is a good outlook in the back country, and that there will be some good grain harvested there."

Quebec is, of course, not a grain country, but the hay and root yields, Col. Starke thinks, will be fully up to normal, or, perhaps, better. The prosperity which has been manifest for some time will continue.

With respect to business, Colonel Starke stated that retailers are still buying for their wants, but not too far ahead. One of the satisfactory features is that of the promptness with which bills are paid. There is little to complain of in this respect and collections are good.

"Really, the greatest difficulty is that of getting goods. This continues to be one of the big problems and it does not look as though we will get a great deal of relief on some lines this fall."

This has continued to be one of the big problems of the jobber. He finds that, with many lines ordered, they are either short-shipped or filed for future filling altogether. Little encouragement seems to offer with regard to uninterrupted service in filling trade orders. It would seem the part of wisdom to buy early and avoid disappointment.

Says Trade To Blame if Shortage

HARDWARE AND METAL has frequently called the attention of the trade to the possibility of shortages continuing in various kinds of merchandise. In speaking this week with a large importer of cutlery and tools, ths fact was touched upon. This informant declared that the buyer—meaning the retailer, and in some cases the jobber—hesitated repeatedly in the spring to buy his requirements. He felt that there would be declines and thought he would be the winner if buying was deferred. Perhaps a slight decline did come about on some lines. This importer had, in several instances, gone out then to sell goods and was frequently met with objections prompted by the above excuse, namely, that prices would decline further. Instead of this, when changes again came about, as they did, they were in the nature of advances.

The above applied to the goods in question—cutlery and tools, and some lines of nickeled ware, etc., electrical goods and so on. Such commodities are difficult to procure still, and this will be the case for months to come, as far as HARDWARE AND METAL can learn.

The situation, in a nutshell, is this. The trade would not buy in the spring in any but such small lots as were required for immediate trade needs. The importer therefore placed but limited orders with his principals; the principals with whom he dealt placed their orders accordingly—and these, too, were cut down. This policy continued right down to the mills where the raw materials were obtained and production of steel and other raw, basic materials was cut down. Then came a period of inaction and continued light buying, comparatively speaking, until the trade realized there would be no precipitate decline of price. Buying again developed and demands became greater upon the mills and the manufacturer. There was but one result. Manufacturers, without material, were unable to get from the mills, the stocks here becoming low, and now, before this condition can be righted, delays will continue for some time and supplies are not to be had without more delays.

All the advices that HARDWARE AND METAL can obtain, on most regular lines of hardware and also on many lines that must be considered special, are to the effect that the merchant who orders at once and as he can use, will be the one who will have least complaint to make later. It is the man with the goods who will sell them; there is bound to be a big demand.

PAINT EMPLOYEES HOLD PICNIC

The Winnipeg staffs of the Sherwin-Williams Company of Canada, Ltd., held a successful picnic on Saturday last. This was enjoyed along the Red River and the day was acclaimed one of the best outings yet. W. S. Fallis, the Canadian managing director, of Montreal, was present.

Ensilage Cutters

A. H. Melvill, Cereal, Alta.—Please forward names of manufacturers or distributors of ensilage cutters.

Manufacturers of ensilage cutters in Canada are as follows: Bateman Wilkinson Company, Ltd. Toronto; D. Bell & Sons Co., Ltd., St. George, Ont; The Bruce Agricultural Works, Teeswater, Ont.; J. Fleury's Sons, Aurora, Ont.; Gilson Mfg. Co., Ltd., Guelph, Ont.; Peter Hamilton Co., Ltd., Peterboro, Ont.; The MacDonald Fraser Co., Ltd., Stratford, Ont.; Massey-Harris Co., Ltd., Toronto; Mississippi Iron Works, Almonte, Ont.; The Matthew Moody & Sons Co., Terrebonne, Que.; John Watson Mfg. Co., Ltd, Ayr, Ont.—Ed.

Marble Slabs

R. T. Holman, Ltd., Summerside, P.E.I.—Kindly advise where we can procure marble slabs for counter tops.

We would refer you to the following firms: The Fletcher Mfg. Co., Ltd., Toronto; The Hoidge Marble Co., Ltd., Toronto; The Marble and Tile Co. of Canada, Ltd., Winnipeg; The Vermont Marble Co., Peterboro, Ont., and the Smith Marble & Construction Co., Ltd., Montreal.—Ed.

Branch managers of Beatty Bros., Ltd., Fergus, Ont., in convention. Reading from left to right: Top row: A. S. Walbridge, Montreal Branch; J. M. Thompson, Winnipeg Branch; D. R. Potter, Advertising Manager; N. J. Cabeldu, St. John Branch. Bottom Row—A. K. Freeborn, Vancouver Branch; T. A. Farnell, Ontario Branch; L. P. Winslow, Ontario Branch; M. J. Beatty, General Sales Manager.

THE CLERKS DEPARTMENT

Intelligent Buying is Just as Important as Selling Ability

Many Dealers Find It Difficult to Admit Making an Error of Judgment in Their Selection of Stock and at Inventory Time—Do Not Place Goods Wrongly Bought at Their Real Value

THEODORE H. PRICE, editor of "Commerce and Finance," is reputed to know more about the general underlying conditions that make for success or failure in business than many of the foremost bankers. In the "American Magazine" he discusses the subject at length as follows:

Every business man knows that the possibility of failure is something he must take into his calculations. This does not mean that he expects to fail. It means that he intends not to fail.

Every week brings him his problems. Every year brings an emergency of some sort. And far more often than is realized by people who are not in business there comes some actual crisis which has to be met.

If the famous saying, "Life is just one damned thing after another" was not originated by a business man, it isn't because commercial life does not fit that description.

A Small Percentage

Yet the number of reported failures, compared with the number of men and firms engaged in business, is very small. And there has never been a time in the history of the United States when this percentage was as low as it has been during the past year.

This apparent immunity is largely due to fact that prices have been rising steadily for four years. And it is in a period of declining prices that the real test comes to most financial structures.

The individual man cannot control these outside conditions which, of course, increase the difficulty of carrying on any business whatever. But if a concern is sound within itself, and if it is managed wisely, it can generally weather the storm. Whereas, if it is not sound, if there are radical faults in management, it may fail even when outside conditions are favorable.

Some of the Causes

That being the case, it is certainly worth our while to examine the causes of business weakness and to pick out some of these faults in management. My own experience has been almost entirely with what is called "big businesss"; but the fundamentals are much the same, whether an organization is large or small.

In my observation, a very large proportion of mercantile failures—meaning failures of businesses which have to do with the manufacture and distribution of goods—are due to what a professional accountant once described to me as "hopeful inventories."

Hopeful Inventories

It had been this accountant's business to compile the schedules of bankrupts; and in that shrewd phrase, "hopeful inventories," he put his finger on one of the chief causes which had led to their bankruptcy.

By it he meant that these bankrupt merchants, when they made their annual inventory, had a habit of invoicing their stocks at prices above what was then the market value of the goods. They invoiced at figures which represented the cost, plus the profit which the merchant originally hoped to obtain; not at what was the salable value of the goods at the time the inventory was made.

Is Much Too Common

This habit is not confined to men who actually reach the bankruptcy courts. It is altogether too common among business firms in general. I do not doubt that many a man who reads this article will, if he is honest with himself, admit that he falls into this error. He cannot resist giving his inventory the benefit of every possible doubt. There is too much hopeful addition in it, and too little wise subtraction.

Success in merchandising is almost as much due to intelligent buying as it is to selling ability; and the merchant who makes a mistake and buys an article that isn't readily salable, often finds it very difficult to admit to himself this initial mistake. When he comes to make his inventory he lacks the courage to include in his figures the loss he must face because of that error in judgment.

Become Shopworn

Goods that are kept on hand for a long time often become shopworn. If they are wearing apparel—shoes, millinery, dry goods, men's furnishings—they go out of fashion. And many article deteriorate in quality. When these things happen, the merchant must finally sell the goods at only a fraction of their original cost. In his unwillingness to accept this fraction, and to admit his loss, he shows a lack of moral courage as well as a lack of sound business judgment.

Will Cause Trouble

For instance, a dry goods dealer who buys women's dresses and, failing to dispose of them, carries them over until another season, is laying up trouble for himself if he makes a "hopeful inventory" and lists those dresses at the prices he originally expected to get for them. Because, in order to move them at all, he will have to sell them at a sacrifice.

It requires courage to face this loss and to take it boldly before it becomes too great; for putting off the evil day only makes a bad matter worse. Most women are shrewd shoppers. They know when a stock is up to date. In a small town, especially, they know whether goods have been carried over from one season to the next. They like to go where the stock is fresh. The merchant who makes a hopeful inventory of his old goods may fool himself, but he is not likely to fool his customers.

This lack of moral courage in facing facts leads to a great many failures which are not essentially dishonest, although there is an element of dishonesty in them. For they are caused by a sort of self-deception which often results quite as disastrously as does the deception of one's patrons or one's creditors.

Wrong Bookkeeping

Another frequent cause of failure is bad bookkeeping. I do not mean mathematically incorrect bookkeeping, but bookkeeping that is wrong in principle.

In some of the European countries a very expressive phrase is used in this connection. When a man fails the merchants in those countries say it was because "he didn't keep his books," meaning that he did not estimate correctly his overhead charges—which include many costs that are, in a sense, intangible—and that he also failed to distribute these costs correctly among the various departments of his business.

This distribution, or allocation of costs, is very important. In many establishments one department which is extremely profitable absorbs the losses in others which are unprofitable.

A man needs an analytical mind, and the assistance of a bookkeeper who is analytical, to determine the costs of conducting each department. He should know which one yields a profit, and which ones are conducted at a loss.

Valuable Knowledge

You can readily see how valuable this knowledge would be to the head of a business. Yet it is astonishing how many merchants do not have it. Among older men there are some who pride themselves on being old-fashioned, and who simply deal with the results of their business as a whole. They know they made a certain amount on a year's transactions. But they do not know that the lion's share of the profit came from only a few departments, and that the business might have made a great deal more if they had built up other departments which had yielded only a small profit, instead of maintaining those which had been run at a loss.

This type of merchant unconsciously relies on the profits from some particular article, or some special line, that is well established or is temporarily in demand. But if that particular line becomes unpopular he may find, to his surprise, that the whole business was leaning on a single support. With that support gone, it collapses.

Criminal Methods

From the standpoint of the business accountant or statistician, these two factors—"hopeful inventories" and "bad bookkeeping"—are responsible for most of the mercantile failures which are not the result of what I may frankly call criminal methods.

By criminal methods I mean the deception of creditors, the creation of a false basis of credit by giving out misleading statements which are known to be dishonest by the man who publishes them,

and a desire to defraud one's creditors by taking advantage of the protection of the bankruptcy laws.

Reckless Speculation

Among what I call immoral, or unmoral, practices which often lead to business failure, speculation takes the first place, because all business is to a greater or a less degree speculative.

But a distinction must be drawn between legitimate and illegitimate business speculation—and it is a very fine one. The conscience of the business man himself must be his chief reliance in determining what speculations are legitimate for him and what ones are improper and an injustice to his creditors.

For instance, the dry goods merchant, who must buy his autumnal stock of goods in the spring, is by the very nature of his business compelled to "speculate" upon the demand he is likely to meet when the autumn season shall have arrived.

Would Face Loss

It is impossible for him to know positively whether the crops which promise well in the spring will come to the hoped-for fruition. He is, however, justified in calculating at least upon an average yield. But if, in a moment of unguarded optimism, he should base his purchase upon the expectation of abnormally large crops, and then should find in October that the people in his section were impoverished by a crop failure, the probability is that he would have to face a considerable loss upon at least the seasonal portion of his stock.

His business loss as a result of this "speculation should not, however, be disproportioned to his capital. If his springtime purchases have been made in a spirit of unwarrantable optimism, he is likely to meet disaster. That is why the great wholesale distributors of the country—who sell their goods on credits which sometimes run four or five months from the planting to the harvesting season—watch the crops so closely.

Keep Track of Crops

One of the most interesting organizations I know of, in regard to the progress of the crops, is that which has been developed by the Simmons Hardware Company of St. Louis. In their credit department there is an extensive system of maps on which, from week to week, the condition of the crops in each country, as reported by their traveling salesmen and other correspondents, is indicated by different colored disks. In this way it is possible to tell at a glance whether the agricultural prospects in a certain section are such as to justify the credits customarily given to the merchants of that region.

There is another form of speculation, however, concerning the impropriety of which there is a question. The man who speculates in his own business, with which he is thoroughly acquainted, and of whose risks he is entirely aware, is perhaps justified. In fact, as I have explained, he is obliged to base his advance purchases on his opinion of what the future holds.

But the man who goes outside of his own business to speculate—the hardware dealer who speculates in cotton, the proprietor of a shoe store who speculates in grain, the dry goods dealer who speculates in stocks—loses his credit just as soon as his speculative proclivities become known to the bankers who extend him the financial accommodation upon which he depends to supplement his own capital.

Temptation is Great

Of course the temptation to engage in what may be called outside speculation is at times very great. Every few years there spreads over this country—and over all countries for that matter — a speculative mania, whose contagion it is very hard to resist. The conservative merchant, especially as he grows older and finds himself a little less disposed to work hard in order to keep his regular business up to the standard of his youthful efficiency, is very prone to allow himself to hope that he can increase the income he is so sorely in need of to meet the growing demands of his family by the deal in stocks, or the "flyer" in grain, which the local broker so confidently recommends him to undertake.

Were Far Harder

One of the few sermons which I can recollect dealt with the temptations of middle age, which, the preacher said, despite all that has been written about the temptation of youth, were far harder to resist.
